Theoretical Research: Results and Proposals

VMAP: A Dublin Core Application Profile for Musical Resources	1
<i>Carlos A. Iglesias, Mercedes Garijo, Daniel Molina, and Paloma de Juan</i>	
Usage-Oriented Topic Maps Building Approach	13
<i>Nebrasse Ellouze, Nadira Lammari, Elisabeth Métais, and Mohamed Ben Ahmed</i>	
ManagemOnt: A Semantic Approach to Software Engineering Management Process	24
<i>Baris Ulu and Banu Diri</i>	
Clarifying the Semantics of Relationships between Learning Objects . . .	35
<i>M. Elena Rodríguez, Jordi Conesa, and Miguel Ángel Sicilia</i>	
A Framework for Automatizing and Optimizing the Selection of Indexing Algorithms	48
<i>Mihaela Brut, Sébastien Laborie, Ana-Maria Manzat, and Florence Sèdes</i>	
Empirical Analysis of Errors on Human-Generated Learning Objects Metadata	60
<i>Cristian Cechinel, Salvador Sánchez-Alonso, and Miguel Ángel Sicilia</i>	
Analysis of Educational Metadata Supporting Complex Learning Processes	71
<i>Jorge Torres and Juan Manuel Dodero</i>	
A Fine-Grained Metric System for the Completeness of Metadata	83
<i>Thomas Margaritopoulos, Merkourios Margaritopoulos, Ioannis Mavridis, and Athanasios Manitsaris</i>	
Unified Semantic Search of Data and Services	95
<i>Domenico Beneventano, Francesco Guerra, Andrea Maurino, Matteo Palmonari, Gabriella Pasi, and Antonio Sala</i>	
Preliminary Explorations on the Statistical Profiles of Highly-Rated Learning Objects	108
<i>Elena García-Barriocanal and Miguel Ángel Sicilia</i>	

Applications: Case Studies and Proposals

A Semantic Web Based System for Context Metadata Management <i>Svetlin Stefanov and Vincent Huang</i>	118
An XML Pipeline Based System Architecture for Managing Bibliographic Metadata <i>Johannes Textor and Benjamin Feldner</i>	130
DataStaR: Bridging XML and OWL in Science Metadata Management <i>Brian Lowe</i>	141
Structured Metadata for Representing and Managing Complex 'Narrative' Information <i>Gian Piero Zarri</i>	151
A Semantic Web Framework to Support Knowledge Management in Chronic Disease Healthcare <i>Marut Buranarach, Thepchai Supnithi, Noppadol Chalortham, Vasuthep Khunthong, Patcharee Varasai, and Asanee Kawtrakul</i>	164
Ontological Enrichment of the <i>Genes-to-Systems Breast Cancer</i> Database <i>Federica Viti, Ettore Mosca, Ivan Merelli, Andrea Calabria, Roberta Alfieri, and Luciano Milanese</i>	171
An Ontology Based Approach to Information Security <i>Teresa Pereira and Henrique Santos</i>	183
Reusability Evaluation of Learning Objects Stored in Open Repositories Based on Their Metadata <i>Javier Sanz, Salvador Sánchez-Alonso, and Juan Manuel Dodero</i>	193
A Comparison of Methods and Techniques for Ontological Query Expansion <i>Fabio Sartori</i>	203
Exploring Characterizations of Learning Object Repositories Using Data Mining Techniques <i>Alejandra Segura, Christian Vidal, Victor Menendez, Alfredo Zapata, and Manuel Prieto</i>	215

Special Track: Metadata and Semantics for Agriculture, Food and Environment

Assuring the Quality of Agricultural Learning Repositories: Issues for the Learning Object Metadata Creation Process of the CGIAR <i>Thomas Zschocke and Jan Beniest</i>	226
--	-----

Ontology Design Parameters for Aligning Agri-Informatics with the Semantic Web	239
<i>C. Maria Keet</i>	
Developing an Ontology for Improving Question Answering in the Agricultural Domain	245
<i>Katia Vila and Antonio Ferrández</i>	
A Service Architecture for Facilitated Metadata Annotation and Ressource Linkage Using agroXML and ReSTful Web Services	257
<i>Daniel Martini, Mario Schmitz, Jürgen Frisch, and Martin Kunisch</i>	
A Water Conservation Digital Library Using Ontologies	263
<i>Lukasz Ziemba, Camilo Cornejo, and Howard Beck</i>	
Evaluation of a Metadata Application Profile for Learning Resources on Organic Agriculture	270
<i>Nikos Palavitsinis, Nikos Manouselis, and Salvador Sanchez Alonso</i>	
Ontology for Seamless Integration of Agricultural Data and Models	282
<i>Ioannis N. Athanasiadis, Andrea-Emilio Rizzoli, Sander Janssen, Erling Andersen, and Ferdinando Villa</i>	
Assessment of Food and Nutrition Related Descriptors in Agricultural and Biomedical Thesauri	294
<i>Tomaz Bartol</i>	
Networked Ontologies from the Fisheries Domain	306
<i>Caterina Caracciolo, Juan Heguiabehere, Margherita Sini, and Johannes Keizer</i>	
Improving Information Exchange in the Chicken Processing Sector Using Standardised Data Lists	312
<i>Kathryn Anne-Marie Donnelly, Joop van der Roest, Stefán Torfi Höskuldsson, Petter Olsen, and Kine Mari Karlsen</i>	
Navigation as a New Form of Search for Agricultural Learning Resources in Semantic Repositories	322
<i>Ramiro Cano, Alberto Abián, and Elena Mena</i>	
Author Index	329
