

CONTENTS

I.	Introduction	1
II.	The ADM Formalism Applied to Homogeneous Cosmologies	16
III.	The Hamiltonian Formalism: Simple Examples, their Classical and Quantum Behavior	34
IV.	The Hamiltonian Formulation Applied to more Complex Systems	97
V.	Applications to Bianchi-Type Universes	104
VI.	Superspace	135
VII.	Quantization	146
Appendix A	Lagrangian Cosmology	151
Appendix B	The Quantum Behavior of an Expanding, One-Dimensional, Square Well	154
Appendix C	Miscellaneous Hamiltonian Calculations	159
References		166
