

Contents

1 WHY USE JAVA?	1
Introduction	1
What is Java?.....	2
Is this book for you?	2
What you need to run Java	3
How to use this book	3
Conventions.....	4
 2 OBJECT ORIENTATION PRIMER	5
Introduction	5
What are objects?	5
Classes	6
Attributes and behaviour	7
Inheritance	8
Why use inheritance?	8
 3 JAVA APPLET S	10
Introduction	10
Applets and applications.....	10
Why applets are different	11
A simple applet.....	13
Initialising an applet	13
Starting an applet.....	14
Stopping an applet.....	14
Destroying an applet.....	14
Displaying text and graphics	14
Java and HTML.....	15
HTML tags	16
The applet tag	16
Creating an applet.....	17
Controlling the applet size and position	18
Compiling applications.....	21
Command line arguments for applications	21
Command line arguments for applets	21

4 THE JAVA LANGUAGE24

 Introduction.....24

 Applications and applets24

 Features of Java programs.....25

 Names in Java25

 Running a Java application25

 Key elements of a Java program26

 Classes.....26

 New objects27

 Data types.....27

 Arrays.....28

 Methods.....29

 Calling methods30

 Creating a class and an object31

 Instance variables32

 Class variables.....33

 Constants33

 Using instance variables.....33

 Using class variables34

 The keyword *this*.....35

 Arithmetic in Java35

 Assigning number variables35

 Casting36

 Assigning characters, strings and boolean variables36

 Assignment operators37

 Assigning objects39

 Comparison operators39

 Comparing objects40

 Overloaded methods.....40

 Constructors41

 The *finalize* method.....42

5 BRANCHING AND LOOPING.....43

 Introduction.....43

 If...else statements43

 Block statements44

 The conditional operator45

 Switch statements.....45

 Looping46

 While loops.....46

 Do..while loops47

 For loops.....47

 Quitting loops.....48

 Java operators.....49

 Bitwise operators.....49

Logical operators.....	51
Operator precedence.....	52
Using strings in Java.....	53
6 GRAPHICS.....	55
Introduction	55
Graphics basics.....	55
Graphics drawing methods	57
Lines and points.....	57
Rectangles	57
Plain rectangles.....	58
Rounded rectangles	58
3D-effect rectangles.....	59
Polygons	60
Ovals	61
Arcs	62
Colour.....	63
Pre-defined colour	63
Defining colours	64
Changing object colours	64
Text and fonts.....	66
Using images	67
The <i>drawImage</i> method.....	68
The keyword <i>this</i>	69
7 ANIMATION AND MULTITHREADING	70
Introduction	70
Multithreading	70
Creating new threads	71
Pre-emptive scheduling	72
Problems with multiple threads	74
The <i>synchronized</i> keyword.....	75
Using <i>Runnable</i>	76
Thread priorities	76
Animation.....	78
The bouncing ball applet	78
Using threads.....	80
Reducing flicker	83
Overriding methods	83
Overriding <i>update</i>	84
Using double buffering.....	86

8 HANDLING EXCEPTIONS.....	92
Introduction.....	92
What are exceptions?	92
Java exceptions	92
The <i>java.lang.Exception</i> class.....	93
Trying and catching.....	94
Throwing and catching.....	96
Using <i>finally</i>	96
 9 THE JAVA.AWT PACKAGE.....	 97
Introduction.....	97
Event driven programming.....	97
What the AWT does.....	98
The <i>Button</i> component.....	98
The <i>Label</i> component.....	100
The <i>Scrollbar</i> component.....	100
The <i>Checkbox</i> component.....	102
The <i>List</i> component.....	103
The <i>TextField</i> component	104
Entering passwords	105
The <i>TextArea</i> component	105
Controlling layout	106
The <i>FlowLayout</i> class	106
The <i>GridLayout</i> class.....	107
The <i>GridBagLayout</i> class.....	108
The <i>BorderLayout</i> class	110
The <i>CardLayout</i> class	111
Layout methods	112
Using the layout managers	112
 10 HANDLING EVENTS	 116
Introduction.....	116
Mouse events.....	116
The <i>mouseDown</i> and <i>mouseUp</i> events.....	117
Boolean methods.....	118
The line drawing applet.....	118
The scribble applet.....	120
Keyboard events.....	122
The <i>handleEvent</i> method	124
The <i>action</i> method	125
 11 WINDOWS, DIALOGS AND MENUS.....	 128
Introduction.....	128

Creating and displaying windows	128
Adding objects to pages	129
Menus	130
Types of menu items.....	132
Enabling and disabling menu items	134
The <i>Dialog</i> subclass	134
Windows methods	135
12 INPUT AND OUTPUT STREAMS	137
Introduction	137
The <i>java.io</i> package.....	137
The <i>FileInputStream</i> class.....	138
Reading from streams.....	140
The <i>skip</i> and <i>mark</i> methods.....	140
The <i>ByteArrayInputStream</i> class.....	141
The <i>StringBufferInputStream</i> class.....	141
The <i>FilterInputStream</i> class	142
The <i>BufferedInputStream</i> class	142
The <i>DataInputStream</i> class	142
The <i>LineNumberInputStream</i> class	143
The <i>PushbackInputStream</i> class.....	144
The <i>PipedInputStream</i> class.....	144
The <i>SequenceInputStream</i> class	144
The <i>OutputStream</i> class.....	145
The <i>FileOutputStream</i> class	145
Writing to streams	146
The <i>ByteArrayOutputStream</i> class	147
The <i>FilterOutputStream</i> class.....	147
The <i>BufferedOutputStream</i> class	148
The <i>PrintStream</i> class	148
The <i>DataOutputStream</i> class.....	149
The <i>PipedOutputStream</i> class	150
13 MODIFIERS AND PACKAGES	151
Introduction	151
Access control	151
The <i>public</i> access modifier.....	152
The <i>private</i> access modifier.....	152
The <i>package</i> access modifier.....	153
The <i>protected</i> access modifier.....	153
Accessor methods.....	153
The <i>final</i> modifier.....	154
Using packages.....	155
Why use packages?.....	155

Importing packages	157
The <i>java.lang</i> package	158
14 JAVA AND C++	159
Introduction	159
Data types	159
Using strings	160
Command line arguments	160
Exception handling	160
Miscellaneous differences	161
APPENDIX A JAVA PACKAGES	162
Introduction	162
Reserved words	162
Reserved characters	162
Java operators	163
Java data types	163
The Java class library	164
The <i>java.awt</i> package	164
Exception index for <i>java.awt</i>	166
The <i>java.awt.image</i> package	166
Exception index for <i>java.awt.image</i>	166
The <i>java.awt.peer</i> package	167
Exception index for <i>java.awt.peer</i>	167
The <i>java.io</i> package	167
Exception index for <i>java.io</i>	169
The <i>java.lang</i> package	169
Exception index for <i>java.lang</i>	170
The <i>java.util</i> package	171
Exception index for <i>java.util</i>	172
The <i>java.net</i> package	172
Exception index for <i>java.net</i>	173
The <i>java.applet</i> package	173
Exception index for <i>java.applet</i>	173
APPENDIX B CLASS HIERARCHIES	174
Introduction	174
Class hierarchy	174
INDEX	183
