

CONTENTS

<i>Preface</i>	XIII
<i>Acknowledgement</i>	XIV
<i>Contributors</i>	XV
History of Vitamin B ₆ <i>E.E. Snell</i>	1
Molecular evolution	
Molecular evolution of pyridoxal-5'-phosphate-dependent enzymes <i>P. Christen, P.K. Mehta and E. Sandmeier</i>	9
Stereospecificity of aminotransferases for C-4' hydrogen transfer and enzyme evolution <i>K. Soda, T. Yoshimura and N. Esaki</i>	15
Detection of weak structural similarities among PLP dependent enzymes <i>S. Pascarella and F. Bossa</i>	21
Aminotransferases	
Crystallographic studies on the Vitamin B ₆ -assisted enzymic transamination reaction <i>J.N. Jansonius, J.-C. Génovésio-Taverne, M. Hennig, E. Hohenester, M. Jenny, V.N. Malashkevich, M. Moser, R. Müller, B.W. Shen, W. Stark, A. von Stosch and M.D. Toney</i>	29
Redesign of aspartate aminotransferase specificity to that of tyrosine aminotransferase <i>J.F. Kirsch and J.J. Onuffer</i>	37
Enzyme-substrate interactions modulating protonation and tautomerization states of the aldimines of pyridoxal enzymes <i>H. Kagamiyama, H. Hayashi, T. Yano, H. Mizuguchi and S. Ishii</i>	43
Functional role of the mobile stretch Gly36-Val37-Gly38 of porcine cytosolic aspartate aminotransferase <i>Y. Morino, S. Tanase, Q.-W. Pan, N. Hamasaki, M. Mayumi, S. Rhee, P.H. Rogers and A. Arnone</i>	49
Using ¹ H- and ¹⁵ N-NMR spectroscopy to observe active sites of porcine cytosolic and <i>Escherichia coli</i> aspartate aminotransferases <i>D.E. Metzler, C.M. Metzler, E.T. Mollova, R.D. Scott, A. Kintanar, S. Tanase, K. Kogo, T. Higaki, Y. Morino, H. Kagamiyama, T. Yano, S. Kuramitsu, H. Hayashi, K. Hirotsu and I. Miyahara</i>	55

VIII

Aspartate aminotransferases like it hot <i>G. Marino, L. Birolo and G. Sannia</i>	61
Studies on the mechanism of action of D-amino acid transaminase <i>J.M. Manning</i>	67
Cytosolic factors and the twisting path from birth to berth in aspartate aminotransferases <i>A. Iriarte, A. Artigues, B. Lain, J.R. Mattingly, Jr. and M. Martinez-Carrion</i> . . .	75
Mitochondrial protein import: Role of certain domains of mitochondrial aspartate aminotransferase <i>S. Giannattasio, A. Azzariti, R.A. Vacca, P. Lattanzio, R.S. Merafina and E. Marra</i>	81
Cytosolic aspartate aminotransferase: Tissue-specific hormonal regulation of a housekeeping gene promoter <i>R. Barouki, M. Garlatti, S. Feilleux-Duché, C. Toussaint, M. Aggerbeck and J. Hanoune</i>	87
Regulation by glucagon of serine: pyruvate/alanine:glyoxylate aminotransferase gene expression in cultured hepatocytes <i>C. Uchida, T. Funai, K. Ohbayashi, T. Oda and A. Ichiyama</i>	93
Glutamate 1-semialdehyde aminotransferase, a unique enzyme in chlorophyll biosynthesis <i>B. Grimm</i>	99
Mechanism of glutamate semialdehyde aminotransferase probed with substrate analogues <i>R. Tyacke, B. Grimm, J.L. Harwood and R.A. John</i>	105

Tryptophan-synthase and decarboxylases

Crystallographic and kinetic studies of the tryptophan synthase $\alpha_2\beta_2$ complex with a mutation in β subunit lysine-87 that binds pyridoxal phosphate <i>E.W. Miles, U. Banik, Z. Lu, A.A. Ahmed, K.D. Parris, C.C. Hyde and D.R. Davies</i>	113
The roles of chemical transformation, loop closure, tunnel function and metal ion activation in the tryptophan synthase mechanism <i>M.F. Dunn, P.S. Brzovic, C.A. Leja, P. Pan and E.U. Woehl</i>	119
Effects of monovalent cations on functional properties of the tryptophan synthase $\alpha_2\beta_2$ complex in solution and in the crystal <i>A. Peracchi, A. Mozzarelli and G.L. Rossi</i>	125
The long-range effect on the mutual activation of the α and β subunits in the $\alpha_2\beta_2$ complex of tryptophan synthase <i>K. Hiraga and K. Yutani</i>	131

X-ray structure, sequence and solution properties of ornithine decarboxylase from <i>Lactobacillus 30a</i> <i>M.L. Hackert, D. Carroll, R. Ghosh, A. Kern, C. Momany, M. Oliveira and L. Zhang</i>	135
Dialkylglycine decarboxylase structure: Alkali metal binding sites and bifunctional active site <i>M.D. Toney, E. Hohenester, J.W. Keller and J.N. Jansonius</i>	141
The location and role of active-site bases in PLP-dependent decarboxylase enzymes as deduced from stereochemical and kinetic studies <i>D. Gani, M. Akhtar, J.E. Rose and K. Tilley</i>	147
GuCl-induced unfolding of pig kidney dopa decarboxylase: Evidence for a multi-state process <i>P. Dominici, P.S. Moore and C. Borri Voltattorni</i>	153
Phosphorylases	
The transition state complex in the phosphorylase catalyzed reaction <i>D. Palm, S. Becker and R. Schinzel</i>	161
Binding mode of glucans to α -glucan phosphorylase isozymes and their chimeric enzymes <i>T. Fukui, H. Mori and K. Tanizawa</i>	167
Slow conformational transitions of muscle glycogen phosphorylase <i>b</i> <i>B.I. Kurganov and E.I. Schors</i>	173
Other pyridoxal-dependent enzymes	
X-ray study of tryptophanase at 2.1 Å resolution <i>M. Isupov, I. Dementieva, L. Zakomirdina, K.S. Wilson, Z. Dauter, A.A. Antson, G.G. Dodson and E.G. Harutyunyan</i>	183
Crystallographic studies of tyrosine phenol-lyase <i>A.A. Antson, G.G. Dodson, K.S. Wilson, S.V. Pletnev, E.G. Harutyunyan and T.V. Demidkina</i>	187
Studies of the mechanism of tyrosine phenol-lyase: Kinetics and site-directed mutagenesis <i>R.S. Phillips, H. Chen and P. Gollnick</i>	193
The role of pyridoxal phosphate in the refolding of serine hydroxymethyltransferase <i>K. Cai and V. Schirch</i>	199
The mechanism of O-acetylserine sulfhydrylase from <i>Salmonella typhimurium</i> <i>K.D. Schnackerz and P.F. Cook</i>	205
Involvement of PLP in biological formation iron-sulfur clusters <i>L. Zheng and D.R. Dean</i>	211

X

- Iron-sulfur clusters as alternatives to pyridoxal-5'-phosphate in bacterial L-serine dehydratases: Cloning of the gene encoding the β -subunit of the enzyme from *Peptostreptococcus asaccharolyticus*
A.E.M. Hofmeister, R. Grabowski and W. Buckel 217

- Phosphorescence of pyridoxal kinase at room temperature: The effects of ligands bound to the nucleotide site
M. Blazquez, T. Pineda, F. Kwok and J.E. Churchich 223

- The Schiff base of pyridoxal-5'-phosphate with ethylenediamine and ethylamine: Species in solution
J.M. Sevilla, C. Hidalgo, T. Pineda, F. Garcia-Blanco and M. Blazquez 229

Amine oxidases

- Biological role and reactivity of TPQ containing amine oxidases
B. Mondovi 235

- Two distinct quinoprotein amine oxidases are functioning in *Aspergillus niger*
I. Frebort, H. Toyama, K. Matsushita, H. Kumagai, P. Pec, L. Luhova and O. Adachi 241

- The catalytic competence of cobalt-time oxidase
E. Agostinelli, L. Morpurgo, C. Wang, B. Mondovi and A. Giartosio 247

- Mechanistic studies of copper/topa amine oxidases
D.M. Dooley, D.E. Brown, M.A. McGuirl and L.J. Sears 253

- Design, synthesis and evaluation of mechanism-based inhibitors of copper amine oxidases
L.M. Sayre, F. Wang, Y. Lee, H. Huang, F.T. Greenaway, Z. He, A. Lightning and H.M. Kagan 259

- Copper ion-dependent biogenesis of topa quinone cofactor covalently bound to bacterial monoamine oxidase
K. Tanizawa, R. Matsuzaki and T. Fukui 263

- Modulation of lysyl oxidase activity toward peptidyl lysine by vicinal dicarboxylic amino acid residues
N. Nagan and H.M. Kagan 269

Quinoprotein dehydrogenases

- The structure and function of quinoprotein dehydrogenases
C. Anthony 277

- Quinoprotein oxidoreductases for the oxidation of alcohols, sugars and amines
J.A. Duine, J.A. Jongejan and S. de Vries 283

The ternary complex between methylamine dehydrogenase, amicyanin and cytochrome C _{55H} <i>F.S. Mathews, L. Chen, R.C.E. Durley, V.L. Davidson</i>	291
Model studies directed toward the action of quinoprotein methanol dehydrogenase <i>S. Itoh</i>	297
Molecular physiology	
Nutritional aspects of vitamin B ₆ : Requirements, recommendations and intake <i>D.A. Bender</i>	305
Vitamin B ₆ transport and metabolism: Clues for delivery of bioactive compounds <i>D.B. McCormick</i>	311
Vitamin B ₆ modulation of steroid receptor-mediated gene expression <i>D.B. Tully, A.B. Scoltock and J.A. Cidlowski</i>	319
Molecular pathology	
Pyridoxine (vitamin B ₆), neurotransmitters and hypertension <i>K. Dakshinamurti, K.J. Lal and S. K. Sharma</i>	331
A liver enzyme, serine:pyruvate/alanine:glyoxylate aminotransferase and its mutant in a primary hyperoxaluria type I case <i>K. Ishikawa, T. Suzuki, T. Funai, K. Nishiyama, C. Uchida and A. Ichiyama</i> . . .	337
Pyridoxal phosphate, GABA and seizure susceptibility <i>D.L. Martin</i>	343
Monoclonal antibodies to bovine brain GABA transaminase <i>S.Y. Choi, S.H. Jang, B.R. Lee, Y.K. Kim, S.-W. Cho and E.Y. Choi</i>	349
Effects of pyrroloquinoline quinone (PQQ) on the SLE-like (Systemic Lupus Erythematosus) disease in MRL-lpr/lpr mice <i>B.J. Weimann</i>	353
Conclusions <i>F. Bossa</i>	359
<i>Subject index</i>	361
