

# Table of Contents

---

## Session I: System Aspects I

### Large System Analysis of a Binary Low-Cost MIMO Transmitter

Mohammad Ali Sedaghat (Norwegian University of Science and Technology, Norway),  
Ralf R. Müller (Norwegian University of Science and Technology, Norway)

### Interference Temperature Analysis in a Large Scale Cellular System

Hans H. Brunner (Technische Universität München, Germany),  
Josef A. Nossek (Technische Universität München, Germany)

## Poster Session A

### Noncoherent Detection in Massive MIMO Systems

Andreas Schenk (Friedrich-Alexander-Universität Erlangen-Nürnberg),  
Robert F.H. Fischer (Universität Ulm, Germany)

### Test of Downlink Joint Transmission with Distributed Antennas

Johannes Koppenborg (Alcatel-Lucent Bell Labs, Germany),  
Cornelis Hoek (Alcatel-Lucent Bell Labs, Germany),  
Thorsten Wild (Alcatel-Lucent Bell Labs, Germany),  
Guenther Herzog (Alcatel-Lucent Bell Labs, Germany)

### Joint Spectrum Selection and Radio Resource Management for Distributed Antenna Systems with Cognitive Radio and Space Division Multiplexing

Ramiro Samano-Robles (Instituto de Telecomunicações, Universidade de Aveiro, Portugal),  
Atílio Gameiro (Instituto de Telecomunicações, Universidade de Aveiro, Portugal)

### Iterative Channel Estimation in LTE Systems

Florent Kadrija (Vienna University of Technology, Austria),  
Michal Šimko (Vienna University of Technology, Austria),  
Markus Rupp (Vienna University of Technology, Austria)

### Distributed Consensus-Based Linear Estimation with Erroneous Links

Henning Paul (University of Bremen, Germany),  
Ban-Sok Shin (University of Bremen, Germany),  
Armin Dekorsy (University of Bremen, Germany)

### **Estimation of Noise Parameters in Multi-Antenna Receivers using Digitized Signal Samples**

Michel Ivrlač (Technische Universität München, Germany),  
Bernhard Lehmeyer (Technische Universität München, Germany),  
Josef A. Nossek (Technische Universität München, Germany),  
Christian A. Hofmann (Federal Armed Forces University Munich, Germany),  
Berthold Lankl (Federal Armed Forces University Munich, Germany)

### **Spatial reuse in OFDMA multi-hop networks applying corridor-based routing**

Alexander Kuehne (Technische Universität Darmstadt, Germany),  
Adrian Loch (Technische Universität Darmstadt, Germany),  
Matthias Hollick (Technische Universität Darmstadt, Germany),  
Anja Klein (Technische Universität Darmstadt, Germany)

### **Multi-Hop Non-Regenerative MIMO Relay Communication**

Aleksey Danilov (Nizhny Novgorod State Technical University, Russia),  
Evgeny Mavrychev (Nizhny Novgorod State Technical University, Russia)

### **Separate MMSE Optimization of Distributed IDM-STC versus Cooperative OFDM for the Two-Hop Decode-and-Forward Multiple-Access Relay Channel**

Sebastian Vorkoeper (University of Rostock, Germany),  
Florian Lenkeit (University of Bremen, Germany),  
Volker Kuehn (University of Rostock, Germany),  
Dirk Wübben (University of Bremen, Germany),  
Armin Dekorsy (University of Bremen, Germany)

### **Throughput Maximization for Energy Harvesting Receivers**

Qing Bai (Technische Universität München, Germany),  
Amine Mezghani (Technische Universität München, Germany),  
Josef A. Nossek (Technische Universität München, Germany)

## **Session II: Precoding and Tx Optimization**

### **Multi-User MIMO Multi-Cell Systems: Finite SNR Rate Loss Analysis**

Gerhard Wunder (Heinrich Hertz Institute, Germany),  
Supreeth Raghuprakash (Heinrich Hertz Institute, Germany),  
Jan Schreck (Technische Universität Berlin, Germany),  
Peter Jung (Technische Universität Berlin, Germany)

### **The Network MIMO Downlink with Per-Antenna Power Constraint: Linear Preequalization vs. Tomlinson-Harashima Precoding**

Robert F. H. Fischer (Universität Ulm, Germany),  
Sebastian Heinrichs (Universität Ulm, Germany)

### **Linear Precoding in Parallel MIMO Broadcast Channels: Separable and Inseparable Scenarios**

Christoph Hellings (Technische Universität München, Germany),  
Wolfgang Utschick (Technische Universität München, Germany)

### **Transmit Precoding for MIMO-BICM-ID Satellite Systems with Nonlinear Power Amplifiers**

Thomas Delamotte (Universität der Bundeswehr München, Germany),  
Gerhard Bauch (Technische Universität Hamburg-Harburg, Germany),  
Vito Dantonà (Universität der Bundeswehr München, Germany),  
Berthold Lankl (Universität der Bundeswehr München, Germany)

## **Session III: Rx Techniques**

### **Low-Complexity Iterative Interference Cancellation Multiuser Detection for Overloaded MIMO OFDM IDMA System**

Min Chen (University of York, United Kingdom),  
Alister G. Burr (University of York, United Kingdom)

### **Sparsity-Aware Successive Interference Cancellation with Practical Constraints**

Benjamin Knoop (University of Bremen, Germany),  
Fabian Monsees (University of Bremen, Germany),  
Carsten Bockelmann (University of Bremen, Germany),  
Dirk Wübben (University of Bremen, Germany),  
Steffen Paul (University of Bremen, Germany),  
Armin Dekorsy (University of Bremen, Germany),

### **Channel Estimators for LTE-A Downlink Fast Fading Channels**

Michael Meidlinger (Vienna University of Technology, Austria),  
Michal Šimko (Vienna University of Technology, Austria),  
Qi Wang (Vienna University of Technology, Austria),  
Markus Rupp (Vienna University of Technology, Austria)

### **Interference Suppression and Electronic Tracking Using Antenna Arrays at Satellite Ground Stations**

Yao Cheng (Ilmenau University of Technology, Germany),  
Martin Haardt (Ilmenau University of Technology, Germany),  
Hennes Henniger (German Aerospace Center (DLR), Germany),  
Robert Metzger (German Aerospace Center (DLR), Germany),  
Erhard Diedrich (German Aerospace Center (DLR), Germany)

## **Session IV: System Aspects II**

### **A fairness-based performance evaluation of Fractional Frequency Reuse in LTE**

Josep Colom Ikuno (Vienna University of Technology, Austria), Martin Taranetz (Vienna University of Technology, Austria), Markus Rupp (Vienna University of Technology, Austria)

### **Blind Pilot Decontamination**

Ralf R. Müller (Norwegian University of Science and Technology, Norway),  
Mikko Vehkaperä (Aalto University, Finland),  
Laura Cottatellucci (Institute Eurecom, France)

## **Poster Session B**

### **Field Trial Evaluation of 3D Beamforming in a Multicell Scenario**

Hardy Halbauer (Alcatel-Lucent Bell Labs, Germany),  
Johannes Koppenborg (Alcatel-Lucent Bell Labs, Germany),  
Joerg Holfeld (Vodafone Chair Mobile Communication Systems, TU Dresden, Germany),  
Michael Grieger (Vodafone Chair Mobile Communication Systems, TU Dresden, Germany),  
Martin Danneberg (Vodafone Chair Mobile Communication Systems, TU Dresden, Germany),  
Gerhard Fettweis (Vodafone Chair Mobile Communication Systems, TU Dresden, Germany)

### **Leakage Based Multi User Beamforming Scheme to Mitigate Interference in MIMO-FBMC**

Upul Jayasinghe (Asian Institute of Technology, Thailand),  
Nandana Rajatheva (University of Oulu, Finland),  
Matti Latva-aho (University of Oulu, Finland)

### **Optimal Antenna Positioning for Wireless Board-To-Board Communication Using a Butler Matrix Beamforming Network**

Johannes Israel (Technische Universität Dresden, Germany),  
John Martinovic (Technische Universität Dresden, Germany),  
Andreas Fischer (Technische Universität Dresden, Germany),  
Michael Jenning (Technische Universität Dresden, Germany),  
Lukas Landau (Technische Universität Dresden, Germany)

### **Search-Based MUSIC Techniques for 2D DoA Estimation Using EADF and Real Antenna Arrays**

Dominik Schulz (Ilmenau University of Technology, Germany),  
Reiner S. Thomä (Ilmenau University of Technology, Germany)

### **Antenna Array Based Positioning Scheme for Unmanned Aerial Vehicles**

Marco Marinho (University of Brasília, Brazil),  
Ronaldo Ferreira, (University of Brasília, Brazil),  
João Paulo Carvalho Lustosa da Costa (University of Brasília, Brazil),  
Edison Pignaton de Freitas (University of Brasília, Brazil),  
Felix Antreich (German Aerospace Center (DLR), Germany),  
Kefei Liu (City University of Hong Kong, Hong Kong),  
Hing Cheung So (City University of Hong Kong, Hong Kong),  
Rafael Timoteo de Sousa Junior (University of Brasília, Brazil),  
Ricardo Zelenovsky (University of Brasília, Brazil)

### **Measurement-Based Evaluation of the LTE MIMO Downlink at Different Antenna Configurations**

Martin Lerch (Vienna University of Technology, Austria),  
Markus Rupp (Vienna University of Technology, Austria)

### **Efficient MIMO Order and Transmit Antenna Subset Selection in Correlated Channels**

Naveed Iqbal (Ilmenau University of Technology, Germany),  
Christian Schneider (Ilmenau University of Technology, Germany),  
Reiner S. Thomä (Ilmenau University of Technology, Germany)

### **Time-Domain MIMO Precoding for FEXT Cancellation in DSL Systems**

Fabian Mruck (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany),  
Clemens Stierstorfer (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany),  
Johannes Huber (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany),  
Roman Tzschoppe (Broadband United GmbH, Germany)

### **Measurement Results for the Comparison of Multiple and Single Polarized, LOS and NLOS, Indoor and Outdoor MIMO Channels**

Christian A Hofmann (Munich University of the Bundeswehr, Germany),  
Dirk Ogermann (Munich University of the Bundeswehr, Germany),  
Berthold Lankl (Munich University of the Bundeswehr, Germany)

### **Optimizing the Number of Feedback Users**

Mario H. Castañeda (Technische Universität München, Germany),  
Sebastian Theiler (Technische Universität München, Germany),  
Josef A. Nossek (Technische Universität München, Germany)

## **Session V: Tx Strategies**

### **Transmit Strategies for Full-Duplex Point-to-Point Systems with Residual Self-Interference**

Jianshu Zhang (Ilmenau University of Technology, Germany),  
Omid Taghizadeh (Ilmenau University of Technology, Germany),  
Martin Haardt (Ilmenau University of Technology, Germany)

### **Quantization-Loss Reduction for Array Signal-Source Localization**

Manuel Stein (Technische Universität München, Germany),  
Amine Mezghani (Technische Universität München, Germany),  
Josef A. Nossek (Technische Universität München, Germany)

### **Greedy Transmission Strategies for Collaborative Beamforming with Energy Harvesting Sensors**

Lazar Berbakov (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain),  
Javier Matamoros (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain),  
Carles Antón-Haro (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain)

## **A Hybrid Approach Combining Non-Regenerative MIMO Two-Way Relaying and Direct Link Transmission**

Holger Degenhardt (Technische Universität Darmstadt, Germany),

Fabian Hohmann (Technische Universität Darmstadt, Germany),

Anja Klein (Technische Universität Darmstadt, Germany)
