smartsystems
integration

Amsterdam, The Netherlands, 13–14 March 2013

Table of Contents

Smart Systems Integration – trends in the field of smart medtech systems
Thomas Gessner, Martina Vogel, Thomas Otto, Fraunhofer ENAS, Germany
Joerg Nestler, Chemnitz University of Technology, Germany

Conference Sessions

Session I: System integration and packaging

Development of 3D Integrated SiP using embedded active/passive chips in PCB and external parts
Arnaud Grivon, THALES Global Service, France

Hybrid assembly of micro scanner arrays with large aperture and their system integration
Thilo Sandner, Michael Wildenhain, Markus Schwarzenberg, Harald Schenk, Fraunhofer IPMS, Germany

Low temperature wafer bonding technology for RF based MEMS devices
Marco Haubold, Steffen Kurth, Thomas Gessner, Fraunhofer ENAS, Germany
Sascha Figur, Bernhard Schönlinner, EADS Germany, Germany

Session II: Advanced technology and reliability

Advances in Reliability Research by Means of Crack Avoidance Strategies
Bernd Michel, E. Auerswald, Fraunhofer, Germany
T. Winkler, Berliner Nanotest und Design, Germany
H. Shirangi, Robert Bosch, Germany
G. Wondrak, Daimler, Germany

Distortion Measurements and Simulations on Mechanically Stressed Bare Die MEMS Gyroscopes
Markus Dorwarth, Steven Kehrberg, Max Schellenberg, Holger Rank, Benjamin Schmidt, Robert Bosch, Germany
Jan Mehner, Chemnitz University of Technology, Germany

Inkjet-Printed Functionalities for Microfluidic Lab-on-a-Chip Systems
Erik Beckert, Oliver Pabst, Zhe Shu, Ramona Eberhardt, Andreas Tünnermann, Fraunhofer IOF, Germany
Jolke Perelaer, Ulrich Schubert, Friedrich-Schiller-University, Germany
Holger Becker, microfluidic ChipShop, Germany

Wafer-level technology for piezoresistive electro-mechanical transducer based on Carbon Nanotubes
Alexey Shaporin, Sascha Hermann, Christian Kaufmann, Stefan E. Schulz, Thomas Gessner, Sebastian Voigt, Jan Mehner, Steffen Hartmann, Bernhard Wunderle, Chemnitz University of Technology, Germany
Jens Bonitz, Fraunhofer ENAS, Germany

Session III: 3D-Integration and interconnect technologies I

Challenges and Methods for the Design of 3D-Integrated Smart Systems
Uwe Knöchel, Andy Heinig, Fraunhofer IIS/EAS, Germany

Photo-definable polyimide-based Flat UTCP technology for 3D-stacking application
T. Sterken, S. Priyabadini, M. Op de Beeck, J. Vanfleteren, Centre for Mycrosystems Technology, Belgium

Silicon Interposers with TSVs – A basis for Wafer Level 3D System Integration
Kai Zoschke, Fraunhofer IZM, Germany
Jürgen Wolf, Fraunhofer IZM-ASSID, Germany
Oswin Ehrmann, Klaus-Dieter Lang, Technical University of Berlin, Germany

Vertical Integration techniques for MEMS using HAR TSV
Lutz Hofmann, I. Schubert, R. Ecke, K. Gottfried, Fraunhofer ENAS, Germany
S. E. Schulz, T. Gessner, Chemnitz University of Technology, Germany

Hybrid microassembly for 3D integration and heterogeneous integration of microsystem – EU FP7 Project FAB2ASM
Quan Zhou, Aalto University, Finnland

Session IV: Micro and nano systems and components

Compact double monochromator based on tunable MEMS gratings
Maurizio Tormen, Markus Lützelschwab, Branislav Timotijevic, Réal Ischer, Ross Stanley, Thomas Overstolz, Sylvain Grossmann, Jörg Pierer, Christian Bosshard, CSEM, Switzerland

Miniature Fourier transform infrared spectrometer for multi gas detection
Tatsuyuki Tanahashi, Takahito Ono, Tohoku University, Japan

Multi-sensors modules in SiGeMEMS technology
T. Sterken, M. Op de Beeck, H.A.C. Tilmans, A. Witvrouw, S. Severi, P. Helin, M. A. Erismis, L. Haspeslagh, V. Rochus, R. F. Yazicioglu, S. Donnay, C Van Hoof X. Rottenberg, IMEC, Belgium

Sensors for Cyber Chemical Systems
Yvonne Joseph, Madlin Falk, Frederic Güth, Rosemarie Dittrich, Technical University Bergakademie Freiberg, Germany

Adaptive antenna tuners for mobile phones
Erwin Spits, K. Boyle, M.A. de Jongh , T. Bakker, S. Sato, A. van Bezooijen, Epcos Netherlands, the Netherlands

Session V: 3D-Integration and interconnect technologies II

Thin-film based stretchable electronics technologies
Rik Verplancke, Amir Jahanshahi, Tom Sterken, Dieter Cuypers, Jan Vanfleteren, Ghent University – IMEC, Belgium

Interflex: Reliable integration technologies for building a system-in-foil
Erwin Yacoub-George, Robert Faul, Karlheinz Bock, Fraunhofer EMFT, Germany

JEMSIP_3D: Major results & achievements from the project and exploitation thereof in future products
M. Jürgen Wolf, Fraunhofer IZM, Germany
H. Kapitza, Germany
K. Pressel, Infineon Technologies, Regensburg, Germany
J. Perrocheau, LCP's consultants, Trets, France
Y. De Maquille, Linxens, Mantes-la-Jolie, France
L. F. Tz. Kwakman, FEI Company, Eindhoven, The Netherlands
A. Rouzaud, CEA-Leti, Grenoble, France

InP-Si BiCMOS Hetero Integration for broadband radio links
Marco Lisker, IHP – Leibniz Institut für innovative Mikroelektronik, Germany

Session VI: Smart power, smart grids

Smart Energy Agents as an Enabler for Smart Distribution Grids
Michael Metzger, Andrei Szabo, Siemens, Germany

Optical Power Supply for Sensor Nodes in Intelligent Sensorial Materials
Christoph Budelmann, DFKI, Germany
Mike Bülters, Bremer Institut für angewandte Strahltechnik, Germany

Rechargeable Micro Fuel Cells as Power Supply for Smart Microsystems
Dominik Zimmermann, I. Freund, Micronas, Germany
J. Becker, C. Müller, H. Reinecke, University of Freiburg, Germany

ARTEMIS ME^{3}Gas open source middleware platform inter-operability retrofit pilot
Brendan O' Flynn, Mike Hayes, Liam Moore, Cian O' Mathúna, Tyndall National Institute, Ireland
Emmanuel Frécon, Joakim Eriksson, Swedish Institute of Computer Science, Sweden
Peter Rosengren, Peeter Kool, CNet, Sweden
Alberto Fernandez, Sensing & Control, Spain

Session VII: Manufacturing technologies for smart integrated systems I

Flexible and Stretchable Electronics and Applications for Biomedical Devices
Dae-Hyeong Kim, Seoul National University, Korea

Integration techniques and applications of thin chips on low cost foil substrates
Daan van den Ende, A. Sridhar, R. Kusters, J. van den Brand, Holst Centre/TNO, the Netherlands
M. Cauwe, B. Vandecasteele, IMEC-CMST, Belgium

Multi-Sensor Stacking using Mold Embedding Processes
Karl-Friedrich Becker, T. Braun, K. Piefke, V. Bader, R. Aschenbrenner, Fraunhofer IZM, Germany
R. Kahle, S. Voges, T. Thomas, K.-D. Lang, Technical University Berlin, Germany

Development of a biocompatible encapsulationand interconnect technology for implantable electronics
Maaike Op de Beeck, Karen Qian, Bishoy Morcos, Aleksander Radisic, Karl Malachowski,
Chris Van Hoof, IMEC, Belgium

A hybrid Elastomer-MEMS actuator for a tactile graphical display
Jacek Baborowski, S. Mouaziz, T. Overstolz, Ph. Niedermann, CSEM, Switzerland
S. Fazekas, A. Ágoston, MFKK, Hungary
G. Martínez, CRIC, Spain
Y. Leung-Ki, S. Gamper, Karmic, Switzerland
E. Schäfer, U. Grotz, Metec, Germany

Session VIII: Smart medtech systems and systems for prognostic health

Novel piezoelectric harvester for cardiac implants: Design, Optimisation & Fabrication
Renzo Dal Molin, Sorin CRM, France
An Nguyen-Dinh, Claire Bantignies, Vermon, France
Sébastien Boisseau, CEA-Leti, France

Wireless Smart Glove for arthritis rehabilitation
Brendan O´Flynn, Javier Torres Sanchez, Philip Angove, Tyndall National Institute, Ireland
James Connolly, Joan Condell, Kevin Curran, University of Ulster, Ireland

Wearable Smart Systems for Personal Healthcare and Lifestyle
Ruud Vullers, Julien Penders, Sywert Brongersma, Jacqueline Wijsman, Marco Altini, Chris Van Hoof, Holst Centre, the Netherlands

A Flexible Micro-Electrode Array with an Embedded Flexible CMOS-Chip for Medical Applications
Nadine Winkin, Wilfried Mokwa, RWTH Aachen, Germany
Uta Gierth, Alexander Michaelis, Thomas Rabbow, Fraunhofer IKTS, Germany

The integrated micro optical sensor for photometry and fluorescence applications
Martin Baca, Andreas Schober, Xuan Ma, Adrian Grewe, Ilmenau University of Technology, Germany
Martin Schaedel, Olaf Brodersen, Matthias Will, CiS, Germany

Session IX: Manufacturing technologies for smart integrated systems II

pMUT for High Intensity Focused Ultrasound
An Nguyen-Dinh, Etienne Flesch, Cyril Meynier, Vermon, France
Dag Wang, Frode Tyholdt, Andreas Vogl, Hannah Tofteberg, Niels Peter Østbø, SINTEF, Norway

Integration of Multi-level MOEMS Structures on CMOS for Spatial Light Modulators
Martin Friedrichs, Matthias List, Michael Müller, Fraunhofer IPMS, Germany

Absolute Pressure Sensors made by Anodic Bonding
Konstanze Schmidt, Uwe Schwarz, X-FAB Semiconductor Foundries, Germany

Manufacturing Technologies for Integrated Smart Systems: a Primer
Marc Desmulliez, Heriot-Watt University, United Kingdom
David Topham, Brunel University, United Kingdom

Session X: Micro-Nano-Bio systems applications

Sensors for human-machine-interfaces in smart medical systems – Integration challenges and solutions
Dirk Fengels, Thomas Burch, CSEM, Switzerland
Joeri Gredig, Swissrehamed, Switzerland
Thomas Maeder, Caroline Jacq, EPFL, Switzerland

Microfluidic integration: what options do we have and what does it mean?
Henne van Heeren, enablingMNT, the Netherlands
Patric Salomon, enablingMNT, Germany

Cellenc: human cell encapsulation in closed loop microfluidic chip
Patrick Boisseau, S. Morales, J. Berthier, P.-Y. Benhamou, A. Comte Bellemin, F. Boizot, P. Caillat, F. Rivera, CEA, France

Self-powered microfluidic platform for autonomous amperometric sensing
Juan Pablo Esquivel, Centre Nacional de Microelectrónica (CNM-CSIC), Spain

Session XI: Advanced sensor technologies / Sensor networks

MEMS Technology for Consumer Electronics
Stefan Finkbeiner, Bosch Sensortec, Germany

Smart MEMS systems for automotive safety
Marc Osajda, Freescale Halbleiter, Germany

Autonomous Visual Sensors for safety and security
Zeev Smilansky, Emza Visual Sense, Israel
Massimo Gottardi, Fondazione Bruno Kessler, Italy

Wireless Sensors Networks in Electromagnetically and Physically Hostile Environments
Anders Rydberg, Mathias Gruden, Magnus Jobs, University of Uppsala, Sweden

Session XII

Technology Clusters and Their Role in the Commercialization of Micro and Nanosystems
Roger H. Grace, Roger Grace Associates, USA

Poster Session

An intelligent modular tool for the monitoring and control of high efficient grinding processes
Oliver Adams, Laboratory for Machine Tools and Production Engineering, Germany

Generic process for low-cost InP integrated photonics in industrial foundries
Luc Augustin, Huub Ambrosius, Peter Thijs, Mike Wale, Meint Smit, TU Eindhoven, the Netherlands
Norbert Grote, Fraunhofer HHI, Germany

Robot Manipulator with emergent Behaviour supported by a Smart Sensorial Material and Agent Systems
Stefan Bosse, Florian Pantke, Stefan Edelkamp, University Bremen, Germany

CO_2 sensor system for mobile application
Jamila Boudaden, F. Wenninger, S. Kibler, K. Neumeier, R. Faul, A. Drost, D. Bonfert, U. Schaber, L. Meixner, H-E. Endres, I. Eisele, Fraunhofer EMFT, Germany
K. Rose, Fraunhofer ISC, Germany

New solution addresses energy measurement challenges related to wireless devices driven by microharvester
Carlo Canziani, Agilent Technologies, Italy

Investigations on Eutectic Bonding of Polyimide Structures for MEMS Applications
Tom Creutzburg, Johannes Rittinger, Lutz Rissing, Srećko Cvetković, Leibniz University Hannover, Germany

Technology Development for Packaging of the GMR-Sensor via Eutectic Bonding
Srecko Cvetkovic, Rahel Kruppe, Johannes Rittinger, Lutz Rissing, Leibniz University Hannover, Germany

Picosecond Laser Micromachining in the context of MEMS/NEMS applications
Tom Enderlein, Christian Helke, Karla Hiller, Jörg Nestler, Technical University Chemnitz, Germany
Martin Schüller, Sascha Geidel, Thomas Otto, Thomas Gessner, Fraunhofer ENAS, Germany

Investigation of micro structuring and magnetizing of spintronic layer stacks using laser irradiation
Horst Exner, Isabel Berthold, Matthias Müller, Robby Ebert, Hochschule Mittweida, Germany
Senoy Thomas, Patrick Matthes, Chemnitz University of Technology, Germany

Multi-sensor module for the measurement of pressure, temperature, flow rate and concentration in micro reaction technology
Thomas Frank, Andrea Cyriax, Sebastian Pobering, CiS Research institute for micro sensors and photovoltaic, Germany

Miniaturized frequency doubled DPSS assembled using solderjet bumping technology
Marte Gilaberte Basset, D. Guilhot, S. Ferrando, P. Ribes, D. Montes, M. Galan, Monocrom, Spain
T. Burkhardt, E. Beckert, M. Hornaff, Fraunhofer Institute for Applied Optics and Precision Engineering, Germany

SmartSenior – a multifunctional wristband supports living at home
Julia Günther, Jin-U Kim, Fraunhofer IZM, DE

Barriers to the Successful Commercialization of MEMS: the 2012 MEMS Industry Commercialization Report Card
Roger H. Grace, Roger Grace Associates, USA

Stress Relief Technologies for Laser Diced Wafers
Jürgen Grafe, S. Mimietz, M. Lorenz, M. Schima, Fraunhofer IZM, Germany

Actuator net design for morphing wing structure
André Gratias, Martin Schueller, Matthias Lipowski, Fraunhofer ENAS, Germany
Ignazio Dimino, CIRA, Italy

Studies on the piezoresistive effect in MOS transistors for use in integrated MEMS sensors
Sven Haas, Michael Schramm, Kay-Uwe Loebel, Steffen Heinz, Danny Reuter, Andreas Bertz, John Thomas Horstmann, Thomas Geßner, Chemnitz University of Technology, Germany

Inkjet Printing of Microsieves and Reinforcing Patterns for Fragile Microsieves
Jens Hammerschmidt, Peter Ueberfuhr, Reinhard R. Baumann, Kerstin Gläser, Werner A. Goedel, Technical University Chemnitz, Germany
Franziska M. Wolf, Friedrich-Schiller-Universität Jena, Germany

Tomorrow’s Telemetering Today: Citizen Observatory Approach with Micro Sensors and Smart Prognostics
Dieter Hayn, AIT Austrian Institute of Technology, Austria
Mike Kobernus, Norwegian Institute for Air Research, Norway

Laterally stacked organic devices fabricated by trench technology
Karla Hiller, Danny Reuter, Sreetama Banerjee, Michael Fronk, Georgeta Salvan, Dietrich R. T. Zahn, Thomas Gessner, Technical University Chemnitz, Germany

Fiber Optics in Arc Flash Detection Applications
Alek Indra, Avago Technologies, Singapore

Cyber Chemical Systems – Sensors and Information Processing
Yvonne Joseph, TU Bergakademie Freiberg, Germany
Daniela Nicklas, University of Oldenburg, Germany

Integration of MEMS/NEMS models at the system level using VHDL-AMS
Vladimir Kolchuzhin, Jan Mehner, Shende Milind, Erik Markert, Ulrich Heinkel, Christian Wagner, Technical University Chemnitz, Germany
Thomas Gessner, Fraunhofer ENAS, Germany

Autonomous Micro-platform for Multi-sensors (AMM) for wireless monitoring
Philippe Laurent, N. Maillard, S. Stoukatch, F. Axisa, J. Destiné, MICROSYS University of Liege, Belgium

Design and simulation of nanomaterial-enhanced LTCC integrated inductors
Yu-Ching Lin, Shuji Tanaka, Masayoshi Esashi, Tohoku University, Japan
Felix Gabler, Thomas Gessner, Fraunhofer ENAS, Germany

System Design of Double Wall Synthetic Jet Actuators
Mathias Lipowski, Martin Schueller, Fraunhofer ENAS, Germany
Robert Schulze, Chemnitz University of Technology, Germany

Influence of DMSO and MWCNTs addition on the thermoelectric properties of PEDOT:PSS Thin Films
Jinji Luo, Petra Streit, Thomas Gessner, Technical University Chemnitz, Germany
Detlef Billep, Thomas Otto, Fraunhofer ENAS, Germany

A Specification tool for Nanosystems
Erik Markert, Milind Shende, Matthias Sauppe, Thomas Horn, Sven Quinger, Ulrich Heinkel, Technical University Chemnitz, Germany

Integration of a position photodiode for a micro laser tracker system
Eric Markweg, Tran Trung Nguyen, Christoph Ament, Martin Hoffmann, Technical University Ilmenau, Germany
Martin Schädel, Olaf Brodersen, CiS Institut für Mikrosensorik und Photovoltaik, Germany

Optical sensor for flow measurements in capillaries
Ralf Müller, Olaf Brodersen, CiS Research Institute for Micro Sensors and Photovoltaic, Germany
Dieter Petrak, Ingenieurbüro FlowSensor, Germany

Comparison of various polymer-based dry electrodes for high quality EEG/ECG measurements
Maike Op de Beeck, Yun-Hsuan Chen, C. Van Hoof, IMEC, Belgium
L. Vanderheyden, Datwyler Sealing Solutions, Belgium

Development of Novel Micro Conveyors by Using Piezoelectric Vibration Stages
Chi Hsiang Pan, National Chin-Yi University of Technology, Taiwan

Via-Last technology for the interconnection of flash and processor chip for mobile applications
René Puschmann, Mathias Böttcher, Peggy John, Irene Bartusseck, Charles Manier, Kai Zoschke, Jürgen Grafe, Fraunhofer IZM, Germany
Michael Ziesmann, NXP Semiconductors Germany, Germany

M&NEMS: a technological platform for 10-axis sensor
Philippe Robert, P. Rey, A. Berthelot, G. Jourdan, Y. Deimerly, CEA-Léti, France
S. Louwers, J. Bon, F-X. Boillot, Joël Collet, Tronics, France

Package Characterization with Stress Chip Measurements for Health Monitoring
Florian Rost, F. Schindler-Saefkow, A. Otto, B. Michel, S. Rzepka, Fraunhofer ENAS, Germany

Joint Technology Initiative Clean Sky – Aims for greener Aviation
Martin Schueller, E. Kaulfersch, M. Lipowski, Fraunhofer ENAS, Germany

Inkjet-printed electronics: Transfer from lab to fab manufacturing
Enrico Sowade, Kalyan Yoti Mitra, Reinhard R. Baumann, Technical University Chemnitz, Germany
Henrique Leonel Gomes, Universidade do Algarve, Portugal

Evaluation of the Generated Energy by Non-Harmonic Movement of a Permanent Magnet Near a Coil
Nobby Stevens, Lieven De Strycker, Davy Mercy, KU Leuven, Belgium

Optimization of MEMS/NEMS for reliable resonance frequencies
Chris Stoeckel, Kay Hofmann, Technical University Chemnitz, Germany
Roman Forke, Detlef Billep, Thomas Gessner, Fraunhofer ENAS, Germany

System reliability as a key for managing complex requirements, such as robust design of microsystems
Stefan Straube, Daniel Hahn, Kathleen Jerchel, Andreas Middendorf, Olaf Wittler, Klaus-Dieter Lang, Fraunhofer IZM, Germany

Bio-Chemical-Sensors Array Impedance Spectroscopy Chip
Drago Strle, University of Ljubljana, Slovenia

Integration and fabrication of PZT and metallic glass films for micro-mirror device
Yao-Chuan Tsai, Jae-Wung Lee, Yu-Ching Lin, Masayoshi Esashi, Tohoku University, Japan
Takayuki Naono, Takamichi Fujii, Fujifilm Corporation, Japan
Thomas Gessner, Fraunhofer ENAS, Germany

Capacitive Silicon-Microphone and its mechanical and electro-acoustical properties
Robert Wieland, Jamila Boudaden, Detlef Bonfert, Peter Iskra, Ignaz Eisele, Fraunhofer EMFT, Germany
Gregor Feiertag, Munich University of applied Sciences, Germany

Adapted printed battery development for driving a smart miniaturised cholesterol sensing system
Andreas Willert, Reinhard, R. Baumann, Fraunhofer ENAS, Germany
Michael Espig, Enrico Sowade, Technical University Chemnitz, Germany

Through Silicon via Interposer for 3D Integration
Jürgen Wolf, Fraunhofer IZM, Germany

Development of a 40 Watts 5 kV converter using Piezoelectric Transformer for Rheoelectrical damper application
Yujia Yang, Matthias Radecker, Stephan Guttowski, Klaus-Dieter Lang, Fraunhofer IZM, Germany
Bruno Fontana da Silva, Lucas Vizzotto Bellinaso, Raffael Engleitner, Federal University of Santa Maria, Brazil
Alfredo Vazquez Carazo, Micromechatronics, USA

2D semiconductors: New innovative platform for the next generation of advanced functional systems
Serge Zhuiykov, CSIRO, Australia

Tutorial

Future opportunities for SME in Smart Systems R+I
Anna Puig-Centelles, STARLAB, Spain
Luis Fonseca, CNM-CSIC, Spain
Chris Merveille, IK4-IKERLAN, Spain
Thomas Koehler, VDI-VDE, Germany

Keynote-Sessions

Active control in microfluidic systems
Jaap den Toonder, Philips Research Laboratories, the Netherlands

Special sessions by EPoSS

A new strategic research agenda for smart systems integration: markets, technologies, processes

Implementing the new EPoSS SRA: policy recommendations and industrial roll-out

US Session

MEMS Industry Group
