

Contents - Volume III*

Survey Paper	
Volume III: Shock Waves in Condensed Matter and Heterogeneous Media – An Introductory Survey	
M.E.H. van Dongen	3
Plenary Lectures	
Shock Wave Impact on Porous Materials	
B.W. Skews	11
Cellular and Tissular Effects of Shock Wave-Induced Cavitation: Potential Application to Digestive Cancers	
F. Prat and A. Arefiev	21
Part 1: Two-Phase Flows	
Entrainment of a Spherical Particle by the Flow Behind a Shock Wave	
M. Olim, H. Nagoya, K. Takayama and F. Hiatt	31
On the Importance of the Basset History Term on the Particle Motion Induced by a Plane Shock Wave	
M. Sommerfeld and S. Decker	37
Drag Coefficient Measurement of Spheres in a Vertical Shock Tube and Numerical Simulation	
G. Rodriguez, P. Grandeboeuf, M. Khelifi and J.-F. Haas	43
Experimental and Numerical Investigation of Shock Wave Attenuation in Dust-Gas Suspensions	
O. Igra, G. Ben-Dor, F. Aizik and B. Gelfand	49
Numerical Simulation of Shock Wave Reflection and Diffraction in a Dusty Gas	
Shmuel Eidelman, Xiaolong Yang and Itzhak Lottati	55
Numerical Simulation of Dusty Shock Diffraction Around a 90 Degree Corner	
B.Y. Wang, Q.S. Wu, H. Zhu and Y.H. Xu	61
Numerical Simulation of the Interaction of a Shock Wave with a Two-Phase Interface	
Q. Yu, A. van de Ven, J.H. Geng, F. Zhang and H. Grönig	67
Turbulent Boundary Layer Over a Dust Bed	
K.-Y. Chien, R.E. Ferguson, J.P. Collins, A.L. Kuhl and R.G. Batt	73
Optical Observation of Mach Reflection of a Partly Dispersed Shock Wave by Sub- Micron Water Droplets in Air	
H. Hirahara and M. Kawahashi	77
Effects of the Injection of Droplets on a Stationary Shock Wave in a Nozzle	
F. Uttheza, R. Saurel, E. Daniel and J.C. Loraud	83
Impact of Strong Shock Waves on Monodisperse Isopropanol Droplet Streams	
N. Widdecke, W. Klenk and A. Frohn	89

* The Contents of the other volumes are given at the end of the book.

Droplet Behaviour in Underexpanded Supersonic Jets M. Sommerfeld and J. Kurian	95
Shock Tube Study of Droplet-Vapor Phase Transition of Hexane in Argon F. Peters and B. Paikert	101
Thickness Measurements of Partial Liquefaction Shock Waves M. Herrmann and F. Obermeier	107
Interferometric Measurements and Numerical Simulation of Relaxation in an Argon-Steam Mixture F. Maršík, J. Blaha and P. Sopuch	113
Propagation of Shock Waves Through a Gas Mixture Due to Strong Evaporation from a Plane Condensed Phase Y. Onishi and H. Miura	119
Measurements on Film Condensation Behind Incident and Reflected Shock Waves T. Teske and F. Obermeier	125
On the Onset of Condensation in Rarefaction Waves in Shock Tubes Can F. Delale and Günter H. Schnerr	131
Influence of Shock Waves on the Condensation Process in a Nozzle A.L. Itkin, A.V. Rodionov and E.G. Kolesnichenko	135
Propagation of Shock Waves in Dilute Bubbly Liquids M. Kameda, Y. Matsumoto and Y. Haneda	141
"Resonance Solitons" in a Bubbly Liquid N.V. Malykh	147
Analytical Techniques for the Problem of the Interaction of Nonlinear Sonic Waves with Nonuniform Media A.A. Lugovtsov	151
An Adaptive Gridding Approach to the Computation of Reactive Two-Phase Flows in Two Dimensions W. Speares and E.F. Toro	155

Part 2: Shocks in Porous Media

On the Modelling of Wave Phenomena in Permeable Foam M.E.H. van Dongen, D.M.J. Smeulders, T. Kitamura and K. Takayama	163
A Multiphase Model for Shock-Induced Flow in Low-Density Foam M.R. Baer	169
Structure of Deformation Waves in Porous Compressible Materials Under the Influence of Shock Waves L.G. Gvozdeva, Yu.M. Faresov and Yu.L. Sharov	175
Transmission of a Blast Wave Through a Deformable Layer J.J. Lee, D.L. Frost and J.H.S. Lee	181
Peculiarities of Weak Shock Wave Propagation in a Gas-Liquid Foam I.I. Goldfarb, V.P. Melnikov, Z.M. Orenbakh, I.R. Shreiber and F.I. Vafina	187

Pressure Waves in Gas-Liquid Foams	
T. Elperin, O. Igra and Z. Orenbakh	193
Formation of Shock Waves in Gas-Liquid Foams	
T. Elperin, O. Igra and I. Shreiber	197
Jump Conditions Across Strong Compaction Waves in Gas-Saturated Rigid Porous Media	
A. Levy, G. Ben-Dor, S. Sorek and J. Bear	203
Head-on Collision of a Normal Shock Wave with a Polyurethane Foam	
E. Zaretsky and O. Igra	209
Head-on Collision of Shock Waves with Porous Materials: Experimental and Numerical Investigation	
G. Ben-Dor, O. Igra, G. Mazor, H. Onodera and K. Takayama	215
Head-on Collision of Normal Shock Waves with Rigid Porous Materials	
A. Levy, B.W. Skews, G. Ben-Dor and S. Sorek	221
Slow Detonation in Filtration Combustion	
Vladimir Gol'dshtein, Isaak Shreiber and Gregory Sivashinsky	227

Part 3: Shocks in Condensed Matter

Liquid Fracture at Explosive Loading	
V. Kedrinskii	233
Characterization of Pressure Waves in Liquids Using an Interferometric Method	
A.P. Alloncle, D. Dufresne and M. Autric	239
Laser-Generated Shock Waves	
D.C. Emmony, M.K.B. Suaidi and B. Ward	245
Laser Generation of Stress Waves in Metal	
Jean-Eric Masse and Gérard Barreau	251
High-Power Laser Radiation-Induced Shock Waves in Solids	
Ch. Prat and M. Autric	255
Beam-Matter Experiments with High-Power Proton Beams on KALIF	
K. Baumung, H.J. Bluhm, P. Hoppé, H.U. Karow, D. Rusch, G.I. Kanel, V. Licht, S.V. Razorenov and A.V. Utkin	261
A Numerical Study of Explosive-Driven Cylindrical Imploding Shocks in Solids	
T. Hiroe, H. Matsuo and K. Fujiwara	267
Model of Viscoelastic Unidirectional Composite with Coupled Thermal and Elastic Processes	
A.D. Resnyansky and E.I. Romensky	273
Underwater-Shock Consolidation of TiAl Powder	
A. Chiba, M. Nishida, R. Tomoshige, K. Imamura and C. Moon	279
An Adaptive Mesh Method to Speed up the Numerical Simulation of an Underwater Explosion	
Philippe Boyce and Thierry Hocquellet	285

Converging Underwater Shock Waves for Metal Processing S. Itoh, M. Fujita, S. Nagano and K. Kamohara	289
Hugoniot Adiabate of Plasticized TATB-Based Explosive Compositions E.V. Shorohov and B.V. Litvinov	295
Substance Compression Under Strong Shock Waves with Allowance for Nuclei Dissociation B.V. Litvinov, N.P. Purygin, S.V. Samylov and I.V. Sanin	299
Equations of State and Matter Transformation Parameters Under Shock Compression for Epoxy Resin K.K. Krupnikov and V.P. Krupnikova	301
Quasi-Spherical Pulsed Loading Impact on Solid Metal Balls N.P. Purygin and V.I. Buzanov	307
X-Ray Line Broadening Analysis of Dynamic Loaded Aluminium Metal Matrix Composite C. Patuelli	311
Application of Parallel Processors to Shock Wave Modelling S.B. Bazarov, A.V. Shutov, O.Yu. Vorobiev, A.V. Zharov, V.E. Fortov and B.P. Krukov	317

Part 4: Industrial Applications and Environment

Laser-Supported Absorption Waves in Radiation-Metal Interaction C. Dumas, M. Ghrab, C. Prat and M. Autric	323
Shock Waves in the Cavity of a Xe-He Excimer Laser S. Kosugi, T. Ohishi, K. Maeno and H. Honma	329
Aerothermodynamic and Thermal Phenomena in a High Pulse-Repetition Rate XeCl Laser J.P. Truong, O. Uteza, M.L. Sentis, P. Delaporte, B. Forestier and B. Fontaine	335
Power Reduction of Excimer Lasers Caused by Electromagnetic Shock Waves Due to Repetitively Pulsed Discharge E. Hirai, N. Nagai and H. Yamakoshi	341
Attenuation and Distorsion of Propagating Compression Waves in a High-Speed Railway Model and in Real Tunnels Toshiyuki Aoki, Kazuyasu Matsuo, Hideto Hidaka, Yasuhiro Noguchi and Syunji Morihara	347
A Numerical and Experimental Study of Sonic Booms Generated in High-Speed Train Tunnels A. Sasoh, T. Saito, S. Funabashi, O. Onodera, K. Takayama, Y. Matsui and R. Kaneko	353
Effects of Shock Waves on Silencer Characteristics in the Exhaust Gas Flow of Automobile Engines Noriaki Sekine, Ichiro Kudo, Osamu Onodera and Kazuyoshi Takayama	359
Noise Induced by Weak Shock Waves in Automobile Exhaust Systems (Effects of Viscosity and Back Pressure) S. Matsumura, O. Onodera and K. Takayama	367
An Experimental Study of an Intelligent Muzzle Brake K.C. Phan	373

Effects of Shock Waves on Jet Mixing and Noise Generation K. Kailasanath, J.P. Boris and A.M. Landsberg	379
Numerical Simulations of Blast Wave Propagation Induced by Eruptions of Volcanoes T. Saito, T. Kitamura, K. Takayama, N. Fujii and H. Taniguchi	385
Experiments and Analysis of Orbital Debris Shock-Induced Penetration of Pressure Vessels in Space Robert M. Schmidt, Kevin R. Housen and Harlow G. Ahlstrom	391
Shocked Quartz, Silica and Carbon Materials in Meteorites and Impact Craters Y. Miura, K. Takayama, T. Kato, N. Kawashima, M. Imai, G. Iancu and M. Okamoto	399
Shock Metamorphic Evolution of Meteorites and Impact Craters Y. Miura, K. Takayama, N. Kawashima and T. Kato	405
Interaction of Shock Waves with Tree Crowns and the Front of Crown Forest Fires A.M. Grishin	411
Shock Tube Pyrolysis Research of Chinese Coals Xi-Yu Chang, Ding-An Liu, Miu-Zhi Li and Hui Li	417

Part 5: Biological Aspects

Extra-Auditory Effects of Single and Multiple Blasts P. Vassout, G. Parmentier, G. Evrard and A. Dancer	425
Effects of Shock Waves on Living Tissues Using Shock Tubes for Bio-Tests M. Tamagawa and T. Akamatsu	429
Extracorporeal Shock Wave Gallstone Lithotripsy Hideo Ise, Osamu Kitayama, Seiki Matsuno, Kazuyoshi Takayama and Toshiyuki Okawa	435
Underwater Shock Wave Propagation and Focusing in Inhomogeneous Media H. Nagoya, T. Obara and K. Takayama	439
Nonlinear Transmission of Focused Shock Waves in Nondegassed Water Č. Štuka, P. Šunka and J. Benes	445
Soft Flash X-ray System for Shock Wave Research E. Sato, K. Takahashi, M. Sagae, A. Shikoda, T. Oizumi, H. Ojima, K. Takayama, K. Sasaki, Y. Tamakawa and T. Yanagisawa	449
New Discharge Circuit for Efficient Shock Wave Generation P.Šunka, V. Babický, M. Člupek and Č. Štuka	455
New Methods of Superpowerful Focused Shock Wave Generation for Medicine and Mineralogy V. Veroman and O. Novikov	459

Author Index	463
Contents - Volumes I, II, IV	471
