

Contents

Part I	Supernovae and Their Remnants	
<hr/>		
A Recent Study on the Historical Novae and Supernovae By Li Qibin (With 3 Figures)		2
Models of Type II Supernova and SN 1987A: Observations Versus Theoretical Predictions. By W. Hillebrandt		26
Theoretical Model of SN 1987A and Presupernova Evolution of Massive Stars By K. Nomoto, M. Hashimoto, and T. Shigeyama (With 21 Figures)		34
Stellar Evolution and Nucleosynthesis Implications of Supernova 1987A. By J.W. Truran (With 4 Figures)		57
X-Ray Observations of Supernova Remnants – The State of the Art – By W. Brinkmann (With 3 Figures)		69
Supernova Explosions Inside Pre-existing Wind-Driven Cavities: Spherically Symmetric Models. By G. Tenorio-Tagle, P. Bodenheimer, and J. Franco (With 4 Figures)		77
Inverse Compton Scattering (ICS) Plays an Important Role in Pulsar Emission. By G.J. Qiao (With 2 Figures)		88
Line Emission from Magnetized Neutron Stars and Electron Cyclotron Maser Instability. By Wang De Yu and Mao Din Yi (With 3 Figures)		97
Radiation Processes in Strong Magnetic Fields By W. Nagel (With 3 Figures)		103
Radiation Dominated Shocks in a One-Dimensional Plasma Flow By H. Riffert (With 2 Figures)		112
<hr/>		
Part II	Active Galaxies	
<hr/>		
Quasar Models. By M. Camenzind (With 1 Figure)		118
Accretion Disks in the Centers of Galaxies By W.J. Duschl (With 4 Figures)		126

Synchrotron Emission from Shock Waves in Active Galactic Nuclei By P.L. Biermann	134
The Masses of Active Galactic Nuclei By Liu Ru-liang (With 3 Figures)	144
The Study of X-Ray Radiation from AGNs By Liu Ru-Liang, Zhang He-qi, and You Jun-han (With 6 Figures) . .	149
The Starburst Model for AGNs By J. Melnick and R. Terlevich (With 3 Figures)	155
Starburst Galaxies as Recently Formed Companions By H. Arp (With 3 Figures)	160
Collision of Giant Molecular Clouds By Guo-xuan Song (With 5 Figures)	167

Part III Cosmology

Cosmic Strings and Galaxy Formation By N. Straumann (With 6 Figures)	174
The Correlation Strength of Clusters in the Cosmic String Model By Jia-lu Zhang and Yi-peng Jing (With 2 Figures)	196
Fractals in the Distribution of Galaxies. By L.Z. Fang	201
Fractal Turbulence and Origin of Large Scale Structure By Liu Yong-zhen and Deng Zu-gan	205
The Two-Point Correlation Function of Groups in CFA Survey By Zou Zhen-long and Liu Da-qing (With 1 Figure)	213
Large Scale Distribution of Galaxies with Different Luminosity By G. Börner, Z.-G. Deng, and X.-Y. Xia (With 3 Figures)	218
The Large Scale Distribution of Abell Clusters By G. Börner, You-yuan Zhou, and Yu Gao (With 10 Figures)	227
A Study of the Cosmic Constant H_0 with SN1 By Wu Shimin, Guo Wanwen, and Li Zongwei (With 2 Figures) . . .	236
The Large Scale Inhomogeneous Distribution of Ly-Alpha Absorption Lines in the Spectra of Quasars By Yaoquan Chu and Xingfen Zhu (With 5 Figures)	240
Clustering of Quasars and Its Evolution By Xingfen Zhu and Yaoquan Chu (With 5 Figures)	247
Evolution in Quasar Clustering Properties By A. Kruszewski (With 2 Figures)	255

The Observational Status of Super Clusters at High Redshifts By M.-H. Ulrich	263
Exact Solutions of the Nonlinear Equations for Self-Gravitating Matter. By G. Götz	268
Index of Contributors	281
