

Contents

	Principles of Hyperthermia	13
1.1.	Definition of Hyperthermia	13
1.1.1.	Different Temperature Regimes	13
1.1.2.	Heating Techniques	14
1.1.3.	References	14
1.2.	Physical Basics and Hyperthermia Applications	14
1.2.1.	Electromagnetic Irradiation	14
1.2.2.	Interaction of Non-Ionizing Electromagnetic Radiation with Matter	16
1.2.3.	Practical Realizations	17
1.2.4.	Planning and Optimization	20
1.2.5.	Harmful Effects of Non-Ionizing Radiation	21
1.2.6.	Further Heating Techniques	21
1.2.7.	Heat Transport	22
1.2.8.	References	23
1.3.	Biological Rationale of Hyperthermia	23
1.3.1.	Biological Rationale and Mode of Action of Hyperthermia	23
1.3.2.	Interaction of Hyperthermia and Chemotherapeutic Agents	24
1.3.3.	Interaction of Hyperthermia and Ionizing Radiotherapy	24
1.3.4.	Immune Modulation by Hyperthermia	25
1.3.5.	References	26
	Techniques, Clinical Use and Quality Assurance	29
2.1.	Hyperthermia Treatment Techniques	29
2.1.1.	Classical Techniques	29
2.1.2.	Recent Developments	31
2.1.3.	References	33
2.2.	Practical Recommendations	35
2.2.1.	Treatment Planning	39
2.2.2.	Treatment Monitoring	41
2.2.3.	Treatment Documentation	42
2.2.4.	Requirements and Characterization of Equipment	42
2.2.5.	Safety Aspects	43
2.2.6.	Hyperthermia Staff Requirements	43
2.2.7.	References	43
2.3.	Quality Assurance	44
2.3.1.	Heat Dosimetry	44
2.3.2.	The Hyperthermia QA Guidelines and Their Principles	45
2.3.3.	Thermometry and Verification	47
2.3.5.	Future Aspects	48
2.3.6.	References	48
	Clinical Results of Quality-Assured Hyperthermia	51
3.1.	Hyperthermia Alone	51
3.2.	Chemotherapy and Hyperthermia	51
3.2.1.	Peritoneal carcinomatosis of epithelial ovarian cancer (EOC)	51

3.2.2.	Non-muscle-invasive bladder cancer (NMIBC)	52
3.2.3.	High-risk soft tissue sarcomas (HR-STs) of adults	53
3.2.4.	Localized relapse or metastatic disease of soft-tissue sarcoma	54
3.2.5.	Pancreatic Cancer	55
3.2.6.	Breast Cancer	56
3.2.7.	Cervical Cancer	56
3.2.8.	Pediatric Cancer	56
3.2.9.	References	57
3.3.	Radiotherapy and Hyperthermia	59
3.3.1.	Breast Cancer	59
3.3.2.	Rectal Cancer	60
3.3.3.	Cervical Carcinoma	62
3.3.4.	Further Results	63
3.3.5.	References	63
3.4.	Radiochemotherapy and Hyperthermia	64
3.4.1.	Breast Cancer	64
3.4.2.	Rectal Cancer	64
3.4.3.	Cervical Carcinoma	65
3.4.4.	Anal Cancer	66
3.4.5.	Bladder Cancer	67
3.4.6.	Esophageal Carcinoma	68
3.4.7.	Further Fields of Research	69
3.4.8.	References	69

The Role of Hyperthermia in Pediatric Oncology **71**

4.1.	Indications	71
4.2.	Locoregional Radiofrequency Hyperthermia in Children and Adolescents	71
4.2.1.	Application of Hyperthermia and Thermometry	71
4.2.2.	Analysis of Temperatures	73
4.2.3.	Hyper-PEI Treatment Schedule	73
4.3.	Limitations	74
4.4.	Results	75
4.4.1.	Experimental Studies	75
4.4.2.	Clinical Studies	76
4.4.2.1.	Radiofrequency Hyperthermia and Chemotherapy	76
4.4.2.2.	Radiofrequency Hyperthermia and Radiotherapy	77
4.5.	Technical Approach and Perspectives	79
4.6.	Surgical Techniques for Isolated Hyperthermic Perfusion with High-Dose Chemotherapy ..	82
4.6.1.	Isolated Hyperthermic Limb Perfusion	82
4.6.2.	Hyperthermic Intraperitoneal Chemoperfusion	82
4.7.	Clinical Aspects	83
4.8.	References	84

Current and Future Clinical Trials **87**

5.1.	Chemotherapy and Hyperthermia	87
5.1.1.	References	90

5.2.	Radiotherapy / Chemoradiation and Hyperthermia	90
5.2.1.	Anal Cancer	90
5.2.2.	Soft Tissue Sarcoma	91
5.2.3.	Rectal Cancer	91
5.2.4.	References	92
