

Table of Contents

Part I

Introducing simulation in social studies of science and technology

- 1 **Simulation: An introduction to the idea..... 1**
Nigel Gilbert
- 2 **Modelling science as an adaptive and self-organising
social system: Concepts, theories and modelling tools..... 15**
Jürgen Klüver
- 3 **Computer simulations in science and technology
studies..... 33**
Petra Ahrweiler and Stefan Wörmann

Part II

Simulating the logic of discovery

- 4 **Causation and discovery..... 53**
Michael May
- 5 **The discovery of the urea cycle: Computer models of
scientific discovery 71**
Gerd Graßhoff
- 6 **Connecting disconnected structures: The modelling of
scientific discovery in medical literature databases 91**
Rein Vos and Floor Rikken

Part III

Evolutionary models of science and technology

- 7 The evolution of technologies..... 103**
Klaus G. Troitzsch
- 8 Simulating paradigm shifts using a lock-in model..... 117**
Koen Frenken and Okke Verbart
- 9 SiSiFOS — simulating studies on the internal
formation and the organization of science..... 129**
Petra Ahrweiler and Rolf Wolkenhauer
- 10 The self-organization of social systems: A simulation
of the social construction of knowledge..... 145**
Günter Küppers
- 11 Modelling Krohn and Küppers' theory of science as a
self-organizing system..... 157**
Christina Stoica

Part IV

Simulating conditions and dependencies of scientific work

- 12 Modelling creativity..... 173**
Arthur I. Miller
- 13 Developing simulation models with policy relevance:
The implications of recent UK reforms for emergent
scientific disciplines..... 183**
Paul Windrum and Chris Birchenhall
