

C O N T E N T S

Curriculum vitae of A. MOSTOWSKI	1
Bibliography of MOSTOWSKI'S works	3
Two remarks on the models of Morse' set theory by A. MOSTOWSKI	13
Contributed papers :	23
B. BALCAR and W. GUZICKI, A remark on power of singular cardinals	25
J. BELL, Uncountable standard models of ZFC + $V \neq L$	29
L. BUKOVSKY, Changing cofinality of $\aleph_2$	37
D. CENZER, Inductive definitions positive and monotone	51
K. DEVLIN, An alternative to Martin's axiom	65
M. DUBIEL, Elementary extension of β -models	77
U. FELGNER, Das Problem von Souslin für geordnete Strukturen	83
S. GOTTWALD, A cumulative system of fuzzy sets	109
S. KRAJEWSKI, Non standard satisfaction classes	121
A. KRAWCZYK and M. KRYNICKI, Ehrenfeucht games for generalized quantifiers	145
A. LACHLAN, Dimension and totally transcendental theories of rank 2	153
F. LOWENTHAL, Measure and categoricity in α -recursion	185
W. MAREK and M. SREBRNY, Urelements and extendability	203

L. PACHOLSKI, On limit reduced powers, saturatedness and universality	221
S. ROGUSKI, Extensions of models for ZFC to models for $ZF + V = HOD$ with applications	241
A. SLOMSON, Decision problems for generalized quantifiers - a survey	249
A. SOCHOR, The alternative set theory	259
J. TRUSS, Some cases of König's Lemma	273
Z. VETULANI, Categoricity relative to ordinals for models of set-theory and the nonabsoluteness of L	285
M. WEESE, The universality of boolean algebras with the Häftig quantifier	291
W. ZADROŻNY, Von Neumann's hierarchy and definable reals	297
A. ZARACH, Generic extension of admissible sets	321
P. HÁJEK, Some Remarks on observational model-theoretic languages	335
