<b>Part I</b>	<b>Rotational Tunneling I – Potentials and Phonon Interaction</b>	
<hr/>		
The Temperature Dependence of Rotational Tunneling – Simulation of a Quantum System at Finite Temperatures		
By A. Hüller and L. Baetz (With 1 Figure) . . . . .		2
The Rotational Potential of Solid Nitromethane		
By S.F. Trevino (With 9 Figures) . . . . .		9
The Orientation of the Rotational Potential in the Crystal Frame: $(\text{NH}_4)_2\text{PtCl}_6$		
By A. Hoser, W. Prandl, and G. Heger (With 2 Figures) . . . . .		19
Inelastic Neutron Scattering Study of Methyl Tunnelling in $\alpha$ -Crystallised Toluene. By D. Cavagnat, A. Magerl, C. Vettier, and S. Clough (With 3 Figures) . . . . .		24
Tunnelling Spectroscopy and Dynamics of $\text{CH}_3$ in a Homologous Series of Ketones		
By A.J. Horsewill, R.M. Green, and A.M. Alsanoosi (With 2 Figures) . . . . .		28
$\text{NH}_4^+$ Motions in $\text{NH}_4\text{MF}_3$ Cubic Perovskites		
By R. Navarro, E. Palacios, J. Bartolomé, R. Burriel, and D. González (With 2 Figures) . . . . .		33
Spectroscopic Raman Study of Trifluoroperovskites of Ammonium Under High Pressure		
By E. Palacios, J. Bartolomé, F. Agulló-Rueda, J.M. Calleja, M. Cardona, K. Syassen, and K. Strößner (With 2 Figures) . . . . .		38
<b>Part II</b>	<b>Rotational Tunneling II – Coupled Systems</b>	
<hr/>		
Rotational Tunneling of Coupled Groups Studied by Inelastic Neutron Scattering. By A. Heidemann (With 7 Figures) . . . . .		44
Study of the Dipolar Proton Spin System in Lithium Acetate with NMR Dispersion Spectroscopy		
By E. Crits and L. Van Gerven (With 5 Figures) . . . . .		54

Tunnelling of Ammine Ligands in Nickel Hexammine Iodide By G.J. Kearley, H. Blank, and J.K. Cockcroft (With 3 Figures) . . .	58
The Free Rotor, $\text{NH}_3$ , in Metal Hexammine Ions By H. Blank, J.K. Cockcroft, and G.J. Kearley (With 2 Figures) . . .	62
Tunnel Spectroscopy by Dipolar-Driven NMR. By K.J. Abed, G.J. Barker, S. Clough, and A.J. Horsewill (With 3 Figures) . . . . .	65
Zeeman-Tunnel Resonance Line Shapes in NMRRR Investigations of Rotational Tunneling. By G. Vandemaele, A. Buekenhoudt, and L. Van Gerven (With 4 Figures) . . . . .	72
Coupled Tunneling of Methyl Groups in Solids as Studied by Proton NMR Method. By S. Takeda and H. Chihara (With 4 Figures) . . . .	76
Tunneling of $\text{CH}_3$ Groups in Molecular Crystals of the $\text{X}(\text{CH}_3)_n$ Type. By J. Peterneij, I. Jencic, B. Cvikl, and M.M. Pintar (With 2 Figures) . . . . .	81

---

<b>Part III</b>	<b>Rotational Tunneling III – Surfaces, Isotope Effect, Matrix Isolation</b>
-----------------	--

---

Hindered Rotation and Tunnelling of Adsorbed Species By S.J.M. Collinson, G.M. Hunt, M.V. Smalley, M.L. Statham, and R.K. Thomas (With 6 Figures) . . . . .	86
Rotational Tunneling of Matrix-Isolated Tetramethyl Compounds By W. Langel, M. Prager, O. Schrems, and E. Knözinger (With 5 Figures) . . . . .	93
Rotational Excitations in $(\text{CH}_4)_{1-x}\text{Kr}_x$ Solid Mixtures By S. Grondey, M. Prager, W. Press, and A. Heidemann (With 5 Figures) . . . . .	98
Quantum Rotation of Ammonia Molecules in Disordered $\text{Ca}(\text{NH}_3)_6$ By F. Leclercq, P. Damay, A.J. Dianoux, and W. Press (With 3 Figures) . . . . .	103
The Methyl Rotational Potentials of Various Isotopic Methyl Iodides and Their Coupling to Phonons By M. Prager, J. Stanislawski, and W. Häusler (With 3 Figures) . . .	107
Partially Deuterated Methyl Groups in Molecular Solids: The System $4\text{-CH}_2\text{D-C}_5\text{H}_4\text{N}$ with an Original Sixfold Symmetric Barrier By H.B. Brom, H. den Adel, and B. Alefeld (With 2 Figures) . . . . .	113
Calorimetric and Dielectric Study of Partly Deuterated Ammonium Hexachlorostannate By J. Gilchrist, J. Odin, and J. Peyrard (With 2 Figures) . . . . .	118

Tunneling to Reorientation Transition Effects in High Field $^2\text{H}$ -NMR Spectra of $\text{ND}_4^+$ Ions. By L.P. Ingman, E. Koivula, Z.T. Lalowicz, M. Punkkinen, and E.E. Ylinen (With 1 Figure) . . . . .	122
---	-----

---

<b>Part IV</b>	<b>Translational Tunneling</b>
----------------	--------------------------------

---

Influence of Phonons and Electrons on Low-Temperature Translational Tunneling. By H. Grabert (With 3 Figures) . . . . .	130
Quantum Diffusion of Light Interstitials in Metals By D. Richter (With 6 Figures) . . . . .	140
The Influence of Electrons on the Tunneling State of a Hydrogen Atom in a Metal. By H. Wipf, D. Steinbinder, K. Neumaier, P. Gutsmedl, A. Magerl, and A.J. Dianoux (With 2 Figures) . . . . .	153
H and D Tunneling in Nb: Dependence on Defect Concentration and Trapping Center. By P. Gutsmedl, M. Schiekhofer, K. Neumaier, and H. Wipf (With 3 Figures) . . . . .	158
Sound Velocity Measurements on Hydrogen-Doped Niobium in the Superconducting and Normal States By W. Morr, G. Weiss, and H. Wipf (With 1 Figure) . . . . .	163
Quantitative Theory of the Tunnel Level Splitting for Hydrogen Trapped at Oxygen in Niobium. By H. Teichler . . . . .	167
Debye-Waller Peculiarity in Phonon-Assisted Tunneling By M. Wagner (With 2 Figures) . . . . .	172
Quantum Diffusion Above $\Theta_{\text{Debye}}/2$ . By A. Klamt (With 2 Figures) . . . . .	177
Hydrogen Diffusion by Tunneling in Metals By I. Svare (With 2 Figures) . . . . .	182
Optical Studies of Proton Tunneling and Relaxation in Benzoic Acid By M. Pierre, H.P. Trommsdorff, and R.M. Hochstrasser (With 3 Figures) . . . . .	186

---

<b>Part V</b>	<b>Disordered Systems</b>
---------------	---------------------------

---

How Universal Is the Spectral Density of Tunneling States in Glasses? By S. Hunklinger (With 5 Figures) . . . . .	194
Very Low Frequency Elastic Loss of PMMA Below 5 K By M. v. Schickfus, H. Tietje, and E. Gmelin (With 3 Figures) . . . . .	204
Ultrasonic Attenuation Study of Two-Level Systems in Neutron-Irradiated Quartz upon Heat Treatment By A. Vanelstraete and C. Laermans (With 1 Figure) . . . . .	208

The One-Dimensional Quantum Rotator $\text{H}_2\text{S}^-$ in Several Alkali Halides. By D. Schoemaker and E. Goovaerts (With 2 Figures) . . . .	212
Relaxation Times of $k \approx 0$ Rotons in Parahydrogen Crystals at Low Concentrations of Orthohydrogen Impurities By E. Goovaerts, X.Y. Chen, C. Sierens, A. Bouwen, and D. Schoemaker (With 3 Figures) . . . . .	217
<b>Index of Contributors</b> . . . . .	<b>221</b>
