

Contents

Invited Papers

Multisensor Data Fusion in Situation Assessment Processes <i>Alain Appriou</i>	1
Dependency Mining in Relational Databases <i>Siegfried Bell</i>	16
Syntactic Combination of Uncertain Information: A Possibilistic Approach <i>Salem Benferhat, Didier Dubois and Henri Prade</i>	30
A Coherence-Based Approach to Default Reasoning <i>Salem Benferhat and Laurent Garcia</i>	43
A Syntactical Approach to Data Fusion <i>Paolo Bison, Gaetano Chemello, Claudio Sossai and Gaetano Trainito</i>	58
Some Experimental Results on Learning Probabilistic and Possibilistic Networks with Different Evaluation Measures <i>Christian Borgelt and Rudolf Kruse</i>	71
Information Fusion in Logic: A Brief Overview <i>Laurence Cholvy and Anthony Hunter</i>	86
Focusing vs. Belief Revision: A Fundamental Distinction When Dealing with Generic Knowledge <i>Didier Dubois and Henri Prade</i>	96
Background and Perspectives of Possibilistic Graphical Models <i>Jörg Gebhardt and Rudolf Kruse</i>	108
Checking Several Forms of Consistency in Nonmonotonic Knowledge-Bases <i>Bertrand Mazure, Lakhdar Saïs and Éric Grégoire</i>	122
The α -junctions: Combination Operators Applicable to Belief Functions <i>Philippe Smets</i>	131
Just How Stupid Is Postmodernism? <i>John Woods</i>	154

Accepted Papers

Integrating Preference Orderings into Argument-Based Reasoning <i>Leila Amgoud and Claudette Cayrol</i>	159
--	-----

Assumption-Based Modeling Using ABEL <i>B. Anrig, R. Haenni, J. Kohlas and N. Lehmann</i>	171
Propositional Quantification for Conditional Logic <i>Philippe Besnard, Jean-Marc Guinnebault and Emmanuel Mayer</i>	183
Fast-Division Architecture for Dempster-Shafer Belief Functions <i>R. Bissig, J. Kohlas, N. Lehmann</i>	198
Graduality by Means of Analogical Reasoning <i>J. Delechamp and B. Bouchon-Meunier</i>	210
Reasoning About Unpredicted Change and Explicit Time <i>Florence Dupin de Saint-Cyr and Jérôme Lang</i>	223
Non-elementary Speed-Ups in Default Reasoning <i>Uwe Egly and Hans Tompits</i>	237
A Compositional Reasoning System for Executing Nonmonotonic Theories of Reasoning <i>Joeri Engelfriet and Jan Treur</i>	252
Structured Belief Bases: A Practical Approach to Prioritised Base Revision <i>Dov Gabbay and Odinaldo Rodrigues</i>	267
Entrenchment Relations: A Uniform Approach to Nonmonotonicity <i>Konstantinos Georgatos</i>	282
A Modal Logic for Reasoning about Knowledge and Time on Binary Subset Trees <i>Bernhard Heinemann</i>	298
How to Change Factual Beliefs Using Laws and Dependence Information <i>Andreas Herzig</i>	311
Using Default Logic for Lexical Knowledge <i>Anthony Hunter</i>	322
A Layered, Anytime Approach to Sensor Validation <i>Pablo H. Ibarguengoytia, Sunil Vadera and L. Enrique Sucar</i>	336
treeNets: A Framework for Anytime Evaluation of Belief Networks <i>Nathalie Jitnah and A. Nicholson</i>	350
A Logically Sound Method for Uncertain Reasoning with Quantified Conditionals <i>Gabriele Kern-Isberner</i>	365

Belief Functions with Nonstandard Values <i>Ivan Kramosil</i>	380
Error Tolerance Method in Multiple-Valued Logic <i>Soowoo Lee</i>	392
Representing and Reasoning with Events from Natural Language <i>Miguel Leith and Jim Cunningham</i>	406
Reasoning about Security: A Logic and a Decision Method for Role-Based Access Control <i>Fabio Massacci</i>	421
Process Modeling with Different Qualities of Knowledge <i>Wolfgang May</i>	436
A Fuzzy Analysis of Linguistic Negation of Nuanced Property in Knowledge-Based Systems <i>Daniel Pacholczyk</i>	451
Normative Argumentation and Qualitative Probability <i>Simon Parsons</i>	466
Towards a Formalization of Narratives: Actions with Duration, Concurrent Actions and Qualification <i>Anna Radzikowska</i>	481
Multiple Subarguments in Logic, Argumentation, Rhetoric and Text Generation <i>Chris Reed and Derek Long</i>	496
Cactus: A Branching-Time Logic Programming Language <i>P. Rondogiannis, M. Gergatsoulis and T. Panayiotopoulos</i>	511
Creating Prototypes for Fast Classification in Dempster-Shafer Clustering <i>Johan Schubert</i>	525
Probabilistic Default Logic Based on Irrelevance and Relevance Assumptions <i>Gerhard Schurz</i>	536
Logic for Two: The Semantics of Distributive Substructural Logics <i>John Slaney and Robert Meyer</i>	554
Multivalued Extension of Conditional Belief Functions <i>Anna Slobodová</i>	568

Combining Evidence under Partial Ignorance 574
Frans Voorbraak

Rational Default Quantifier Logic 589
Emil Weydert

Disjunctive Update, Minimal Change, and Default Reasoning 600
Yan Zhang

Position Papers and System Descriptions

Toward a Uniform Logical Representation of Different Kinds of Integrity Constraints 614
Robert Demolombe, Andrew J. I. Jones and Jose Carmo

Authors Index 621
