

Contents

The New Computing

A Quantum Jump in Computer Science	1
<i>G. Brassard</i>	
Artificial Life and Real World Computing	15
<i>L. Steels, M. Tokoro</i>	
Recurrent Neural Networks	29
<i>H.T. Siegelmann</i>	
Scalable Computing	46
<i>W.F. McColl</i>	

Parallel and Distributed Systems

Efficient Use of Parallel and Distributed Systems: From Theory	62
to Practice	
<i>B. Monien, R. Diekmann, R. Feldmann, R. Klasing, R. Lüling,</i>	
<i>K. Menzel, Th. Römke, U.-P. Schroeder</i>	
Experimental Validation of Models of Parallel Computation	78
<i>L. Snyder</i>	
Quo Vadetis, Parallel Machine Models?	101
<i>J. Wiedermann</i>	

Algorithm Design

Templates for Linear Algebra Problems	115
<i>Z. Bai, D. Day, J. Demmel, J. Dongarra, M. Gu, A. Ruhe,</i>	
<i>H. van der Vorst</i>	
The ART behind IDEAS	141
<i>Th. Beth, A. Klappenecker, T. Minkwitz, A. Nückel</i>	
Algorithmic Number Theory and Its Relationship to Computational	159
Complexity	
<i>L.M. Adleman</i>	
Edge-Coloring Algorithms	172
<i>S. Nakano, X. Zhou, T. Nishizeki</i>	
Towards a Computational Theory of Genome Rearrangements	184
<i>S. Hannenhalli, P.A. Pevzner</i>	

Algebraic Topology and Distributed Computing – A Primer	203
<i>M. Herlihy, S. Rajsbaum</i>	

Optimization and Search

Differential BDDs	218
<i>A. Anuchutanukul, Z. Manna, T.E. Uribe</i>	
Algorithmic Techniques for Geometric Optimization	234
<i>P.K. Agarwal, M. Sharir</i>	
All the Needles in a Haystack: Can Exhaustive Search	254
Overcome Combinatorial Chaos?	
<i>J. Nievergelt, R. Gasser, F. Mäser, C. Wirth</i>	
Fundamental Limitations on Search Algorithms: Evolutionary	275
Computing in Perspective	
<i>N.J. Radcliffe, P.D. Surry</i>	

Software Technology

Mathematical System Models as a Basis of Software Engineering	292
<i>M. Broy</i>	
Formulations and Formalisms in Software Architecture	307
<i>M. Shaw, D. Garlan</i>	
The Oz Programming Model	324
<i>G. Smolka</i>	
Standard Generalized Markup Language: Mathematical and	344
Philosophical Issues	
<i>D. Wood</i>	

Programming Theory

Avoiding the Undefined by Underspecification	366
<i>D. Gries, F.B. Schneider</i>	
Towards a Theory of Recursive Structures	374
<i>D. Harel</i>	
Chu Spaces and Their Interpretation as Concurrent Objects	392
<i>V. Pratt</i>	
Abstracting Unification: A Key Step in the Design of	406
Logic Program Analyses	
<i>M. Bruynooghe, M. Codish, A. Mulkers</i>	

Verification and Reasoning

Programming Satan's Computer	426
<i>R. Anderson, R. Needham</i>	
Petri Net Models of Distributed Algorithms	441
<i>W. Reisig</i>	
Symmetry and Induction in Model Checking	455
<i>E.M. Clarke, S. Jha</i>	
Alternating Automata and Program Verification	471
<i>M.Y. Vardi</i>	
Reasoning about Actions and Change with Ramification	486
<i>E. Sandewall</i>	

Intelligent Systems

Trends in Active Vision	505
<i>J.-O. Eklundh</i>	
Computational Machine Learning in Theory and Praxis	518
<i>M. Li, P. Vitányi</i>	
Fuzzy Sets as a Tool for Modeling	536
<i>R.R. Yager</i>	
Information Retrieval and Informative Reasoning	549
<i>C.J. van Rijsbergen</i>	
Database Transaction Models	560
<i>G. Vossen</i>	

Multimedia and Hypermedia

Multimedia Authoring Tools: State of the Art and	575
Research Challenges	
<i>D.C.A. Bulterman, L. Hardman</i>	
Computational Models for Distributed Multimedia Applications	592
<i>Th. Käppner, R. Steinmetz</i>	
Hypermedia Systems as Internet Tools	608
<i>H. Maurer</i>	
Biographies of Contributing Authors	625
Author Index	643
