| <b>PART 1</b> | <b>Forest Ecology and Landscape Ecosystems</b> |
|---------------|--|

|          |                                   |          |
|----------|-----------------------------------|----------|
| <b>1</b> | <b>Concepts of Forest Ecology</b> | <b>3</b> |
|----------|-----------------------------------|----------|

|   |    |
|---|----|
| Ecology,                                    | 4  |
| Landscape Ecosystems,                       | 4  |
| Landscape Ecosystem and Community,          | 7  |
| Ecosystem Structure and Function,           | 7  |
| Examples of Landscape Ecosystems,           | 9  |
| An Approach to The Study of Forest Ecology, | 11 |
| Applicability to Forest Management,         | 12 |
| Suggested Readings,                         | 13 |

|          |  |           |
|----------|--|-----------|
| <b>2</b> | <b>Landscape Ecosystems at Multiple Scales</b> | <b>15</b> |
|----------|--|-----------|

|  |    |
|--|----|
| Overview of Spatial and Temporal Scales,                                       | 15 |
| Spatial Scales of Hierarchical Landscape Ecosystems,                           | 17 |
| Climatic Classification,   | 18 |
| Physiography,  | 20 |
| Vegetation Types and Biomes,   | 20 |
| Distinguishing and Mapping Landscape Ecosystems<br>at Multiple Spatial Scales, | 25 |
| Regional Landscape Ecosystems,   | 26 |
| Regional Landscape Ecosystems of Michigan,                                     | 28 |
| Local Landscape Ecosystems,  | 30 |
| Local Landscape Ecosystems in Upper Michigan,                                  | 30 |
| Suggested Readings,  | 32 |

## PART 2 The Forest Tree

### 3 Forest Tree Variation

35

- Components of Phenotypic Variation, 35
  - Plasticity of the Phenotype, 36
- Sources of Variation, 37
- The Evolutionary Sequence, 38
  - Sexual and Asexual Systems, 39
- Genetic Diversity of Woody Species, 39
- Genecology, 40
  - Patterns of Genecological Differentiation, 41
    - Genecological Categories, 42
  - Factors Eliciting Genecological Differentiation, 42
    - Growth Cessation, 43
    - Growth Resumption, 46
  - Examples of Genecological Differentiation, 46
    - Eastern North American Species, 47
    - Scots Pine, 49
    - Wide-Ranging Western North American Conifers, 50
      - Ponderosa pine, 50
      - Douglas-fir, 52
    - Local Genecological Differentiation, 55
  - Factors Affecting Differentiation: Gene Flow and Selection Pressure, 56
- Ecological Considerations at the Species Level, 57
  - Niche, 60
  - Hybridization, 60
  - Polyploidy, 63
  - The Fitness–Flexibility Compromise, 66
  - Epigenetics, 66
- Suggested Readings, 67

### 4 Regeneration Ecology

69

- Regeneration, 69
- Sexual Reproduction, 71
  - Maturation and the Ability to Flower, 72
    - Increasing Seed Production, 73
  - Reproductive Cycles, 74
  - Pollination, 75

|   |    |
|---|----|
| Periodicity of Seed Crops,                    | 76 |
| Effects of Reproduction on Vegetative Growth, | 78 |
| Dispersal,                                    | 80 |
| Seed Bank, Dormancy, and Germination,         | 82 |
| Establishment Following Sexual Reproduction,  | 83 |
| Post-Establishment Development,               | 90 |
| Vegetative Reproduction,                      | 90 |
| Suggested Readings,                           | 94 |

## 5 Tree Structure and Growth

95

|  |     |
|--|-----|
| Tree Form,                                   | 95  |
| Architectural Models,                        | 97  |
| Short and Long Shoots,                       | 99  |
| Patterns of Intermittent Growth,             | 100 |
| Sylleptic and Proleptic Shoots,              | 102 |
| Roots,                                       | 102 |
| Kinds, Forms, and Occurrence,                | 103 |
| Fine Root Relations,                         | 105 |
| Horizontal and Vertical Root Development,    | 107 |
| Periodicity of Primary Root Growth,          | 108 |
| Root Grafting,                               | 108 |
| Specialized Roots and Buttresses,            | 110 |
| Stems,                                       | 110 |
| Xylem Cells and Growth Rings,                | 111 |
| Periodicity and Control of Secondary Growth, | 112 |
| Control of Earlywood and Latewood Formation, | 114 |
| Winter Freezing and Water Transport,         | 115 |
| Water Deficits and Tree Growth,              | 116 |
| Suggested Readings,                          | 118 |

## PART 3 The Physical Environment

|  |     |
|--|-----|
| Forest Environment,                    | 119 |
| Site Factors,                          | 120 |
| Organization of Site Factors,          | 120 |
| Interrelationships Among Site Factors, | 121 |
| Importance of Site in Forest Ecology,  | 122 |

**6 Light****123**

- Distribution of Light Reaching the Ecosphere, 124
  - Plant Interception of Radiation, 125
  - Canopy Structure and Leaf Area, 125
- Light Quality Beneath the Forest Canopy, 130
  - Sunflecks, 130
- Light and Growth of Trees, 133
  - Light and Seedling Survival and Growth, 136
- Light and Tree Morphology and Anatomy, 137
  - Light and Epicormic Sprouting, 139
- Photocontrol of Plant Response, 139
- Light and Ecosystem Change, 141
- Suggested Readings, 141

**7 Temperature****143**

- Geographical Patterns of Temperature, 143
- Temperatures at the Soil Surface, 145
- Temperature within the Forest, 147
- Temperature Variation with Local Topography, 148
- Temperature and Plant Growth, 150
  - Cold Injury to Plants, 153
  - Dormancy, 155
  - Frost Hardiness and Cold Resistance, 156
    - Thermotropic Movements in Rhododendrons, 159
  - Winter Chilling and Growth Resumption, 161
- Natural Plant Distributions and Cold Hardiness, 162
  - Deciduousness and Temperature, 164
- Suggested Readings, 165

**8 Physiography****167**

- Concepts and Terms, 167
- Characteristics of Physiography and their Significance, 168
  - Physiographic Setting, 169
  - Specific Landforms, 170
  - Elevation, 170
  - Form of Landforms, 170
    - Level Terrain, 170
    - Sloping Terrain, 171
    - Slope Characteristics, 171

|  |     |
|--|-----|
| Position on slope,   | 172 |
| Aspect,  | 172 |
| Slope inclination,   | 173 |
| Parent Material in Relation to Landform,                       | 173 |
| Position of Landform in the Landscape,                         | 174 |
| Multiple Roles of Physiography,                                | 174 |
| Physiographic Diversity, Landscape Ecosystems, and Vegetation, | 176 |
| Mountainous Physiography,                                      | 176 |
| Mountainous Terrain of California and the Pacific Northwest,   | 177 |
| Physiography and Forests of the Central Appalachians,          | 180 |
| Flatlands,   | 183 |
| The Great Plains,  | 184 |
| Pine Savannas of the Western Great Lakes Region,               | 185 |
| Till Plains of the Midwest,                                    | 185 |
| Southeastern and Southern Coastal Plain,                       | 186 |
| Floodplains,   | 186 |
| Physiography and Firebreaks,                                   | 190 |
| Microlandforms and Microtopography,                            | 191 |
| Tree Uprooting and Pit-and-Mound Microtopography,              | 191 |
| Microtopography and Regeneration in Hardwood Swamps,           | 193 |
| Suggested Readings,  | 194 |

## 9 Soil

195

|   |     |
|---|-----|
| Parent Material,  | 195 |
| Soil Formation,   | 197 |
| Soil Profile Development,                                       | 197 |
| Physical Properties of Soil,                                    | 200 |
| Soil Texture,   | 200 |
| Soil Structure,   | 201 |
| Soil Color,   | 202 |
| Soil Water,   | 202 |
| Physical Properties of Water,                                   | 203 |
| Soil Water Potential,   | 204 |
| Chemical Properties of Soil,                                    | 206 |
| Clay Mineralogy,  | 207 |
| Cation Exchange and the Supply of Nutrients,                    | 209 |
| Soil Acidity,   | 210 |
| Soil Organic Matter,  | 212 |
| Soil Classification,  | 213 |
| Landform, Soil, and Forest Vegetation: Landscape Relationships, | 215 |
| Suggested Readings,   | 217 |

**10 Fire****219**

- Fire and the Forest Tree, 220
  - Causes, 220
  - Fire Regime, 220
    - Fire Types, Frequency, and Severity, 221
  - Fire Adaptations and Key Characteristics, 224
  - Strategies of Species Persistence, 227
    - Closed-Cone Pines, 228
- Fire and the Forest Site, 230
  - Indirect Effects, 230
  - Direct Effects, 232
  - Organic Matter and Erosion, 234
  - Beneficial Effects of Fire, 236
- Suggested Readings, 236

**11 Site Quality and Ecosystem Evaluation and Classification****237**

- Direct Measurement of Forest Productivity, 238
- Tree Height as a Measure of Site, 239
  - Site-Index Curves, 240
  - Comparisons Between Species, 243
  - Advantages and Limitations, 243
- Vegetation as an Indicator of Site Quality, 244
  - Species Groups of Ground Cover, 245
    - Indicator Plants of Coastal British Columbia, 246
    - Ecological Species Groups, 246
  - Plant Associations and Habitat Types in the Western United States, 247
    - Operational Site Classification Based on Vegetation, 247
  - Applications and Limitations of Vegetation, 250
- Environmental Factors as a Measure of Site, 251
  - Climatic Factors, 251
  - Physiographic Land Classification, 252
  - Physiographic and Soil Factors: Soil-Site Studies, 252
  - Soil Surveys, 256
- Multiple-Factor Methods of Site and Ecosystem Classification, 256
  - Ecosystem Classification and Mapping in Baden-Württemberg, 257
  - Applications of Multi-Factor Methods in the United States and Canada, 258
    - Ecosystem Classification and Mapping in Michigan, 258
    - Ecosystem Classification in the Southeastern United States, 261

|   |     |
|---|-----|
| Ecosystem Classification in the Southwestern United States, | 262 |
| National Classification Systems in the United States,       | 262 |
| Ecological Land Classification in Canada,                   | 263 |
| Hills' physiographic approach,                              | 263 |
| Other approaches used in Canada,                            | 264 |
| Suggested Readings,   | 265 |

## **PART 4** Forest Communities

### **12** Animals in Forest Ecosystems

269

|  |     |
|--|-----|
| Plant Defense,   | 269 |
| Investment in Plant Defense,                           | 270 |
| Plant Defense Against Insects,                         | 272 |
| Examples of Injury and Plant Defense,                  | 273 |
| Nutrition,   | 274 |
| Plant Hybrid Zones as Reservoirs for Insect Diversity, | 275 |
| Plant Defense Against Mammals,                         | 276 |
| Roles of Animals in Plant Life History,                | 277 |
| Pollination,   | 277 |
| Seed Dispersal,  | 278 |
| Fish and Reptiles,                                     | 278 |
| Birds,   | 279 |
| Mammals,   | 282 |
| Germination and Establishment,                         | 284 |
| Decomposition, Mineral Cycling, and Soil Improvement,  | 285 |
| Damage and Death,                                      | 286 |
| Influence of Livestock on Forest Ecosystems,           | 288 |
| Suggested Readings,                                    | 290 |

### **13** Forest Communities

291

|   |     |
|---|-----|
| Community Concept,                      | 291 |
| Grounding Communities,                  | 292 |
| Florida Keys,                           | 292 |
| Interior Alaska,                        | 294 |
| Southern Illinois,                      | 294 |
| View from the Past: Community Concepts, | 296 |
| Schools and Terminology,                | 296 |
| Concepts of Clements and Gleason,       | 297 |

|   |     |
|---|-----|
| Phytosociology in Europe,                                       | 298 |
| Continuum Concept,  | 298 |
| Community as a Landscape Ecosystem Property,                    | 299 |
| Examples of Spatial Variation in Forest Communities,            | 300 |
| Discrete Forest Communities,                                    | 300 |
| Coastal California: Giant and Pygmy Forests,                    | 301 |
| Forest–Grassland Ecotone,                                       | 302 |
| Alpine Tree Lines,  | 302 |
| Merging Forest Communities,                                     | 303 |
| Eastern Deciduous Forest—Southern Appalachians,                 | 303 |
| New England,  | 304 |
| Competition and Niche Differentiation,                          | 305 |
| Interactions Among Organisms,                                   | 307 |
| Mutualisms in Forest Ecosystems,                                | 307 |
| Symbiotic Mutualisms—Mycorrhizae,                               | 307 |
| Nonsymbiotic Mutualisms,  | 307 |
| Competition,  | 308 |
| Forest Community Structure and Composition,                     | 308 |
| Vertical Structure,   | 310 |
| Stand Density,  | 312 |
| Competition and Overstory Composition,                          | 313 |
| Competition in the Understory,                                  | 314 |
| Understory Tolerance,   | 315 |
| Characteristics of Understory-Tolerant and -Intolerant Species, | 316 |
| Tolerance Ratings of Tree Species,                              | 317 |
| Examples of Understory Tolerance in Forest Ecosystems,          | 319 |
| Nature of Understory Tolerance,                                 | 319 |
| Environmental Factors Relating to Understory Tolerance,         | 322 |
| Physiological Processes Relating to Tolerance,                  | 323 |
| Suggested Readings,   | 325 |

## 14 Diversity in Forests

327

|   |     |
|---|-----|
| Concepts of Biological and Ecosystem Diversity, | 327 |
| The Value of Species Diversity,                 | 328 |
| Value of Biodiversity,                          | 329 |
| Common Threats to Diversity,                    | 331 |
| Measuring Diversity,                            | 331 |
| Levels of Diversity,                            | 331 |
| Measurement,                                    | 333 |
| Inventory Diversity: Alpha Diversity,           | 333 |
| Differentiation or Beta Diversity,              | 335 |

|  |     |
|--|-----|
| Diversity of Landscape Ecosystems,   | 336 |
| Examples of Diversity,   | 337 |
| Ground-Cover Species Diversity in Northern Lower Michigan,                 | 337 |
| Ecosystem Groups,  | 337 |
| Ecosystem Types,   | 340 |
| Ecosystem Diversity,   | 342 |
| Causes of Species Diversity,   | 343 |
| Diversity at Continental and Subcontinental Scales,                        | 343 |
| Paleogeography and Continental Relationships,                              | 343 |
| Glaciation,  | 344 |
| Latitude and Elevation,  | 344 |
| Diversity at Local Scales,   | 346 |
| Physiography and Soil,   | 346 |
| Community Composition and Structure,                                       | 349 |
| Disturbance and Succession,  | 349 |
| Focal Species in Conserving Diversity,                                     | 351 |
| Foundation Species,  | 352 |
| Keystone Species,  | 352 |
| Endemics and Rare and Endangered Species,                                  | 353 |
| Diversity and the Functioning of Ecosystems,                               | 354 |
| Biodiversity–Productivity Relationship,                                    | 354 |
| The Role of Biodiversity in Ecosystem Stability,                           | 356 |
| Forest Management and Diversity,   | 357 |
| Effects of Traditional Forest Management on Diversity,                     | 357 |
| Preserving Diversity in Managed Forests,                                   | 358 |
| Ecological Forestry: Incorporating Biodiversity<br>into Forest Management, | 359 |
| Variable-Retention Harvest System,   | 360 |
| Designing a Variable-Retention Harvest System,                             | 361 |
| How Well Does Variable Retention Conserve<br>Biodiversity?,                | 361 |
| Epilog: Conserving Ecosystem and Biological Diversity,                     | 363 |
| Suggested Readings,  | 364 |

## PART 5 Forest Ecosystem Dynamics

### 15 Long-Term Forest Ecosystem and Vegetation Change 367

|   |     |
|---|-----|
| Change Before the Pleistocene Age,                                | 367 |
| Pleistocene Glaciations,  | 368 |
| Ecosystem and Vegetational Change Since the Last Glacial Maximum, | 370 |

|   |     |
|---|-----|
| Eastern North America,  | 370 |
| Overall Migration Sequence and Patterns,                          | 371 |
| Ecosystem Change in the Southern Appalachians,                    | 373 |
| Western North America,  | 373 |
| Patterns of Tree Genera and Species Migrations,                   | 375 |
| Migration Irregularities and Disturbance,                         | 377 |
| Migration From Glacial Microrefugia,                              | 377 |
| Independent Migration and Similarity of Communities Through Time, | 379 |
| Suggested Readings,   | 380 |

## 16 Disturbance

381

|   |     |
|---|-----|
| Concepts of Disturbance,                  | 382 |
| Defining a Disturbance,                   | 382 |
| Disturbance as an Ecosystem Process,      | 384 |
| Sources of Disturbance,                   | 386 |
| Major Disturbances in Forest Ecosystems,  | 387 |

  - Early Intervention Strategies, 607
  - Management Approaches for Established Invasive Species, 607
  - Novel Ecosystems and Invasive Species, 608
- Suggested Readings, 610

**22 Forest Landscape Ecology****611**

- Concepts of Landscape Ecology, 612
- Forest Fragmentation and Connectivity, 615
  - Patches in Forest Ecology, 616
  - Forest Fragmentation, 617
    - Ecological Effects, 617
  - Connectivity, 620
- Disturbances on Landscapes, 622
  - Effects of Heterogeneity on Disturbances, 622
    - Hurricanes in New England, 622
    - Landscape Pattern Effects on Disturbance Spread, 625
  - Effects of Disturbances on Heterogeneity, 625
    - Stand-Replacing Wildfires in Yellowstone National Park, 627
  - Historical Range of Variability, 630
- Interactions of Landscape Patterns and Ecological Processes, 632
  - Leaf Area and Productivity, 633
  - Forest Carbon Dynamics, 635
  - Nutrient Dynamics, 636
- Suggested Readings, 638

## **23 Sustainability of Forest Ecosystems 639**

|  |     |
|--|-----|
| Concepts of Sustainability,                          | 639 |
| The Prevalence of Human Values in Forest Ecology,    | 639 |
| Historical Perspective of Sustainability in Forests, | 641 |
| Ecosystem Services,                                  | 642 |
| Toward a Definition of Sustainability,               | 644 |
| Where Do We Go From Here?,                           | 646 |
| Epilog: Earth as a Metaphor for Life,                | 648 |
| Suggested Readings,                                  | 650 |
