

Contents

Preface	v
Chapter 1 Introduction	1
1.1 Historic Note	1
1.2 Role of Plastics in Packaging	2
1.3 Book Structure	6
Chapter 2 Basic Concepts and Definitions	7
2.1 Terminology	7
2.1.1 Macromolecule	7
2.1.2 Polymer	8
2.1.3 Plastic	8
2.1.4 Monomer	10
2.1.5 Constitutional Unit	10
2.1.6 Homopolymer	11
2.1.7 Copolymer	11
2.2 Polymer Nomenclature	12
2.3 Interatomic and Intermolecular Forces in Polymers	13
2.3.1 Interatomic Forces	13
2.3.1.1 Covalent Bonds	13
2.3.1.2 Ionic Bonds	14
2.3.2 Intermolecular and Intramolecular Forces	15
2.3.2.1 Dispersion Forces	16
2.3.2.2 Induction Forces	16
2.3.2.3 Dipole Forces	17
2.3.2.4 Hydrogen Bonds	17
2.4 Properties Determined by Chemical Composition	17
2.5 Categorization of Plastics	18
Study Questions	19

Chapter 3	Polymer Structure and Properties	21
3.1	Introduction	21
3.2	Molecular Architecture	21
3.2.1	Linear Polymers	22
3.2.2	Branched Polymers	22
3.2.3	Cross-Linked Polymers	23
3.3	Copolymer Structure	24
3.3.1	Random Copolymers	25
3.3.2	Alternating Copolymers	25
3.3.3	Block Copolymers	26
3.3.4	Graft Copolymers	27
3.3.5	Combinations of Copolymer Types	28
3.4	Chain Polymerization, Addition Polymers	29
3.4.1	Addition or Chain Polymerization	29
3.4.2	Vinyl Polymers	30
3.4.3	Free-Radical Polymerization	32
3.4.3.1	Initiation	32
3.4.3.2	Propagation	33
3.4.3.3	Termination	33
3.4.4	Polyethylene Polymerization Processes	33
3.4.5	Other Addition Polymerization Mechanisms	36
3.5	Molecular Configuration and Conformation	37
3.6	Head-to-Head and Head-to-Tail Configurations of Vinyl Polymers	37
3.7	Stereochemistry	39
3.8	Step Polymerization, Condensation Polymers	41
3.9	Molecular Weight and Molecular Weight Distribution	44
3.9.1	Degree of Polymerization	45
3.9.2	Molecular Mass (Weight) and Molecular Weight Distribution	45
3.9.3	Number Average Molecular Weight	46
3.9.4	Weight Average Molecular Weight	47
3.9.5	Other Molecular Weight Averages	50
3.9.6	Determination of MWD	50
3.9.7	Effect of Molecular Weight and Molecular Weight Distribution on Flow and Mechanical Properties	51
3.10	Polymer Morphology	54
3.10.1	Crystallinity	55
3.10.2	Polymer Orientation	60
3.10.3	Degree of Crystallinity	61
3.11	Thermal Properties	63
3.11.1	Melting Temperature	63
3.11.2	Glass Transition Temperature	63
3.11.2.1	Measuring T_g	66
3.11.2.2	Variables Affecting T_g	68
3.11.3	Other Thermal Transitions	69
3.11.4	Heat Capacity	70
3.11.5	Heat of Fusion	70

3.11.6	Thermal Conductivity	70
3.11.7	Thermal Expansion Coefficient	71
3.11.8	Other Dimensional Changes	72
3.11.9	Dimensional Stability	72
3.12	Mechanical Properties	73
3.12.1	Tensile Properties	73
3.12.2	Tear Strength	76
3.12.3	Impact and Bursting Strength	76
3.12.4	Other Mechanical Properties	76
3.13	Barrier Properties	77
3.13.1	Diffusion Coefficient	78
3.13.2	Solubility Coefficient	78
3.13.3	Permeability Coefficient	78
3.14	Surfaces and Adhesion	79
3.14.1	Surface Tension	79
3.14.2	Wettability	79
3.14.3	Adhesive Bond Strength	80
3.14.4	Cohesive Bond Strength	80
3.14.5	Blocking	80
3.14.6	Friction	81
3.14.7	Heat Sealing	81
3.15	Optical Characteristics	82
3.15.1	Gloss	82
3.15.2	Haze	83
3.15.3	Transparency and Opacity	83
3.16	Electrical Properties	84
3.17	Plastics Identification Using IR Spectrophotometry	84
	References	86
	Study Questions	86
Chapter 4	Major Plastics in Packaging	89
4.1	Branched Polyethylenes	89
4.1.1	Low Density Polyethylene	91
4.1.2	Ethylene Vinyl Acetate (EVA)	92
4.1.3	Ethylene Acrylic Acid (EAA)	93
4.1.4	Ionomers	94
4.2	Linear Polyethylenes	95
4.2.1	High Density Polyethylene (HDPE)	96
4.2.2	Linear Low Density Polyethylene (LLDPE)	98
4.2.3	Metallocene Polymers	99
4.2.4	Property Trends in the Polyethylene Family	102
4.3	Polypropylene (PP)	102
4.3.1	PP Homopolymer	104
4.3.2	Random Copolymer Polypropylene	104
4.4	Polyvinyl Chloride (PVC)	106
4.5	Vinylidene Chloride Copolymers (PVDC)	108

4.6	Polystyrene (PS)	109
4.7	Polyvinyl Alcohol (PVOH) and Ethylene Vinyl Alcohol (EVOH)	110
4.7.1	Polyvinyl Alcohol	110
4.7.2	Ethylene Vinyl Alcohol	111
4.8	Nylon	113
4.9	Polyester	115
4.9.1	Polyethylene Terephthalate (PET)	115
4.9.2	Glycol Modified PET, Other PET Copolymers, and PET Blends	117
4.9.3	Polyethylene Naphthalate (PEN)	118
4.10	Polycarbonate (PC)	119
4.11	Fluoropolymers	120
4.12	Styrene-Butadiene Copolymers	121
4.13	Acrylonitrile Copolymers	121
4.14	Liquid Crystal Polymers	123
4.15	Conductive Polymers	124
4.16	Thermoplastic Elastomers	124
4.17	Thermosets	125
4.18	Cellophane and Cellulosic Plastics	127
4.18.1	Cellophane	128
4.18.2	Cellulosic Plastics	128
4.19	Polymer Blends	130
	References	131
	Study Questions	131
Chapter 5	Additives and Compounding	135
5.1	Introduction	135
5.2	Compounding	136
5.3	Antioxidants	137
5.4	Heat Stabilizers	140
5.5	UV Stabilizers	141
5.6	Additives to Modify Surface Attractions	142
5.6.1	Antiblocking Agents	143
5.6.2	Slip Agents	143
5.6.3	Antislip Agents	144
5.6.4	Lubricants	144
5.6.5	Mold Release Agents	145
5.7	Colorants	145
5.7.1	Dyes	146
5.7.2	Organic Pigments	146
5.7.3	Inorganic Pigments	146
5.7.4	Specialty Pigments	146
5.7.5	Colorants and the FDA	148
5.8	Antifogging Agents	148
5.9	Nucleating Agents	149
5.10	Antistatic Agents	150
5.11	Plasticizers	151

5.12	Oxygen Scavengers, Desiccants and Fragrance Enhancers	152
5.13	Fillers and Reinforcers	154
5.14	Antimicrobials or Biocides	155
5.15	Other Additives	155
	Study Questions	156
Chapter 6 Adhesion, Adhesives and Heat Sealing		157
6.1	Adhesion	157
6.2	Adhesives	158
6.3	Adhesive and Cohesive Bond Strength	159
6.3.1	Adhesive Bond Strength	160
6.3.1.1	Surface Tension	160
6.3.1.2	Solubility Parameter	161
6.3.1.3	Viscosity	163
6.3.1.4	Estimation of Adhesive Bond Strength	164
6.3.2	Cohesive Bond Strength	164
6.4	Types of Adhesives	165
6.4.1	Reactive Adhesives	165
6.4.2	Hot Melt Adhesives	166
6.4.3	Solvent-Borne Adhesives	166
6.4.4	Water-Borne Adhesives	167
6.4.5	Pressure Sensitive and Remoistenable Adhesives	168
6.4.6	Cold-Seal Adhesives	169
6.5	Application of Adhesives	169
6.6	Adhesive Terminology	170
6.7	Adhesive Additives	171
6.8	Heat Sealing	172
6.8.1	Sealing Methods	173
6.8.1.1	Bar or Thermal Sealing	173
6.8.1.2	Impulse Sealing	174
6.8.1.3	Band Sealing	175
6.8.1.4	Hot Wire or Hot Knife Sealing	175
6.8.1.5	Ultrasonic Sealing	176
6.8.1.6	Friction Sealing	176
6.8.1.7	Hot Gas Sealing and Contact Sealing	176
6.8.1.8	Radiant Sealing	177
6.8.1.9	Dielectric Sealing	177
6.8.1.10	Magnetic Sealing	177
6.8.1.11	Induction Sealing	177
6.8.1.12	Solvent Sealing	178
6.8.2	Heat Conduction in Multilayer Flexible Materials	179
6.8.3	Hot Tack	180
6.8.4	Heat Seal Jaws	180
6.8.5	Heat Seal Failure Modes	181
6.8.6	Evaluation of Seals in Flexible Packaging Materials	182
	References	183

Study Questions	183
Chapter 7 Extrusion, Film and Sheet	185
7.1 Extrusion and Extruders	185
7.1.1 Hopper and Feed Port	187
7.1.2 Feed Section	187
7.1.3 Compression Section	188
7.1.4 Metering Section	189
7.1.5 Mixing Devices	189
7.1.6 Extruder and Screw Design and Size	190
7.1.7 Dies	191
7.1.8 Melt Filters	191
7.1.9 Drive Mechanisms and Screw Speeds	191
7.1.10 Special Designs	192
7.1.11 Extrusion Temperatures	192
7.1.12 Extrusion Pressures	194
7.2 Cast Film and Sheet	194
7.2.1 Cold Cast or Chill Roll Cast Process	194
7.2.2 Roll Stack and Calendering Processes	195
7.2.3 Quench Tank or Water Bath Process	195
7.2.4 Nip Rolls and Winding	196
7.2.5 Gauge Control	196
7.2.6 Orientation	197
7.2.7 Cast Film Dies	198
7.3 Blown Film	199
7.3.1 Blown Film Extrusion	201
7.3.2 Blown Film Dies	201
7.3.3 Air Rings and Internal Bubble Cooling (IBC)	203
7.3.4 Collapsing Frames	205
7.3.5 Nips	206
7.3.6 Slitting and Winding	207
7.3.7 Double-Bubble Process	208
7.4 Stretch and Shrink Wrap	208
7.4.1 Stretch Wrap	209
7.4.2 Shrink Wrap	209
7.5 Film and Sheet Coextrusion	210
7.6 Surface Treatment	213
7.7 Yield of Film	214
7.8 Testing and Evaluation of Films	215
References	215
Study Questions	215
Chapter 8 Converting, Lamination and Coating	217
8.1 Extrusion Coating and Laminating	217
8.2 Hot Melt Lamination or Coating	220

8.3	Adhesive Lamination	221
8.4	Thermal Laminating	223
8.5	Metallized Film	223
8.6	Silicon Oxide Films	225
8.7	Other Inorganic Barrier Coatings	226
8.8	Building Multilayer Structures	226
	References	227
	Study Questions	227
Chapter 9 Flexible Packaging		229
9.1	Characteristics of Flexible Packaging	229
9.2	Pouch Styles	231
	9.2.1 Pillow Pouches	231
	9.2.2 Three-side Seal Pouches	232
	9.2.3 Four-side Seal Pouches	232
	9.2.4 Stand-up Pouches	232
9.3	Forming Pouches	233
9.4	Bulk and Heavy-Duty Bags	235
9.5	Retort Pouches	236
9.6	Bag-in-Box	237
	References	237
	Study Questions	237
Chapter 10 Thermoforming		239
10.1	Introduction	239
10.2	Heating the Sheet	240
	10.2.1 Temperature Selection	240
	10.2.2 Radiative Heating	240
10.3	Forming the Sheet	242
	10.3.1 Basic Methods	242
	10.3.1.1 Drape Forming	243
	10.3.1.2 Vacuum Forming	243
	10.3.1.3 Pressure Forming	244
	10.3.2 Sheet Deformation	244
	10.3.3 Thermoforming Variations	246
	10.3.3.1 Plug-Assist Thermoforming	246
	10.3.3.2 Solid Phase Pressure Forming	246
	10.3.3.3 Bubble or Billow Forming	247
	10.3.3.4 Vacuum Snap-Back Thermoforming	247
	10.3.3.5 Matched Mold Forming	248
	10.3.3.6 Scrapless Thermoforming	248
	10.3.3.7 In-Line Thermoforming and Melt-to-Mold Thermoforming	249
	10.3.3.8 Twin-Sheet Thermoforming	249
	10.3.3.9 Skin Packaging	250
10.3.4	Selection of Thermoforming Method	251

10.4	Trimming the Sheet	252
10.5	Part and Mold Design	252
10.5.1	Prototype Molds	253
10.5.2	Production Molds	256
10.6	Thermoform-Fill-Seal Systems	257
	References	257
	Study Questions	257

Chapter 11 Injection Molding, Closures, Rotational Molding, Compression Molding, and Tubes 259

11.1	Injection Molding	259
11.1.1	Injection Molding Machines	259
11.1.2	Injection Mold Units	260
11.1.3	Polymer Flow	261
11.1.4	Removal of Molded Parts	264
11.1.5	Hot Runner Molds	265
11.1.6	Venting	265
11.1.7	Applications of Injection Molding	266
11.2	Closures	266
11.2.1	Friction Closures	267
11.2.2	Snap-fit Closures	267
11.2.3	Threaded Closures	268
11.2.4	Specialty Closures	270
11.2.5	Fitments and Overcaps	270
11.3	Rotational Molding	271
11.4	Compression Molding	271
11.5	Plastic Tubes	272
	References	273
	Study Questions	273

Chapter 12 Blow Molding and Bottles 275

12.1	Blow Molding	275
12.2	Extrusion Blow Molding	276
12.2.1	Basic Extrusion Blow Molding Process	276
12.2.2	Parison Dimensions	278
12.2.3	Extrusion Blow Molding Variations	278
12.2.4	Container Designs	279
12.2.5	Die Shaping	280
12.2.6	Programmed Parison	282
12.3	Injection Blow Molding	283
12.4	Stretch Blow Molding	285
12.5	Coextruded Bottles	287
12.6	Coinjection Blow Molded Bottles	289
12.7	Foam Blow Molding	290
12.8	Blow Molds	291

12.9	In-Mold Labeling	292
12.10	Aseptic Blow Molding	293
12.11	Bottle Modifications	293
12.11.1	Heat Setting	293
12.11.2	Vacuum Panels	294
12.11.3	Crystallized Finishes	294
12.12	Surface Treatment	295
12.12.1	Flame Treatment	295
12.12.2	Coatings	295
12.12.3	Fluorination	296
12.12.4	Sulfonation	296
12.13	Dimensions and Tolerances for Plastic Bottles	296
	References	298
	Study Questions	298
Chapter 13 Foams, Cushioning and Distribution Packaging		299
13.1	Foams	299
13.1.1	Polystyrene Foam	300
13.1.1.1	Expanded Polystyrene Foam (EPS)	300
13.1.1.2	Extruded Polystyrene Foam	301
13.1.1.3	Styrene Copolymer Foams	302
13.1.2	Polyolefin Foams	302
13.1.3	Polyurethane Foams and Foam-in-Place Systems	303
13.1.4	Starch-Based Foams	304
13.2	Non-Foam Plastic Cushioning Systems	304
13.3	Cushioning	305
13.4	Thermal Insulation of Foams	307
13.5	Plastic Pallets	309
13.6	Plastic Drums and Other Shipping Containers	309
13.7	Packaging for Electrostatic Discharge Protection	310
	References	311
	Study Questions	311
Chapter 14 Mass Transfer in Polymeric Packaging Systems: Sorption, Diffusion, Permeation and Shelf Life		313
14.1	Introduction	313
14.2	Physical and Chemical Basis for Interactions	314
14.3	Types of Interactions	315
14.3.1	Permeation	315
14.3.2	Migration	316
14.3.3	Sorption	317
14.4	Thermodynamic Equilibrium	318
14.4.1	Gas Phase Chemical Activity	319
14.4.2	Solubility	319
14.4.3	Partition Coefficient	321

14.5	Diffusion	322
14.6	Steady State Diffusion Across a Single Sheet: Permeability	323
14.7	Variables Affecting Permeability	328
14.7.1	Chemical Structure of the Polymer	328
14.7.2	Chemical Structure of the Permeant Molecule	328
14.7.3	Effect of Temperature	331
14.7.4	Effect of Humidity	334
14.7.5	Physical Structure of the Polymer	334
14.7.6	Effect of Permeant Concentration	337
14.8	Experimental Determination of Permeability	338
14.9	Multilayer Structures	340
14.10	Applications of the Permeability Equation	343
14.11	Shelf Life Estimation	344
	References	350
	Study Questions	350
Chapter 15	U.S. Regulations and Plastic Packaging	353
15.1	Introduction	353
15.2	The U.S. Federal Food, Drug and Cosmetic Act	353
15.3	Medical Packaging Regulations	354
15.3.1	Drug Packaging	354
15.3.2	Medical Device Packaging	355
15.4	Food Packaging Regulations	356
15.4.1	What is a Food Additive?	356
15.4.1.1	Example 1: Information on Nylon Available in the CFR ..	357
15.4.1.2	Example 2: Identification of Relevant Regulations for Fabrication of an Adhesive-laminated Plastic Bag	358
15.4.2	Acceptable Amounts of Migration	358
15.4.3	Threshold of Regulation	359
15.4.4	Food Processing Equipment and the Housewares Exclusion	361
15.4.5	Determining the Conditions of Use	361
15.4.6	Multilayer Food Packages	362
15.4.7	GRAS and Prior-Sanctioned Additives	362
15.4.8	Use of Recycled Plastics for Food Packaging	363
15.4.9	Role of Manufacturers and Users in Determining FDA Compliance	365
15.5	Cosmetic Packaging Regulations	366
15.6	State Laws and Regulations	366
15.6.1	Degradable Beverage Carriers	366
15.6.2	“Model Toxics” Legislation	367
15.6.3	Resin Coding on Plastic Bottles	369
15.6.4	Recycling Rate/Recycled Content Requirements	370
15.6.4.1	Oregon	371
15.6.4.2	California	371
15.6.4.3	Wisconsin	371
15.7	Potential Future Issues	372
	Study Questions	373

Chapter 16 Environmental Considerations	375
16.1 Introduction	375
16.2 Solid Waste Concerns	376
16.3 Source Reduction and Reuse	380
16.4 Recycling of Plastic Packaging	380
16.4.1 Collection of Packaging Materials for Recycling	382
16.4.2 Recycling Rates for Plastics Packaging	383
16.4.3 Processing of Collected Plastics	384
16.4.3.1 Size Reduction	385
16.4.3.2 Cleaning	385
16.4.3.3 Sorting	386
16.4.3.4 Extrusion and Pelletizing	387
16.4.4 Feedstock Recycling	388
16.5 PET Recycling	389
16.6 HDPE Recycling	390
16.7 LDPE Recycling	392
16.8 Recycling of PS, PP, and PVC	392
16.9 Recycling of Commingled Plastics	393
16.10 Biodegradable Plastics	394
16.10.1 Polyesters	395
16.10.2 Starch-Based Plastics	395
16.10.3 Lactic Acid Plastics	396
16.10.4 Other Biodegradable Plastics	396
16.11 Other Environmental Concerns	397
16.11.1 Resource Depletion and Energy Efficiency	397
16.11.2 Pollution	397
16.11.3 Climate Change	398
16.12 Lifecycle Assessment	399
References	400
Study Questions	401
Additional Reading	403
