

Inhaltsverzeichnis

Keynotes

- 01 Sichere Kommunikation im Zeitalter des Quantencomputers 9**
H. Griebner (ADVA Optical Networking, München)
- 02 Das 5G-Testfeld am Campus TU Berlin/Fraunhofer HHI 10**
K. Habel (Fraunhofer Heinrich-Hertz-Institut, Berlin)

Session 1: Free-Space Optical Transmission

Chris Fludger

- 03 Invited**
Optische Satelliten-Downlinks zur schnellen und sicheren Datenübertragung 11
C. Fuchs (Deutsches Zentrum für Luft- und Raumfahrt, Wessling)
- 04 13.16 Tbit/s Free-space Optical Transmission over 10.45 km for Geostationary Satellite Feeder-links 12**
A. Dochhan, J. Poliak, J. Surof, M. Richerzhagen, H. Friew Kelemu, R. Mata Calvo (ADVA Optical Networking, Meiningen; Deutsches Zentrum für Luft- und Raumfahrt, Wessling)
- 05 Quantifying the Effect of the Optimization of an M-fold Transmitter Diversity Scheme with Atmospherically Induced Beam Wander and Scintillation 15**
A. Mustafa, D. Giggenbach, J. Poliak, S. ten Brink (Deutsches Zentrum für Luft- und Raumfahrt, Wessling; Universität Stuttgart)
- 06 Transmitter Diversity with Phase-Division for Optical GEO Feeder Links 18**
C. Fuchs, D. Giggenbach, R. Mata Calvo, W. Rosenkranz (Deutsches Zentrum für Luftund Raumfahrt, Wessling; Christian-Albrechts-Universität, Kiel)

Session 2: Workshop „Future Optical Networks“ (I)

Thomas Bauschert

- 07 Large-scale Modeling of Future Automotive Data Traffic towards the Edge Cloud 21**
R. Protzmann, K. Hübner, N. Ascheuer, U. Bauknecht, T. Enderle, U. Gebhard, C. Raack, A. Witt (Fraunhofer FOKUS, Berlin; DCAITI, TU Berlin; atesio, Berlin; Universität Stuttgart; Nokia Bell Labs, Stuttgart)
- 08 Reconfigurable Resource Allocation in Dynamic Transport Networks 24**
T. Enderle, N. Ascheuer, U. Bauknecht, U. Gebhard, K. Hübner, R. Protzmann, C. Raack, A. Witt (Fraunhofer FOKUS, Berlin; DCAITI, TU Berlin; atesio, Berlin; Universität Stuttgart; Nokia Bell Labs, Stuttgart)
- 09 A Techno-Economic Investigation of Asymmetric Loadbalancing in Multi Layer Networks 27**
T. Lindner, M. Gunkel, F. Wissel (Technische Universität Darmstadt; Deutsche Telekom Technik, Darmstadt)

Session 3: Workshop „Future Optical Networks“ (II)

Thomas Weidlich

10	Invited	
	Traffic Awareness – A Data Center Interconnects Calculus	30
	Hao Wang (Gesellschaft für wissenschaftliche Datenverarbeitung, Göttingen)	
11	Optical Ethernet – a Backbone for the Mobile Edge Cloud	31
	W. Lautenschlaeger, L. Dembeck, U. Gebhard (Nokia Bell Labs, Stuttgart)	
12	Server Traffic Prediction Using Machine Learning for Optical Circuit Switching Scheduling	34
	M. Balanici, S. Pachnicke (Christian-Albrechts-Universität, Kiel)	
13	ONF core information model extension and its application and verification in photonic layer SDN API	37
	A. Autenrieth, M. Chamania, S. Dris, D. Khomchenko, A. Mittermaier, S. Neidlinger, A. M. Skorupski (ADVA Optical Networking, München; ADVA Optical Networking, Berlin; VPIphotonics GmbH, Berlin; VPI Development Center, Minsk; highstreet technologies, Berlin)	

Session 4: Quantum Key Distribution

Helmut Griesser

14	Invited	
	Quantum Key Distribution in Fiber and Satellite Applications	41
	Christoph Marquardt (Max-Planck-Institut für die Physik des Lichts, Erlangen)	
15	Impact of Laser Frequency Noise on a Heterodyne Continuous Variable Quantum Key Distribution System	42
	M. Rückmann, S. Kleis, C. G. Schaeffer (Helmut-Schmidt-Universität, Hamburg)	
16	Low-Loss Arbitrary Polarization State Synthesizer for Quantum Key Distribution Purposes	46
	B. Koch, R. Noé (Universität Paderborn; Novoptel, Paderborn)	
17	Designing a Quantum Key Distribution Network – Methodology and Challenges	49
	M. Gunkel, F. Wissel, A. Poppe (Deutsche Telekom Technik, Darmstadt; Huawei Technologies, Düsseldorf)	

Session 5: Transmission I

Henning Bülow

18	DWDM Soliton Transmission enabled by Integrated Photonics and Nonlinear Fourier Transform	52
	J. Koch, J. Müller, A. Moscoso-Mártir, J. Witzens, S. Pachnicke (Christian-Albrechts-Universität, Kiel; RWTH Aachen)	
19	Experimental Investigation of Security Gaps when using Punctured LDPC Coding in Coherent Systems up to 64-GBd DP-64QAM	55
	C. Schmidt-Langhorst, J. Pfeiffer, R. Elschner, F. Frey, R. Emmerich, R. F. H. Fischer, C. Schubert (Fraunhofer Heinrich-Hertz-Institut, Berlin; Universität Ulm)	

20	Seamless ONU Activation Using Upstream Signal Loopback for TDM-PON Running Low-latency Services	58
	R. Borkowski, R. Bonk, Th. Pfeiffer (Nokia Bell Labs)	

Session 6: Transmission II

Stephan Pachnicke

21	Evaluation of Photonic Reservoir Computing for Use in Short Reach PAM-4 Transmission Systems	61
	S. Li, S. Ohlendorf, S. Pachnicke (Christian-Albrechts-Universität, Kiel)	
22	Application Study of Digital Resolution Enhancement for Digital-to-Analog Converters	64
	N. Sölch, C. Fludger (Cisco Optical Nürnberg; Technische Hochschule Nürnberg)	
23	Experimental Analysis of Inter Mode Group Coupling at Connectors in Graded Index Multi Mode Fibers	67
	C. M. Spenner, S. Jeurink, P. M. Krummrich (Technische Universität Dortmund)	
24	Fiber-Optic Transmission with a Direct Detection Receiver: Iterative Implementation of Block Linear Equalization	70
	W. G. Teich, S. Roy, R. F. H. Fischer (Universität Ulm)	

Session 7: Systems and Components

Andreas Kirstädter

25	Latency Measurement of 100 km Fiber Using Correlation-OTDR	73
	F. Azendorf, A. Dochhan, B. Schmauss, M. Eiselt (ADVA Optical Networking, Meiningen; Universität Erlangen)	
26	WDM Environmental Assessment and its Application	76
	K. Grobe, D. Alpögger (ADVA Optical Networking, München)	
27	Polarization-Independent Depolarizer for Control and Supervisory Signals in Long-Haul Fiber Lines	82
	R. Noé, B. Koch (Universität Paderborn; Novoptel, Paderborn)
