Preface — VII

Acknowledgments — IX

1 First steps in automatic complexity — 1

- 1.1 Words — 1
- 1.1.1 Occurrences and powers — 2
- 1.2 Automata — 5
- 1.2.1 Formal proofs — 9
- 1.2.2 Subword inequalities — 14
- 1.3 Upper bounds — 18
- 1.4 Maximum-depth Dyck words — 20
- 1.4.1 Diophantine equations — 23
- 1.4.2 Generalized maximum-depth Dyck words — 25
- 1.5 Open problems — 28
- 1.6 Exercises — 29

2 Nondeterminism and overlap-free words — 33

- 2.1 Introduction — 33
- 2.2 Powers and complexity — 36
- 2.2.1 Square-free words — 36
- 2.2.2 Morphisms — 38
- 2.2.3 Overlap-free words — 41
- 2.2.4 Almost square-free words — 47
- 2.3 Open problems — 50
- 2.4 Exercises — 50

3 Edge complexity and digraphs — 52

- 3.1 Edge-counting automatic complexity — 52
- 3.2 Power-bordered words — 57
- 3.3 One-cycle-free-path automata — 59
- 3.4 Truncated complexity — 60
- 3.5 Covering, plurality, majority — 64
- 3.6 Bounding deterministic complexity — 67
- 3.6.1 Deterministic shortness — 71
- 3.7 Open problems — 75
- 3.8 Exercises — 75

4 The many variants — 77

- 4.1 Master diagram — 77

4.2	Nonbranching complexity —	81
4.3	Unambiguous complexity —	86
4.4	Bi-determinism —	90
4.5	Permutation automatic complexity —	91
4.6	Counter automata —	99
4.7	Open problems —	100
4.8	Exercises —	101
5	The incompressibility theorem —	103
5.1	Incompressibility —	103
5.2	Deepening the power-complexity connection —	104
5.3	Open problems —	108
5.4	Exercises —	110
6	Conditional automatic complexity —	111
6.1	Basics —	111
6.2	Bearing on the unique vs. exact problem —	113
6.3	A Jaccard distance metric —	114
6.4	A normalized information distance metric —	119
6.5	Open problems —	121
6.6	Exercises —	121
7	Logical depth and automatic complexity —	122
7.1	Introduction —	122
7.1.1	Cycles as gadgets —	125
7.1.2	A deep example —	126
7.1.3	A curious inequality —	127
7.2	Parsimonious reductions —	128
7.3	Computational complexity —	129
7.4	Logical depth —	132
7.4.1	A subword inequality —	134
7.4.2	Future work —	135
7.5	Exercises —	136

Bibliography — 137

Index — 141
