

Contents

1 Introduction

U. Hartmann	1
1.1 Recent Trends in Magnetic Thin Film and Multilayer Research	1
1.2 Progress in High-Resolution Imaging	3
1.3 Present and Future Applications of Magnetic Multilayers and Related Devices	7
1.4 Survey of This Book	10
References	12

2 Progress in Magneto-optical Data Storage

K. Röll	13
2.1 Magnetic and Optical Recording	13
2.2 Magneto-optical Recording	16
2.2.1 Basic Material Properties	17
2.2.2 Materials for Green and Blue Laser Radiation	21
2.2.3 Production of Magneto-optical Disks	22
2.3 Application of Exchange-Coupled Double Layers	25
2.3.1 DOW Using ECDLs	25
2.3.2 Magnetic Reversal Processes in ECDLs	28
2.3.3 Application of the Switching-Field Diagram	31
2.3.4 Simulation of DOW	35
2.3.5 Layer Systems for DOW	36
2.3.6 Magnetically Induced Super-Resolution	39
2.4 Outlook	42
References	43

3 Layered Magnetic Structures:

Interlayer Exchange Coupling and Giant Magnetoresistance

P. Grünberg	49
3.1 Qualitative Determination of the Different Types of Coupling	50
3.2 Quantitative Description: Definition and Determination of Coupling Parameters	52
3.3 Multiperiodic Oscillations, Microscopic Models	54
3.4 Giant Magnetoresistance	57

3.5 Phenomenological Description and Microscopic Mechanism of the GMR Effect	59
3.6 Applications, Final Remarks	63
References	63

4 Giant Magnetoresistance in Exchange-Biased Spin-Valve Layered Structures and its Application in Read Heads

R. Coehoorn	65
4.1 Introductory Comments	65
4.2 Origin of the GMR Effect	69
4.2.1 Phenomenological Description	69
4.2.2 Simple Model	70
4.2.3 Spin-Dependent Scattering	71
4.2.4 Other Magnetoresistance Effects	75
4.3 GMR of Exchange-Biased Spin Valves	75
4.3.1 Fe-Mn-Based Simple Spin Valves	75
4.3.2 Other Exchange-Biased Spin-Valve Structures	81
4.3.3 Dependence on the Microstructure	83
4.3.4 Effects of Annealing	89
4.4 Modeling of GMR: Semiclassical Transport Model	89
4.4.1 Applications of the Semiclassical Model	92
4.4.2 Extensions of the Semiclassical Model	96
4.4.3 Beyond the Semiclassical Model	97
4.5 Magnetic Interactions	98
4.5.1 Interlayer Magnetic Coupling	98
4.5.2 Exchange Biasing	100
4.5.3 Magnetic Anisotropy	105
4.6 Application in Read Heads	107
4.6.1 Trends in Magnetic Storage	107
4.6.2 Head Designs	109
4.6.3 Yoke-Type Heads	110
4.7 Issues and Challenges	116
4.8 Notes Added in Proof	117
References	120

5 Experiments on the Perpendicular Giant Magnetoresistance in Magnetic Multilayers

M. A. M. Gijs	129
5.1 Perpendicular Magnetoresistance at 4.2 K: Exploring the Physics of Spin-Dependent Scattering	130
5.1.1 The Two-Channel Model at Low Temperatures	130

5.1.2 Experiments	
Based on the Superconducting Contact Technique	135
5.2 Perpendicular Magnetoresistance up to Room Temperature:	
Exploring Routes to Practical Devices	148
5.2.1 The Two-Channel Model at Higher Temperatures	148
5.2.2 Lithographically Defined Pillar Structures	150
5.2.3 Electrodeposited Multilayer Pillars	163
5.2.4 Structures on Grooved Substrates	168
5.3 Conclusion	172
References	174

6 Physics of and Methods for Studying Metallic Multilayers with Interlayer Exchange Coupling and GMR Response

H. A. M. van den Berg	179
6.1 Developments in the Field of Magnetoresistive Sensors	179
6.2 Physics of the Interlayer Coupling	182
6.2.1 The Interlayer Coupling in Metallic Superlattices	184
6.2.2 Experimental Investigations Towards the Interlayer Coupling .	196
6.3 Physics of the GMR Effect	211
6.3.1 Theoretical Background of the GMR Effect	211
6.3.2 Micromagnetics of Multilayer Systems	226
6.3.3 Experimental Data on the GMR Effect	238
6.3.4 Prospects for Sensors Based on the GMR Effect	250
References	255

7 Nonlinear Magnetooptics for Magnetic Thin Films

Th. Rasing	263
7.1 The Magnetooptical Kerr Effect	265
7.2 Surface Second-Harmonic Generation	267
7.3 Magnetization-Induced Second-Harmonic Generation	268
7.3.1 The Nonlinear Tensor Components of Magnetized Materials .	268
7.3.2 The Nonlinear Magnetooptical Kerr Effect	271
7.3.3 Nonlinear Magnetic Circular Dichroism	274
7.4 The Nonlinear Magnetooptical Susceptibility	275
7.4.1 Quantum-Mechanical Expressions for $\chi^{(2)}(\mathbf{M})$	275
7.4.2 Theoretical Estimates for $\chi^{(2)}(\mathbf{M})$	277
7.5 SHG from Multilayers	278
7.6 Experimental Considerations	282
7.7 Examples	285
7.7.1 MSHG Studies of Fe Surfaces	286
7.7.2 MSHG Study of Co/Au Multilayers	287
7.7.3 MSHG and MOKE Study of Co/Cu(001) Films	291
7.7.4 MSHG and MOKE Studies of Cu/Co/Cu(001) Films	296

7.7.5 MSHG Study of Cu/Co/Cu(001): The Appearance of QW Oscillations	297
7.7.6 NOMOKE Rotation from Fe	299
7.7.7 MSHG Study of Ni	305
7.7.8 MSHG Study of Cr ₂ O ₃	306
7.7.9 MSHG Study of Co/Au: Observations of Quantum-Well States	307
7.8 Summary and Future Prospects	311
