

Table of Contents

1. Advanced Educational Technology: Knowledge Revisited	1
<i>N. Balacheff</i>	
2. Advancing Education by Proper Technology	21
<i>D. G. Bouwhuis, R. van Hoe, H. Bouma</i>	
3. Collaborative Distance Learning and Computer Conferencing	45
<i>F. Henri, C. R. Rigault</i>	
4. Interaction and Collaboration in Distance Learning Through Computer Mediated Technologies	77
<i>M. F. Verdejo</i>	
5. Interface Issues in Advanced Educational Technology Based on Computers	89
<i>A. C. Derycke</i>	
6. New Technologies for Modelling Science and Mathematics	114
<i>R. Sutherland</i>	
7. Implementation of Technology Education in New York State	123
<i>M. Hacker</i>	
8. Challenges and Lessons Learned in Second Language Learning Systems	136
<i>M. L. Swartz</i>	
9. Student Modelling: A Crucible for Research	149
<i>G. I. McCalla</i>	

VIII Table of Contents

10. Diagnosis and Cognitive Support in Microworlds and Intelligent Tutoring Systems: Conceptualization, Realization, and Application to Real-World Learning Environments	165
<i>D. L. Ferguson</i>	
11. Instructional Design for Computer Based Learning Environments	173
<i>M. Vivet</i>	
12. Implementing Instructional Models in Computer-Based Learning Environments: A Case Study in Problem Selection	184
<i>J. J. G. van Merriënboer, J. J. Luursema</i>	
13. Learning Interfaces	207
<i>P. Duchastel</i>	
Subject Index	218
