

Contents

1 Introduction	11	7 Fact Representation & Syntax	57
1.1 Purpose	11	7.1 Fact Representation & Syntax in SSADM ...	57
1.2 What is Being Compared?	11	7.2 Fact Representation & Syntax in GRAPES	59
1.3 Intended Audience	12	7.3 Examples of the SSADM Fact Representation & Syntax	60
1.4 Study Assumptions	12	7.4 Examples of the GRAPES Fact Representation & Syntax	70
1.5 The Task	12	7.5 Comparison of the GRAPES & SSADM Fact Representation & Syntax	77
1.6 The Comparison Study	12		
1.7 Overview of the Case Study	13	8 The Knowledge Collection	
1.8 Summary	13	Process	81
2 Overview of Both Methods	16	8.1 Knowledge Collection in SSADM	81
2.1 Overview of SSADM	16	8.2 Knowledge Collection in GRAPES	83
2.2 Overview of DOMINO/GRAPES	20	8.3 Examples of the SSADM Knowledge Collection Process	85
3 Motivation, Background and Philosophy	28	8.4 Examples of the GRAPES Knowledge Collection Process	91
3.1 SSADM	28	8.5 Comparison of the GRAPES and SSADM Knowledge Collection Processes	96
3.2 GRAPES History and Development	29		
3.3 Comparison	30	9 Transformations	97
4 Methodology Style	31	9.1 Transformations in SSADM	97
4.1 SSADM Style	31	9.2 Transformations in GRAPES	100
4.2 GRAPES Style	32	9.3 Examples of the SSADM Transformations	103
4.3 Comparison of SSADM and GRAPES Styles	34	9.4 Examples of the GRAPES Transformations	109
5 Architecture of the Developed Systems	35	9.5 Comparison of the GRAPES and SSADM Transformations	115
5.1 SSADM Architecture	36		
5.2 GRAPES Processing Architecture	38	10 Conclusions	116
5.3 Examples of the SSADM Architecture in the Hi-Ho Case Study	38	10.1 Answers to Specific Questions	116
5.4 Examples of GRAPES's Processing Architecture in the Hi-Ho Case Study	45	10.2 Opportunities for Harmonization of GRAPES and SSADM	119
5.5 Comparison of the Architecture of End-Products of GRAPES & SSADM	48		
6 Life Cycles	49	Annex 1	
6.1 The SSADM Life Cycle	49	The Hi-Ho Recruitment Case Study	121
6.2 The DOMINO Life Cycle	51	Introduction	122
6.3 Coverage of the SSADM Life Cycle in the Hi-Ho Case Study	55	The current Hi-Ho system	122
6.4 Coverage of the GRAPES Life Cycle in the Hi-Ho Case Study	56	Requirements for the new Hi-Ho system	123
6.5 Comparison of the GRAPES and SSADM Life Cycles	56	Sample forms in use in the current system	124

Annex 2

Hi-Ho SSADM Development	129
Data flow diagrams	130
Logical data model	133
Logical data model-data store	
cross-references	134
Enquiry access paths	136
LDM enhanced with RDA results	139
Results of ELH analysis, 1st pass	140
Further DFD & LDM documentation	147
Entity life histories after 2nd pass	152
ECDs after 2nd pass	159
After specification of deletion strategy	165
Update process models	175
Enquiry process models	188
Function DFD equivalents	192
Function input structures	200
Probable function processing from stage 6 ...	205
Input/output data	211

Annex 3

Hi-Ho GRAPES Development	221
Model of Required System	223
Static structure	224
Communication	226
Behaviour	236
Model hierarchy	249
Reusable units	250
Model of Current Situation	253
Static structure	254
Communication	256
Behaviour	265

Annex 4

Hi-Ho SSADM Development	
Using Super-Events	277

Annex 5

Hi-Ho GRAPES Intermediate Diagrams	305
