Volume E 10b/Part 1

B.	Synthesis of Fluorinated Compounds	1
1.	By Introduction of Fluorine with Preservation of the Carbon Skeleton	1
1.1.	By Substitution	1
1.1.1.	Of Metals	1
	(M. H. ROCK)	
1.1.1.1.	Group IV Metals (Pb, Sn, Ge, Si)	1
1.1.1.2.	Boron and Thallium (in Organoboron and Organothallium Derivatives)	8
1.1.1.3.	Mercury (in Organomercury Derivatives)	9
1.1.1.4.	Magnesium (in Grignard Reagents)	10
1.1.1.5.	Group I Metals (Li, Na, K)	11
1.1.2.	Of Hydrogen	15
	(M. H. ROCK)	
1.1.2.1.	Alkyl Hydrogens	15
1.1.2.2.	Hydrogens in Sulfides	19
1.1.2.3.	Benzylic Hydrogens	23
1.1.2.4.	Hydrogens α to a Carbonyl Functionality	24
1.1.2.5.	Metal-Assisted Substitution of Hydrogens α to a Carbonyl Functionality (Metal Enolates)	28
1.1.2.6.	Hydrogens in Nonaromatic Heterocyclic Compounds	30
1.1.2.7.	Aryl Hydrogens	32
1.1.2.8.	Heteroaryl Hydrogens	44
1.1.3.	Of Halogens	50
	(M. H. ROCK)	
1.1.3.1.	Synthesis of Fluorinated Alkanes through Halogen Exchange	50
1.1.3.2.	Synthesis of Fluorinated Alkenes through Halogen Exchange	56
1.1.3.3.	Synthesis of Fluorinated Carboxylic Acids, Esters, Amides, Ketones, and Alcohols through Halogen Exchange	57
1.1.3.4.	Synthesis of Fluoroalkyl Aromatics by Exchange of Activated Benzylic Halogens	61
1.1.3.5.	Synthesis of Fluorinated Aromatic Compounds through Halogen Exchange	65
1.1.3.6.	Synthesis of Fluorinated Heterocyclic Compounds through Halogen Exchange	71
1.1.3.7.	Synthesis of Aromatic Trifluoromethoxy Compounds and Aromatic Trifluoromethyl Sulfides through Halogen Exchange	74
1.1.3.8.	Synthesis of Acid Fluorides and Sulfonyl Fluorides	76
1.1.4.	Of Oxygen Substituents Having a C—O Bond	82
	(S. BÖHM)	
1.1.4.1.	Hydroxy Groups	82
1.1.4.1.1.	Fluorination of Alcohols	82
1.1.4.1.1.1.	Sulfur Tetrafluoride	82

1.1.4.1.1.1.1.	Hydroxy Carbonyl Compounds	82
1.1.4.1.1.1.2.	Nitro Alcohols	84
1.1.4.1.1.1.3.	Polyhalo Alcohols	84
1.1.4.1.1.1.4.	Hydroxyamino Acids and Hydroxyamines	86
1.1.4.1.1.1.5.	Simple Alcohols	87
1.1.4.1.1.2.	Diethylaminosulfur Trifluoride (DAST) and Related Reagents	88
1.1.4.1.1.3.	Selenium Tetrafluoride	98
1.1.4.1.1.4.	Yarovenko and Ishikawa Reagents	99
1.1.4.1.1.4.1.	Simple Alcohols	101
1.1.4.1.1.4.2.	α -Hydroxy Carbonyl Compounds	106
1.1.4.1.1.4.3.	Steroids	107
1.1.4.1.1.4.4.	Carbohydrates, Natural Products, and Antibiotics	110
1.1.4.1.1.5.	Fluoro- λ^5 -phosphanes	112
1.1.4.1.1.6.	Hydrogen Fluoride	112
1.1.4.1.1.7.	Hydrogen Fluoride/Pyridine and Hydrogen Fluoride/Amines	113
1.1.4.1.2.	Fluorination of Phenols	114
1.1.4.2.	Esters	119
1.1.4.2.1.	Fluorination of Esters of Inorganic Acids	119
1.1.4.2.1.1.	Metal Fluorides	119
1.1.4.2.1.2.	Tetraalkylammonium Fluorides and Poly(hydrogen fluorides)	123
1.1.4.2.1.2.1.	Aliphatics	123
1.1.4.2.1.2.2.	Carbohydrates	125
1.1.4.2.1.2.3.	Steroids	127
1.1.4.2.1.3.	Hydrogen Fluoride/Alkylamines	127
1.1.4.2.1.4.	Polymer-Supported Fluoride and Acid Fluorides	128
1.1.4.2.1.5.	TASF(Me) and Related Reagents	128
1.1.4.2.1.6.	Other Methods	129
1.1.4.2.2.	Fluorination of Esters of Carboxylic Acids, Lactones, and Related Compounds	130
1.1.4.3.	Ethers	134
1.1.4.3.1.	Fluorination of Open-Chain Ethers	134
1.1.4.3.1.1.	Dialkyl Ethers	134
1.1.4.3.1.2.	Silyl Ethers	134
1.1.4.3.1.2.1.	Fluoro- λ^5 -phosphanes	134
1.1.4.3.1.2.2.	Fluoro- λ^4 -sulfanes	136
1.1.4.3.2.	Cyclic Ethers	137
1.1.4.3.2.1.	Fluorination with Ring Opening of Epoxides	137
1.1.4.3.2.1.1.	Hydrogen Fluoride	137
1.1.4.3.2.1.2.	Boron Trifluoride	140
1.1.4.3.2.1.3.	Potassium or Sodium Hydrogen Fluoride	142
1.1.4.3.2.1.4.	Hydrogen Fluoride/Pyridine	146
1.1.4.3.2.1.5.	Alkylamine Hydrofluorides and Alkylammonium Fluorides	148
1.1.4.3.2.1.6.	Other Reagents	153
1.1.4.3.2.1.7.	Tabular Summary of the Directional Effect of Reagents on the Opening of Unsymmetrical Oxiranes	155
1.1.4.3.2.2.	Fluorination with Ring Opening of Cyclic Ethers with More Than Three Ring Members	155
1.1.5.	Of Oxygen Substituents Having a C=O Bond or Two C—O Bond (Th. SCHMIERER)	159
1.1.5.1.	Introduction of One Fluorine Atom	159
1.1.5.2.	Introduction of Two Fluorine Atoms	160
1.1.5.3.	Introduction of Three Fluorine Atoms	190
1.1.5.4.	Mixed Fluoro Halo Compounds	207

1.1.6.	Of Sulfur Substituents Having a C—S Bond 207 (TH. SCHMIERER)	207
1.1.7.	Of Sulfur Substituents Having a C=S Bond or Two or Three C—S Bonds 212 (TH. SCHMIERER)	212
1.1.7.1.	Introduction of One Fluorine Atom 212	212
1.1.7.2.	Introduction of Two Fluorine Atoms 213	213
1.1.7.3.	Introduction of Three Fluorine Atoms 221	221
1.1.8.	Of Nitrogen Substituents Having a C—N Bond 229 (J. OSÍO BARCINA and S. DE LA MOYA CERERO)	229
1.1.8.1.	Replacement of Nitro Groups in Aromatic Compounds with Fluorine (Fluorodenitration) 229	229
1.1.8.2.	Replacement of Azido Groups with Fluorine in the Nitrosative Decomposition of Aliphatic Azides 235	235
1.1.8.3.	Replacement of Triazo Groups with Fluorine in the Acid Decomposition of Aromatic Triazenes 237	237
1.1.8.4.	Replacement of Diazo Sulfide Groups with Fluorine in the Silver(I) Ion Promoted Acid Decomposition of Aryl Diazo Sulfides 240	240
1.1.8.5.	Replacement of Amino Groups in Aromatic Amines with Fluorine via Diazonium Compounds (Aromatic Fluorodediazonation) 241	241
1.1.8.6.	Replacement of Amino Groups in Aliphatic Amines with Fluorine via Diazonium Compounds (Aliphatic Fluorodediazonation) 254	254
1.1.8.7.	Replacement of Amino Groups in Amines with Fluorine via Quaternary Ammonium Salts 256	256
1.1.8.8.	Fluorination of Enamines with Electrophilic Fluorinating Reagents ... 263	263
1.1.9.	Of Nitrogen Substituents Having a C=N Bond 269 (J. OSÍO BARCINA and S. DE LA MOYA CERERO)	269
1.1.9.1.	Preparation of Fluorinated Compounds from Hydrazones 269	269
1.1.9.2.	Preparation of Fluorinated Compounds from Oximes 277	277
1.1.9.3.	Preparation of Fluorinated Compounds from Diazo Derivatives 281	281
1.1.9.4.	Preparation of Fluorinated Compounds from 2 <i>H</i> -Azirines 287	287
1.1.9.5.	Preparation of Fluorinated Compounds from Imines 289	289
1.1.10.	Of Other Functional Groups 292 (J. OSÍO BARCINA and S. DE LA MOYA CERERO)	292
1.2.	By Addition 308	308
1.2.1.	To Alkenes (Including Dienes) 308 (P. WOLFRUM)	308
1.2.1.1.	Addition of Hydrogen Fluoride 308	308
1.2.1.1.1.	Electrophilic Addition 308	308
1.2.1.1.2.	Nucleophilic Addition 313	313
1.2.1.2.	Addition of Fluorine 315	315
1.2.1.2.1.	Direct Addition of Elemental Fluorine 315	315
1.2.1.2.2.	Indirect Addition of Fluorine 321	321
1.2.1.3.	Addition of Fluorine and a Different Halogen (Halofluorination Reactions) 328	328
1.2.1.3.1.	Addition of Fluorine and Chlorine 329	329
1.2.1.3.2.	Addition of Fluorine and Bromine 333	333
1.2.1.3.3.	Addition of Fluorine and Iodine 341	341
1.2.1.4.	Addition of Fluorine and NO or NO ₂ 346	346
1.2.1.4.1.	Addition of Fluorine and NO 346	346
1.2.1.4.2.	Addition of Fluorine and NO ₂ 347	347
1.2.1.5.	Addition of Fluorine and Alkyl Groups 349	349
1.2.1.6.	Addition of Fluorine and Oxygen 353	353

1.2.1.6.1.	Addition of Fluorine and a Hydroxy Group	353
1.2.1.6.2.	Addition of Fluorine and a Trifluoromethoxy Group with Trifluoromethyl Hypofluorite	355
1.2.1.6.3.	Addition of Fluorine and a Perfluoroalkoxy Group with Perfluoroalkyl Hypofluorites	359
1.2.1.6.4.	Addition of Fluorine and an Alkoxy Group	360
1.2.1.6.5.	Addition of Fluorine and an Acetoxy Group	362
1.2.1.7.	Fluorohydroxyalkylation	363
1.2.1.8.	Fluoroaminomethylation	364
1.2.1.9.	Other Additions	364
1.2.1.9.1.	Fluoroacylation	364
1.2.1.9.2.	Fluoroarylation	365
1.2.1.9.3.	Addition of Fluorine and a Metal	367
1.2.1.9.4.	Addition of Fluorine and Sulfur	368
1.2.2.	To Alkynes	372
	(P. WOLFRUM)	
1.2.2.1.	Addition of Hydrogen Fluoride	372
1.2.2.2.	Addition of Fluorine	374
1.2.2.3.	Addition of Fluorine and a Different Halogen	375
1.2.2.4.	Addition of Fluorine and Nitrogen	376
1.2.2.5.	Addition of Fluorine and Carbon	377
1.2.2.6.	Addition of Fluorine and Oxygen	377
1.2.2.7.	Other Additions	378
1.2.2.7.1.	Addition of Fluorine and Sulfur	378
1.2.2.7.2.	Addition of Fluorine and Selenium	379
1.2.2.7.3.	Addition of Fluorine and a Metal	380
1.2.3.	To Arenes and Heteroarenes	395
	(M. H. ROCK)	
2.	From Other Fluorinated Compounds	402
2.1.	By Bond-Forming Reactions	402
2.1.1.	C—C Bond-Forming Reactions	402
2.1.1.1.	By Substitution Reactions Based on Organo-Fluorine Synthons Containing Group IV and V Elements	402
	(G. G. FURIN)	
2.1.1.1.1.	Use of Organosilicon Synthons	402
2.1.1.1.1.1.	Introduction of Perfluoroalkyl Groups into Organosilicon and Organogermanium Compounds	402
2.1.1.1.1.2.	Perfluoroalkylation of Organic Compounds via Organosilicon Reagents	405
2.1.1.1.1.3.	Perfluorovinylations Reactions Using $F_2C=CFTMS$	419
2.1.1.1.1.4.	Polyfluoroarylation Reactions	424
2.1.1.1.2.	Use of Synthons Based on Phosphorus and Other Group V Elements	429
2.1.1.1.2.1.	Synthesis Using Derivatives of Group V Elements Containing Polyfluorophenyl Groups	429
2.1.1.1.2.2.	Synthesis Using λ^5 -Phosphanes Containing Polyfluoroalkyl Groups ...	430
2.1.1.1.2.3.	Reactions with Tris(diethylamino)phosphane	432
2.1.1.1.2.4.	Use of Other Trivalent Phosphorus Compounds	439
2.1.1.2.	By Condensation Reactions	448
	(J. T. WELCH)	
2.1.1.3.	Via Organometallic Compounds	465
	(D. J. BURTON and P. A. MORKEN)	
2.1.1.3.1.	Perfluoroalkyl Reagents	466

2.1.1.3.1.1.	Lithium and Magnesium Reagents	466
2.1.1.3.1.2.	Zinc, Cadmium, and Mercury Reagents	467
2.1.1.3.1.3.	Copper Reagents	468
2.1.1.3.2.	Fluorovinyl Reagents	469
2.1.1.3.2.1.	Lithium and Magnesium Reagents	469
2.1.1.3.2.2.	Tin Reagents	471
2.1.1.3.2.3.	Zinc, Cadmium, and Mercury Reagents	472
2.1.1.3.2.4.	Copper Reagents	473
2.1.1.3.3.	Fluorinated Allylmetallic and (Perfluorobenzyl)metallic Reagents	474
2.1.1.3.4.	Perfluoroalkynylmetallics	475
2.1.1.3.5.	Perfluoroarylmetallics	476
2.1.1.4.	Linear Addition Reactions to C=C Bonds	481
	(C. WAKSELMAN)	
2.1.1.4.1.	Radical Addition of Perhaloalkanes	481
2.1.1.4.1.1.	Simple Alkenes	481
2.1.1.4.1.2.	Unsaturated Alcohols, Ketones, Acids and Their Derivatives	486
2.1.1.4.1.3.	Haloalkenes	488
2.1.1.4.1.4.	Enol Derivatives	489
2.1.1.4.2.	Radical Addition to Fluorinated Alkenes with Hydrogen Transfer	491
2.1.1.4.2.1.	Alkanes and Haloforms	491
2.1.1.4.2.2.	Alcohols	491
2.1.1.4.2.3.	Ethers	492
2.1.1.4.2.4.	Aldehydes	492
2.1.1.4.3.	Acid-Catalyzed Reactions (Additions to Alkene Double-Bond Systems)	493
2.1.1.5.	Linear Addition Reactions to C≡C Bonds	493
2.1.1.5.1.	Radical Addition of Perhaloalkanes to Various Alkynes	493
2.1.1.5.2.	Radical Addition to Fluorinated Alkynes with Hydrogen Transfer	496
2.1.1.6.	Cycloaddition Reactions	498
2.1.1.6.1.	Of Alkenes, Allenes, Alkynes, and Other Unsaturated Systems	498
	(M. H. ROCK)	
2.1.1.6.1.1.	Formation of Fluorinated Three-Membered Ring Systems	498
2.1.1.6.1.1.1.	Addition of Difluorocarbene to Alkenes	498
2.1.1.6.1.1.2.	Addition of Fluorocarbene to Alkenes	501
2.1.1.6.1.1.3.	Addition of Chlorofluorocarbene to Alkenes	501
2.1.1.6.1.1.4.	Addition of Bromofluorocarbene to Alkenes	503
2.1.1.6.1.1.5.	Addition of Fluoroiodocarbene to Alkenes	504
2.1.1.6.1.1.6.	Addition of Substituted Fluorocarbenes to Alkenes	504
2.1.1.6.1.2.	Formation of Fluorinated Four-Membered Ring Systems	505
2.1.1.6.1.3.	Formation of Fluorinated Five-Membered Ring Systems	513
2.1.1.6.1.4.	Formation of Fluorinated Six-Membered Ring Systems	513
2.1.1.6.2.	Of Fluoroalkyl-Substituted Unsaturated Compounds	520
	(D. BONNET-DELPON)	
2.1.1.6.2.1.	[4 + 2] Cycloadditions; Diels – Alder Reactions	520
2.1.1.6.2.1.1.	[4 + 2] Cycloadditions of Fluoroalkyl-Substituted Alkenes with Dienes	520
2.1.1.6.2.1.2.	[4 + 2] Cycloadditions of Trifluoromethyl-Substituted Alkynes with Dienes	526
2.1.1.6.2.1.3.	[4 + 2] Cycloadditions of Trifluoromethyl-Substituted Dienes with Alkenes	528
2.1.1.6.2.2.	[4 + 2] Cycloadditions Involving Heteroatoms	531
2.1.1.6.2.2.1.	Trifluoromethyl-Substituted Heterodienophiles	531
2.1.1.6.2.2.2.	Trifluoromethyl-Substituted Heterodienes	535
2.1.1.6.2.3.	[3 + 2] Cycloadditions	541

2.1.1.6.2.3.1.	[3 + 2] Cycloadditions of Trifluoromethyl-Substituted Alkenes or Alkynes with Dipoles	541
2.1.1.6.2.3.2.	[3 + 2] Cycloadditions of Alkenes or Alkynes with Trifluoromethyl-Substituted Dipoles	548
2.1.1.6.2.4.	[2 + 2] Cycloadditions	552
2.1.1.6.2.4.1.	[2 + 2] Cycloadditions of Trifluoromethyl-Substituted Alkenes	552
2.1.1.6.2.4.2.	[2 + 2] Cycloadditions of Trifluoroacetaldehyde and Trifluoromethyl Ketones	553
2.1.1.6.2.4.3.	[2 + 2] Cycloadditions of Trifluoromethyl Imines	554
2.1.1.6.2.5.	[2 + 1] Cycloadditions	555
2.1.1.6.2.5.1.	[2 + 1] Cycloadditions of Carbenes to Trifluoromethyl-Substituted Alkenes	555
2.1.1.6.2.5.2.	[2 + 1] Cycloadditions of Carbenes to Trifluoromethyl-Substituted C=O, C=S, and C=N Bonds	555
2.1.1.6.2.5.3.	[2 + 1] Cycloadditions of Trifluoromethyl-Substituted Carbenes to Unsaturated Systems	557
2.1.1.7.	By Dimerization Reactions	563
	(L. R. SUBRAMANIAN and G. SIEGEMUND)	
2.1.1.7.1.	Recombination of Radicals Generated by Pyrolysis	563
2.1.1.7.2.	Dimerization by Intermolecular Elimination of Halogens	563
2.1.1.7.3.	Dimerization by Elimination of Carbon Dioxide by Electrolysis	567
2.1.2.	C–O Bond Formation by Substitution Reactions	570
	(J. PIETRUSZKA)	
2.1.2.1.	Formation of Alcohols and Ethers	570
2.1.2.1.1.	Aliphatic Compounds	570
2.1.2.1.2.	Aromatic Compounds	573
2.1.2.2.	Formation of Acetals and Ketals	578
2.1.2.3.	Formation of Carboxylic Acids and Carboxylic Acid Derivatives	580
2.1.2.3.1.	Aliphatic Compounds	580
2.1.2.3.2.	Aromatic Compounds	583
2.1.2.4.	Formation of Heterocycles	585
2.1.2.4.1.	Three-Membered Rings	585
2.1.2.4.2.	Four-Membered Rings	587
2.1.2.4.3.	Five-Membered Rings	587
2.1.2.4.4.	Six-Membered Rings	591
2.1.2.4.5.	Other Heterocycles	593
2.1.3.	C–S Bond Formation by Substitution and Addition Reactions	606
	(J. STÖLTING)	
2.1.3.1.	By Substitution Reactions	606
2.1.3.1.1.	Organometallic Compounds and Sulfur Derivatives	606
2.1.3.1.2.	Substitution of Hydrogen	607
2.1.3.1.3.	Fluoroalkylations of Sulfur Compounds	607
2.1.3.1.4.	Arylation and Fluoroarylation Reactions	614
2.1.3.1.5.	Acylation Reactions	617
2.1.3.2.	By Addition Reactions	618
2.1.3.2.1.	To C=C Bonds	618
2.1.3.2.2.	To C≡C Bonds	621
2.1.3.3.	By Cycloaddition Reactions	626
2.1.4.	C–N Bond Formation by Substitution and Addition Reactions	630
	(J. STÖLTING)	
2.1.4.1.	By Substitution Reactions	630
2.1.4.1.1.	Substitution of Hydrogen	630
2.1.4.1.2.	Alkylation Reactions	632

2.1.4.1.3.	Arylation Reactions	639
2.1.4.1.4.	Acylation Reactions	642
2.1.4.1.5.	Ring Opening of Epoxides	644
2.1.4.2.	By Addition Reactions	645
2.1.4.2.1.	To C=C Bonds	645
2.1.4.2.2.	To C≡C Bonds	647
2.1.4.3.	Cycloaddition Reactions	650
2.1.5.	C–P Bond Formation by Substitution and Addition Reactions	656
	(J. STÖLTING)	
2.1.5.1.	By Substitution Reactions	656
2.1.5.1.1.	Organometallic Compounds and Phosphorus Derivatives	656
2.1.5.1.2.	Friedel–Crafts Arylation with Phosphorus Chlorides	662
2.1.5.1.3.	Diorgano-Substituted Phosphanes and Their Oxides and Trifluoroacetyl-Containing Compounds	662
2.1.5.1.4.	Vinyl Halogen Atoms in Perhalogenated Alkenes and Phosphanes ...	664
2.1.5.1.5.	Formation of Fluorinated Phosphorus Compounds by Other Nucleophilic Substitution Reactions	666
2.1.5.1.6.	Formation of Fluorinated Phosphonium Salts	669
2.1.5.1.7.	Formation of Fluorinated Phosphorus Compounds by the Michaelis–Becker Reaction	671
2.1.5.1.8.	Formation of Fluorinated Phosphorus Compounds by the Michaelis–Arbuzov Reaction	671
2.1.5.2.	By Addition Reactions	676
2.1.5.2.1.	To C=C Bonds	676
2.1.5.2.2.	To C=O Bonds	681
2.1.5.2.3.	To C=N Bonds	684
2.1.5.2.4.	To C≡C Bonds	685
2.1.5.2.5.	Cycloaddition Reactions	687
2.2.	By Cleavage Reactions	691
	(N. LUI and J. FISCHER-LUI)	
2.2.1.	By Cleavage of C–C Bonds	691
2.2.1.1.	Oxidative Cleavage	691
2.2.1.1.1.	Oxidation of Fluoroalkenes by Potassium Permanganate	691
2.2.1.1.2.	Other Oxidizing Agents	697
2.2.1.2.	Decarboxylation of Fluorinated Compounds	699
2.2.1.3.	Decarbonylation of Fluorinated Compounds	706
2.2.1.4.	Thermal Cleavage of C–C Bonds	708
2.2.1.5.	Photolysis of C–C Bonds	711
2.2.1.6.	Cleavage of C–C Bonds by Alkali	712
2.2.2.	Preparation of Fluorinated Compounds by Cleavage of Heteroatom–Carbon and Heteroatom–Heteroatom Bonds	713
2.2.2.1.	Decarboxylation of Fluoroformates	713
2.2.2.2.	Cleavage of C–N, N–N, and N–O Bonds	715
