

Contents

Response Characteristics of K^+ , Ca^{++} - and Other Liquid Membrane Electrodes. W.E. MORF, M. OEHME, and W. SIMON. With 2 Figures ...	1
Serum Ca^{++} -Activity and Complexation. K. PASCHEN. With 1 Figure .	6
Summary of the Discussion. G. SIEGEL (Chairman) and H. APFEL	10
Calcium Activation of Vascular Contractile Proteins. U. MRWA and J.C. RÜEGG. With 3 Figures	12
Calcium Compartments in Vascular Smooth Muscle: Electron Probe Analysis. A.P. SOMLYO, A.V. SOMLYO, H. SHUMAN, and R.E. GARFIELD. With 1 Figure	17
Differentiation of Calcium Activation Systems in Vascular Smooth Muscle. K. GOLENHOFEN and A.H. WESTON. With 2 Figures	21
La^{+++} and Excitation Contraction Coupling in Vascular Smooth Muscle. C. van BREEMEN and R. DETH. With 2 Figures	26
Summary of the Discussion. G. SIEGEL (Chairman) and H. APFEL	31
Calcium and Regulation of Cyclic Nucleotides in Rat Aorta. J.-C. STOCLET, T. MICHON, J.-M. SCHEFTEL, and F. DEMESY-WAELDELE. With 2 Figures	34
Calcium and the Regulation of Adenosine 3',5'-Monophosphate by Neurotransmitters. J. SCHULTZ. With 1 Figure	39
Summary of the Discussion. A.P. SOMLYO (Chairman) and C. INFANTES	42
Reaction of Capillary Flow to Electrical Stimulation of the Capillary Wall and to Application of Different Ions. D.W. LÜBBERS, G. HAUCK, and H. WEIGELT. With 1 Figure	44
Membrane Basis of Vascular Regulation. G. SIEGEL, G. NIESERT, R. EHEHALT, and O. BERTSCHE. With 2 Figures	48
Noradrenaline and pH-Effects at the Membrane of Vascular Smooth Muscle. U. PEIPER and R. LAVEN. With 2 Figures	56
Vascular Effects of Potassium in Physiologic Concentration Range. H. NGUYEN-DUONG, K. BRECHT, and G. GEBERT. With 2 Figures	61

Summary of the Discussion. W.R. KEATINGE (Chairman) and U. SCHINDLER	64
Calcium in the Vascular Smooth Muscle Cell. W.R. KEATINGE. With 1 Figure	67
Spontaneous Actions of Small Pial Vessels and the Response to Transmural Electrical Stimulation. H. BRANDT and H.G. ENZENROSS. With 2 Figures	71
Ionic Interaction in Pial Vascular Smooth Muscles. E. BETZ. With 1 Figure	75
Measurements of Pial Perivascular Ion Activities by Means of Ion Sensitive Microelectrodes. D. HEUSER. With 2 Figures	78
The Effects of Serotonin and Noradrenaline on the Pial Arteries. M. CSORNAI. With 2 Figures	83
Interactions of Norepinephrine with H^+ and K^+ at Pial Arteries of Cats. W. KUSCHINSKY and M. WAHL. With 2 Figures	87
Summary of the Discussion. J. ASTRUP (Chairman) and G. KARLITZKY	90
The Action of K^+ at the Cerebral Vessels. I.R. CAMERON, J. CARONNA, R. MILLER, and R.A.F. LINTON	92
K^+ Accumulation as a Pathological Stimulus for Dilatation or Contraction of Cerebral Vessels. M. BALDY-MOULINIER and Ch. NEGRE. With 1 Figure	97
H^+ , CO_2 , Prostaglandins and Cerebrovascular Smooth Muscle. J.D. PICKARD, F.A. SIMEONE, and P. VINALL	101
Correlation of Changes in Blood Flow and Acid-Base Changes in the Brain during Induced Epileptic Seizures. B. NILSSON, B. MELDRUM, K. NORBERG, and B.K. SIESJÖ. With 2 Figures	105
Evidence against H^+ and K^+ as the Main Factors in the Regulation of Cerebral Blood Flow during Epileptic Discharges, Acute Hypoxemia, Amphetamine Intoxication, and Hypoglycemia. A Microelectrode Study. J. ASTRUP, D. HEUSER, N.A. LASSEN, B. NILSSON, K. NORBERG, and B.K. SIESJÖ. With 2 Figures	110
Summary of the Discussion. R.M. BERNE (Chairman) and D. HEUSER ..	115
Interactions of H Ions, Ca-Antagonistic Drugs and Cardiac Glycosides with Excitation-Contraction Coupling of Vascular Smooth Muscle. A. FLECKENSTEIN, K. NAKAYAMA, G. FLECKENSTEIN-GRÜN, and Y.K. BYON. With 2 Figures	117
Effect of Phosphodiesterase-Inhibition on Smooth Muscle Tone. W.R. KUKOVETZ, G. PÖCH, A. WURM, S. HOLZMANN, and E. PAIETTA. With 3 Figures	124

The Effect of Bencyclane on the K^+ - and Ca^{++} - Induced Pial Arterial Constriction. P. SCHANZENBÄCHER. With 2 Figures	132
Effect of Adenosine on Contraction of Vascular Smooth Muscle. R.M. BERNE, J.T. HERLIHY, J. SCHRADER, and R. RUBIO. With 2 Figures	137
Influence of pH on Adenosine-Induced Dilatations of Pial Arteries. M. WAHL and W. KUSCHINSKY. With 2 Figures	141
Effect of Sodium Nitroprusside, Temperature, and Calcium Withdrawal on the Relaxation Speed of Vascular Smooth Muscle. V.A.W. KREYE and J.B. LÜTH. With 2 Figures	145
Summary of the Discussion. C. van BREEMEN (Chairman) and A. LINKE	149
Conclusion	153
Subject Index	155
