

1	Introduction	1
2	Magmatic, Volcanic and Other Geogenic Gas Exhalations	3
2.1	Solfataras	4
2.2	Fumaroles	4
2.2.1	Hot Geysers	5
2.3	Methane Emissions	7
2.3.1	Mud Volcanoes	8
2.3.2	Eternal Fire	9
2.3.3	Submarine Methane Sources	9
2.4	Black and White Smokers	10
2.5	CO ₂ Emissions	11
3	Mofettes	13
3.1	What Are Mofettes	13
3.2	Eu-Mofettes – Genuine Mofettes	20
3.2.1	Dry or Wet Mofettes?	21
3.3	Aquatic Mofettes	22
3.4	Gas-Powered Cold-Water Geysers or Bubblers	23
3.5	Acid Springs and Wells	24
3.6	Iron Ochre	25
3.7	Biogenic Decalcification	26
3.7.1	Carbonate Can Be Hard	27
3.7.2	The Stony Grooves or Gutters	28
3.8	Wandering Mofettes	28
3.9	Pseudo-Mofettes	28

3.9.1	Degraded Peatlands – Sauerland	29
3.9.2	“Seismo-Tectonically” Induced Changes in Geogenic CO ₂ Release	31
3.9.3	Biogenic Soil Respiration	32
3.10	Is It Possible to Search for Mofettes?	34
4	Geological-Volcanological Basics	37
5	Carbon Dioxide: The Decisive Parameter for Mofettes	41
5.1	Nomenclature	41
5.2	The Physico-Chemical Properties of CO ₂	42
5.2.1	Odour and Taste	42
5.2.2	Water Solubility	42
5.2.3	The Acid Effect	42
5.2.4	Absorption of Thermal Radiation	46
5.2.5	The Specific Density	47
5.2.6	Visibility of the Gas	47
5.2.7	The Displacement of Oxygen	48
5.3	The Toxicity of Carbon Dioxide	50
6	Mofettes as Habitats	53
6.1	Plants in Mofettes	53
6.1.1	Plants Perish	55
6.1.2	Growth and Habitus of Plants in Mofettes	57
6.2	Adapted Plants Can Grow – The Azonal Vegetation	59
6.2.1	Clear Boundaries	60
6.3	Physiological Adaptations of Plants	63
6.3.1	Nutrient Elements in Mofette Plants	66
6.4	Mofettophilia and Mofettophobia	67
6.5	CO ₂ and Trees	69
6.5.1	The Problem of the Swale	72
6.6	The Hot ‘Fumarolic’ Mofettes of the Azores	72
6.7	Mofettes Seen from Above	75
7	Bacteria and Fungi	77
7.1	Bacteria and Archaea	77
7.2	Fungi	78
7.2.1	Umbelopsis	78
7.2.2	Mushrooms Fungi in Mofette Soils	79
7.2.3	The Soil Yeasts	79

8	Animals	81
8.1	Animals Die	82
8.2	Thanatocoenoses – Animal Cemeteries	84
8.2.1	Why Do So Many Different Animals End Up in the CO ₂ Death Trap?	85
8.3	Animal Life in the CO ₂ -Gas Gradient	89
8.3.1	Springtails and Nematodes	89
8.4	Animals Mark CO ₂ -Emission Borders	90
8.4.1	Moles	90
8.4.2	Swallows	92
8.4.3	Bats	93
8.4.4	Wild Boar	94
8.5	The Deliberate Killing of Animals	95
8.5.1	Grotta del Cane	95
8.5.2	La Grotte du Chien a Royat	97
9	Mofettes and Climate	99
9.1	Mofettes and the Microclimate	99
9.2	The Bossoleto CO ₂ Gas Valley	100
9.2.1	The CO ₂ Diurnal Cycle	100
9.2.2	Cloud formation in Bossoleto	102
9.3	Bad Pyrmont	103
9.4	Mofettes and the Global Climate	105
10	The Bottoms in Mofettes	107
10.1	The Gas within the Soil	107
10.1.1	The Transect Display	108
10.1.2	The Area Depiction	109
10.1.3	The Cube Depiction of Soil Monoliths	110
10.2	The CO ₂ to Oxygen Ratio	111
10.3	pH Values in Mofette Soils	111
10.4	Buffering of the Soil	112
10.5	The Humus Content of Mofette Soils	113
10.6	The Mineral Content	114
11	The Importance and Use of Mofettes	115
11.1	Economic Use	115
11.1.1	The Production of Mineral Waters	116
11.1.2	Production of Chemicals	117
11.1.3	The Production of Dry Ice	118

11.1.4	CO ₂ in the Production, Processing and Preservation of Foodstuffs	118
11.1.5	CO ₂ in Pest Control	118
11.1.6	CO ₂ in Fire Fighting	119
11.1.7	CO ₂ and Plant Fertilization	119
11.2	The Drilling and Production of CO ₂ Gas	120
11.2.1	Fighting the Greenhouse Effect	120
11.3	The Medical Use of Mofettes	123
11.3.1	Cures and Balneology	123
11.3.2	Poorly Healing Wounds	125
11.4	Mofettes and Tourism: Geo-Biotopes	125
11.5	Italy: Campi Flegrei	127
11.5.1	Czech Republic: Soos	129
11.6	Germany: The Volcanic Eifel	130
12	The Mythical-Ethnological Significance of CO₂-degassing	135
12.1	Mythical Places and Sacrificial Sites	135
12.1.1	Oracle Sites	136
12.1.2	The Ancient Entrances to Hell	137
13	Danger from CO₂: Human Tragedies	143
13.1	Mammoth: Horseshoe Lake	144
13.2	Djeng Plateau	146
