

Contents

Part I	Local Relaxation in Bulk Polymers	
<hr/>		
Local Motions in Bulk Polymers. By L. Monnerie, J.L. Viovy, R. Dejean de la Batie, and F. Lauprêtre (With 18 Figures)		2
Large Scale Motion Near the Glass Transition By T.A. Vilgis (With 1 Figure)		18
Local Relaxation in Polymer Glasses Studied by NMR By H. Sillescu (With 4 Figures)		26
Synchrotron-Excited Fluorescence Study of Local Dynamics in Bulk Polymers By V. Veissier, J.L. Viovy, and L. Monnerie (With 1 Figure)		37
Secondary Relaxation in Glassy Polycyclohexylmethacrylate as Studied by Dynamic Light Scattering. By G. Fytas (With 3 Figures)		44
Dynamics of Solid Poly(methacrylate): An NMR Study By B. Gabrys, J.N. Clark, A.J. Horsewill, S. Clough, and J.S. Higgins (With 2 Figures)		49
Molecular Motions in <i>n</i> -Alkanes C_nH_{2n+2} ($n=19,23,24$) By F. Guillaume, J. Doucet, C. Sourisseau, and A.J. Dianoux (With 3 Figures)		54
Conformationally Disordered Crystalline Phase in VF_2 - F_3E Copolymers. By J.F. Legrand, P. Delzenne, A.J. Dianoux, M. Bee, C. Poinsignon, D. Broussoux, and V.H. Schmidt (With 4 Figures) . .		59
NMR, QENS and Conductivity Studies of the Anhydrous Polymer Protonic Conductor $P(EO)(H_3PO_4)_x$ By P. Donoso, W. Gorecki, C. Berthier, F. Defendini, C. Poinsignon, and M.B. Armand (With 5 Figures)		65
<hr/>		
Part II	Time-Dependent Small Angle Scattering Experiments	
<hr/>		
Diffusive Motion in Polymers as Studied by Time Resolved Small Angle Neutron Scattering. By A.R. Rennie (With 1 Figure)		72

Molecular Rheology of Polymer Melts – Relaxation of Partially Labeled Chains	
By J.L. Barea, R. Muller, and C. Picot (With 6 Figures)	86
Chain Conformation in Simple Elongational Flow. By R. Muller, C. Picot, R. Hocquart, and J.L. Barea (With 2 Figures)	93
Chain Molecule Diffusion in Glasses	
By E. Meurer, G.P. Hellmann, and A.R. Rennie (With 4 Figures) . .	98
Time Resolved Neutron Scattering on Periodically Deformed Model Networks. By R. Oeser, C. Picot, and J. Herz (With 8 Figures) . . .	104
A Transient Experiment Using Elastic Scattering in Order to Observe Macromolecular Relaxation in Rubbers and Melts	
By J. Bastide, M. Buzier, and F. Boué (With 4 Figures)	112

Part III	Fast Fluctuations near the Glass Transition and in the Glassy State
-----------------	--

Density Fluctuations near the Glass Transition in Polymers and Low Molecular Weight Liquids	
By G. Meier and E.W. Fischer (With 13 Figures)	122
Neutron Scattering Study of Relaxations and Vibrations in Molten Polyethylene. By U. Buchenau, M. Monkenbusch, M. Stamm, C.F. Majkrzak, and N. Nücker (With 4 Figures)	138
Changes in the Incoherent Inelastic Scattering of Amorphous Polybutadiene near the Glass Transition	
By B. Frick (With 4 Figures)	143
Dynamics of the Glass Instability of a Molecular Glass as Observed by Incoherent Neutron Scattering	
By F. Fujara and W. Petry (With 4 Figures)	149

Part IV	Large Scale Brownian Motion
----------------	------------------------------------

Neutron Spin Echo Studies of Intramolecular Motion in Dense Polymer Systems	
By D. Richter, B. Ewen, and R. Oeser (With 10 Figures)	156
Simulations of Restricted Polymer Diffusion	
By A. Baumgärtner (With 7 Figures)	170
Dynamic Properties of Entangled Polymers as Seen Through Light Scattering Results. By L. Leger (With 7 Figures)	184
A Generalized Rouse Theory for Entangled Polymeric Liquids	
By W. Hess	193

Dynamic Properties of Entangled Polymeric Solutions: Quasielastic Light Scattering and Dynamic Mechanical Measurements By P. Štěpánek, J. Jakeš, J. Hrouz, and W. Brown (With 3 Figures)	198
Length Fluctuations in Entangled Polymers: Application to Partly Labelled Chains. By J.L. Viovy (With 1 Figure)	203
Effect of Crosslinking and Deformation on the Dynamics of Polymer Chains by the Neutron Spin Echo Technique. By R. Oeser, F. Boué, J. Bastide, B. Farago, C. Picot, and D. Richter (With 3 Figures)	208
Monte Carlo Simulation of Dense and Branched Polymers: The Bond Fluctuation Method By I. Carmesin and K. Kremer (With 5 Figures)	214
Computer Simulation of Cooperative Motions in Condensed Polymer Systems Based on the Mechanism of Closed Loop Rearrangements By T. Pakula and S. Geyler (With 5 Figures)	220
Mutual Diffusion in Blends of Long and Short Entangled Polymer Chains. By E.A. Jordan, R.C. Ball, A.M. Donald, L.J. Fetters, R.A.L. Jones, and J. Klein (With 4 Figures)	225
NMR Approach to Disentanglement Relaxation in Molten Polymers By J.P. Cohen-Addad	230
Motion of Long Alkanes in Polyethylene Melts By A.R. Rennie, W. Petry, and B. Stühn (With 4 Figures)	235
Towards an Equilibrium Theory of Liquid-Crystalline Polymers By W. Renz (With 1 Figure)	240

Part V	Dynamics of Phase Separation in Polymer Blends
---------------	---

Concentration Fluctuations and Phase Separation in Polymer Blends as Observed by X-Ray and Light Scattering By G. Strobl (With 23 Figures)	246
Kinetics of Microphase Separation of Block Copolymers from Time Resolved Small Angle Neutron Scattering By J.G. Connell and R.W. Richards (With 11 Figures)	263
Prediction of Phase Separation Behaviour from Thermodynamic Measurements in Polymer Blends. By J.S. Higgins, H. Fruitwala, P.E. Tomlins, and J.N. Clark (With 5 Figures)	274
Concentration Fluctuations in Polymer Mixtures Under Shear Flow: A Phenomenological Theory. By N. Pistoro and K. Binder	285
Mutual Diffusion in the Poly(ethyleneoxide)/Poly(propyleneoxide) Mixture by Photon Correlation Spectroscopy By J. Kanetakis and G. Fytas (With 4 Figures)	290

Growth of Domains in a PVME/d-PS Polymer Blend by Small Angle Neutron Scattering. By D. Schwahn, T. Springer, H. Yee-Madeira, and K. Mortensen (With 4 Figures)	296
Monte Carlo Simulation of Thermodynamic and Structural Properties of Polymer Mixtures Including "Solvent" By A. Sariban and K. Binder (With 4 Figures)	301
Index of Contributors	307
