

Contents

Preface	vii
Multivariate Inequalities of Kolmogorov Type and Their Applications <i>V. F. Babenko, V. A. Kofanov, and S. A. Pichugov</i>	1
Monotone Iterative Technique for Impulsive Differential-Difference Equations with Variable Impulsive Perturbations <i>D. Bainov, A. Dishliev, and S. Hristova</i>	13
Multivariate Cosine Wavelets <i>K. Bittner, C. K. Chui, and J. Prestin</i>	29
On Almost Interpolation by Multivariate Splines <i>O. Davydov, M. Sommer, and H. Strauss</i>	45
Locally Linearly Independent Systems and Almost Interpolation <i>O. Davydov, M. Sommer, and H. Strauss</i>	59
Exponential-Type Approximation in Multivariate Harmonic Hilbert Spaces <i>F.-J. Delves</i>	73
Interpolation by Continuous Function Spaces <i>M. von Golitschek</i>	83
Discrete Characterization of Besov Spaces and Its Applications to Stochastics <i>A. Kamont</i>	89
One-Sided Approximation and Interpolation Operators Generating Hyperbolic Sigma-Pi Neural Networks <i>B. Lenze</i>	99
Unconstrained Minimization of Quadratic Splines and Applications <i>W. Li</i>	113
Interpolation by Translates of a Basis Function <i>W. Light</i>	129
On the Sup-Norm Condition Number of the Multivariate Triangular Bernstein Basis <i>T. Lyche and K. Scherer</i>	141
Integration Methods of Clenshaw-Curtis Type, Based on Four Kinds of Chebyshev Polynomials <i>J. C. Mason and E. Venturino</i>	153
Tensor Products of Convex Cones <i>B. Mulansky</i>	167

The Curse of Dimension and a Universal Method for Numerical Integration <i>E. Novak and K. Ritter</i>	177
Interpolation by Bivariate Splines on Crosscut Partitions <i>G. Nürnberger, O. V. Davydov, G. Walz, and F. Zeilfelder</i>	189
Necessary and Sufficient Conditions for Orthonormality of Scaling Vectors <i>G. Plonka</i>	205
Trigonometric Preconditioners for Block Toeplitz Systems <i>D. Potts, G. Steidl, and M. Tasche</i>	219
The Average Size of Certain Gram-Determinants and Interpolation on Non-Compact Sets <i>M. Reimer</i>	235
Radial Basis Functions Viewed From Cubic Splines <i>R. Schaback</i>	245
Wavelet Modelling of High Resolution Radar Imaging and Clinical Magnetic Resonance Tomography <i>W. Schempp</i>	259
A New Interpretation of the Sampling Theorem and Its Extensions <i>G. Schmeisser and J. J. Voss</i>	275
Gridded Data Interpolation with Restrictions on the First Order Derivatives <i>J. W. Schmidt and M. Walther</i>	289
Affine Frames and Multiresolution <i>J. Stöckler</i>	307
List of Participants	321
