Contents

1	Introduction	17
2	Use of SAP Interactive Forms by Adobe	23
2.1	PDF, PDF-Based Print Forms, and Interactive PDF Forms	23
2.1.1	PDF File Format	23
2.1.2	PDF-Based Print Forms	24
2.1.3	Interactive PDF Forms	27
2.1.4	Accessibility of PDF Forms	28
2.1.5	Using Interactive PDF Forms	29
2.2	Adobe Reader and Adobe Acrobat Family	29
2.2.1	Comparing Adobe Reader and Acrobat Professional	30
2.2.2	Selecting the Appropriate Adobe Reader Version	34
2.2.3	Useful Settings of Adobe Reader	34
2.3	Examples of PDF-Based Print Forms and Interactive PDF Forms ...	35
2.3.1	Example for Print Output	35
2.3.2	Creating an Interactive PDF Form	39
2.4	Using Interactive Forms in Business Processes	41
2.4.1	Online Scenarios	42
2.4.2	Offline Scenarios	42
2.4.3	Combining Online and Offline Scenarios	44
2.4.4	When Do You Use Online and Offline Scenarios?	44
2.4.5	Notes on the Use of Interactive Forms	46
2.5	Software Components and Architecture	47
2.5.1	Adobe LiveCycle Designer	48
2.5.2	ADS	53
2.5.3	Interaction of Components	57
2.6	Summary	61
3	Installation and Configuration	63
3.1	Preparations	63
3.2	Installation of the Java Application Server and ADS	65
3.2.1	SAPinst	65

3.2.2	SAP Management Console	68
3.2.3	Smoke Test	71
3.3	Installation of the ABAP Application Server	72
3.4	Basic Configuration	76
3.4.1	ADSUSER	77
3.4.2	ADSCaller	78
3.4.3	Web Service Test	79
3.5	Scenario-Dependent Configuration	80
3.5.1	RFC Destination	81
3.5.2	Destination and ICF Service	83
3.5.3	Web Service Proxy	88
3.5.4	ReaderRights Credential	90
3.5.5	FPCONNECT	93
3.6	Optional Configuration	94
3.6.1	Licensing	94
3.6.2	Credentials, Trusted Anchors, Certificate Revocation Lists ...	96
3.6.3	Service Properties	99
3.6.4	Fonts	100
3.6.5	XDCs	101
3.7	Error Analysis	102
3.8	Using ADS	104
3.9	Installation of Adobe LiveCycle Designer	106
3.10	Summary	107

4 Interface and Form Context 109

4.1	Structure of a Form	109
4.2	Interface of a Form	110
4.2.1	ABAP Dictionary-Based Interface	113
4.2.2	XML Schema-Based Interface	122
4.2.3	Smart Forms-Compatible Interface	124
4.2.4	Documentation of a Form Interface	126
4.3	Context of a Form	127
4.3.1	Creating a Form	128
4.3.2	Structure of a Form	131
4.3.3	Structures	134
4.3.4	Data Nodes	137
4.3.5	Text Nodes	139

4.3.6	Graphic Nodes	146
4.3.7	Address Nodes	150
4.3.8	Alternatives	153
4.3.9	Tables or Loops	155
4.3.10	Single Record Nodes	160
4.3.11	Conditions	163
4.3.12	Folders	164
4.4	Documentation of a Form	165
4.5	Summary	166

5 Creating Form Templates 167

5.1	Adobe LiveCycle Designer	167
5.1.1	Menu Bar and Toolbar	169
5.1.2	Script Editor	169
5.1.3	Hierarchy and Data View	170
5.1.4	Library and Object Palette	172
5.1.5	Form Design Area	173
5.2	The Basic Principles of the Form Template Design	174
5.2.1	Getting Started	175
5.2.2	Using Text Fields	179
5.2.3	Formatting Texts	184
5.3	Data Binding for Form Fields	185
5.3.1	Defining the Data Binding	186
5.3.2	Using Preview Data	187
5.4	Structuring Form Templates with Subforms	189
5.4.1	Adding a Hierarchy	190
5.4.2	Extending the Form Template	193
5.5	Using Master Pages and Rich Text Fields	199
5.5.1	Customizing the Master Page	199
5.5.2	Rich Text Fields	200
5.5.3	Alternative Method for Adding the Footer	202
5.5.4	Activating Forms	203
5.6	Reusing Form Objects	203
5.6.1	Creating Your Own Libraries	204
5.6.2	Adding Form Objects	205
5.6.3	Using Form Objects	206

5.7	Implicit Data Binding	206
5.7.1	Creating Copies of Forms	207
5.7.2	Implementing the Implicit Data Binding	208
5.8	Useful Functions in Adobe LiveCycle Designer	211
5.8.1	Customizing the Toolbars	211
5.8.2	Field Editor	212
5.8.3	Spelling	213
5.8.4	Managing Multiple Form Fields	213
5.9	Summary	213

6 Form Output 215

6.1	Print Program	216
6.1.1	Data Selection	216
6.1.2	Determining the Generated Function Module	219
6.1.3	Opening a Print Job	220
6.1.4	Calling the Generated Function Module	222
6.1.5	Closing the Print Job	225
6.1.6	Form Output	226
6.2	Spool System	229
6.3	Device Types for the Output	231
6.4	Special Output Scenarios	234
6.4.1	Archiving	234
6.4.2	Returning Documents	235
6.5	Error Analysis	239
6.5.1	Trace and PDF with Additional Information	239
6.5.2	Activating and Retrieving the Trace in the Print Program ...	243
6.5.3	More Detailed Error Messages	244
6.5.4	ICF Recorder	244
6.6	Performance Optimization	248
6.6.1	Bundling Forms	249
6.6.2	Activating Bundling	250
6.6.3	Deactivating Bundling	251
6.6.4	Bundling Example	252
6.6.5	Bundling the PDF Return	255
6.7	Translating Forms	256
6.7.1	Translating Short Texts	257
6.7.2	Translating Long Texts	258
6.7.3	Output of a Translated Form	259

6.8	XFP Output	260
6.9	Summary	262

7 Advanced Form Template Design 263

7.1	Advanced Techniques for Print Forms	263
7.1.1	Preparations	264
7.1.2	Floating Fields	264
7.1.3	Using Tables	266
7.1.4	Page Breaks	270
7.1.5	Subform Set	274
7.1.6	Using Patterns for Display Formatting	276
7.1.7	Form Output with Duplex Printing	280
7.1.8	Output of the Completed Form Template	281
7.2	Interactive PDF Forms	283
7.2.1	Preparations	283
7.2.2	From PDF-Based Print Forms to Interactive PDF Forms	288
7.2.3	Form Fields of Interactive PDF Forms	300
7.2.4	Dynamic Properties	307
7.3	Using Script Programs	311
7.3.1	First Script Program	312
7.3.2	Tips for Debugging Script Programs	315
7.3.3	Calculations via Script Programs	317
7.3.4	Input Validation via Script Programs	318
7.3.5	Controlling the Ready-for-Input Status and Visibility of Form Fields	319
7.3.6	Dynamic Tables	320
7.3.7	Access to Data Nodes and Form Fields	323
7.4	Using Barcodes	325
7.4.1	Properties of Barcodes	325
7.4.2	Notes on the Output of Barcodes with Zebra Label Printers	326
7.5	Tips for Increasing Performance	327
7.5.1	Merging Static Texts	327
7.5.2	Resolution of Used Images	327
7.5.3	Ensuring Correct Data Bindings	328
7.5.4	Nesting Depth of Subforms	328
7.5.5	Gradient Fills for PostScript Level 2	328
7.5.6	Using Script Programs	328

7.5.7	Limiting the Volume of Transferred Data for the Form Output	329
7.5.8	Using Fonts	329
7.6	Introduction to Accessible PDF Forms	329
7.6.1	Creating Accessible PDF Forms	330
7.6.2	Tips for Creating Accessible PDF Forms	331
7.7	Additional Information	332
7.7.1	Additional Information on the Internet	332
7.7.2	Adobe Designer Scripting Reference	333
7.7.3	XFA	333
7.7.4	Acrobat JavaScript Reference	334
7.8	Summary	334

8 Integration with Web Dynpro ABAP 335

8.1	Web Dynpro ABAP	335
8.1.1	Initial Overview	336
8.1.2	Step by Step: Hello World	339
8.2	Scenarios for Adobe Integration	347
8.2.1	Print Scenario	347
8.2.2	Online Scenario	348
8.2.3	Offline Scenario	349
8.3	The InteractiveForm UI Element	350
8.4	Interaction with Form Builder	352
8.4.1	Using Form Templates	352
8.4.2	The pdfOnly Case	364
8.5	Implementing Scenarios Using Web Dynpro ABAP	365
8.5.1	Print Scenario	365
8.5.2	Online Scenario	370
8.5.3	Offline Scenario	428
8.5.4	Specialized Topics	455
8.6	Summary	457

9 Internal Service Request 459

9.1	Introduction	460
9.1.1	Concepts in the ISR Framework	460
9.1.2	Prerequisites	462

9.1.3	What can be Configured and Where Can It Be Programmed?	463
9.2	SAP NetWeaver Portal Scenarios	464
9.2.1	Grouping of the Provided Scenarios	464
9.2.2	Calling the Request Form in the Portal	465
9.2.3	Applicant Role	466
9.2.4	Approver Role	472
9.2.5	Processor Role	474
9.2.6	Workflow or Worklist?	476
9.3	Getting Started—Creating a Plain Scenario	476
9.3.1	Preliminary Considerations for a New ISR Scenario	476
9.3.2	ISR Wizard	477
9.4	Customizing and Programming a Scenario	487
9.4.1	General Details	487
9.4.2	Application and Version	489
9.4.3	Notification Type	491
9.4.4	Entry Type	492
9.4.5	Characteristics	493
9.4.6	Activities and Automatic Updates in Notifications	495
9.4.7	The Processor's Activities from the Form	499
9.4.8	Processor Determination (BAdI QISR3) and Workflow	502
9.4.9	Service Costs and BAdI QISR2	506
9.4.10	Testing the Scenario	509
9.5	Request Forms as Adobe Forms	510
9.5.1	Specific Properties	510
9.5.2	Structure of the Interface and Form Context	511
9.5.3	Generating Adobe Forms from Characteristics	513
9.5.4	Generating New Characteristics from the Form	515
9.5.5	ISR Library—Special Screen Elements	515
9.6	Form Flow Logic	522
9.6.1	Data Structures within the ISR Framework	525
9.6.2	Default Values for the MODE, USER_COMMAND, and FORM_VIEW Parameters	525
9.6.3	Programming Examples	526
9.6.4	Reading and Setting the Special Request Fields in BAdI Methods	530
9.6.5	Error Handling During Checks	532
9.6.6	Controlling the Field Layout	532

9.7	ISR Architecture	533
9.7.1	ISR as a Toolset	533
9.7.2	Web Dynpro ABAP Component and How to Use It	534
9.7.3	Usage Options in SAP NetWeaver Portal	538
9.7.4	ISR_PROCESS_EVENT RFC	546
9.7.5	Additional Interfaces and Auxiliary Functions	548
9.8	Summary	550

10 ABAP PDF Object 553

10.1	Overview	553
10.2	Instantiating the PDF Object	554
10.3	Creating a PDF Document	556
10.3.1	Retrieving a Form	558
10.3.2	Transferring a Form via a Reference	559
10.3.3	Creating an Interactive PDF Document	559
10.3.4	Usage Rights	562
10.4	Processing an Interactive PDF Document	564
10.4.1	Filling Out an Interactive PDF Document	565
10.4.2	Data Extraction	567
10.4.3	Validation of a Digital Signature	568
10.5	Additional Methods of the PDF Object	571
10.6	Summary	571

11 Offline Scenarios via Web Services 573

11.1	Overview	573
11.2	Using WSDL Data Connections	574
11.2.1	Creating a Web Service Based on a BAPI	574
11.2.2	Creating a Form Template	581
11.2.3	Testing the Form Template	586
11.3	Using the SOAP Object in JavaScript	589
11.3.1	Creating a Web Service on the Basis of a Function Module	589
11.3.2	Creating a Form Template	595
11.3.3	Implementing the Web Service Calls	596
11.3.4	Testing the Form Template	601

11.4	Tips for Using Web Services	603
11.4.1	Calling the Web Service in the Click Event	603
11.4.2	Calling the Web Service Automatically When Opening the Form	603
11.4.3	Calling Multiple Web Services Using a Button	603
11.5	Summary	604
