

Table of Contents

I Introduction

Introduction.....	3
<i>David Forsyth (U.C. Berkeley) and Joe Mundy (GE Corporate Research and Development)</i>	
An Empirical-Statistical Agenda for Recognition	9
<i>David Forsyth (U.C. Berkeley)</i>	
A Formal-Physical Agenda for Recognition	22
<i>Joe Mundy (GE Corporate Research and Development)</i>	

II Shape

Shape Models and Object Recognition	31
<i>Jean Ponce, Martha Cepeda, Sung-il Pae, and Steve Sullivan (UIUC)</i>	
Order Structure, Correspondence, and Shape Based Categories	58
<i>Stefan Carlsson (KTH - Stockholm)</i>	
Quasi-Invariant Parameterisations and Their Applications in Computer Vision	72
<i>Jun Sato (Nagoya IT) and Roberto Cipolla (Cambridge)</i>	

III Shading

Representations for Recognition Under Variable Illumination	95
<i>David J. Kriegman (UIUC), Peter N. Belhumeur, and Athinodoros S. Georgiades (Yale)</i>	
Shadows, Shading, and Projective Ambiguity	132
<i>Peter N. Belhumeur (Yale), David J. Kriegman (UIUC), and Alan L. Yuille (Smith-Kettlewell)</i>	

IV Grouping

Grouping in the Normalized Cut Framework	155
<i>Jitendra Malik, Jianbo Shi, Serge Belongie, and Thomas Leung (Berkeley)</i>	

Geometric Grouping of Repeated Elements within Images	165
<i>Frederik Schaffalitzky and Andrew Zisserman (Oxford)</i>	
Constrained Symmetry for Change Detection	182
<i>Rupert W. Curwen and Joe L. Mundy (GE Corporate Research and Development)</i>	
Grouping Based on Coupled Diffusion Maps	196
<i>Marc Proesmans (Leuven) and Luc Van Gool (Leuven and ETH)</i>	

V Representation and Recognition

Integrating Geometric and Photometric Information for Image Retrieval ..	217
<i>Cordelia Schmid (INRIA), Andrew Zisserman (Oxford), and Roger Mohr (INRIA)</i>	
Towards the Integration of Geometric and Appearance-Based Object Recognition	234
<i>Joe Mundy and Tushar Saxena (GE Corporate Research and Development)</i>	
Recognizing Objects Using Color-Annotated Adjacency Graphs	246
<i>Peter Tu, Tushar Saxena, and Richard Hartley (GE Corporate Research and Development)</i>	
A Cooperating Strategy for Objects Recognition	264
<i>Antonio Chella, Vito Di Gesù, Ignazio Infantino, Daniela Intravaia, and Cesare Valenti (Palermo)</i>	

VI Statistics, Learning, and Recognition

Model Selection for Two View Geometry: A Review	277
<i>Philip H.S. Torr (Microsoft)</i>	
Finding Objects by Grouping Primitives	302
<i>David Forsyth, John Haddon, and Sergey Ioffe (U.C. Berkeley)</i>	
Object Recognition with Gradient-Based Learning	319
<i>Yann LeCun, Patrick Haffner, Léon Bottou, (AT&T Labs - Research), and Yoshua Bengio (Université de Montréal)</i>	

Author Index	347
