SECTION A Theoretical Discussion

A0.0 Introduction

A1.0 Mathematical relations

A1.1 Simplicial complexes

A1.2 A geometrical representation

A1.3 Chains of q -connection in K

A1.4 Q -Analysis

A1.5 An algorithm for Q -Analysis

A1.6 Q -space and the structure vector

A1.7 Patterns on a complex

A1.8 Dynamics on a static backcloth structure $S(N)$

A2.0 Exterior algebra

A2.1 An algebraic representation of K

A2.2 Patterns as polynomials in ΛV

A2.3 The face operator f

A2.4 The coface operator Δ

A2.5 The role of the obstruction vector \hat{Q}

A2.6 Incremental changes $\delta\pi$ in a pattern π

A2.7 Extending the exterior algebra ΛV to $Ex(V)$

A3.0 A concept of nearness

A3.1 A form of discrete pseudo-homotopy

A3.2 Face-saving maps

A3.3 Loops in a complex

A3.4 Co-loops

A3.5 The shomotopy group structure $\{S_q, *\}$

A3.6 Holes, objects and co-objects

A References
