

Contents

1	Introduction	1
1.1	Positron Annihilation in Chemistry	1
1.2	History of Chemistry-Oriented Positron Annihilation Studies	5
1.3	Review of Physics-Oriented Positron Research	9
1.4	The Content and Intention of this Book	12
2	Theory	15
2.1	The Annihilation Probability	15
2.2	Atomic Physics of Positronium (Ps)	21
2.3	Application of the Theory	25
3	Experimental Techniques	29
3.1	Positron Lifetime (LT) Technique	29
3.1.1	Elementary Description of a LT Spectrometer	30
3.1.2	Special Problems of LT Measurements	32
3.1.3	General Remarks on the Data Analysis	35
3.1.4	Data Analysis of LT Spectra	36
3.2	Angular Correlation (AC) Measurements	37
3.2.1	Experimental	37
3.2.2	Data Analysis of AC Spectra	41
3.3	Doppler Broadening (DB) Measurements	42
3.4	Miscellaneous Measurements	44
4	Light Particle States in Insulating Matter	48
4.1	General Remarks	48
4.2	The Excess Electron	49
4.3	The Positron States in Liquids	53
4.4	The Ps States in Liquids	54
4.5	Short Remarks on Light Particle States in Solids and Gases	61
4.6	Measurable Properties of Light Particles	63

5	The Positron Spur and Ps Formation in Pure Liquids	66
5.1	The Positron Track and its Terminal Spur	66
5.2	Homogeneous, Long Time Irradiation by Positron Slowing Down	69
5.3	Determination of the Ps Yield	71
5.4	Formation of Ps in the Positron Spur	77
5.5	The Measured Ps Yields for Pure Liquids	80
6	Solvated Positron Reactions. Models of Reaction Kinetics	88
6.1	Hydrated Positron Reactions with Halides	89
6.2	Reaction Kinetics in Positron Annihilation	98
6.3	Discussion of e_{aq}^C Reactions. Low Concentrations	106
6.4	Discussion of e_{aq}^C Reactions. High Concentrations	110
7	Positronium Formation in Solutions	112
7.1	Special Cases of Ps Formation in Nonpolar Mixtures	112
7.2	Theory of Ps Inhibition and Antiinhibition	116
7.3	Empirical Expression for the Ps Yield	118
7.4	Positronium Formation in Mixtures of Nonpolar Liquids	120
7.5	Positronium Formation in Solutions of Polar Liquids	132
7.6	Miscellaneous Ps Yield Effects	146
7.7	The Older Ps Formation Models	150
8	Positronium Reactions in Solutions	155
8.1	Kinetic Equations of Positronium Reactions	155
8.2	An Example of Ps Quenching and Inhibition	162
8.3	Positronium Quenching by Mainly Organic Molecules in Solutions	165
8.4	Paramagnetic Quenching of Positronium in Solutions	176
8.5	Positronium Reactions with Ions in Aqueous Solutions	183
9	Principles of Positron Annihilation in Molecular Solids	193
9.1	Positronium Bloch Functions and Ps Trapping in Defects	194
9.2	Positronium Trapping in Vacancies in Plastic Crystals	200
9.3	Positronium Formation in Solid Aromatic Hydrocarbons	206
9.4	Positronium in Some Other Molecular Crystals	211
9.5	Slow-Positron Beam Studies of Solids	217
10	Polymers and Miscellaneous Molecular Compounds	221
10.1	Transition from Glassy to Normal Liquid State	221
10.2	Positron Annihilation in Polymers	223
10.3	Electric Field Dependence of the Ps Yield	229

10.4	Liquid Crystals and Miscellaneous Liquids	234
10.5	Miscellaneous Solids	239
11	Conclusion	246
	References	248
	Index of Chemicals	259
	Subject Index	265
