

Table of contents

<i>Silbermann, B.:</i> Obituary	1
<i>Maz'ya, V.:</i> In memory of Siegfried Pröbldorf	4
<i>Sprekels, J.:</i> Siegfried Pröbldorf – A short review of his scientific career	9
Publications of Siegfried Pröbldorf	13
Dissertations directed by Siegfried Pröbldorf	25
<i>Begehr, H., Dai, D.-Q.:</i> On the theory of a singular Vekua system	27
<i>Böttcher, A., Karlovich, Yu.I., Rabinovich, V.S.:</i> Singular integral operators with complex conjugation from the viewpoint of pseudodifferential operators	36
<i>Bourgeois, C., Nicaise, S.:</i> Biorthogonal wavelet approximation methods for the heat equation	60
<i>Efendiev, M.A., Wendland, W.L.:</i> Orientable and nonorientable Riemann-Hilbert problems	73
<i>Elschner, J., Schmidt, G.:</i> Diffraction in periodic structures and optimal design of binary gratings. Part II: Gradient formulas for TM polarization	89
<i>Gohberg, I., Krupnik, N.:</i> A connection between the determinant and characteristic numbers of an operator pencil	109
<i>Gorenflo, R., Mainardi, F.:</i> Random walk models approximating symmetric space-fractional diffusion processes	120
<i>Grigorieff, R.D., Sloan, I.H.:</i> On quolocution and collocation methods for singular integral equations with piecewise continuous coefficients, using continuous splines on quasi-uniform meshes	146
<i>Grudsky, S.M.:</i> Toeplitz operators and the modelling of oscillating discontinuities with the help of Blaschke products	162

<i>Hackbusch, W., Khoromskij, B.N.:</i> Towards $\mathcal{H}$ -matrix approximation of linear complexity	194
<i>Harbrecht, H., Schneider, R.:</i> Wavelet Galerkin schemes for 2D-BEM	221
<i>Junghanns, P., Mastroianni, G.:</i> On the stability of collocation methods for Cauchy singular integral equations on an interval	261
<i>Kravchenko, V.V.:</i> On a new approach for solving Dirac equations with some potentials and Maxwell's system in homogeneous media	278
<i>Laurita, C., Mastroianni, G.:</i> Revisiting a quadrature method for CSIE with weakly singular perturbation kernel	307
<i>Luther, U., Mastroianni, G.:</i> Fourier projections in weighted L^∞ -spaces	327
<i>Maz'ya, V., Shaposhnikova, T.:</i> Maximal Banach algebra in spaces of multipliers between Bessel potential spaces	352
<i>Natroshevili, D., Tediashvili, Z.:</i> Mixed type direct and inverse scattering problems	366
<i>Plato, R.:</i> On an inverse problem in groundwater filtration and its regularization by the conjugate gradient method	390
<i>Prestin, J., Selig, K.K.:</i> On a constructive representation of an orthogonal trigonometric Schauder basis for $C_{2\pi}$	402
<i>Prößdorf, S., Yamamoto, M.:</i> Discretization methods for the Lavrent'ev regularization	426
<i>Rathsfield, A.:</i> On a hierarchical three-point basis in the space of piecewise linear functions over smooth surfaces	442
<i>Roch, S.:</i> Algebras of approximation sequences: Fractality	471
<i>Vainikko, G.:</i> Fast solvers of generalized airfoil equation of index 1	498
<i>von Wolfersdorf, L.:</i> On plane potential flow past a porous circular cylinder	517
