I	Introduction	1
1	Introduction	3
1.1	Algorithmic Approach	3
1.2	Organization and Results	5
2	Basic Concepts and Notation	9
2.1	Computational Complexity and NP-Hardness	9
2.2	Parameterized Complexity and Multivariate Algorithmics	10
2.2.1	Multivariate Algorithmics	11
2.3	Parameter Identification	12
2.4	Kernelization	13
2.5	Depth-Bounded Search Trees	14
2.6	Basic Graph Notation	15
II	Fitting Biological Data with Combinatorial Structures	17
3	Introduction to Part II	19
3.1	The Considered Problems	19
3.2	Summary of Results	22
3.3	Edge Modification Problems	24
3.3.1	Basic Notation for Edge Modification Problems	25
3.4	Universal Data Reduction Rules and Structural Observations	26
4	Cluster Editing and Cluster Deletion	33
4.1	Introduction	33
4.1.1	Previous Work	33
4.1.2	Related Problems	35
4.1.3	Our Results	36
4.2	Cluster Vertex Deletion Number as Parameter	37
4.2.1	Cluster Editing	38
4.2.2	Cluster Deletion	43
4.3	Further Alternative Parameterizations	50

4.4	Conclusion	51
5	Clustering With Overlaps	53
5.1	Introduction	53
5.2	Recognition and Forbidden Subgraph Characterization	56
5.3	A Complexity Dichotomy with Respect to the Overlap Number s	58
5.4	Parameterized Complexity	62
5.5	Two Kernelization Results for Edge Deletion	67
5.5.1	An $O(k^4)$ -Vertex Kernel for 1-Edge-Overlap Deletion	67
5.5.2	An $O(k^3)$ -Vertex Kernel for 2-Vertex-Overlap Deletion	71
5.6	Conclusion	78
6	Hierarchical Tree Clustering	81
6.1	Introduction	81
6.2	Preliminaries	85
6.3	A Decomposition Property and Two Search Tree Strategies	85
6.4	Two Kernelization Results	90
6.4.1	An $O(k^2)$ -Element Problem Kernel	90
6.4.2	An $O(M \cdot k)$ -Element Problem Kernel	92
6.5	Experimental Results	100
6.5.1	Implementation Aspects	100
6.5.2	Experiments with Synthetic Data	101
6.5.3	Experiments with Protein Similarity Data	103
6.5.4	Conclusions and Recommendations	105
6.6	Conclusion	105
7	Minimum Flip Consensus Tree	107
7.1	Introduction	107
7.2	Preliminaries	110
7.3	A Decomposition Property	112
7.4	Data Reduction Rules	114
7.5	Analysis of the Problem Kernel Size	120
7.6	An $O(3.68^k)$ -Size Search Tree	123
7.7	Conclusion	129
III	Constrained Search Problems	131
8	Interval Constrained Coloring	133
8.1	Introduction	133
8.2	Parameterization and the Deconstruction of NP-Hardness	135
8.3	A Simple Normal Form Observation	138
8.4	Single Parameters	139
8.5	Combined Parameters	147
8.6	Implementations and Experiments	151
8.7	Conclusion	155

9 Parsimony Haplotyping	157
9.1 Introduction	157
9.2 Improved Fixed-Parameter Algorithms	160
9.2.1 Haplotype Inference by Parsimony	160
9.2.2 Constrained Haplotype Inference by Parsimony	163
9.3 Problem Kernelization for Haplotype Inference by Parsimony	164
9.4 Further Results and Conclusions	165
 IV Conclusion	 167
10 Conclusion	169
