Report on the 1996 International Workshop on Object Representation in Computer Vision	1
<i>Jean Ponce, Martial Hebert and Andrew Zisserman</i>	

Geometric and topological representations

From an intensity image to 3-D segmented descriptions	11
<i>Mourad Zerroug and Ramakant Nevatia</i>	
Recovering generalized cylinders by monocular vision	25
<i>Patrick Sayd, Michel Dhome, Jean-Marc Lavest</i>	
Combinatorial geometry for shape representation and indexing	53
<i>Stefan Carlsson</i>	
Representing objects using topology	79
<i>Charlie Rothwell, Joe Mundy and Bill Hoffman</i>	
Curvature based signatures for object description and recognition	109
<i>Elli Angelopoulou, James P. Williams and Lawrence B. Wolff</i>	
On 3D shape synthesis	131
<i>Heung-Yeung Shum, Martial Hebert and Katsushi Ikeuchi</i>	

Appearance-based representations

Shape constancy in pictorial relief	151
<i>Jan J. Koenderink, Andrea J. van Doorn, Chris Christou and Joseph S. Lappin</i>	
Dimensionality of illumination manifolds in appearance matching	165
<i>Shree K. Nayar and Hiroshi Murase</i>	
Learning object representations from lighting variations	179
<i>R. Epstein, A. L. Yuille and P. N. Belhumeur</i>	
Learning appearance models for object recognition	201
<i>Arthur R. Pope and David G. Lowe</i>	
An image oriented CAD approach	221
<i>Cordelia Schmid, Philippe Bobet, Bart Lamiroy and Roger Mohr</i>	
An experimental comparison of appearance and geometric model based recognition	247
<i>J. Mundy, A. Liu, N. Pillow, A. Zisserman, S. Abdallah, S. Utcke, S. Nayar and C. Rothwell</i>	

3D representations and applications

Virtualized reality: being mobile in a visual scene	273
<i>Takeo Kanade, P. J. Narayanan and Peter W. Rander</i>	
Generic shape learning and recognition	287
<i>Alexandre R. J. François and Gérard Medioni</i>	
A hybrid approach to 3D representation	321
<i>Nigel Ayoung-Chee, Gregory Dudek and Frank P. Ferrie</i>	
Finding pictures of objects in large collections of images	335
<i>David A. Forsyth, Jitendra Malik, Margaret M. Fleck, Hayit Greenspan, Thomas Leung, Serge Belongie, Chad Carson and Chris Bregler</i>	
Beyond the Hough transform: further properties of the $R\theta$ mapping and their applications	361
<i>M. Wright, A. Fitzgibbon, P. J. Giblin and R. B. Fisher</i>	
Non-Euclidean object representations for calibration-free video overlay	381
<i>Kiriakos N. Kutulakos and James R. Vallino</i>	

Author Index	403
