Introduction	1
1 Basic Notions About Models of Computation	5
1.1 Introduction	5
1.2 Alphabets, Words, Sets, and Classes	5
1.3 Inclusion Modulo Finite Variants	12
1.4 Boolean Formulas	14
1.5 Models of Computation: Finite Automata	19
1.6 Models of Computation: Turing Machines	19
1.7 Models of Computation: Nondeterministic Turing Machines	26
1.8 Models of Computation: Oracle Turing Machines	28
1.9 Bibliographical Remarks	33
2 Time and Space Bounded Computations	34
2.1 Introduction	34
2.2 Orders of Magnitude	34
2.3 Running Time and Work Space of Turing Machines	37
2.4 Time and Space Constructibility	42
2.5 Bounding Resources: Basic Definitions and Relationships	47
2.6 Bibliographical Remarks	54
3 Central Complexity Classes	56
3.1 Introduction	56
3.2 Definitions, Properties, and Examples	56
3.3 Computing Functions: Invertibility and Honesty	60
3.4 Polynomial Time Many-one Reducibility	64
3.5 "Natural" NP -complete Sets	68
3.6 "Natural" $PSPACE$ -complete Sets	71
3.7 Padding Arguments	74
3.8 Space Bounded Reducibility	76
3.9 Exercises	79
3.10 Bibliographical Remarks	81

4	Time Bounded Turing Reducibilities	83
4.1	Introduction	83
4.2	Polynomial Time Turing Reducibility: Relativized Classes . . .	83
4.3	Tally and Sparse Sets in NP	88
4.4	Strong Nondeterministic Polynomial Time Reducibility	92
4.5	Self-Reducibility	94
4.6	Exercises	95
4.7	Bibliographical Remarks	98
5	Nonuniform Complexity	99
5.1	Introduction	99
5.2	Classes Defined by Advice Functions	99
5.3	Boolean Circuit Complexity	100
5.4	Turing Machines and Boolean Circuits	104
5.5	Polynomial Advice	110
5.6	Logarithmic Advice	115
5.7	Self-Producing Circuits	118
5.8	A Lower Bound to the Circuit Size of Boolean Functions . . .	120
5.9	Other Nonuniform Complexity Measures	122
5.10	Exercises	125
5.11	Bibliographical Remarks	127
6	Probabilistic Algorithms	130
6.1	Introduction	130
6.2	The Probabilistic Computational Model	131
6.3	Polynomial Time Probabilistic Classes	134
6.4	Bounded Error Probability	137
6.5	Nonuniform Properties of BPP	142
6.6	Zero Error Probability	144
6.7	Exercises	146
6.8	Bibliographical Remarks	148
7	Uniform Diagonalization	150
7.1	Introduction	150
7.2	Presentability and Other Properties	150
7.3	The Main Theorem	151
7.4	Applications	153
7.5	Exercises	157
7.6	Bibliographical Remarks	159
8	The Polynomial Time Hierarchy	160
8.1	Introduction	160
8.2	Definition and Properties	160
8.3	Characterization and Consequences	163

8.4	Complete Sets and Presentability	168
8.5	<i>BPP</i> and the Polynomial Time Hierarchy	169
8.6	Exercises	173
8.7	Bibliographical Remarks	175
