

Table of Contents

- 1. Introduction and Background 1
 - 1.1 History of Diode-Laser Array Development 1
 - 1.2 Nonsemiconductor Laser Arrays 11
 - 1.3 Contributing Factors to Developing Monolithic Diode-Laser Arrays 12
 - 1.3.1 Key Technological Advances 13
 - 1.3.2 Performance Limitations of Single-Element Diode Lasers 14
 - 1.3.3 Distinction Between Coherent and Incoherent Diode-Laser Arrays 15
 - 1.3.4 Applications for Diode-Laser Arrays 18
 - 1.4 Design Concepts for Coherent Diode-Laser Arrays 19
 - 1.4.1 Laterally Coupled Diode-Laser Array Concepts 21
 - 1.4.2 Longitudinally Coupled Diode-Laser Array Concepts .. 26
 - 1.4.3 Output Coupling Mechanisms 29
- 2. Fundamentals of High-Power Operation 31
 - 2.1 Threshold Characteristics 31
 - 2.2 Current-Gain Properties 37
 - 2.3 Optimizing Operation Above-Threshold 41
 - 2.3.1 Differential Quantum Efficiency 41
 - 2.3.2 Conversion Efficiency 44
 - 2.3.3 Maximizing Conversion Efficiency 46
 - 2.3.4 Nonlinear Gain Saturation and Conversion Efficiency . 49
 - 2.3.5 Maximizing Power-Extraction Efficiency 53
 - 2.3.6 Efficiency and Power-Current Characteristics: Nonlinear Calculation 55
 - 2.4 Scaling Properties of Semiconductor and Non-Semiconductor Lasers 58
 - 2.5 Scaling Limitations on Power Performance of Diode Lasers .. 63
 - 2.6 Effect of Carriers on Optical Properties 66
 - 2.7 Linewidth Broadening Factor 70
 - 2.8 Thermal Effects in High-Power Arrays 72
 - 2.8.1 Effect of Heating on Diode-Laser Characteristics 72

2.8.2	Heat Dissipation in Diode-Laser Arrays	74
2.8.3	Thermal Management and Performance Limitations ..	79
3.	Spatial and Spectral Mode Discrimination	83
3.1	Spatial Modes of Planar Semiconductor Waveguides	83
3.1.1	Index Guiding	88
3.1.2	Gain Guiding	89
3.1.3	Mixed Guiding	90
3.1.4	Parabolic Dielectric-Profile Waveguide Model	91
3.2	Lateral-Mode Discrimination and Modal Gain	94
3.3	Single-Frequency Operation	99
3.3.1	Number of Modes in Diode-Laser Arrays	100
3.3.2	Spontaneous-Emission Factor	103
3.3.3	Longitudinal Mode Structure	108
3.3.4	Spectral Linewidth	111
3.4	Frequency-Locking of Diode-Laser Oscillators	114
3.4.1	Frequency Locking of Independent Laser Oscillators ..	115
3.4.2	Influence of Nonuniformities on Frequency Locking ...	121
4.	Theoretical Models for Monolithic Diode-Laser Arrays ...	125
4.1	Multi-Layer Waveguide Structures	125
4.2	Analysis of Diode-Laser Waveguide Structures	127
4.2.1	Effective-Index Method	128
4.2.2	Coupled-Mode Approximation	131
4.2.3	Bloch-Function Analysis of Laser Arrays	138
4.2.4	Two-Dimensional Waveguide Model of Laser Arrays ..	146
4.3	Self-Consistent Models	150
4.3.1	Electric-Field Propagation Model	151
4.3.2	Carrier-Transport Model	152
4.3.3	Thermal Model	154
4.3.4	Outline of Self-Consistent Numerical Procedure	156
4.3.5	Instability of Spatial Modes	157
4.4	Optical Coherence Theory	164
4.4.1	Mutual Coherence	164
4.4.2	Cross-Power Spectrum	165
4.4.3	Propagation of the Cross-Power Spectrum	166
4.4.4	Far-Field Mutual Coherence	168
4.4.5	Cross-Spectral Purity	169
5.	Gain-Guided Diode-Laser Oscillators	171
5.1	Multiple-Stripe Gain-Guided Laser Array Structures	172
5.2	Gain-Tailored Structures	178
5.3	Unstable-Resonator Diode Lasers	183
5.3.1	Geometric Optics Analysis of Unstable Resonators	185

5.3.2	Unstable-Resonator Diode Lasers with Self-Collimated Output Beams	186
5.3.3	Half-Symmetric Unstable-Resonator Diode Lasers	187
5.3.4	Tapered-Cavity Diode Lasers	192
6.	Index-Guided Diode-Laser Array Oscillators	197
6.1	Channeled-Substrate Planar Laser Arrays	197
6.2	Ridge-Guided Laser Arrays	203
6.3	Leaky-Wave-Coupled Arrays	208
6.3.1	Resonant Optical-Wave Coupling Model	209
6.3.2	Transverse and Lateral Structures of Antiguided Arrays	216
6.3.3	Basic Modal Characteristics of Antiguided Laser Arrays	216
6.3.4	Rigorous Modeling of Structural Tolerances for Antiguided Laser Arrays	222
6.3.5	Above-Threshold Mode Stability of an Antiguided Array	224
7.	Surface-Emitting Diode-Laser Arrays	233
7.1	Fundamentals of GSE Diode-Laser Arrays	233
7.1.1	Grating Feedback and Output-Coupling Elements	234
7.1.2	Principles of GSE Laser Array Design and Operation .	239
7.2	Mode Discrimination Properties of GSE Laser Arrays	250
7.2.1	Boundary-Element Model of Grating-Coupled Waveguides	250
7.2.2	Coupled-Wave Model of GSE Laser Arrays	254
7.2.3	Network Models of GSE Laser Arrays	266
7.2.4	Network Analysis of Ring-Configured GSE Laser Array	272
7.3	Vertical-Cavity Surface-Emitting Laser Arrays	276
7.3.1	Scaling of Two-Dimensional VCSEL Arrays	277
7.3.2	Modal Properties of Two-Dimensional VCSEL Arrays	279
8.	Master-Oscillator Power-Amplifier Diode Lasers	285
8.1	Edge-Emitting MOPAs	286
8.1.1	Semiconductor-Diode Amplifier Arrays	288
8.1.2	Discrete Broad-Area MOPAs	289
8.1.3	Monolithic Edge-Emitting MOPAs	293
8.1.4	Tapered MOPAs	299
8.2	Grating-Coupled Surface-Emitting MOPAs	310
8.2.1	Cascaded Grating-Coupled Surface-Emitting MOPAs .	311
8.2.2	Active Grating-Coupled MOPAs: Operating Principles	317

XII Table of Contents

8.2.3 Active Grating-Coupled MOPAs: Performance Characteristics	330
