

Contents

1	Introduction	1
1.1	Purpose and Plan of This Review	1
1.2	Primate Manual Dexterity	2
1.2.1	Using the Hand	2
1.2.2	Cerebral Cortex and Dexterity	5
1.2.3	Topography of Sensorimotor Pathways that Mediate Handling	10
1.2.4	Parallel Distributed Processing in Sensorimotor Pathways	13
2	Corticospinal Connections in the Primate	17
2.1	Introduction	17
2.2	New Methods	21
2.2.1	Mapping the Distributions of Labeled Corticospinal Neuron Somas	24
2.3	Direct Corticospinal Projections	29
2.3.1	Origins and Projections	29
2.3.2	Multiple Corticospinal Neuron Populations in the Macaque	36
2.4	Morphology of Corticospinal Neurons	37
2.4.1	Intracortical Organization of Corticospinal Neurons: Soma/Dendrite Morphology	37
2.4.2	Axon Terminations of Corticospinal Neurons	40
2.4.3	Corticomotoneurons and Manual Dexterity	43
2.5	Indirect Corticospinal Projections	47
2.5.1	Corticorubrospinal Projections	49
2.6	Spinal Circuitry Mediating Supraspinal Control of Movement	50
2.6.1	Functionally Defined Interneuron Populations: Segmental and Propriospinal Connections	52
2.7	Postnatal Maturation of Corticospinal Pathways	53
2.7.1	Maturation of Manual Dexterity in the Macaque	53
2.7.2	Maturation of Direct Corticospinal Projections in the Rodent and the Macaque	53
2.8	Comment	62

3	The Primate Sensorimotor Thalamus	64
3.1	The Thalamus and Sensorimotor Behavior	64
3.2	Architecture of the Dorsal Thalamus	68
3.2.1	Cytoarchitecture: Three-Dimensional Maps of Thalamic Nuclei	68
3.3	Functional Groupings of Nuclei Within the Sensorimotor Thalamus	72
3.3.1	Subcortical Inputs to the Sensorimotor Thalamus	75
3.4	Thalamocortical Neuron Populations of the Sensorimotor Thalamus	80
3.4.1	Thalamic Territories	80
3.5	Neuron Circuitry of Sensorimotor Thalamic Nuclei in the Macaque	88
3.5.1	Relay Neurons and Interneurons in the Sensorimotor Thalamus	91
3.5.2	Neurons of the Thalamic Reticular Nucleus	92
3.5.3	Corticothalamic Neurons	93
3.5.4	Distributions of Terminal Axons Within Thalamic Nuclei	93
3.5.5	Synaptic Organization Within Thalamic Nuclei	99
3.6	The Pulvinar, Visually Directed Hand Movements, and Object Recognition	101
3.6.1	Topography and Cytoarchitecture	102
3.7	Comment	105
4	Sensorimotor Cortex	106
4.1	Introduction	106
4.2	Distribution of Visual Information in the Parietotemporal Cortex	110
4.3	Flow of Somatosensory Information in the Parietal Cortex in the Macaque	111
4.4	Visual Space, Tangible Space, and Their Neuronal Alignment	114
4.4.1	Which Spatial Parameters Need Central Representation?	114
4.5	Connections Between Parietotemporal, Cingulate, and Prefrontal Cortex	117
4.6	Cortical Connections of Corticospinal Neuron Populations	118
5	Summary and Comments	119
6	References	121
7	Subject Index	141
