

Table of Contents

Part I: Multimodal User Interfaces

Using Acoustic Landscapes for the Evaluation of Multimodal Mobile Applications.....	3
<i>Wolfgang Beinbauer and Cornelia Hipp</i>	
Modeling and Using Saliency in Multimodal Interaction Systems	12
<i>Ali Choumane and Jacques Siroux</i>	
Exploring Multimodal Interaction in Collaborative Settings	19
<i>Luís Duarte, Marco de Sá, and Luís Carriço</i>	
Towards a Multidimensional Approach for the Evaluation of Multimodal Application User Interfaces	29
<i>José E.R. de Queiroz, Joseana M. Fecine, Ana E.V. Barbosa, and Danilo de S. Ferreira</i>	
Multimodal Shopping Lists	39
<i>Jhilmil Jain, Riddhiman Ghosh, and Mohamed Dekhil</i>	
Value of Using Multimodal Data in HCI Methodologies	48
<i>Jhilmil Jain</i>	
Effective Combination of Haptic, Auditory and Visual Information Feedback in Operation Feeling	58
<i>Keiko Kasamatsu, Tadahiro Minami, Kazuki Izumi, and Hideo Jinguh</i>	
Multi-modal Interface in Multi-Display Environment for Multi-users	66
<i>Yoshifumi Kitamura, Satoshi Sakurai, Tokuo Yamaguchi, Ryo Fukazawa, Yuichi Itoh, and Fumio Kishino</i>	
Reliable Evaluation of Multimodal Dialogue Systems	75
<i>Florian Metze, Ina Wechsung, Stefan Schaffer, Julia Seebode, and Sebastian Möller</i>	
Evaluation Proposal of a Framework for the Integration of Multimodal Interaction in 3D Worlds	84
<i>Héctor Olmedo-Rodríguez, David Escudero-Mancebo, and Valentín Cardenoso-Payo</i>	
Building a Practical Multimodal System with a Multimodal Fusion Module	93
<i>Yong Sun, Yu (David) Shi, Fang Chen, and Vera Chung</i>	

Modeling Multimodal Interaction for Performance Evaluation	103
<i>Emile Verdurand, Gilles Coppin, Franck Poirier, and Olivier Grisvard</i>	

Usability Evaluation of Multimodal Interfaces: Is the Whole the Sum of Its Parts?	113
<i>Ina Wechsung, Klaus-Peter Engelbrecht, Stefan Schaffer, Julia Seebode, Florian Metze, and Sebastian Möller</i>	

Part II: Gesture, Eyes Movement and Expression Recognition

An Open Source Framework for Real-Time, Incremental, Static and Dynamic Hand Gesture Learning and Recognition	123
<i>Todd C. Alexander, Hassan S. Ahmed, and Georgios C. Anagnostopoulos</i>	

Gesture-Controlled User Input to Complete Questionnaires on Wrist-Worn Watches	131
<i>Oliver Amft, Roman Amstutz, Asim Smailagic, Dan Siewiorek, and Gerhard Tröster</i>	

UbiGesture: Customizing and Profiling Hand Gestures in Ubiquitous Environment	141
<i>Ayman Atia, Shin Takahashi, Kazuo Misue, and Jiro Tanaka</i>	

The Gestural Input System for Living Room Digital Devices	151
<i>Wen-Shan Chang and Fong-Gong Wu</i>	

Touchless Interaction-Novel Chances and Challenges	161
<i>René de la Barré, Paul Chojecki, Ulrich Leiner, Lothar Mühlbach, and Detlef Ruschin</i>	

Did I Get It Right: Head Gestures Analysis for Human-Machine Interactions	170
<i>Jürgen Gast, Alexander Bannat, Tobias Rehrl, Gerhard Rigoll, Frank Wallhoff, Christoph Mayer, and Bernd Radig</i>	

Interactive Demonstration of Pointing Gestures for Virtual Trainers	178
<i>Yazhou Huang and Marcelo Kallmann</i>	

Anthropometric Facial Emotion Recognition	188
<i>Julia Jarkiewicz, Rafał Kocielnik, and Krzysztof Marasek</i>	

Real-Time Face Tracking and Recognition Based on Particle Filtering and AdaBoosting Techniques	198
<i>Chin-Shyurng Fahn, Ming-Jui Kuo, and Kai-Yi Wang</i>	

A Real-Time Hand Interaction System for Image Sensor Based Interface	208
<i>SeIn Lee, Jonghoon Seo, Soon-bum Lim, Yoon-Chul Choy, and TackDon Han</i>	
Gesture-Based Interface for Connection and Control of Multi-device in a Tabletop Display Environment	216
<i>Hyunglae Lee, Heeseok Jeong, Joongho Lee, Ki-Won Yeom, and Ji-Hyung Park</i>	
Shadow Awareness: Bodily Expression Supporting System with Use of Artificial Shadow	226
<i>Yoshiyuki Miwa, Shiorh Itai, Takabumi Watanabe, Koji Iida, and Hiroko Nishi</i>	
An Approach to Glove-Based Gesture Recognition	236
<i>Farid Parvini, Dennis McLeod, Cyrus Shahabi, Bahareh Navai, Baharak Zali, and Shahram Ghandeharizadeh</i>	
cfHMI: A Novel Contact-Free Human-Machine Interface	246
<i>Tobias Rehrl, Alexander Bannat, Jürgen Gast, Gerhard Rigoll, and Frank Wallhoff</i>	
Fly! Little Me: Localization of Body-Image within Reduced-Self	255
<i>Tatsuya Saito and Masahiko Sato</i>	
New Interaction Concepts by Using the Wii Remote	261
<i>Michael Schreiber, Margeritta von Wilamowitz-Moellendorff, and Ralph Bruder</i>	
Wireless Data Glove for Gesture-Based Robotic Control	271
<i>Nghia X. Tran, Hoa Phan, Vince V. Dinh, Jeffrey Ellen, Bryan Berg, Jason Lum, Eldridge Alcantara, Mike Bruch, Marion G. Ceruti, Charles Kao, Daniel Garcia, Sunny Fugate, and LorRaine Duffy</i>	
PALMbit-Silhouette:A User Interface by Superimposing Palm-Silhouette to Access Wall Displays	281
<i>Goshiro Yamamoto, Huichuan Xu, Kazuto Ikeda, and Kosuke Sato</i>	
Potential Limitations of Multi-touch Gesture Vocabulary: Differentiation, Adoption, Fatigue	291
<i>Wendy Yee</i>	

Part III: Human-Robot Interaction

A Multimodal Human-Robot-Interaction Scenario: Working together with an Industrial Robot	303
<i>Alexander Bannat, Jürgen Gast, Tobias Rehrl, Wolfgang Rösel, Gerhard Rigoll, and Frank Wallhoff</i>	

Robotic Home Assistant Care-O-bot® 3 – Product Vision and Innovation Platform	312
<i>Birgit Graf, Christopher Parltitz, and Martin Hägele</i>	
Designing Emotional and Interactive Behaviors for an Entertainment Robot	321
<i>Yo Chan Kim, Hyuk Tae Kwon, Wan Chul Yoon, and Jong Cheol Kim</i>	
Emotions and Messages in Simple Robot Gestures	331
<i>Jamy Li, Mark Chignell, Sachi Mizobuchi, and Michiaki Yasumura</i>	
Life with a Robot Companion: Video Analysis of 16-Days of Interaction with a Home Robot in a “Ubiquitous Home” Environment	341
<i>Naoko Matsumoto, Hirotada Ueda, Tatsuya Yamazaki, and Hajime Murai</i>	
Impression Evaluation of a Conversational Robot Playing RAKUGO . . .	351
<i>Akihiro Ogino, Noritaka Moriya, Park Seung-Joon, and Hirotada Ueda</i>	
Performance Assessment of Swarm Robots	361
<i>Ercan Oztemel, Cemalettin Kubat, Ozer Uygun, Tuba Canvar, Tulay Korkusuz, Vinesh Raja, and Anthony Soroka</i>	
A Robotic Introducer Agent Based on Adaptive Embodied Entrainment Control	368
<i>Mutsuo Sano, Kenzaburo Miyawaki, Ryohei Sasama, Tomoharu Yamaguchi, and Keiji Yamada</i>	
Robot Helps Teachers for Education of the C Language Beginners	377
<i>Haruaki Tamada, Akihiro Ogino, and Hirotada Ueda</i>	
An Interactive Robot Butler	385
<i>Yeow Kee Tan, Dilip Limbu Kumar, Ridong Jiang, Liyuan Li, Kah Eng Hoe, Xinguo Yu, Li Dong, Chern Yuen Wong, and Haizhou Li</i>	

Part IV: Touch and Pen-Based Interaction

A Study on Fundamental Information Transmission Characteristics of an Air-Jet Driven Tactile Display	397
<i>Takafumi Asao, Hiroaki Hayashi, Masayoshi Hayashi, Kentaro Kotani, and Ken Horii</i>	
VersaPatch: A Low Cost 2.5D Capacitive Touch Sensor	407
<i>Ray Bittner and Mike Sinclair</i>	

From Implicit to Touching Interaction by Identification Technologies: Towards Tagging Context	417
<i>Jose Bravo, Ramon Hervás, Carmen Fuentes, Vladimir Villarreal, Gabriel Chavira, Salvador Nava, Jesus Fontecha, Gregorio Casero, Rocio Peña, and Marcos Vergara</i>	
VTouch: A Vision-Base Dual Finger Touched Inputs for Large Displays	426
<i>Ching-Han Chen and Cun-Xian Nian</i>	
Overview of Meta-analyses Investigating Vibrotactile versus Visual Display Options	435
<i>Linda R. Elliott, Michael D. Coovert, and Elizabeth S. Redden</i>	
Experimental Study about Effect of Thermal Information Presentation to Mouse	444
<i>Shigeyoshi Iizuka and Sakae Yamamoto</i>	
Preliminary Study on Vibrotactile Messaging for Sharing Brief Information	451
<i>Teruaki Ito</i>	
Orientation Responsive Touch Interaction	461
<i>Jinwook Kim, Jong-gil Ahn, and Heedong Ko</i>	
Representation of Velocity Information by Using Tactile Apparent Motion	470
<i>Kentaro Kotani, Toru Yu, Takafumi Asao, and Ken Horii</i>	
Tactile Spatial Cognition by the Palm	479
<i>Misa Grace Kwok</i>	
A Study on Effective Tactile Feeling of Control Panels for Electrical Appliances	486
<i>Miwa Nakanishi, Yusaku Okada, and Sakae Yamamoto</i>	
Facilitating the Design of Vibration for Handheld Devices	496
<i>Taezoon Park, Jihong Hwang, and Wonil Hwang</i>	
Interaction Technique for a Pen-Based Interface Using Finger Motions	503
<i>Yu Suzuki, Kazuo Misue, and Jiro Tanaka</i>	
A Basic Study of Sensory Characteristics toward Interaction with a Box-Shaped Interface	513
<i>Noriko Suzuki, Tosiroy Kamiya, Shunsuke Yoshida, and Sumio Yano</i>	
TACTUS: A Hardware and Software Testbed for Research in Multi-Touch Interaction	523
<i>Paul Varcholik, Joseph J. Laviola Jr., and Denise Nicholson</i>	

Low Cost Flexible Wrist Touch UI Solution 533
 Bin Wang, Chenguang Cai, Emilia Koskinen, Tang Zhenqi,
 Huayu Cao, Leon Xu, and Antti O. Salo

Grasping Interface with Photo Sensor for a Musical Instrument 542
 Tomoyuki Yamaguchi and Shuji Hashimoto

Part V: Brain Interfaces

Ensemble SWLDA Classifiers for the P300 Speller 551
 Garett D. Johnson and Dean J. Krusienski

The I of BCIs: Next Generation Interfaces for Brain-Computer
Interface Systems That Adapt to Individual Users..... 558
 Brendan Allison

Mind-Mirror: EEG-Guided Image Evolution 569
 Nima Bigdely Shamlo and Scott Makeig

BEXPLORER: Computer and Communication Control Using EEG 579
 Mina Mikhail, Marian Abdel-Shahid, Mina Guirguis, Nadine Shehad,
 Baher Soliman, and Khaled El-Ayat

Continuous Control Paradigms for Direct Brain Interfaces 588
 Melody Moore Jackson, Rudolph Mappus, Evan Barba,
 Sadir Hussein, Girish Venkatesh, Chetna Shastry, and
 Amichai Israeli

Constructive Adaptive User Interfaces Based on Brain Waves 596
 Masayuki Numao, Takayuki Nishikawa, Toshihito Sugimoto,
 Satoshi Kurihara, and Roberto Legaspi

Development of Symbiotic Brain-Machine Interfaces Using a
Neurophysiology Cyberworkstation 606
 Justin C. Sanchez, Renato Figueiredo, Jose Fortes, and
 Jose C. Principe

Sensor Modalities for Brain-Computer Interfacing 616
 Gerwin Schalk

A Novel Dry Electrode for Brain-Computer Interface 623
 Eric W. Sellers, Peter Turner, William A. Sarnacki,
 Tobin McManus, Theresa M. Vaughan, and Robert Matthews

Effect of Mental Training on BCI Performance 632
 Lee-Fan Tan, Ashok Jansari, Shian-Ling Keng, and Sing-Yau Goh

The Research on EEG Coherence around Central Area of Left
Hemisphere According to Grab Movement of Right Hand 636
 Mincheol Whang, Jincheol Woo, and Jongwha Kim

Part VI: Language, Voice, Sound and Communication

A Speech-Act Oriented Approach for User-Interactive Editing and Regulation Processes Applied in Written and Spoken Technical Texts . . .	645
<i>Christina Alexandris</i>	
Interacting with a Music Conducting System	654
<i>Carlos Rene Argueta, Ching-Ju Ko, and Yi-Shin Chen</i>	
Hierarchical Structure: A Step for Jointly Designing Interactive Software Dialog and Task Model	664
<i>Sybillie Caffiau, Patrick Girard, Laurent Guittet, and Dominique L. Scapin</i>	
Breaking of the Interaction Cycle: Independent Interpretation and Generation for Advanced Dialogue Management	674
<i>David del Valle-Agudo, Javier Calle-Gómez, Dolores Cuadra-Fernández, and Jessica Rivero-Espinosa</i>	
SimulSort: Multivariate Data Exploration through an Enhanced Sorting Technique	684
<i>Inkyoung Hur and Ji Soo Yi</i>	
WeMe: Seamless Active and Passive Liquid Communication	694
<i>Nicolas Masson and Wendy E. Mackay</i>	
Study of Feature Values for Subjective Classification of Music	701
<i>Masashi Murakami and Toshikazu Kato</i>	
Development of Speech Input Method for Interactive VoiceWeb Systems	710
<i>Ryuichi Nisimura, Jumpei Miyake, Hideki Kawahara, and Toshio Irino</i>	
Non-verbal Communication System Using Pictograms	720
<i>Makiko Okita, Yuki Nakaura, and Hidetsugu Suto</i>	
Modeling Word Selection in Predictive Text Entry	725
<i>Hamed H. Sad and Franck Poirier</i>	
Using Pictographic Representation, Syntactic Information and Gestures in Text Entry	735
<i>Hamed H. Sad and Franck Poirier</i>	
Embodied Sound Media Technology for the Enhancement of the Sound Presence	745
<i>Kenji Suzuki</i>	
Compensate the Speech Recognition Delays for Accurate Speech-Based Cursor Position Control	752
<i>Qiang Tong and Ziyun Wang</i>	

Effectiveness of the Text Display in Bilingual Presentation of JSL/JT
for Emergency Information 761
Shunichi Yonemura, Shin-ichiro Eitoku, and Kazuo Kamata

Part VII: Visualisation, Images, and Pictures

Specifying the Representation of Non-geometric Information in 3D
Virtual Environments 773
Kaveh Bazargan and Gilles Falquet

Prompter “•” Based Creating Thinking Support Communication
System That Allows Hand-Drawing 783
*Li Jen Chen, Jun Ohya, Shunichi Yonemura, Sven Forstmann, and
Yukio Tokunaga*

A Zoomable User Interface for Presenting Hierarchical Diagrams on
Large Screens 791
*Christian Geiger, Holger Reckter, Roman Dumitrescu,
Sascha Kahl, and Jan Berssenbrügge*

Phorigami: A Photo Browser Based on Meta-categorization and
Origami Visualization 801
Shuo-Hsiu Hsu, Pierre Cubaud, and Sylvie Jumpertz

Sphere Anchored Map: A Visualization Technique for Bipartite Graphs
in 3D 811
Takao Ito, Kazuo Misue, and Jiro Tanaka

Motion Stroke-A Tablet-Based Interface for Motion Design Tool Using
Drawing 821
Haruki Kouda, Ichiroh Kanaya, and Kosuke Sato

Tooling the Dynamic Behavior Models of Graphical DSLs 830
Tihamér Levendovszky and Tamás Mészáros

Pattern Recognition Strategies for Interactive Sketch Composition 840
Sébastien Macé and Eric Anquetil

Specification of a Drawing Facility for Diagram Editors 850
Sonja Maier and Mark Minas

A Basic Study on a Drawing-Learning Support System in the
Networked Environment 860
Takashi Nagai, Mizue Kayama, and Kazunori Itoh

Benefit and Evaluation of Interactive 3D Process Data Visualization
for the Presentation of Complex Problems 869
Dorothea Pantföerder, Birgit Vogel-Heuser, and Karin Schweizer

Modeling the Difficulty for Centering Rectangles in One and Two
Dimensions..... 879
Robert Pastel

Composing Visual Syntax for Domain Specific Languages 889
*Luis Pedro, Matteo Risoldi, Didier Buchs, Bruno Barroca, and
Vasco Amaral*

The Effectiveness of Interactivity in Computer-Based Instructional
Diagrams 899
Lisa Whitman

Author Index..... 909
