

TABLE OF CONTENTS		Page
Introduction -- by S. Dikstein		xvi
Acknowledgements		xvii
Contributors		xix
Chapter 1.	EFFECT OF DRUGS ON EXTRAOCULAR MUSCLES <u>H. Aichmair</u>	1
I -	INTRODUCTION	1
	Morphology of extraocular muscles (anatomy, histology)	1
	Biochemistry of extraocular muscles	3
	Physiology of extraocular muscles	3
	Technical terms	6
II -	DRUGS	4
	Principal effect of drugs	4
	Effect of drugs on extraocular muscles	7
Chapter 2.	PHARMACOLOGY OF THE CONJUNCTIVAL SAC <u>N. Ehlers</u>	23
I -	INTRODUCTION	23
II -	ANATOMY OF THE CONJUNCTIVAL SAC	23
	Gross anatomy	23
	The structure of the mucous membrane	24
	Lacrimal gland	24
	Accessory glands	25
	Mucous gland system of the conjunctiva	25
	Route and mechanism of outflow	25

Contents	iv
III - SOME PHYSIOLOGICAL ASPECTS OF THE CONJUNCTIVAL SAC	25
Volume and flow of tears	25
Properties of tears	26
Surface films	27
Mechanism of tear secretion	28
IV - PHARMACOLOGY OF THE CONJUNCTIVAL SAC	30
Topical administration and vehicles	30
Agents acting in the conjunctival sac	33
Agents acting on the mucous membrane	35
Agents penetrating the conjunctiva, acting on deeper structures	37
Effects on the lacrimal gland and conjunctiva of systemically administered drugs	43
V - CONCLUDING REMARKS	46
Chapter 3a. DRUGS AFFECTING THE TRANSPORT & PERMEABILITY OF THE CORNEAL EPITHELIUM <u>J. A. Zadunaisky & B. Spinowitz</u>	57
I - INTRODUCTION	57
II - ELECTROPHYSIOLOGY OF THE CORNEAL EPITHELIUM	57
Electrical potential, resistance and current	57
Ionic currents and active transport	58
Sodium transport and chloride transport	59
Structural basis of electrical and ionic events	60
III - CHLORIDE TRANSPORT	61
IV - GLYCOLYTIC PATHWAYS ASSOCIATED TO CHLORIDE TRANSPORT	62
Inhibitors of respiration	62

Contents	v
Ouabain	63
Furosemide	63
Ethacrynic acid	63
V - STIMULANTS OF CHLORIDE TRANSPORT	63
Epinephrine	63
Theophylline and aminophylline	65
Alpha and beta receptors; use of blocking agents	66
Cyclic AMP and its dibutyryl derivative	66
Prostaglandins	66
Ascorbic acid	67
Adenosine	67
VI - SODIUM TRANSPORT	68
Stimulants of sodium transport in corneal epithelium	68
Amphotericin B	68
VII - CONTROL OF CORNEAL TRANSPARENCY & HYDRATION BY THE EPITHELIAL IONIC TRANSPORT	68
VIII - HIGH ACETYLCHOLINE CONTENT OF THE CORNEAL EPITHELIUM	69
IX - PERMEABILITY TO DRUGS	71
Molecular size	71
Concentration gradient	72
Lipid/aqueous partition and ionic charge	72
Chapter 3b. EFFECT OF DRUGS ON THE ENDOTHELIAL CELLS	
<u>S. Dikstein</u>	79
I - BIOCHEMISTRY OF EXPERIMENTAL CONDITIONS	79
Energy sources	81

Contents	vi
II - INHIBITORS	81
III - WHAT REGULATES THE FLUID PUMP?	83
Chapter 3c. TECHNIQUES OF INVESTIGATION OF THE CORNEA	
<u>D. M. Maurice</u>	90
I - PHYSIOLOGICAL CONCEPTS	90
Stroma	90
Limiting layers	90
II - TECHNIQUES	91
In vivo preparation	91
Isolated cornea	91
Net water flux	92
Pachometers	93
Specular microscope	93
Pharmacological effects on thickness	93
Swelling pressure	94
Permeability	95
Optical properties	96
Biochemical techniques	97
Chapter 3d. EFFECT OF DRUGS ON THE CORNEAL STROMA	102
<u>G. Cremer-Bartells</u>	
I - INTRODUCTION	102
General remarks	102
Morphology	102
II - CHEMICAL COMPOSITION AND METABOLISM	103
Chemical composition	103
Metabolism	105
III - EFFECT OF DRUGS	107
Vitamins	107

	Immunosuppressive agents	109
	Drugs acting on the central and peripheral nervous system	112
	Antirheumatic drugs	114
	Osmotically active substances	115
	Alkali burning	115
	Drugs influencing wound regeneration	116
	Various drugs and chemicals	117
Chapter 4.	DRUGS INFLUENCING AQUEOUS HUMOR FORMATION & DRAINAGE	128
	<u>S. Mishima, K. Masuda and T. Tamura</u>	
I -	INTRODUCTION	128
II -	ANATOMY RELEVANT TO AQUEOUS FORMATION & DRAINAGE	130
	The ciliary body	130
	The iris	135
	The drainage system	136
III -	PHYSIOLOGY OF AQUEOUS HUMOR FORMATION & DRAINAGE	142
	Formation of the aqueous humor	142
	Other transport systems in the ciliary body	160
	Drainage of the aqueous humor	163
IV -	METHODS OF INVESTIGATION	166
	Determination of the IOP	166
	The outflow facility and related parameters	168
	Rate of aqueous humor formation	173
	Determination of substance turnover in the anterior chamber: Transfer coefficients by flow and diffusion	182
	Aqueous flare, protein content of the aqueous humor	191

	In-vitro studies on the iris-ciliary body preparation	191
	Glaucoma in animals	191
V -	TABLES FOR VARIOUS PARAMETERS IN AQUEOUS HUMOR DYNAMICS	193
VI -	CARBONIC ANHYDRASE INHIBITOR	193
	Distribution of carbonic anhydrase in the anterior uvea	194
	Kinetics of the inhibitor in the eye	194
	Ocular effects of the enzyme inhibitor	195
	Mechanism of action	201
VII -	SYMPATHETIC NERVOUS SYSTEM & SYMPATHOMIMETIC DRUGS	203
	Sympathetic innervation to the anterior uvea and the outflow channels: histological and biochemical aspects	204
	Adrenergic mechanisms in IOP dynamics	206
	Blood circulation in the anterior uvea and the blood-aqueous barrier	212
	Physiology and biochemistry of the ciliary body	213
VIII -	PARASYMPATHOMIMETIC & PARASYMPATHOLYTIC DRUGS	217
	Pilocarpine; direct acting parasympathomimetic drug	217
	Anti-cholinesterases	220
	Parasympatholytic drugs; atropinic drugs	221
IX -	HORMONES	222
	Corticosteroids	222
	Adrenocorticotrophic hormone (acth)	229
	melanocyte stimulating hormone (MSH)	229
	Vasopressin	229

Contents

ix

	Oxytocin	230
	Angiotensin	230
	Estrogen and progesterone	230
	Thyroid hormone	231
X	PROSTAGLANDINS	231
	Distribution, synthesis and excretion	231
	Ocular effects	232
	Antagonism of PG's effects and inhibition of synthesis	234
	Physiology and biochemistry of the ciliary body	236
XI	ENZYMES & ENZYME INHIBITORS	237
	Hyaluronidase	237
	Alpha-chymotrypsin	238
	Fibrinolytic enzymes	238
	Other proteolytic enzymes	239
	Ouabain	239
	Other metabolic inhibitors	239
XII	MISCELLANEOUS AGENTS	240
	Anesthetic agents	240
	Osmotic agents & water: changes in blood osmolarity	240
	Caffeine	242
Chapter 5a.	DRUGS AFFECTING IRIS MUSCLE	288
	<u>S. Ishikawa, S. Oono & H. Hikita</u>	
I	ANATOMY OF IRIS	288
	The iris	288
	The sphincter muscle	288
	The dilator muscle	289

Contents	x
II - THE PUPIL - FUNCTIONAL ANATOMY	293
The light reflex	293
III - METHODS OF EXAMINATION IN PUPILLARY SYSTEM	299
IV - AGE AND PUPILLARY REACTION TO DRUGS	317
Blood circulation	323
V - DRUGS INFLUENCING THE IRIS MUSCLES INNERVATED BY THE SYMPATHETIC NERVE	324
Introduction	324
Adrenergic receptor	324
Denervation supersensitivity in the sympathetic nerve	328
Sympathomimetic drugs	330
Pharmacologic determination of location of lesions on Horner's syndrome	338
Iris pigment and drug accumulation	341
adrenergic blocking agents	342
Adrenergic neuron blocking agents	346
Dopa and dopamine	352
MAO inhibitor and COMT inhibitor	353
VI - PARASYMPATHOMIMETIC, PARASYMPATHOLYTIC & MISCELLANEOUS DRUGS INFLUENCING THE IRIS	353
Parasympathomimetic drug	353
Ganglion stimulant and blocker	355
Parasympathomimetic drug (direct acting drug)	357
Parasympathomimetic drug (indirect acting drug)	365
Parasympatholytic drug	373
Miscellaneous	374

Chapter 5b.	DRUGS INFLUENCING THE CILIARY MUSCLE	383
	<u>S. Ishikawa & H. Suzuki</u>	
I -	ANATOMY OF THE CILIARY MUSCLE	383
II -	FUNCTIONAL ASPECT OF THE CILIARY MUSCLE - ACCOMODATION	385
III -	EXPERIMENTAL METHODS	386
	Muscle strip preparation	386
	Refractometry	387
	Determination of changes in a/a ratio (accommodative response/accommodative stimulus ratio)	387
	Ultrasonic biometry	387
	Phacometry	387
	Detection of potential change of ciliary muscle	387
IV -	DRUGS INFLUENCING THE CILIARY MUSCLE	391
	Sympathomimetic and sympatholytic drugs	391
	Ganglion blocker and stimulator	398
	Parasympathomimetic drugs	399
	Parasympatholytic drugs	410
	Miscellaneous	414
Chapter 6.	DRUGS INFLUENCING THE LENS	433
	<u>J. F. R. Kuck, Jr.</u>	
I -	INTRODUCTION	433
II -	HORMONES (NON-STEROID), OTHER PHYSIOLOGICAL AGENTS & SYNTHETIC ANALOGS	435
III -	STEROIDS	438
	Corticosteroids	438
	Oral contraceptives	440
	Ouabain	441

Contents	xii
IV - DIABETOGENIC AGENTS & CATARACTOGENIC SUGARS	441
V - SURFACTANTS & OTHER LYSING AGENTS	443
VI - ANTIBIOTICS, ANTIVIRAL AGENTS & ALKYLATING AGENTS	444
Antibiotics	444
Anti-viral agents	445
Iodoacetate	446
VII - RADIATION, RADIOPROTECTANTS & RADIO-MIMETICS	447
Radiation	447
Radioprotectants	448
Radiomimetics	449
VIII - NITROAROMATIC COMPOUNDS	450
2,4-Dinitrophenol	450
Other nitroaromatics	453
IX - NAPHTHALENE & QUINONES	453
Naphthalene	453
Quinones	456
X - PHOTSENSITIZERS & PHOTODYNAMIC AGENTS	456
XI - SULFHYDRYL REAGENTS	459
XII - METALS	461
XIII - CHELATING AGENTS	465
XIV - RESPIRATORY ENZYME INHIBITORS	466

Contents	xiii
XV - OPIATES, OTHER NARCOTICS, ANALGESICS & TRANQUILIZERS	467
Acute reversible lens opacities (ARLO)	467
XVI - MIOTICS, PARASYMPATHOMIMETICS & CHOL- INESTERASE INHIBITORS	468
XVII - MISCELLANEOUS	471
Vitamins	471
Amino-acids and their anti-metabolites	471
Medicinals	472
Industrials	476
XVIII - ANTI-CATARACTOGENIC AGENTS	477
XIX - ADDENDUM	479
Hormones (non-steroid), other physiological agents and synthetic analogs (II)	479
Steroids (III)	479
Surfactants (V)	479
Antibiotics (VI)	479
Photosensitizers and photodynamic agents (X)	480
Respiratory enzyme inhibitors (XIV)	480
Opiates, other narcotics, analgesics and tran- quilizers (XV)	480
Miscellaneous (XVII)	480
Anti-cataractogenic agents (XVIII)	481
Chapter 7. THE PHARMACOLOGY OF THE VITREOUS <u>E. A. Balazs & J. L. Denbinger</u>	524
I - TARGETS OF DRUG ACTION	525
II - INFLAMMATION IN THE VITREOUS	527
III - VITREOUS VOLUME AND OSMOTIC AGENTS	529

IV	- LIQUID VITREOUS AND ITS REPLACEMENT	531
V	- TREATMENT OF VITREOUS HEMORRHAGES	532
Chapter 8.	SYNAPTIC TRANSMISSION IN THE RETINA <u>P. Gouras</u>	539
I	- INTRODUCTION	539
II	- CHEMICAL SYNAPSES	541
III	- TRANSMITTER IDENTIFICATION	542
IV	- EXTERNAL PLEXIFORM LAYER	543
V	- INNER PLEXIFORM LAYER	545
VI	- SUMMARY	547
Chapter 9.	PHARMACOLOGICAL ASPECTS OF VASCULAR PROLIFERATION <u>U. Ticho</u>	550
I	- NEOVASCULARIZATION OF THE RETINA	550
II	- NEOVASCULARIZATION OF THE IRIS	554
III	- NEOVASCULARIZATION OF THE CORNEA	554
Chapter 10.	OCULAR SIDE-EFFECTS OF DRUGS <u>H. N. Bernstein</u>	560
I	- CHLORAMPHENICOL	560
II	- CHLORPROMAZINE	564
III	- CHLOROQUINE	575
IV	- CLOMIPHENE CITRATE	599

Contents	xv
V - CORTICOSTEROIDS	601
VI - DIMETHYL SULFOXIDE (DMSO)	610
VII - ECHOTHIOPHATE	613
VIII - ETHAMBUTOL	616
IX - INDOMETHACIN	624
X - IODOCHLOROXYDROXYQUINE & DIBROM- HYDROXYQUINOLINE	625
XI - ORAL CONTRACEPTIVES	625
XII - PHENIPRAZINE HC 1	629
XIII - PLASMOCID	631
XIV - QUINACRINE (ATABRINE, MEPACRINE)	632
XV - QUININE	632
XVI - THIORIDAZINE	634
XVII - NP-207 (PIPERIDYLCHLOROPHENOTHIAZINE)	638
XVIII - TRIPANAROL	640
CHEMICAL AND DRUG INDEX	645
