

Contents

Part I Invited Speakers

Two new techniques for generating exactly incompressible approximate velocities

Bernardo Cockburn..... 3

Role of High-End Computing in Meeting NASA's Science and Engineering Challenges

Rupak Biswas, Eugene L. Tu, William R. Van Dalsem..... 14

Recent Advances of Multi-phase Flow Computation with the Adaptive Soroban-grid Cubic Interpolated Propagation (CIP) Method

Takashi Yabe, Youichi Ogata, Kenji Takizawa 29

Part II Schemes

On the Computation of Steady-State Compressible Flows Using a DG Method

Hong Luo, Joseph D. Baum, Rainald Löhner 47

Space-Time Discontinuous Galerkin Method for Large Amplitude Nonlinear Water Waves

Yan Xu, Jaap J.W. van der Vegt..... 53

A discontinuous Galerkin method with Hancock-type time integration for hyperbolic systems with stiff relaxation source terms

Yoshifumi Suzuki, Bram van Leer 59

Very High Order, Non-Oscillatory Fluctuation Distribution Schemes	
<i>M.E.Hubbard, N.Z.Mebrate</i>	65
High-order residual distribution : discontinuity capturing crosswind dissipation and diffusion	
<i>N. Villedieu-Ligout, M. Ricchiuto, H. Deconinck</i>	71
High-Order Fluctuation-Splitting Schemes for Advection-Diffusion Equations	
<i>Hiroaki Nishikawa and Philip Roe</i>	77
Construction of Higher Order Residual Distribution Schemes	
<i>Rémi Abgrall and Cédric Tavé</i>	83
Stable and convergent residual distribution for time-dependent conservation laws	
<i>Mario Ricchiuto, Rémi Abgrall</i>	89
An ALE Formulation of the Multidimensional Residual Distribution Scheme for Computations on Moving Meshes	
<i>Jirí Dobes, Herman Deconinck</i>	95
Solution of the steady Euler equations using Fluctuation Splitting schemes on quadrilateral elements	
<i>D. T. Rubino, P. De Palma, G. Pascazio, M. Napolitano</i>	101
A Residual-Based Compact Scheme for All-Speed Flows on Unstructured Grids	
<i>Christophe Corre, Alberto Beccantini, Thibaud Kloczko</i>	107
Vorticity Preserving Scheme for Unsteady Compressible Flows	
<i>Fabrice Falissard, Alain Lerat, Jacques Sidès</i>	113
Extension of the SD Method to Viscous Flow on Unstructured Grids	
<i>Z. J. Wang, Yuzhi Sun, C. Liang, Yen, Liu</i>	119
Strictly Stable High Order Difference Methods for the Compressible Euler and Navier-Stokes Equations	
<i>Bernhard Müller</i>	125
Uniform Flow Preserving Property of High Order Upwind Finite Difference Schemes on Generalized Coordinate System	
<i>Taku Nonomura, Nobuyuki Iizuka, Kozo Fujii</i>	131

Implementation of an Enhanced Flux Formulation for Unsteady Navier-Stokes Solutions <i>G. Xia, S. Sardeshmukh, V. Sankaran, C. L. Merkle</i>	137
Computation of Eigenspaces of Hyperbolic Systems <i>S.K. Godunov, O.B. Feodoritova, V.T. Zhukov</i>	143
A Proposed Cure to the Carbuncle Phenomenon <i>Farzad Ismail, Philip L. Roe, Hiroaki Nishikawa</i>	149
The High Order WLSQR Scheme and its Applications in Turbomachinery <i>Jivri Fürst</i>	155
Building Better (Weighted) ENO Methods <i>William J. Rider</i>	161
Discontinuity Diagnosis Essentially Non-Oscillatory Schemes <i>Yun-Feng Liu, Jian-Ping Wang</i>	167
Third Order Reconstruction on Unstructured Highly Irregular 3D Meshes <i>J. Rokicki, R. Wieteska</i>	173
An Intrinsically Multi-Dimensional Acoustics Convection Upstream Resolution Algorithm for the Euler Equations <i>Joe Iannelli</i>	179
Multi-dimensional Limiting Process for Two- and Three-dimensional Flow Physics Analyses <i>Sung-Hwan Yoon, Chongam Kim and Kyu-Hong Kim</i>	185
A Multidimensional Kinetic Upwind Method for Euler Equations <i>Keshav S Malagi, P S Kulkarni, S M Deshpande</i>	191
High Resolution Quantum Kinetic Beam Schemes and Its Applications to Ideal Quantum Gas Dynamical Flows <i>Y. H. Shi, J. Y. Yang</i>	197
Semi-GLS Stabilization of FEM Applied to Incompressible Flows with Higher Reynolds Numbers <i>Pavel Burda, Jaroslav Novotný, Jakub vSístek</i>	203
Finite volume box scheme for a certain class of nonlinear conservation laws in mixed form <i>H. Beaugendre, A. Ern</i>	209

Numerical study of the Colocated Clustered Finite Volume Scheme

O. Touazi, E. Chénier, R. Eymard 215

Arbitrary High Order Finite Volume Schemes on Unstructured Meshes

Michael Dumbser, Claus-Dieter Munz 221

Part III Algorithms

A high scalability parallel algebraic multigrid solver

T. Saad, M. Darwish 231

Jacobian-Free Newton-Krylov Methods: Issues and Solutions

David W. Zingg, Todd T. Chisholm 237

Non-stationary two-stage relaxation based on the principle of aggregation multi-grid

R. Haelterman, J. Vierendeels, D. Van Heule 243

The efficient and accurate solution of porous media flow problems with strongly discontinuous coefficients

Y.C. Lee, P.H. Gaskell 249

Stability of Pressure-Correction Algorithms for Low-Speed Reacting and Non-Reacting Flow Simulations

Pieter Rauwoens, Krista Nerinckx, Jan Vierendeels, Bart Merci 255

A simple hybrid well-balanced method for a 2D viscous shallow water model

F. Marche 261

A kinetic energy-preserving P1 iso P2/P1 finite-element method for computing unsteady incompressible flows

David Vanden-Abee, Deryl Snyder, Yves Detandt and Gérard Degrez .. 267

Study on the segregation algorithms of the incompressible Navier-Stokes equations using P1P1/P2P1 finite element formulation

Myung H. Cho, Hyoung G. Choi, Jung Y. Yoo 273

A Mach-uniform algorithm: coupled versus segregated approach

Krista Nerinckx, Jan Vierendeels, Erik Dick 279

Crank-Nicolson Scheme for Solving Low Mach Number Unsteady Viscous Flows Using an Implicit Preconditioned Dual Time Stepping Technique <i>D. Vigneron, G. Deliége, J.-A. Essers</i>	285
Heated Wake by Deferred Corrected ULTRA <i>Salem Bouhairie, Vincent H. Chu</i>	291
Convergence Acceleration for Euler Equation based on SPR <i>Dohyung Lee, Hyungmin Kang and Dongho Lee</i>	297
Acceleration of Unsteady Incompressible Flow Calculation Using Extrapolation Methods <i>Kenjiro Shimano, Shun Yonezu, Yoshiteru Enomoto</i>	303
Improved Numerical Simulations of Incompressible Flows Based on Viscous/Inviscid Interaction Procedures <i>M. Hafez, A. Shatalov, M. Nakajima</i>	309
 Part IV AMR - Adaptive mesh techniques	
A Parallel Unstructured Overset Mesh Technique for Unsteady Flow Simulations <i>Mun Seung Jung, Oh Joon Kwon</i>	317
A Parallel Overset Adaptive Cartesian/Prism Grid Method for Moving Boundary Flows <i>Ravishakar Kannan, Z.J. Wang</i>	323
Navier-Stokes Simulation of Local Winds Over the Earth's Topography <i>Neal M. Chaderjian, Jasim U. Ahmad, Marc G. Kramer, Terry L. Holst</i>	329
Grid-adaptive Simulations of Relativistic Flows <i>R. Keppens, Z. Meliani</i>	335
Solution of Laminar Combusting Flows Using a Parallel Implicit Adaptive Mesh Refinement Algorithm <i>Scott A. Northrup, Clinton P. T. Groth</i>	341
Towards Direct Numerical Simulation of a Diffusion Flame-Shock Interaction with an AMR Algorithm <i>G. Billet, J. Ryan and M. Borrel</i>	347
Adaptive Multigrid Solutions of Thin Film Flows over Topography <i>Y.C. Lee, H.M. Thompson, P.H. Gaskell</i>	353

A meshless solver for computing viscous flows on Cartesian like grids	
<i>Munikrishna N., Karthikeyan N., Balakrishnan N.</i>	359
Immersed boundary technique for compressible flow simulations on semi-structured grids	
<i>M. D. de Tullio, P. De Palma, G. Iaccarino, G. Pascazio, M. Napolitano</i>	365
Incompressible Flow Simulations Using Virtual Boundary Method with New Direct Forcing Terms Estimation	
<i>Hidetoshi Nishida, Kazuhiro Sasao</i>	371
A Hybrid Building-Block and Gridless Method for Computing Shock Waves	
<i>Hong Luo, Joseph D. Baum, Rainald Löhner</i>	377
A Residual estimator based adaptation strategy for compressible flows	
<i>Ganesh N., Nikhil V Shende, Balakrishnan N.</i>	383
Anisotropic solution-adaptive technique applied to simulations of steady and unsteady compressible flows	
<i>Jerzy Majewski, Aristotelis N. Athanasiadis</i>	389
Simulation of Flow around Wing Sections by Building-Cube Method	
<i>Kazuhiro Nakahashi, Yota Sakurai</i>	395
Robust Mesh Deformation using the Linear Elasticity Equations	
<i>Richard P. Dwight</i>	401
 Part V DNS and LES	
Identification and role of coherent structures in two-dimensional turbulence	
<i>Ch.-H. Bruneau, P. Fischer, H. Kellay</i>	409
Temporal Evolution of Dominant Flow Structures in Turbulent Channel Flow	
<i>Giancarlo Alfonsi, Leonardo Primavera</i>	415
LES of passive scalar in compressible mixing layers	
<i>C. Le Ribault</i>	421
Buoyancy Effect on Turbulence using Blocks	
<i>Vincent H. Chu, Wihel Altai, Camilo E. Pinilla</i>	427

Direct numerical simulation of Taylor-Couette flows in the fully turbulent regime <i>Yves Detandt, Mikhail Krivilyov, Yacine Salhi, David Vanden Abeele, Jan Fransaer</i>	433
Flux Limiting Schemes for Implicit Large Eddy Simulation of Synthetic Jets <i>Sanjay Patel, Dimitris Drikakis</i>	439
Implicit Large Eddy Simulation of a Flow around a Cylindrical Body <i>Satoko Komurasaki, Kunio Kuwahara</i>	445
LES study of the impact of the wake structures on the aerodynamics of a simplified ICE2 train subjected to a side wind <i>Hassan Hemida, Sinivsa Krajnović</i>	451
Use of Immersed Boundary Technique in a Cartesian LES solver to study wake flows <i>J. Bodart, R. Giammanco, P. Rambaud, C. Benocci</i>	457
Stochastic generation of velocity fluctuation for turbulent inflow and initial condition <i>M. Fathali, M. Klein, T. Broeckhoven, C. Lacor, M. Baelmans</i>	463
Study on Numerical and Modelling Error in LES of a Channel Flow Using Explicit Filtering <i>Tellervo T. Brandt</i>	469
Wall Boundary Conditions for Variational Multiscale Large-Eddy Simulations <i>S. J. Hulshoff, E. A. Muntz</i>	475
The Sampling Based Dynamic Procedure for Numerical Discretization Enhancement <i>Dieter Fauconnier, Chris De Langhe, Erik Dick</i>	481
Application of a Unique Eddy-Viscosity Model for a Hybrid LES-RANS Method <i>Michael Breuer, Benoit Jaffrézic</i>	487
A locally superconvergent scheme for the simulation of turbulent flows in complex geometries <i>M.V. Salvetti, S. Camarri, B. Koobus, A. Dervieux</i>	493
URANS Analysis of Flow-Induced Cavity Resonances <i>M. Mesbah, W. Desmet, M. Baelmans</i>	499

Revisiting URANS computations of the flow behind a backward-facing step using second moment closures <i>A. Fadaei-Ghotbi, R. Manceau, J. Borée</i>	505
Contribution of Turbulence Equation Terms to the Shear Stress Balance <i>Dragan Kovzulović, Thomas Röber</i>	511
 Part VI Optimisation and Flow Control	
Optimum Shape Design for Unsteady Three-Dimensional Viscous Flows <i>S. Nadarajah, A. Jameson</i>	519
Comparison of Exact and Approximate Discrete Adjoint for Aerodynamic Shape Optimization <i>Giampietro Carpentieri, Michel J.L van Tooren, Barry Koren</i>	525
Adjoint Sensitivity Computations for an Embedded-Boundary Cartesian Mesh Method and CAD Geometry <i>Marian Nemec, Michael J. Aftosmis</i>	531
Optimum shape design through multilevel gradient-based method using Bézier parametrisation <i>M. Martinelli, F. Beux</i>	537
High-Fidelity Multi-criteria Aero-structural Optimisation using Hierarchical Parallel Evolutionary Algorithms <i>L. F.González, L. Damp, J. Périaux, K. Srinivas</i>	543
Flow Control Optimization Using Neural Networks and Genetic Algorithms <i>Raymond P. LeBeau, Jr., Narendra K. Beliganur, Thomas Hauser</i>	549
Shape Optimization for Dense Gas Flows in Turbine Cascades <i>Pietro Marco Congedo, Paola Cinnella, Christophe Corre</i>	555
Control of Flow Past a Stalled NACA0015Airfoil <i>Meiliang Mao, Xiaogang Deng, Jianqiang Chen</i>	561
Active control of a transitional flow over a backward-facing step <i>E. Creusé, A. Giovannini, I. Mortazavi</i>	567
Synthetic Jet Actuator Modeling for Flow Control Applications <i>M. Ferlauto, R. Marsilio</i>	573

Numerical Study of Transonic Drag Reduction for Flow Past Airfoils Using Active Flow Control <i>Jose Vadillo, Ramesh K. Agarwal</i>	579
 Part VII Two-phase and multimaterial flows	
Level Set based Finite Element Method of Bubble-in-Liquid Simulation <i>Hyoung G. Choi, Jung Y. Yoo</i>	589
Level Set method for Curvature-driven Flows in Microfluidics <i>Paul Vigneaux</i>	595
Mesh-Based Microstructure Representation Algorithm for Simulating Pore-scale Transport Phenomena in Porous Media <i>May-Fun Liou, Issac Greber</i>	601
The Numerical Simulation of Liquid Sloshing in Microgravity <i>Roel Luppès, Joop A. Helder, Arthur E.P. Veldman</i>	607
Numerical Prediction of Interfacial Instability <i>Robert Nourgaliev, Meng-Sing Liou, Theo Theofanous</i>	613
A Lattice Boltzmann based Single-Phase Model: Surface Tension and Wetting <i>Xiu Qing Xing, David Lee Butler, Chun Yang</i>	619
Hyperbolicity, Discontinuities, and Numerics of Two-Fluid Models <i>Meng-Sing Liou, Loc Nguyen, Chih-Hao Chang, Sveta Sushchikh, Robert Nourgaliev, Theo Theofanous</i>	625
Computation of Multiphase Mixture Flows using RoeM and AUSMPW+ Schemes <i>Seung-Won Ihm, Kyung Rok Lee, Chongam Kim, and Kyu Hong Kim</i> ..	631
A relaxation method for the Kapila model <i>C. Berthon, B. Braconnier, J. Claudel, B. Nkonga</i>	637
Direct numerical simulation of bubbly Taylor-Couette flow <i>Thomas Nierhaus, Jean-Francois Thomas, Yves Detandt, David Vanden Abeele</i>	643
Numerical simulation of unsteady flow inside an impulsively started liquid drop <i>M. Krivilyov, J. Fransaer</i>	649

Accurate and Efficient Solution of 2D Steady Water Flows with Surface Waves and Turbulence

Jeroen Wackers, Barry Koren 655

Numerical analysis of bubble migration in thermocapillary flows of an open cylindrical container

Hiroaki Ohira, Satoshi Matsumoto, Takashi Mashiko, Shinichi Yoda, Yasuhiro Kamotani 662

Part VIII Hypersonic and supersonic flow

Numerical investigation of an effusion cooled thermal protection material

Volker Hannemann 671

Calculation of Transport Properties for Entry into the Martian Atmosphere

Johannes Baumgart, Tobias Leicht, Thierry Magin, Paolo Barbante, Pietro Rini, Gérard Degrez, Roger Grundmann 677

Numerical simulation of supersonic flow around a double ramp configuration and correlation with experiment

Fedorchenko I.A., Fedorova N.N., Kharlamova Yu.V., Gaisbauer U., and Kraemer E. 683

Effects of Mach number on the combustion zone length for a RAMAC configuration at sub-detonative mode

Tarek Bengherbia, Yufeng Yao, Pascal Bauer 689

A Finite Element/Finite Volume Mixed Solver

He Lixing, Zhang Laiping, Zhang Hanxin 695

Numerical Analysis for Magnetic Control of Heat-Transfer and Pressure in Hypersonic Shock Wave Interference Flows

Daisuke Tsubakino, Yoshiteru Tanaka, Kozo Fujii 701

Numerical Simulation of a Flat-Plate Hypersonic Shock Layer Perturbed by External Acoustic Waves

A.N.Kudryavtsev, S.G.Mironov, T.V.Poplavskaya, I.S.Tsyryulnikov 707

Numerical Simulation of Supersonic Turbulent Flows over Backward-Facing Steps

N.N. Fedorova, I.A. Bedarev 713

Unified Flow Solver Combining Boltzmann and Continuum Models for Simulations of Gas Flows for the Entire Range of Knudsen Numbers

V. V. Aristov, A. A. Frolova, S. A. Zabelok, V. I. Kolobov, R. R. Arslanbekov 719

Adaptive Boltzmann/Navier-Stokes Hybrid Method for Multi-Scale Gas Flow Simulation

Koji Morinishi 725

Computing Simulation of Hypersonic Magneto-Fluid-Dynamics Interaction

J.S. Shang 731

Numerical Simulation of R-M instability at High Mach Numbers

Fu Dexun, Ma Yanwen, Liang Xian 738

Part IX Multiphysics and interdisciplinary coupled flow problems

Boundary conditions by low-order modelling

Marcelo Buffoni, Haysam Telib, Angelo Iollo 747

Multi Scale Numerical Simulation of Dispersed Reacting Flow, with application to Chemical Vapor Deposition of Alumina

Andrey A. Markov 753

Computational Analysis of Flow through a Multiple Nozzle Driven Laser Cavity and Diffuser

M. A. Sriram, N. K. S. Rajan, P. S. Kulkarni 759

MHD Analysis of Force Acting on Dipole Magnetic Field in Magnetized Plasma Flow

Hiroyuki Nishida, Hiroyuki Ogawa, Yoshifumi Inatani 765

Performance of High Order Filter Methods for a Richtmyer-Meshkov Instability

B. Sjögreen, H.C.Yee 771

Unsteady Flow Simulation of High Speed Turbopumps

Cetin C. Kiris, Dochan Kwak, William Chan, Jeffrey A. Housman 777

Use of the Gaussian Moment Closure for the Modelling of Continuum and Micron-Scale Flows with Moving Boundaries

J. G. McDonald, J. S. Sachdev, C. P. T. Groth 783

Development of “MATIS-SC” for High Speed Steam Flow with Non-equilibrium Condensation <i>Ryo Morita, Fumio Inada</i>	789
Numerical Method for Near-critical Fluids of Arbitrary Material <i>Satoru Yamamoto and Atsushi Ito</i>	795
Flow Physics and Stokes’ Theorem in Wind Turbine Aerodynamics <i>Sven Schmitz, Jean-Jacques Chattot</i>	801
The Role of Separation Bubble on an Airfoil at Low Reynolds Numbers <i>Yusuke Nakae, Tatsuo Motohashi, Satoko Komurasaki, Kunio Kuwahara</i>	807
Effect of the thermal boundary conditions and physical properties variation on transient natural convection of high Prandtl number fluids <i>O. Younis, J. Pallares, F. X. Grau</i>	813
Aeroacoustic simulation of the flow in a Helmholtz resonator <i>Laurent Georges, Grégoire Winckelmans, Stéphane Caro, Philippe Geuzaine</i>	819
Explicit low dispersive and low dissipative non-centered finite differences and filters <i>Berland J., Bogeey C., Bailly C.</i>	825
A New Principle of Non-Reflecting and its Application to Hyperbolic Conservation Laws <i>Ching Y. Loh, Philip C.E. Jorgenson</i>	831
Numerical Solution of the Linearized Euler Equations Using Compact Schemes <i>Kris Van den Abeele, Jan Ramboer, Ghader Ghorbaniasl, Chris Lacor</i> ..	837
Transonic Aeroelastic Computations of a Delta Wing Configuration with High Fidelity Equations <i>Hiroshi Terashima, Kenji Ono</i>	843
Transonic Buffet over Symmetric Airfoils <i>Alexander Kuz'min, Alexey Shilkin</i>	849
Aerodynamic Performance of a Deforming Elastic Body in Supersonic Flow <i>Tomohisa Hashimoto, Koji Morinishi, Nobuyuki Satofuka</i>	855

CAD-Centric Framework for Aero-mechanical Optimization - Counter-Rotating Fan Design <i>Hiromasa Kato, Stéphane Pierret, Rajan Filomeno Coelho</i>	861
Aeroelastic Solutions for Viscous Flows using the Time Accurate and Non-Linear Frequency Domain Methods <i>F. Kachra, S. Nadarajah, C. Tatossian</i>	867
Role of Interpolation in Airflow Induced Vibration in Hard Disk Drive Enclosures <i>S. Ali, M. Damodaran</i>	873
Computation of fluid structure interaction with application to three-Dimensional combustion system <i>Zinedine Khatir</i>	879
Numerical Computations of Unsteady Aerodynamics of Projectiles using an Unstructured Technique <i>Jubaraj Sahu</i>	886
