

Table of Contents

I	Invited Lectures	1
	A Decade of TAPSOFT: Aspects of Progress and Prospects in Theory and Practice of Software Development	3
	<i>H. Ehrig, B. Mahr</i>	
	Theory and Practice of Software Development – Stages in a Debate . . .	25
	<i>C. Floyd</i>	
	Rational Spaces and Set Constraints	42
	<i>D. Kozen</i>	
	Formal Methods and Social Context in Software Development	62
	<i>J.A. Goguen, Luqi</i>	
	Testing Can Be Formal, Too	82
	<i>M.-C. Gaudel</i>	
	Anatomy of the Pentium Bug	97
	<i>V. Pratt</i>	
	Rational Mechanics and Natural Mathematics	108
	<i>V. Pratt</i>	
II	CAAP	123
	CAAP-1: Trees & Automata	
	First-Order Logic on Finite Trees	125
	<i>A. Potthoff</i>	
	Decidability of Equivalence for Deterministic Synchronized Tree Automata	140
	<i>K. Salomaa</i>	
	The Equivalence Problem for Letter-to-Letter Bottom-up Tree Transducers is Solvable	155
	<i>Y. André, F. Bossut</i>	
	CAAP-2: Concurrency I	
	π I: A Symmetric Calculus based on Internal Mobility	172
	<i>D. Sangiorgi</i>	
	Complete Inference Systems for Weak Bisimulation Equivalences in the π -Calculus	187
	<i>H. Lin</i>	

Reasoning about Higher-Order Processes	202
<i>R.M. Amadio, M. Dam</i>	
Confluence of Processes and Systems of Objects	217
<i>X. Liu, D. Walker</i>	
CAAP-3: Logic & Specification	
An Algebraic Approach to Temporal Logic	232
<i>B. von Karger</i>	
On Behavioural Abstraction and Behavioural Satisfaction in Higher-Order Logic	247
<i>M. Hofmann, D. Sannella</i>	
Assumption/Guarantee Specifications in Linear-Time Temporal Logic (Extended Abstract)	262
<i>B. Jonsson, Y.-K. Tsay</i>	
CAAP-4: Formal Languages	
Fine Hierarchy of Regular ω -Languages	277
<i>V. Selivanov</i>	
Computing the Wadge Degree, the Lifschitz Degree, and the Rabin Index of a Regular Language of Infinite Words in Polynomial Time	288
<i>T. Wilke, H. Yoo</i>	
Semi-Trace Morphisms and Rational Transductions	303
<i>P.-A. Wacrenier</i>	
Nonfinite Axiomatizability of Shuffle Inequalities	318
<i>S.L. Bloom, Z. Ésik</i>	
CAAP-5: Concurrency II	
On the Category of Petri Net Computations	334
<i>V. Sassone</i>	
High Undecidability of Weak Bisimilarity for Petri Nets	349
<i>P. Jančar</i>	
Polynomial Algorithms for the Synthesis of Bounded Nets	364
<i>E. Badouel, L. Bernardinello, Ph. Darondeau</i>	
CAAP-6: Rewriting Systems	
Semi-Completeness of Hierarchical and Super-Hierarchical Combinations of Term Rewriting Systems	379
<i>M.R.K. Krishna Rao</i>	
Lazy Narrowing: Strong Completeness and Eager Variable Elimination (Extended Abstract)	394
<i>S. Okui, A. Middeldorp, T. Ida</i>	

On the Expressive Power of Algebraic Graph Grammars with Application Conditions	409
<i>A. Wagner</i>	

CAAP-7: Semantics

Generated Models and the ω -Rule: The Nondeterministic Case	424
<i>M. Walicki, S. Meldal</i>	
CPO Models for a Class of GSOS Languages	439
<i>L. Aceto, A. Ingólfssdóttir</i>	
Statecharts, Transition Structures and Transformations	454
<i>A. Peron</i>	

III FASE 469

FASE-1: Types

An Imperative Object Calculus	471
<i>M. Abadi, L. Cardelli</i>	
A Refinement of Import/Export Declarations in Modular Logic Programming and Its Semantics	486
<i>I. Karali, C. Halatsis</i>	
Strictness and Totality Analysis with Conjunction	501
<i>K.L. Solberg</i>	

FASE-2: Tools

Generic Techniques for Source-Level Debugging and Dynamic Program Slicing	516
<i>F. Tip</i>	
Reasoning with Executable Specifications	531
<i>Y. Bertot, R. Fraer</i>	
Calculating Software Generators from Solution Specifications	546
<i>R.B. Kieburtz, F. Bellegarde, J. Bell, J. Hook, J. Lewis, D. Oliva, T. Sheard, L. Walton, T. Zhou</i>	

FASE-3: Static Analysis

Comparing Flow-Based Binding-Time Analyses	561
<i>J. Palsberg</i>	
Can you Trust your Data?	575
<i>P. Ørbæk</i>	
Static and Dynamic Processor Allocation for Higher-Order Concurrent Languages	590
<i>H.R. Nielson, F. Nielson</i>	

FASE-4: Case Studies

Mechanized Inductive Proof of Properties of a Simple Code Optimizer . . .	605
<i>A. Geser</i>	

Describing a Signal Analyzer in the Process Algebra PMC – A Case Study	620
<i>H.R. Andersen, M. Mendler</i>	

A Gentle Introduction to Specification Engineering Using a Case Study in Telecommunications	636
<i>S. Kleuker</i>	

FASE-5: Transformations

Precise Interprocedural Dataflow Analysis with Applications to Constant Propagation	651
<i>M. Sagiv, T. Reps, S. Horwitz</i>	

Formal Specification and Prototyping of a Program Specializer	666
<i>S. Blazy, Ph. Facon</i>	

Proving the Correctness of Recursion-Based Automatic Program Transformations	681
<i>D. Sands</i>	

FASE-6: Concurrency

Reactive System Specification and Refinement	696
<i>K. Lano</i>	

Measuring Concurrency of Regular Distributed Computations	711
<i>C. Bareau, B. Caillaud, C. Jard, R. Thoraval</i>	

Non-Speculative and Upward Invocation of Continuations in a Parallel Language	726
<i>L. Moreau</i>	

FASE-7: Specifications

A Model Inference System for Generic Specification with Application to Code Sharing	741
<i>D. Bert, C. Oriat</i>	

Relations as Abstract Datatypes: An Institution to Specify Relations Between Algebras	756
<i>H. Baumeister</i>	

Performance-Oriented Formal Specifications – the LotoTis Approach . . .	772
<i>I. Schieferdecker</i>	

IV TOOLS

787

TOOLS-1

SIGNAL: A Formal Design Environment for Real-Time Systems 789
EP-ATR Project

The META-Frame: An Environment for Flexible Tool Management . . . 791
B. Steffen, T. Margaria, A. Claßen

STeP: The Stanford Temporal Prover 793
*Z. Manna, N. Bjørner, A. Browne, E. Chang, M. Colón, L. de Alfaro,
H. Devarajan, A. Kapur, J. Lee, H. Sipma, T. Uribe*

The HOL-UNITY Verification System 795
F. Andersen, U. Binau, K. Nyblad, K.D. Petersen, J.S. Pettersson

PLATO: A Tool to Assist Programming as Term Rewriting
and Theorem Proving 797
*A.J. Sampaio, A.M. Haeberer, C.T. Prates, C.D. Ururahy,
M.F. Frias, N.C. Albuquerque*

TOOLS-2

LOFT: A Tool for Assisting Selection of Test Data Sets
from Algebraic Specifications 799
B. Marre

The SMoLCS ToolSet 801
E. Astesiano, G. Reggio, F. Morando

The ASF+SDF Meta-Environment: Documentation Tools for Free! 803
M.G.J. van den Brand, E. Visser

The B-Toolkit Demonstration 805
B-Core (UK) Ltd.

TOOLS-3

Object Oriented Semantics Directed Compiler Generation:
A Prototype 807
L.C.C. Guedes, E.H. Haeusler, J.L. Rangel

Author Index 809
