

Volume 5: Compounds of Group 14 (Ge, Sn, Pb)

	Preface	V
	Table of Contents	VII
	Introduction	
	E. J. Thomas and M. G. Moloney	1
5.1	Product Class 1: Germanium Compounds	
	E. J. Thomas	3
5.1.1	Product Subclass 1: Germanium Hydrides	
	K. Oshima	9
5.1.2	Product Subclass 2: Digermenes and Digermanes	
	N. Takeda, N. Tokitoh, and R. Okazaki	27
5.1.3	Product Subclass 3: Metalated Germanium Compounds	
	N. Takeda, N. Tokitoh, and R. Okazaki	33
5.1.4	Product Subclass 4: Germanium Oxides, Sulfides, Selenides, and Tellurides (Double Bonded)	
	N. Takeda, N. Tokitoh, and R. Okazaki	39
5.1.5	Product Subclass 5: Iminogermanes	
	N. Takeda, N. Tokitoh, and R. Okazaki	43
5.1.6	Product Subclass 6: Germenes	
	N. Takeda, N. Tokitoh, and R. Okazaki	47
5.1.7	Product Subclass 7: Germylenes	
	N. Takeda, N. Tokitoh, and R. Okazaki	51
5.1.8	Product Subclass 8: Organogermanium Halides	
	P. Thornton	55
5.1.9	Product Subclass 9: Germanium Oxides	
	P. Thornton	75
5.1.10	Product Subclass 10: Germanium Carboxylates, Phosphates, and Related Compounds	
	P. Thornton	85
5.1.11	Product Subclass 11: Germanium Sulfides, Sulfoxides, and Related Compounds	
	P. Thornton	89

5.1.12	Product Subclass 12: Germanium Selenides, Tellurides, and Related Compounds	
	P. Thornton	93
5.1.13	Product Subclass 13: Germylamines	
	P. Thornton	97
5.1.14	Product Subclass 14: Germanium Phosphines, Arsines, and Stibines	
	P. Thornton	101
5.1.15	Product Subclass 15: Germanium Cyanides	
	A. C. Spivey and C. M. Diaper	105
5.1.16	Product Subclass 16: Acylgermanes	
	A. C. Spivey and C. M. Diaper	109
5.1.17	Product Subclass 17: Imidoylgermanes (α-Iminoalkylgermanes) and α-Diazoalkylgermanes	
	A. C. Spivey and C. M. Diaper	115
5.1.18	Product Subclass 18: α-Halo- and α-Alkoxyvinylgermanes	
	A. C. Spivey and C. M. Diaper	121
5.1.19	Product Subclass 19: α-Halo-, α-Hydroxy-, α-Alkoxy-, and α-Aminoalkylgermanes	
	A. C. Spivey and C. M. Diaper	127
5.1.20	Product Subclass 20: Alkynylgermanes	
	A. C. Spivey and C. M. Diaper	137
5.1.21	Product Subclass 21: Germylketenes and Germylketenimines	
	A. C. Spivey and C. M. Diaper	143
5.1.22	Product Subclass 22: Aryl- and Heteroarylgermanes	
	A. C. Spivey and C. M. Diaper	149
5.1.23	Product Subclass 23: Vinylgermanes	
	A. C. Spivey and C. M. Diaper	159
5.1.24	Product Subclass 24: Propargyl- and Allenylgermanes	
	A. C. Spivey and C. M. Diaper	171
5.1.25	Product Subclass 25: Benzylgermanes	
	A. C. Spivey and C. M. Diaper	177
5.1.26	Product Subclass 26: Allylgermanes	
	A. C. Spivey and C. M. Diaper	181
5.1.27	Product Subclass 27: Alkylgermanes	
	A. C. Spivey and C. M. Diaper	189

5.2	Product Class 2: Tin Compounds	
	E. J. Thomas	195
5.2.1	Product Subclass 1: Tin Hydrides	
	A. J. Clark	205
5.2.2	Product Subclass 2: Distannenes and Distannanes	
	J. Podlech	273
5.2.3	Product Subclass 3: Metalated Tin Compounds	
	J. Podlech	285
5.2.4	Product Subclass 4: Tin Oxides, Sulfides, Selenides, and Tellurides (Double Bonded)	
	N. Takeda, N. Tokitoh, and R. Okazaki	299
5.2.5	Product Subclass 5: Iminostannanes	
	N. Takeda, N. Tokitoh, and R. Okazaki	303
5.2.6	Product Subclass 6: Stannenes	
	N. Takeda, N. Tokitoh, and R. Okazaki	307
5.2.7	Product Subclass 7: Stannylenes	
	N. Takeda, N. Tokitoh, and R. Okazaki	311
5.2.8	Product Subclass 8: Tin Halides and Organotin Halides	
	M. E. Wood	315
5.2.9	Product Subclass 9: Tin Oxides	
	B. Jousseume	353
5.2.10	Product Subclass 10: Tin Carboxylates and Phosphates	
	B. Jousseume	363
5.2.11	Product Subclass 11: Tin Enol Ethers	
	B. Jousseume	369
5.2.12	Product Subclass 12: Tin Sulfides, Thioalkoxides, and Related Compounds	
	B. Jousseume	383
5.2.13	Product Subclass 13: Tin Selenides and Tellurides	
	B. Jousseume	393
5.2.14	Product Subclass 14: Organostannylamines and Related Compounds	
	B. Jousseume	401
5.2.15	Product Subclass 15: Organostannylphosphines	
	B. Jousseume	409

5.2.16	Product Subclass 16: Tin Cyanides and Fulminates	
	P. B. Wyatt	413
5.2.17	Product Subclass 17: Acylstannanes (Including S, Se, and Te Analogues)	
	P. B. Wyatt	423
5.2.18	Product Subclass 18: Imidoystannanes, Diazoalkylstannanes, Tin Isocyanates, and Tin Isothiocyanates	
	P. B. Wyatt	433
5.2.19	Product Subclass 19: 1-Halo-, 1-Alkoxy-, and 1-Aminovinylstannanes	
	I. Coldham and G. P. Vennall	441
5.2.20	Product Subclass 20: 1-Halo-, 1-Hydroxy-, 1-Alkoxy-, and 1-Aminoalkylstannanes	
	I. Coldham and G. P. Vennall	451
5.2.21	Product Subclass 21: Alkynylstannanes	
	G. T. Crisp	463
5.2.22	Product Subclass 22: Ketenylstannanes and Derivatives	
	G. T. Crisp	479
5.2.23	Product Subclass 23: Allenylstannanes	
	G. T. Crisp	485
5.2.24	Product Subclass 24: Arylstannanes	
	G. T. Crisp	499
5.2.25	Product Subclass 25: Alk-1-enylstannanes	
	G. T. Crisp	521
5.2.26	Product Subclass 26: Propargylstannanes	
	D. Young	549
5.2.27	Product Subclass 27: Benzylstannanes	
	R. L. Marshall	559
5.2.28	Product Subclass 28: Allylstannanes	
	R. L. Marshall	573
5.2.29	Product Subclass 29: Alkylstannanes	
	D. Young	607
5.3	Product Class 3: Lead Compounds	
	M. G. Moloney	619
5.3.1	Product Subclass 1: Lead Hydrides	
	M. G. Moloney	627

5.3.2	Product Subclass 2: Diplumbenes and Diplumbanes N. Takeda, N. Tokitoh, and R. Okazaki	637
5.3.3	Product Subclass 3: Metalated Lead Compounds N. Takeda, N. Tokitoh, and R. Okazaki	641
5.3.4	Product Subclass 4: Organoplumbyl Oxides, Sulfides, Selenides, and Tellurides (Double Bonded) N. Takeda, N. Tokitoh, and R. Okazaki	645
5.3.5	Product Subclass 5: Plumbylenes N. Takeda, N. Tokitoh, and R. Okazaki	649
5.3.6	Product Subclass 6: Halo(organo)plumbanes P. J. Guiry and P. J. McCormack	653
5.3.7	Product Subclass 7: Organoplumboxanes and Related Compounds P. J. Guiry and P. J. McCormack	665
5.3.8	Product Subclass 8: Acyloxy(organo)plumbanes P. J. Guiry and P. J. McCormack	673
5.3.9	Product Subclass 9: Plumbyl Enol Ethers P. J. Guiry and P. J. McCormack	693
5.3.10	Product Subclass 10: Organoplumbane Sulfur Compounds P. J. Guiry and P. J. McCormack	697
5.3.11	Product Subclass 11: Organoplumbyl Selenides, Tellurides, and Related Compounds P. J. Guiry and P. J. McCormack	703
5.3.12	Product Subclass 12: Organoplumbanamines and Related Compounds P. J. Guiry and P. J. McCormack	707
5.3.13	Product Subclass 13: Organoplumbyl Phosphines and Phosphine Oxides P. J. Guiry and P. J. McCormack	711
5.3.14	Product Subclass 14: Triorganolead Cyanides and Triorganolead Cyanates P. A. C. Eagle	713
5.3.15	Product Subclass 15: Acylplumbanes P. A. C. Eagle	717
5.3.16	Product Subclass 16: Lead Isocyanates, Isothiocyanates, Diazoplumbanes, and Iminoplumbanes P. A. C. Eagle	721

5.3.17	Product Subclass 17: 1- or 2-Alkoxy- and 1- or 2-(Alkylsulfanyl) and 1- or 2-Aminoalkenyl(triorgano)plumbanes	
	P. A. C. Eagle	727
5.3.18	Product Subclass 18: 1-Halo-, 1-Alkoxy-, 1-Hydroxy-, and 1-Aminoalkylplumbanes	
	P. A. C. Eagle	731
5.3.19	Product Subclass 19: Alkynylplumbanes	
	P. A. C. Eagle	745
5.3.20	Product Subclass 20: Allenylplumbanes	
	P. A. C. Eagle	751
5.3.21	Product Subclass 21: Arylplumbanes	
	P. A. C. Eagle	755
5.3.22	Product Subclass 22: Vinylplumbanes	
	P. A. C. Eagle	763
5.3.23	Product Subclass 23: Benzylplumbanes	
	P. A. C. Eagle	769
5.3.24	Product Subclass 24: Allylplumbanes	
	P. A. C. Eagle	773
5.3.25	Product Subclass 25: Alkylplumbanes	
	P. A. C. Eagle	779
	Keyword Index	793
	Author Index	823
	Abbreviations	859

Table of Contents

Introduction

E. J. Thomas and M. G. Moloney

Introduction	1
---------------------	---

5.1 Product Class 1: Germanium Compounds

E. J. Thomas

5.1 Product Class 1: Germanium Compounds	3
---	---

5.1.1 Product Subclass 1: Germanium Hydrides

K. Oshima

5.1.1 Product Subclass 1: Germanium Hydrides	9
---	---

Synthesis of Product Subclass 1	9
---------------------------------	---

5.1.1.1 Method 1: By Reactions of (Organogermyl)alkali Metal Compounds	9
--	---

5.1.1.1.1 Variation 1: From Tetraarylgermanes	9
---	---

5.1.1.1.2 Variation 2: From Digermanium Compounds	10
---	----

5.1.1.1.3 Variation 3: From Trialkyl- and Triarylgermanium Halides	12
--	----

5.1.1.2 Method 2: Reduction of Germanium Halides	13
--	----

5.1.1.2.1 Variation 1: Reduction with Lithium Aluminum Hydride	13
--	----

5.1.1.2.2 Variation 2: Reduction with Group 14 Hydrides	16
---	----

5.1.1.2.3 Variation 3: Substitution of Halogen with a Carbanion	16
---	----

5.1.1.3 Method 3: Substitution of Halo(organo)germanium Hydrides	17
--	----

5.1.1.3.1 Variation 1: Halogenation of Alkyl- and Arylgermanium Hydrides (Substitution of Hydrogen by Halogen)	18
---	----

5.1.1.3.2 Variation 2: Substitution of Halogen in Halo(organo)germanium Hydrides	19
--	----

Applications of Product Subclass 1 in Organic Synthesis	20
---	----

5.1.1.4 Method 4: Reduction of Organic Halides	21
--	----

5.1.1.5 Method 5: Hydrogermylation of Carbon—Carbon Multiple Bonds	22
--	----

5.1.1.6 Method 6: Reduction of Carbonyl Compounds	23
---	----

5.1.1.7 Method 7: Action of Acids and Bases	24
---	----

5.1.2 Product Subclass 2: Digermenes and Digermanes

N. Takeda, N. Tokitoh, and R. Okazaki

5.1.2 Product Subclass 2: Digermenes and Digermanes	27
--	----

Synthesis of Product Subclass 2	28
---------------------------------	----

5.1.2.1 Method 1: Digermenes from Germanium(II) Complexes	28
---	----

5.1.2.2 Method 2: Digermenes by Photolysis of Trigermiranes or Bis(silyl)germanes	29
--	----

5.1.2.3 Method 3: Digermenes by Reductive Coupling of Dihalogermanes	30
--	----

5.1.2.4	Method 4: Digermanes from Halogermanes	30
5.1.3	Product Subclass 3: Metalated Germanium Compounds N. Takeda, N. Tokitoh, and R. Okazaki	
5.1.3	Product Subclass 3: Metalated Germanium Compounds	33
	Synthesis of Product Subclass 3	34
5.1.3.1	Method 1: Reactions of Tetravalent Germanium Compounds with Metals	34
5.1.3.2	Method 2: Metathesis	34
5.1.3.3	Method 3: Oxidative Addition	35
5.1.3.4	Method 4: From Germylenes	35
5.1.4	Product Subclass 4: Germanium Oxides, Sulfides, Selenides, and Tellurides (Double Bonded) N. Takeda, N. Tokitoh, and R. Okazaki	
5.1.4	Product Subclass 4: Germanium Oxides, Sulfides, Selenides, and Tellurides (Double Bonded)	39
	Synthesis of Product Subclass 4	40
5.1.4.1	Method 1: Chalcogenation of Germylenes	40
5.1.4.2	Method 2: Dechalcogenation of Tetrachalcogenagermolanes	40
5.1.5	Product Subclass 5: Iminogermanes N. Takeda, N. Tokitoh, and R. Okazaki	
5.1.5	Product Subclass 5: Iminogermanes	43
	Synthesis of Product Subclass 5	43
5.1.5.1	Method 1: From Germylenes	43
5.1.5.2	Method 2: Dehydrohalogenation of (Amino)(halo)germanes	44
5.1.6	Product Subclass 6: Germenes N. Takeda, N. Tokitoh, and R. Okazaki	
5.1.6	Product Subclass 6: Germenes	47
	Synthesis of Product Subclass 6	47
5.1.6.1	Method 1: From Germylenes	47
5.1.6.2	Method 2: From Halogermanes	48
5.1.7	Product Subclass 7: Germylenes N. Takeda, N. Tokitoh, and R. Okazaki	
5.1.7	Product Subclass 7: Germylenes	51
	Synthesis of Product Subclass 7	51

5.1.7.1	Method 1:	From Divalent Germanium Compounds with Organolithiums or Grignard Reagents	51
5.1.7.2	Method 2:	Reductive Dehalogenation of Dihalogermanes	52
5.1.8	Product Subclass 8: Organogermanium Halides		
	P. Thornton		
5.1.8	Product Subclass 8: Organogermanium Halides		55
	Synthesis of Product Subclass 8		55
5.1.8.1	Method 1:	From Germanium Halides by Substitution	55
5.1.8.2	Method 2:	Methylene Insertion into the Germanium–Halogen Bond	58
5.1.8.3	Method 3:	By Halogenation of Germanium Compounds	59
5.1.8.3.1	Variation 1:	From Alkyl- or Arylgermanes	59
5.1.8.3.2	Variation 2:	From Germyl Ethers	61
5.1.8.3.3	Variation 3:	From Metallic Germanium	62
5.1.8.3.4	Variation 4:	From Germanium Hydrides	63
5.1.8.4	Method 4:	Comproportionation of Organogermanium Compounds and Germanium Halides	64
5.1.8.5	Method 5:	Addition Reactions of Germanium Compounds	66
5.1.8.5.1	Variation 1:	Addition of Germanium Hydrides to Unsaturated Compounds	66
5.1.8.5.2	Variation 2:	Reactions of Germylenes	69
	Applications of Product Subclass 8 in Organic Synthesis		70
5.1.9	Product Subclass 9: Germanium Oxides		
	P. Thornton		
5.1.9	Product Subclass 9: Germanium Oxides		75
	Synthesis of Product Subclass 9		75
5.1.9.1	Method 1:	By Substitution	75
5.1.9.1.1	Variation 1:	From Organogermanium Halides	75
5.1.9.1.2	Variation 2:	From Organogermanium Oxy Compounds	76
5.1.9.2	Method 2:	Insertion of Oxo Fragments into Germanium–Heteroatom Bonds	77
5.1.9.3	Method 3:	Reactions of Metallogermanium Compounds	78
5.1.9.4	Method 4:	Reactions of Germylenes	79
5.1.9.5	Method 5:	Thermolyses	80
	Applications of Product Subclass 9 in Organic Synthesis		81
5.1.10	Product Subclass 10: Germanium Carboxylates, Phosphates, and Related Compounds		
	P. Thornton		
5.1.10	Product Subclass 10: Germanium Carboxylates, Phosphates, and Related Compounds		85

	Synthesis of Product Subclass 10	85
5.1.10.1	Method 1: From Organogermanium Halides by Substitution	85
5.1.10.2	Method 2: Substitutions in Other Organogermanium Compounds	86
5.1.11	Product Subclass 11: Germanium Sulfides, Sulfoxides, and Related Compounds P. Thornton	
5.1.11	Product Subclass 11: Germanium Sulfides, Sulfoxides, and Related Compounds	89
	Synthesis of Product Subclass 11	89
5.1.11.1	Method 1: From Germanium Halides by Substitution	89
5.1.11.2	Method 2: Substitutions in Other Organogermanium Compounds	90
5.1.12	Product Subclass 12: Germanium Selenides, Tellurides, and Related Compounds P. Thornton	
5.1.12	Product Subclass 12: Germanium Selenides, Tellurides, and Related Compounds	93
	Synthesis of Product Subclass 12	93
5.1.12.1	Method 1: From Germanium Compounds by Substitution	93
5.1.13	Product Subclass 13: Germylamines P. Thornton	
5.1.13	Product Subclass 13: Germylamines	97
	Synthesis of Product Subclass 13	97
5.1.13.1	Method 1: Synthesis by Substitution	97
5.1.13.1.1	Variation 1: From Organogermanium Halides	97
5.1.13.1.2	Variation 2: Substitutions in Other Organogermanium Compounds	98
5.1.13.2	Method 2: From Germanium(II) Compounds by Oxidative Addition	99
	Applications of Product Subclass 13 in Organic Synthesis	99
5.1.14	Product Subclass 14: Germanium Phosphines, Arsines, and Stibines P. Thornton	
5.1.14	Product Subclass 14: Germanium Phosphines, Arsines, and Stibines	101
	Synthesis of Product Subclass 14	101
5.1.14.1	Method 1: From Organogermanium Halides by Substitution	101
5.1.14.2	Method 2: Substitutions in Other Organogermanium Compounds	102
	Applications of Product Subclass 14 in Organic Synthesis	102

5.1.15	Product Subclass 15: Germanium Cyanides A. C. Spivey and C. M. Diaper	
5.1.15	Product Subclass 15: Germanium Cyanides	105
	Synthesis of Product Subclass 15	106
5.1.15.1	Method 1: From Halogermanes by Substitution with Cyanide Salts	106
5.1.16	Product Subclass 16: Acylgermanes A. C. Spivey and C. M. Diaper	
5.1.16	Product Subclass 16: Acylgermanes	109
	Synthesis of Product Subclass 16	109
5.1.16.1	Method 1: From Carboxylic Acid Derivatives by Substitution Using Metallogermanes	109
5.1.16.2	Method 2: From α -Hydroxyalkylgermanes by Oxidation	110
5.1.16.3	Method 3: From Germyl Enol Ethers by Hydrolysis	111
5.1.16.4	Method 4: From α,α -Diheterosubstituted Germanes by Hydrolysis	112
	Applications of Product Subclass 16 in Organic Synthesis	112
5.1.16.5	Method 5: Acylgermanes as Radical Acceptors	112
5.1.17	Product Subclass 17: Imidoylgermanes (α-Iminoalkylgermanes) and α-Diazoalkylgermanes A. C. Spivey and C. M. Diaper	
5.1.17	Product Subclass 17: Imidoylgermanes (α-Iminoalkylgermanes) and α-Diazoalkylgermanes	115
	Synthesis of Product Subclass 17	116
5.1.17.1	Method 1: Imidoylgermanes from Imidoyl Chlorides by Substitution	116
5.1.17.2	Method 2: α -Hydrazonoalkylgermanes from Acylgermanes by Condensation	117
5.1.17.3	Method 3: α -Diazoalkylgermanes by Substitution Using Diazoalkane Derivatives	117
5.1.17.4	Method 4: α -Diazoalkylgermanes from α -Metalated Organogermanes and Tosyl Azide (Diazo Transfer)	118
5.1.17.5	Method 5: α -Diazoalkylgermanes by Radical Exchange and Demercurization	119
5.1.18	Product Subclass 18: α-Halo- and α-Alkoxyvinylgermanes A. C. Spivey and C. M. Diaper	
5.1.18	Product Subclass 18: α-Halo- and α-Alkoxyvinylgermanes	121
	Synthesis of Product Subclass 18	123
5.1.18.1	Method 1: α -Alkoxyvinylgermanes from α -Metallovinyl Ethers by Substitution	123

5.1.18.2	Method 2:	α -Halovinylgermanes from α,β -Dihaloalkylgermanes by Elimination	123
5.1.18.3	Method 3:	α -Halovinylgermanes from Alk-1-ynylgermanes by Hydro/Carbometalation–Halogenation	124
5.1.19	Product Subclass 19: α-Halo-, α-Hydroxy-, α-Alkoxy-, and α-Aminoalkylgermanes A. C. Spivey and C. M. Diaper		
5.1.19	Product Subclass 19: α-Halo-, α-Hydroxy-, α-Alkoxy-, and α-Aminoalkylgermanes		
	Synthesis of Product Subclass 19		127
5.1.19.1	Method 1:	α -Hetero and α -Haloalkylgermanes from Halogermanes by Substitution	128
5.1.19.1.1	Variation 1:	Using Group 1 Organometallics	129
5.1.19.1.2	Variation 2:	Using Group 12 Organometallics	129
5.1.19.2	Method 2:	α -Haloalkylgermanes by Direct Halogenation	130
5.1.19.3	Method 3:	α -Halo and α -Alkoxyalkylgermanes by Insertion	131
5.1.19.3.1	Variation 1:	By Germylene Insertion	131
5.1.19.3.2	Variation 2:	By Methylenation	131
5.1.19.4	Method 4:	α -Hydroxyalkylgermanes from Aldehydes/Ketones by Addition of Metallogermanes	132
5.1.19.5	Method 5:	α -Hydroxyalkylgermanes from Acylgermanes by Addition ...	133
5.1.19.6	Method 6:	Interconversion of α -Hetero- and α -Haloalkylgermanes by Substitution	134
5.1.20	Product Subclass 20: Alkynylgermanes A. C. Spivey and C. M. Diaper		
5.1.20	Product Subclass 20: Alkynylgermanes		
	Synthesis of Product Subclass 20		137
5.1.20.1	Method 1:	From Halogermanes by Substitution	139
5.1.20.2	Method 2:	From Group 14 Metalloalkynyls by Metathesis with Halogermanes	139
	Applications of Product Subclass 20 in Organic Synthesis		140
5.1.20.3	Method 3:	Alkynylgermanes as Protecting Groups	140
5.1.21	Product Subclass 21: Germylketenes and Germylketenimines A. C. Spivey and C. M. Diaper		
5.1.21	Product Subclass 21: Germylketenes and Germylketenimines		
	Synthesis of Product Subclass 21		143
5.1.21.1	Method 1:	Germylketenes from Halogermanes by Substitution with Ynolates	144

5.1.21.2	Method 2:	Germylketenes from (Alkoxyalkynyl)germanes by Thermal Decomposition	145
5.1.21.3	Method 3:	Germylketenes from α -Diazo- β -oxoalkylgermanes by Wolff Rearrangement	145
5.1.21.4	Method 4:	Germylketenimines from α -Cyanoalkylgermanes	146
5.1.22	Product Subclass 22: Aryl- and Heteroarylgermanes A. C. Spivey and C. M. Diaper		
5.1.22	Product Subclass 22: Aryl- and Heteroarylgermanes		149
	Synthesis of Product Subclass 22		150
5.1.22.1	Method 1:	From Halogermanes by Substitution with Arylmetals	150
5.1.22.1.1	Variation 1:	Using Preformed Arylmetals	151
5.1.22.1.2	Variation 2:	Using Barbier-Type Reactions	152
5.1.22.2	Method 2:	From Aryl Halides by Palladium(0)-Mediated Coupling with Digermanes	152
5.1.22.3	Method 3:	From Aryl Halides by Insertion of Dichlorogermylene	153
5.1.22.4	Method 4:	Heteroarylgermanes by Cycloaddition	154
	Applications of Product Subclass 22 in Organic Synthesis		154
5.1.22.5	Method 5:	Arylgermanes as Linkers for Solid-Phase Synthesis	154
5.1.23	Product Subclass 23: Vinylgermanes A. C. Spivey and C. M. Diaper		
5.1.23	Product Subclass 23: Vinylgermanes		159
	Synthesis of Product Subclass 23		160
5.1.23.1	Method 1:	From Vinylolithium and Vinyl Grignard Reagents by Transmetalation with Halogermanes	160
5.1.23.2	Method 2:	From β -Heterogermanes by Elimination	161
5.1.23.2.1	Variation 1:	By Addition of α -Metalated Organogermanes to Aldehydes/Ketones	161
5.1.23.2.2	Variation 2:	By Wittig-Based Methods	162
5.1.23.3	Method 3:	From Alkynes by Germylene Insertion	163
5.1.23.4	Method 4:	From Alkynes by Hydro-, Hetero-, and Metallogermylation ..	163
5.1.23.4.1	Variation 1:	By Hydrogermylation	164
5.1.23.4.2	Variation 2:	By Palladium(0)-Mediated Germylation	165
5.1.23.4.3	Variation 3:	By Metallogermylation	166
	Applications of Product Subclass 23 in Organic Synthesis		167
5.1.23.5	Method 5:	d^2, d^3 -Propene and α^2, d^4 -Butene Synthons for Ring Annulations in Natural Product Synthesis	167

5.1.24	Product Subclass 24: Propargyl- and Allenylgermanes A. C. Spivey and C. M. Diaper	
5.1.24	Product Subclass 24: Propargyl- and Allenylgermanes	171
	Synthesis of Product Subclass 24	172
5.1.24.1	Method 1: Propargyl- or Allenylgermanes by Substitution	172
5.1.24.2	Method 2: Propargyl- and Allenylgermanes from Propargyl and Allenyl Halides by Germylene Insertion	173
5.1.24.3	Method 3: Germacumulenes from Germyl Hydrides by Insertion of Alkadienylidenecarbenes	174
5.1.25	Product Subclass 25: Benzylgermanes A. C. Spivey and C. M. Diaper	
5.1.25	Product Subclass 25: Benzylgermanes	177
	Synthesis of Product Subclass 25	178
5.1.25.1	Method 1: From Halogermanes by Substitution with Benzylmetals	178
5.1.25.2	Method 2: From Benzyl Halides by Germylene Insertion	178
5.1.26	Product Subclass 26: Allylgermanes A. C. Spivey and C. M. Diaper	
5.1.26	Product Subclass 26: Allylgermanes	181
	Synthesis of Product Subclass 26	182
5.1.26.1	Method 1: From Allyl Acetates by Substitution with Metallogermanes ..	182
5.1.26.2	Method 2: From Halogermanes by Substitution with Allylmetals	183
5.1.26.3	Method 3: From Allyl Halides or Dienes by Germylene Insertion	183
5.1.26.4	Method 4: From Allyl Halides by Palladium(0)-Mediated Coupling with Metallogermanes	184
	Applications of Product Subclass 26 in Organic Synthesis	185
5.1.26.5	Method 5: Selective χ -Alkylation of Germanium-Masked Dienolates	185
5.1.27	Product Subclass 27: Alkylgermanes A. C. Spivey and C. M. Diaper	
5.1.27	Product Subclass 27: Alkylgermanes	189
	Synthesis of Product Subclass 27	190
5.1.27.1	Method 1: From Alkyl Halides by Substitution with Metallogermanes ...	190
5.1.27.2	Method 2: From Halogermanes by Substitution with Alkylmetals	190
5.1.27.3	Method 3: From Alkenes by Hydrogermylation	191

5.2	Product Class 2: Tin Compounds E. J. Thomas	
5.2	Product Class 2: Tin Compounds	195
5.2.1	Product Subclass 1: Tin Hydrides A. J. Clark	
5.2.1	Product Subclass 1: Tin Hydrides	205
	Synthesis of Product Subclass 1	207
5.2.1.1	Method 1: From Tin Halides by Reduction	207
5.2.1.1.1	Variation 1: Reduction of Tin Halides with Lithium Aluminum Hydride ...	208
5.2.1.1.2	Variation 2: Reduction of Tin Halides with Sodium Borohydride	210
5.2.1.1.3	Variation 3: Reduction of Tin Halides with Dialkylaluminum Hydrides ...	211
5.2.1.2	Method 2: From Organotin Oxides, Alkoxides, and Amides by Reduction	212
5.2.1.3	Method 3: From Organostannylithium, Sodium, Potassium, and Magnesium Compounds by Reactions with Electrophiles ...	213
5.2.1.4	Method 4: By Reduction of Sn—Sn Bonds	214
5.2.1.5	Method 5: By Exchange Reactions	214
	Applications of Product Subclass 1 in Organic Synthesis	215
5.2.1.6	Method 6: Reduction of Carbon—Halogen, C—O, C—N, C—S, C—Se, and C—Te Bonds without Rearrangement	219
5.2.1.6.1	Variation 1: Reduction of Carbon—Halogen Bonds	220
5.2.1.6.2	Variation 2: Reduction of C—O Bonds	224
5.2.1.6.3	Variation 3: Reduction of C—N Bonds	227
5.2.1.6.4	Variation 4: Reduction of C—S, C—Se, and C—Te Bonds	229
5.2.1.7	Method 7: Elimination Reactions	231
5.2.1.8	Method 8: Addition of Triorganostannanes to C—C, C—O, C—N, and C—S Multiple Bonds	234
5.2.1.8.1	Variation 1: Addition to C—C Multiple Bonds	234
5.2.1.8.2	Variation 2: Addition to C—O Multiple Bonds	241
5.2.1.8.3	Variation 3: Addition to C—N and C—S Multiple Bonds	243
5.2.1.9	Method 9: Mediation of Intermolecular Radical Addition Reactions ...	244
5.2.1.10	Method 10: Mediation of Intramolecular Radical Addition Reactions ...	251
5.2.1.10.1	Variation 1: Radicals Generated by Homolysis of C—I, C—Br, C—Cl, C—SR, and C—SeR Bonds	254
5.2.1.10.2	Variation 2: Radicals Generated by Homolysis of N—Cl, N—O(CO)Ph, N—SPh, and N—NMe(CS)SMe Bonds	257
5.2.1.10.3	Variation 3: Intramolecular Reactions of Radicals Generated by Addition of Tin Hydrides to Unsaturated Groups	259
5.2.1.11	Method 11: Miscellaneous Radical Reactions	260

5.2.2	Product Subclass 2: Distannenes and Distannanes		
	J. Podlech		
5.2.2	Product Subclass 2: Distannenes and Distannanes		273
	Synthesis of Product Subclass 2		273
5.2.2.1	Method 1:	Distannenes by Coupling of Two Stannylenes	273
5.2.2.2	Method 2:	Distannanes by Dehydrogenation of Tin Hydrides	275
5.2.2.2.1	Variation 1:	Catalytic or Thermal Decomposition of Tin Hydrides	276
5.2.2.2.2	Variation 2:	Homolytic Abstraction of Hydrogen from Tin Hydrides	277
5.2.2.3	Method 3:	Distannanes by Hydrostannolysis of Organotin Amides, Oxides, or Alkoxides	277
5.2.2.4	Method 4:	Distannanes by Reaction of Organotin Halides with Metalated Organotin Compounds	279
5.2.2.5	Method 5:	Distannanes by Reduction of Tin Halides, Tin Oxides, or Tin Sulfides with Reducing Agents	280
5.2.3	Product Subclass 3: Metalated Tin Compounds		
	J. Podlech		
5.2.3	Product Subclass 3: Metalated Tin Compounds		285
	Synthesis of Product Subclass 3		287
5.2.3.1	Method 1:	Synthesis by Deprotonation of Tin Hydrides	287
5.2.3.1.1	Variation 1:	Deprotonation with Organometallic Compounds or Metal Hydrides	287
5.2.3.1.2	Variation 2:	Deprotonation with Metal Amides or Metal Alkoxides	288
5.2.3.2	Method 2:	Synthesis by Reductive Metalation of Distannanes	289
5.2.3.3	Method 3:	Synthesis by Reaction of Distannanes with Organometallic Compounds or Metal Hydrides	290
5.2.3.4	Method 4:	Synthesis by Reaction of Tin Halides with Metals	291
5.2.3.5	Method 5:	Synthesis by Transmetalation	293
5.2.3.6	Method 6:	Synthesis by Reaction of Stannous Chloride with Organolithium Compounds	295
5.2.4	Product Subclass 4: Tin Oxides, Sulfides, Selenides, and Tellurides (Double Bonded)		
	N. Takeda, N. Tokitoh, and R. Okazaki		
5.2.4	Product Subclass 4: Tin Oxides, Sulfides, Selenides, and Tellurides (Double Bonded)		299
	Synthesis of Product Subclass 4		300
5.2.4.1	Method 1:	Chalcogenation of Stannylenes	300
5.2.4.2	Method 2:	Dechalcogenation of Tetrachalcogenastannolanes	301

5.2.5	Product Subclass 5: Iminostannanes N. Takeda, N. Tokitoh, and R. Okazaki	
5.2.5	Product Subclass 5: Iminostannanes	303
	Synthesis of Product Subclass 5	303
5.2.5.1	Method 1: Reaction between Stannylenes and Azides	303
5.2.6	Product Subclass 6: Stannenes N. Takeda, N. Tokitoh, and R. Okazaki	
5.2.6	Product Subclass 6: Stannenes	307
	Synthesis of Product Subclass 6	308
5.2.6.1	Method 1: From Stannylenes	308
5.2.7	Product Subclass 7: Stannylenes N. Takeda, N. Tokitoh, and R. Okazaki	
5.2.7	Product Subclass 7: Stannylenes	311
	Synthesis of Product Subclass 7	312
5.2.7.1	Method 1: From Divalent Tin Compounds	312
5.2.7.2	Method 2: Reduction of Dihalostannanes	312
5.2.7.3	Method 3: Exhaustive Desulfurization of Tetrathiastannolanes	313
5.2.8	Product Subclass 8: Tin Halides and Organotin Halides M. E. Wood	
5.2.8	Product Subclass 8: Tin Halides and Organotin Halides	315
	Synthesis of Product Subclass 8	315
5.2.8.1	Tin(IV) Halides by Direct Combination of Elements	315
5.2.8.1.1	Method 1: Chlorine, Bromine, and Iodine as the Halogen	315
5.2.8.2	Tin(IV) Halides by Halide Exchange	317
5.2.8.2.1	Method 1: Fluoride/Chloride Exchange	317
5.2.8.3	Organotin Halides by Direct Synthesis with Metallic Tin	318
5.2.8.3.1	Method 1: Reaction of Alkyl Halides with Metallic Tin	318
5.2.8.3.2	Method 2: Metal-Catalyzed Reaction of Alkyl Halides with Metallic Tin ..	319
5.2.8.3.3	Method 3: Metal-Catalyzed Reaction of Alkyl Halides with Metallic Tin in the Presence of Alcohols	319
5.2.8.3.4	Method 4: Metal-Salt-Catalyzed Reaction of Alkyl Halides with Metallic Tin	320
5.2.8.3.4.1	Variation 1: Catalysis with Copper(I) Iodide in the Presence of Hexamethylphosphoric Triamide	320
5.2.8.3.4.2	Variation 2: Catalysis with Antimony and Arsenic Halides	321

5.2.8.3.4.3	Variation 3:	Catalysis with Mercury(II) Chloride in the Presence of Triethylamine	322
5.2.8.3.5	Method 5:	Triethylamine/Iodine-Catalyzed Reaction of Alkyl Halides with Metallic Tin	322
5.2.8.3.6	Method 6:	Phosphonium Salt Catalyzed Reaction of Alkyl Halides with Metallic Tin	323
5.2.8.4	Organotin Halides by Reactions Involving Tin(II) Halides		324
5.2.8.4.1	Method 1:	Phosphonium Salt Catalyzed Reaction of Alkyl Halides with Tin(II) Halides	324
5.2.8.4.2	Method 2:	Reaction of Alkyl Halides with Tin(II) Chloride in a Salt Melt ..	324
5.2.8.4.3	Method 3:	Reaction of Tin(II) Halides with Organomercury, Organothallium, and Organolead Compounds	326
5.2.8.5	Organotin Halides by Partial Alkylation of Tin(IV) Halides		327
5.2.8.5.1	Method 1:	Organotin Halides by Partial Alkylation of Tin(IV) Halides with Main Group Organometallic Reagents	327
5.2.8.5.1.1	Variation 1:	Using Grignard Reagents	327
5.2.8.5.1.2	Variation 2:	Using Trialkylaluminum Reagents	329
5.2.8.5.1.3	Variation 3:	Using Dialkylmercury(II) Reagents	329
5.2.8.5.2	Method 2:	Organotin Halides by Comproportionation	330
5.2.8.5.2.1	Variation 1:	Using Tetraorganotin Reagents and Tin(IV) Halides	330
5.2.8.5.2.2	Variation 2:	Using Tetraorganotin Reagents and Tin(IV) Halides in the Presence of a Catalyst	332
5.2.8.5.2.3	Variation 3:	Using Tetraorganotin Reagents and Tin(IV) Halides in a Polar Medium	333
5.2.8.5.2.4	Variation 4:	Using Diorganotin Dihalides and Tin(IV) Halides	333
5.2.8.5.2.5	Variation 5:	Using Polymeric "Diorganostannane" Reagents and Tin(IV) Halides	334
5.2.8.5.3	Method 3:	Organotin Halides by Partial Alkylation of Tin(IV) Halides with Diazoalkanes	335
5.2.8.6	Organotin Halides by Cleavage of C—Sn Bonds		335
5.2.8.6.1	Method 1:	Organotin Halides by Cleavage of C—Sn Bonds with Halogens	335
5.2.8.6.2	Method 2:	Organotin Halides by Cleavage of C—Sn Bonds with Hydrogen Halides	337
5.2.8.6.3	Method 3:	Organotin Halides by Cleavage of C—Sn Bonds with Organotin Halides	338
5.2.8.7	Organotin Halides by Cleavage of Sn—Sn Bonds		338
5.2.8.7.1	Method 1:	Cleavage of Hexaorganodistannane Reagents with Halogens	338
5.2.8.7.2	Method 2:	Cleavage of Polymeric "Diorganostannane" Reagents with Halogens	339
5.2.8.7.3	Method 3:	Disproportionation Between Polymeric "Diorganostannane" Reagents and Diorganotin Dihalides	339
5.2.8.8	Organotin Halides from Organotin—Oxygen Compounds		339

5.2.8.8.1	Method 1:	Organotin Halides from Organo(oxo)stannols and Hydrogen Halides	340
5.2.8.8.2	Method 2:	Organotin Halides from Organotin Oxides and Hydrogen Halides	340
5.2.8.8.3	Method 3:	Organotin Halides from Organotin Oxides and Ammonium Halides	340
5.2.8.9	Additional Methods		341
5.2.8.9.1	Method 1:	Organotin Halides by Halide Exchange	341
5.2.8.9.2	Method 2:	Tin(II) Halides from Metallic Tin	342
5.2.8.9.3	Method 3:	Tin(II) Halides from Tin(II) Oxide	343
5.2.8.9.4	Method 4:	Tin(II) Halides by Halide Exchange	343
	Applications of Product Subclass 8 in Organic Chemistry		344
5.2.9	Product Subclass 9: Tin Oxides		
	B. Jousseau		
5.2.9	Product Subclass 9: Tin Oxides		353
	Synthesis of Product Subclass 9		356
5.2.9.1	Method 1:	From Organotin Oxides	356
5.2.9.1.1	Variation 1:	Hexaorganodistannoxanes with Dialkyl Carbonates	356
5.2.9.1.2	Variation 2:	Hexaorganodistannoxanes with Hydroxy Compounds	356
5.2.9.1.3	Variation 3:	Triorganotin Alkoxides with Hydroxy Compounds	357
5.2.9.1.4	Variation 4:	Dibutyltin Oxide with Hydroxy Compounds	357
5.2.9.1.5	Variation 5:	Diorganotin Oxides with Diorganotin Compounds	358
	Applications of Product Subclass 9 in Organic Synthesis		358
5.2.9.2	Method 2:	Selective Benzylation of Carbohydrates via Organotin Alkoxides	358
5.2.9.3	Method 3:	Selective Oxidation of Diols via Organotin Alkoxides	359
5.2.9.4	Method 4:	Selective Acylation of Diols by Organodistannoxanes under Catalytic Conditions	360
5.2.10	Product Subclass 10: Tin Carboxylates and Phosphates		
	B. Jousseau		
5.2.10	Product Subclass 10: Tin Carboxylates and Phosphates		363
	Synthesis of Product Subclass 10		365
5.2.10.1	Method 1:	From Organotin Halides	365
5.2.10.2	Method 2:	From Organotin Oxides	365
	Applications of Product Subclass 10 in Organic Synthesis		366
5.2.10.3	Method 3:	Trisubstituted Tetrahydrofurans from Allylsilanes and Aldehydes under Organotin Carboxylate Catalysis	366

5.2.11 Product Subclass 11: Tin Enol Ethers

B. Jousseume

5.2.11	Product Subclass 11: Tin Enol Ethers	369
	Synthesis of Product Subclass 11	373
5.2.11.1	Method 1: From Organotin Hydrides	373
5.2.11.2	Method 2: From Organotin Halides	374
5.2.11.3	Method 3: From Organotin Alkoxides	375
5.2.11.4	Method 4: From Organotin Oxides	375
	Applications of Product Subclass 11 in Organic Synthesis	376
5.2.11.5	Method 5: 1,4-Dicarbonyl Compounds from Organotin Enolates and α -Halo Ketones	376
5.2.11.6	Method 6: 1,5-Dicarbonyl Compounds by Michael Addition of Organotin Enolates to α,β -Unsaturated Carbonyl Compounds	376
5.2.11.7	Method 7: α -Aryl Ketones from Organotin Enolates and Aromatic Halides under Palladium Catalysis	377
5.2.11.8	Method 8: Synthesis of Substituted Pent-4-enones from Organotin Enolates and Allylic Acetates under Palladium Catalysis	378
5.2.11.9	Method 9: α -Alkyl- β -hydroxy Ketones from Organotin Enolates and Aldehydes	378
5.2.11.9.1	Variation 1: Under Diastereoselective Conditions	379
5.2.11.9.2	Variation 2: Under Enantioselective Conditions	379

5.2.12 Product Subclass 12: Tin Sulfides, Thioalkoxides, and Related Compounds

B. Jousseume

5.2.12	Product Subclass 12: Tin Sulfides, Thioalkoxides, and Related Compounds	383
	Synthesis of Product Subclass 12	387
5.2.12.1	Method 1: From Organotin Hydrides	387
5.2.12.2	Method 2: From Organotin Halides	387
5.2.12.2.1	Variation 1: With Thiols	387
5.2.12.2.2	Variation 2: With Sodium Sulfide	388
5.2.12.2.3	Variation 3: With Sodium Thiolates	388
5.2.12.3	Method 3: From Organotin Oxides	389
	Applications of Product Subclass 12 in Organic Synthesis	389
5.2.12.4	Method 4: Sulfenyl Halides from Organotin Thiocarboxylates	389
5.2.12.5	Method 5: Unsymmetrical Sulfides from Organotin Thiolates and Organic Halides	390
5.2.12.6	Method 6: Vinylic Sulfides from Organotin Thiolates and Vinylic Organic Halides	390

5.2.13	Product Subclass 13: Tin Selenides and Tellurides		
	B. Jousseume		
5.2.13	Product Subclass 13: Tin Selenides and Tellurides		393
	Synthesis of Product Subclass 13		395
5.2.13.1	Method 1: From Hexaorganodistannanes		395
5.2.13.2	Method 2: From Organotin Halides		395
5.2.13.2.1	Variation 1: Using Lithium Selenide		395
5.2.13.2.2	Variation 2: Using Sodium Organoselenides		396
	Applications of Product Subclass 13 in Organic Synthesis		397
5.2.13.3	Method 3: Diorganoselenides from Bis(triphenylstannyl) Selenide		397
5.2.13.4	Method 4: Telluropyrans from Bis(tributylstannyl) Telluride via Tellurocarbonyl Compounds		397
5.2.14	Product Subclass 14: Organostannylamines and Related Compounds		
	B. Jousseume		
5.2.14	Product Subclass 14: Organostannylamines and Related Compounds		401
	Synthesis of Product Subclass 14		404
5.2.14.1	Method 1: From Organotin Halides Using Lithium Amides		404
5.2.14.2	Method 2: From Hexaorganodistannoxanes Using Lithium Amides		405
5.2.14.3	Method 3: From Organotin Alkoxides Using Nitrogen Heterocycles		405
5.2.14.4	Method 4: From Organostannylamines		406
5.2.14.5	Method 5: From Organotin Azides by Cycloaddition		406
	Applications of Product Subclass 14 in Organic Synthesis		407
5.2.14.6	Method 6: Aromatic Amines by Amination of Aryl Bromides with Organostannylamines		407
5.2.15	Product Subclass 15: Organostannylphosphines		
	B. Jousseume		
5.2.15	Product Subclass 15: Organostannylphosphines		409
	Synthesis of Product Subclass 15		410
5.2.15.1	Method 1: From Organotin Halides and Phospholylmetals		410
	Applications of Product Subclass 15 in Organic Synthesis		411
5.2.15.2	Method 2: Phospholylphosphinines from Stannylphospholes and Phosphininy Halides		411
5.2.16	Product Subclass 16: Tin Cyanides and Fulminates		
	P. B. Wyatt		
5.2.16	Product Subclass 16: Tin Cyanides and Fulminates		413
	Synthesis of Product Subclass 16		413

5.2.16.1	Method 1:	Tin Cyanides from Organotin Hydrides and Isocyanides	413
5.2.16.2	Method 2:	Tin Cyanides from Tetraorganotin Compounds and Cyanogen Halides	414
5.2.16.3	Method 3:	Tin Cyanides by Substitution of Tin Halides	414
5.2.16.3.1	Variation 1:	Using Trimethylsilyl Cyanide	414
5.2.16.3.2	Variation 2:	Using Silver Cyanide	415
5.2.16.3.3	Variation 3:	Using Group 1 Metal Cyanides	415
5.2.16.4	Method 4:	Tin Cyanides from Tin Hydroxides Using Hydrogen Cyanide ..	416
5.2.16.5	Method 5:	Tin Cyanides from Tin Alkoxides Using Acyl Cyanides	416
5.2.16.6	Method 6:	Tin Cyanides from Stannylamines Using Hydrogen Cyanide ..	417
5.2.16.7	Method 7:	Tin Fulminates by Substitution of Tin Halides	418
		Applications of Product Subclass 16 in Organic Synthesis	418
5.2.16.8	Method 8:	Cyanation of Carbonyl Compounds	418
5.2.16.9	Method 9:	Cyanation of Imines	420
5.2.16.10	Method 10:	Cyanation of Acyl, Alkenyl, and Aryl Halides	420
5.2.17	Product Subclass 17: Acylstannanes (Including S, Se, and Te Analogues) P. B. Wyatt		
5.2.17	Product Subclass 17: Acylstannanes (Including S, Se, and Te Analogues) ·		
		Synthesis of Product Subclass 17	423
5.2.17.1	Method 1:	From Organostannylithium Species and Carbon Dioxide or Carbon Disulfide	424
5.2.17.2	Method 2:	From Organostannylithium Species and Isocyanates	425
5.2.17.3	Method 3:	Acylstannanes and Stannanecarboxamides by Acylation of Organostannylithium Species	425
5.2.17.3.1	Variation 1:	Acylation Using Halocarboxamides	425
5.2.17.3.2	Variation 2:	Acylation Using Acyl Halides, Esters, and Thioesters	426
5.2.17.4	Method 4:	By Reaction of Organostannylmetal Species and Aldehydes with In Situ Oxidation	427
5.2.17.5	Method 5:	By Reaction of Organotin Halides with Lithium Carboxamide Species	428
		Applications of Product Subclass 17 in Organic Synthesis	428
5.2.17.6	Method 6:	Amides by Palladium-Mediated Cross Coupling of Stannanecarboxamides with Aryl and Alkenyl Halides	428
5.2.17.7	Method 7:	1,2-Dicarbonyl Compounds by Acylation of Acylstannanes ..	429
5.2.17.8	Method 8:	1-Alkoxyalkylstannanes by Reduction of Acylstannanes Followed by Alkylation	430
5.2.18	Product Subclass 18: Imidoystannanes, Diazoalkylstannanes, Tin Isocyanates, and Tin Isothiocyanates P. B. Wyatt		
5.2.18	Product Subclass 18: Imidoystannanes, Diazoalkylstannanes, Tin Isocyanates, and Tin Isothiocyanates		
			433

	Synthesis of Product Subclass 18	433
5.2.18.1	Method 1: Imidoystannanes by the Reactions of Organostannyllithiums with Imidoyl Chlorides	433
5.2.18.2	Method 2: Imidoystannanes by the Reactions of Organotin Halides with Lithiated Imines	434
5.2.18.3	Method 3: Imidoystannanes by the Reactions of Acylstannanes with Amines	435
5.2.18.4	Method 4: Stannylated Diazoalkanes by the Reactions of Tin Halides with Lithiated Diazoalkanes	435
5.2.18.5	Method 5: Stannylated Diazoalkanes by the Reactions of Stannylamines with Diazoalkanes	436
5.2.18.6	Method 6: Tin Isocyanates and Isothiocyanates by the Substitution of Tin Halides	437
	Applications of Product Subclass 18 in Organic Synthesis	438
5.2.18.7	Method 7: Imidoystannanes as Imidoyl Anion Equivalents	438
5.2.18.7.1	Variation 1: Oxo Imines by the Acylation of Imidoystannanes	438
5.2.18.7.2	Variation 2: Imines by the Transmetalation of Imidoystannanes Followed by Alkylation	438
5.2.19	Product Subclass 19: 1-Halo-, 1-Alkoxy-, and 1-Aminovinylstannanes I. Coldham and G. P. Vennall	
5.2.19	Product Subclass 19: 1-Halo-, 1-Alkoxy-, and 1-Aminovinylstannanes	441
	Synthesis of Product Subclass 19	441
5.2.19.1	Method 1: From 1-Halo-, 1-Alkoxy-, or 1-Amino Carbanions and Trialkylhalostannanes	441
5.2.19.1.1	Variation 1: Using 1-Halo-, 1-Alkoxy-, or 1-Aminovinyl Anions	442
5.2.19.1.2	Variation 2: Using 1-Halo or 1-Alkoxy Saturated Carbanions Followed by Elimination	443
5.2.19.2	Method 2: 1-Halovinylstannanes by Substitution Using Trialkylstannane Reagents	444
5.2.19.3	Method 3: 1-Halo- or 1-Alkoxyvinylstannanes by Stannylation of a 1-Halo- or 1-Alkoxyalk-1-yne	444
5.2.19.4	Method 4: 1-Alkoxyvinylstannanes from Acyl Derivatives	445
5.2.19.4.1	Variation 1: Using Enolization Followed by Palladium(0) Coupling	446
5.2.19.4.2	Variation 2: Using Enolization of an Acylstannane	447
5.2.19.4.3	Variation 3: Using Stannylation Followed by Elimination	447
	Applications of Product Subclass 19 in Organic Synthesis	448
5.2.19.5	Method 5: Transmetalation of 1-Heterovinylstannanes To Give 1-Heterovinylolithiums	448
5.2.19.6	Method 6: Palladium(0)-Catalyzed Cross-Coupling Reactions of 1-Heterovinylstannanes	448
5.2.19.7	Additional Methods	449

5.2.20	Product Subclass 20: 1-Halo-, 1-Hydroxy-, 1-Alkoxy-, and 1-Aminoalkylstannanes		
	I. Coldham and G. P. Vennall		
5.2.20	Product Subclass 20: 1-Halo-, 1-Hydroxy-, 1-Alkoxy-, and 1-Aminoalkylstannanes		451
	Synthesis of Product Subclass 20		451
5.2.20.1	Method 1:	From 1-Halo-, 1-Alkoxy-, or 1-Amino Carbanions and Trialkyl(halo)stannanes	451
5.2.20.2	Method 2:	Substitution of Alkylstannanes with a Leaving Group in the α -Position	453
5.2.20.3	Method 3:	Functional Group Interconversion of 1-Hydroxy- and 1-Aminoalkylstannanes	454
5.2.20.4	Method 4:	1-Hydroxyalkylstannanes by Reduction of Acylstannanes	454
5.2.20.5	Method 5:	Addition to Trialkylstannane Reagents	455
5.2.20.5.1	Variation 1:	Using Carbonyls or Acetals	456
5.2.20.5.2	Variation 2:	Using Iminium Ions	457
	Applications of Product Subclass 20 in Organic Synthesis		458
5.2.20.6	Method 6:	Transmetalation of 1-Heteroalkylstannanes To Give 1-Heteroalkyllithiums	458
5.2.20.7	Method 7:	Metal-Catalyzed Coupling with Activated Halides and Acyl Derivatives	459
5.2.21	Product Subclass 21: Alkynylstannanes		
	G. T. Crisp		
5.2.21	Product Subclass 21: Alkynylstannanes		463
	Synthesis of Product Subclass 21		463
5.2.21.1	Method 1:	From Alkynyl Anions by Reaction with Trialkyl- or Triaryltin Halides	463
5.2.21.1.1	Variation 1:	Using Grignard Reagents	463
5.2.21.1.2	Variation 2:	Using Organolithium Reagents	464
5.2.21.1.3	Variation 3:	Using Organolithium Reagents Derived from Elimination Reactions	465
5.2.21.2	Method 2:	From Terminal Alkynes by Reaction with Tin Amides and Oxides	466
5.2.21.2.1	Variation 1:	Using Trialkyltin Amides	467
5.2.21.2.2	Variation 2:	Using Trialkyltin Oxides or Bis(trialkyltin) Oxides	468
5.2.21.3	Method 3:	From Silylalkynes by Reaction with Bis(trialkyltin) Oxides and Fluoride Anion	468
5.2.21.4	Methods 4:	Additional Methods	469
	Applications of Product Subclass 21 in Organic Synthesis		469
5.2.21.5	Method 5:	Metal–Tin Exchange of Alkynylstannanes	470
5.2.21.6	Method 6:	Electrophilic Substitution of Alkynylstannanes	471

5.2.21.7	Method 7:	Metal-Catalyzed Couplings of Alkynylstannanes	473
5.2.21.8	Method 8:	Conversion into Other Stannanes	475
5.2.22	Product Subclass 22: Ketenylstannanes and Derivatives		
	G. T. Crisp		
5.2.22	Product Subclass 22: Ketenylstannanes and Derivatives		479
	Synthesis of Product Subclass 22		480
5.2.22.1	Method 1:	From Alkynolates and Trialkyltin Halides	480
5.2.22.2	Method 2:	From the Thermal Decomposition of Alkoxyethynylstannanes	481
5.2.22.3	Method 3:	Additional Methods	481
	Applications of Product Subclass 22 in Organic Synthesis		482
5.2.22.4	Method 4:	Reaction with Nucleophiles	482
5.2.22.5	Method 5:	Reaction with Phosphorus Ylides	482
5.2.23	Product Subclass 23: Allenylstannanes		
	G. T. Crisp		
5.2.23	Product Subclass 23: Allenylstannanes		485
	Synthesis of Product Subclass 23		486
5.2.23.1	Method 1:	From Allenyl Anions by Reaction with Trialkyl- or Triaryltin Halides	486
5.2.23.1.1	Variation 1:	Using Propargyl Bromide and Zinc	486
5.2.23.1.2	Variation 2:	Using Grignard Reagents	487
5.2.23.1.3	Variation 3:	Using Organolithium Reagents	487
5.2.23.2	Method 2:	From Propargyl Compounds by S_N2' Displacement	488
5.2.23.2.1	Variation 1:	Using Stannylcuprates	489
5.2.23.2.2	Variation 2:	Using Magnesium and Lead(II) Bromide	490
5.2.23.3	Method 3:	From Chromium Carbenes by Hydrostannylation	491
5.2.23.4	Method 4:	From the Rearrangement of Propargylstannanes	491
5.2.23.5	Methods 5:	Additional Methods	492
	Applications of Product Subclass 23 in Organic Synthesis		492
5.2.23.6	Method 6:	Substitution with Electrophiles	492
5.2.23.7	Method 7:	Lewis Acid Catalyzed Additions to Electrophiles	493
5.2.23.8	Method 8:	Transmetalation with Organolithium Reagents	495
5.2.23.9	Method 9:	Palladium-Catalyzed Coupling with Electrophiles	495
5.2.24	Product Subclass 24: Arylstannanes		
	G. T. Crisp		
5.2.24	Product Subclass 24: Arylstannanes		499
	Synthesis of Product Subclass 24		499
5.2.24.1	Method 1:	From Aryl Anions by Reaction with Trialkyl- or Triaryltin Halides	499

5.2.24.1.1	Variation 1:	Using a Preformed Grignard Reagent	500
5.2.24.1.2	Variation 2:	Using a Grignard Reagent Formed In Situ (Barbier Conditions)	500
5.2.24.1.3	Variation 3:	Using Anions of Aryllithiums Formed by Directed Lithiations	501
5.2.24.1.4	Variation 4:	Using Anions of Aryllithiums Formed from Aryl Halides	503
5.2.24.2	Method 2:	From Aryl Sulfones by Reaction with Trialkyltin Hydrides	503
5.2.24.3	Method 3:	From Palladium-Catalyzed Coupling of an Aryl Halide or Trifluoromethanesulfonate with a Hexaalkyldistannane	504
5.2.24.4	Method 4:	From an Aryl Halide by Nucleophilic Aromatic Substitution with Trialkyl- or Triaryltin Anions	505
5.2.24.5	Method 5:	From Cycloaddition Reactions of Alkynylstannanes	506
5.2.24.5.1	Variation 1:	Using [4 + 2] Cycloadditions of Alkynylstannanes	507
5.2.24.5.2	Variation 2:	Using Metal-Mediated Cycloadditions of Alkynylstannanes ..	509
5.2.24.5.3	Variation 3:	Using 1,3-Cycloadditions of Alkynylstannanes	510
5.2.24.6	Methods 6:	Additional Methods	510
		Applications of Product Subclass 24 in Organic Synthesis	511
5.2.24.7	Method 7:	Metal-Tin Exchange of Aryl- and Heteroarylstannanes	511
5.2.24.8	Method 8:	Electrophilic Substitution of Aryl- and Heteroarylstannanes ..	513
5.2.24.8.1	Variation 1:	Protiodestannylation	513
5.2.24.8.2	Variation 2:	Halodestannylation	514
5.2.24.8.3	Variation 3:	Using Other Electrophiles	515
5.2.24.9	Method 9:	Metal-Catalyzed Couplings of Aryl- and Heteroarylstannanes ..	515
5.2.25	Product Subclass 25: Alk-1-enylstannanes		
	G. T. Crisp		
5.2.25	Product Subclass 25: Alk-1-enylstannanes		521
	Synthesis of Product Subclass 25		521
5.2.25.1	Method 1:	From Alkenyl Anions by Reaction with Trialkyl- or Triaryltin Halides	521
5.2.25.1.1	Variation 1:	Using Preformed Grignard Reagents	522
5.2.25.1.2	Variation 2:	Using Anions of Alkenyllithiums Formed from Directed Lithiation	523
5.2.25.1.3	Variation 3:	Using Anions of Alkenyllithiums Formed from Alkenyl Halides ..	524
5.2.25.1.4	Variation 4:	Using Other Alkenyl Anions	524
5.2.25.2	Method 2:	From the Palladium-Catalyzed Coupling of Alkenyl Electrophiles with Distannanes	526
5.2.25.3	Method 3:	From Alkenyl Sulfones by Reaction with Trialkyltin Hydrides ..	527
5.2.25.4	Method 4:	From Alkenylsilanes and Fluoride Ion	527
5.2.25.5	Method 5:	From the Hydrostannylation of an Alkyne	528
5.2.25.5.1	Variation 1:	By Radical Addition of a Trialkyltin Hydride	529
5.2.25.5.2	Variation 2:	By Metal-Catalyzed Addition of a Trialkyltin Hydride	529
5.2.25.6	Method 6:	From the Addition of Trialkyltin Metals Across an Alkyne	531
5.2.25.6.1	Variation 1:	Using Stannylcuprates	531
5.2.25.6.2	Variation 2:	Using Distannanes	532
5.2.25.6.3	Variation 3:	Using Borylstannanes	533

5.2.25.7	Method 7:	From Aldehydes using Chromium(II) Halides	534
5.2.25.8	Method 8:	From the Hydrostannylation of an Allene	535
5.2.25.9	Method 9:	From the [4+2] Cycloaddition of Alkynylstannanes to Dienes	536
5.2.25.10	Method 10:	From Other Stannanes	536
5.2.25.11	Methods 11:	Additional Methods	539
		Applications of Product Subclass 25 in Organic Synthesis	539
5.2.25.12	Method 12:	Metal–Tin Exchange of Alkenylstannanes	540
5.2.25.13	Method 13:	Electrophilic Substitution of Alkenylstannanes	541
5.2.25.13.1	Variation 1:	Protiodestannylation	541
5.2.25.13.2	Variation 2:	Halodestannylation	542
5.2.25.13.3	Variation 3:	Using Other Electrophiles	544
5.2.25.14	Method 14:	Metal-Catalyzed Couplings of Alkenylstannanes	545
5.2.26	Product Subclass 26: Propargylstannanes		
	D. Young		
5.2.26	Product Subclass 26: Propargylstannanes		549
	Synthesis of Product Subclass 26		549
5.2.26.1	Method 1:	From Propargyl Grignard Reagents and Tin Halides	549
5.2.26.2	Method 2:	Transmetalations of Intermediate Allenylmetal Species	550
5.2.26.2.1	Variation 1:	Kinetic Stannylation of Lithium Reagents	550
5.2.26.2.2	Variation 2:	From Allenyltitanium Species	551
5.2.26.3	Method 3:	From Propargylic Substrates and Stannylmetal Species	552
5.2.26.3.1	Variation 1:	With Stannyl lithium Species	552
5.2.26.3.2	Variation 2:	With Stannylcopper(I) Species	553
5.2.26.4	Methods 4:	Additional Methods	554
	Applications of Product Subclass 26 in Organic Synthesis		555
5.2.26.5	Method 5:	Allenylation and/or Propargylation Reactions	555
5.2.26.5.1	Variation 1:	Addition to Carbon Electrophiles	555
5.2.26.5.2	Variation 2:	Methanol Mediated Propargylation Reactions	555
5.2.27	Product Subclass 27: Benzylstannanes		
	R. L. Marshall		
5.2.27	Product Subclass 27: Benzylstannanes		559
	Synthesis of Product Subclass 27		559
5.2.27.1	Method 1:	From Trialkylstannyl lithiums	559
5.2.27.2	Method 2:	From Organomagnesium Derivatives and Organotin Halides	560
5.2.27.2.1	Variation 1:	From Benzyl Halides by Barbier Reactions	560
5.2.27.2.2	Variation 2:	Sonication-Promoted Barbier Reactions	560
5.2.27.3	Method 3:	From Organozinc Derivatives and Organotin Halides	561
5.2.27.3.1	Variation 1:	Zinc and/or Copper Mediated Synthesis	561
5.2.27.3.2	Variation 2:	From Benzylic Zinc/Copper Halides	562
5.2.27.4	Method 4:	From Benzyl Anions and Organotin Halides	564

5.2.27.4.1	Variation 1:	From Cresols, by Formation of the Dianion Followed by Stannylation	564
5.2.27.4.2	Variation 2:	By Stannylation of Methylquinolines	564
5.2.27.4.3	Variation 3:	Stannylation of Terpenes	565
5.2.27.5	Method 5:	Synthesis From Tetraalkylammonium Salts	566
5.2.27.6	Method 6:	Via Silicon–Tin Transmetalation	567
5.2.27.7	Method 7:	Palladium-Catalyzed Hydrostannylation of Alkenes	568
		Applications of Product Subclass 27 in Synthesis	568
5.2.27.8	Method 8:	Preparation of 1-Benzyl-1,2-dihydroisoquinolines	568
5.2.27.9	Method 9:	Synthesis of New Non-opioid Analgesics	569
5.2.27.10	Method 10:	Tin–Lithium Exchange Reactions	569
5.2.28	Product Subclass 28: Allylstannanes		
	R. L. Marshall		
5.2.28	Product Subclass 28: Allylstannanes		573
	Synthesis of Product Subclass 28		573
5.2.28.1	Method 1:	Synthesis via Grignards: Reaction of Organomagnesium Reagents with Trialkylhalostannanes	574
5.2.28.1.1	Variation 1:	Direct Formation of the Allyl Grignard	574
5.2.28.1.2	Variation 2:	Via Barbier Reaction	575
5.2.28.1.3	Variation 3:	Sonication-Promoted Barbier Reactions	576
5.2.28.1.4	Variation 4:	Sonication-Promoted Barbier Reactions with Hexabutyldistannoxane [Bis(tributyltin) Oxide]	576
5.2.28.2	Method 2:	Allylstannanes via Trialkylstannyllithium Reagents	577
5.2.28.3	Method 3:	Synthesis via Deprotonation of Alkenes	578
5.2.28.3.1	Variation 1:	Allylstannanes by Deprotonation/Stannylation of Alkenes ...	578
5.2.28.3.2	Variation 2:	Stannylation of Terpenes	579
5.2.28.4	Method 4:	From Allylic Sulfur Derivatives (Sulfides, Sulfones, and Thiols)	579
5.2.28.4.1	Variation 1:	From Allylic Sulfides Using Tributylstannane	579
5.2.28.4.2	Variation 2:	From Allylic Sulfides Using Tributylstannyllithium	580
5.2.28.4.3	Variation 3:	From Allylic Sulfones	581
5.2.28.4.4	Variation 4:	From Allylic S-Substituted S-Methyl Dithiocarbonates	582
5.2.28.5	Method 5:	From Allylic Acetates and Phosphates	583
5.2.28.5.1	Variation 1:	Via Palladium(0) Complexes with Diethyl(tributylstannyl)-aluminum	583
5.2.28.5.2	Variation 2:	Via Palladium(0) Complexes, Samarium(II) Iodide, and Trialkylhalostannanes	584
5.2.28.6	Method 6:	From the Hydrolysis of Boronylallylic Stannanes	585
5.2.28.7	Method 7:	α -Substituted Allylstannanes by Selenoxide Elimination	586
5.2.28.8	Method 8:	Synthesis via Wittig Reactions	586
5.2.28.9	Method 9:	Substituted Allylic Stannanes From β -Stannyl Enolate Esters .	588
5.2.28.10	Method 10:	Via Silicon–Tin Transmetalation	589
5.2.28.11	Method 11:	Palladium-Catalyzed Hydrostannylation of Allenes	590
5.2.28.12	Method 12:	From Allylic Alcohols	591

5.2.28.13	Methods 13: Additional Methods	592
	Applications of Product Subclass 28 in Synthesis	592
5.2.28.14	Method 14: Radical Reactions	592
5.2.28.15	Method 15: Transmetalations	594
5.2.28.16	Method 16: Cross-Coupling Reactions with Alkyl and Allyl Halides	596
5.2.28.17	Method 17: Reactions with Aldehydes, Ketones, and Their Derivatives ...	598
5.2.29	Product Subclass 29: Alkylstannanes D. Young	
5.2.29	Product Subclass 29: Alkylstannanes	607
	Synthesis of Product Subclass 29	608
5.2.29.1	Method 1: From Trialkylstannyl Anions with Haloalkanes or Tosylates ...	608
5.2.29.2	Method 2: From Tin Metal and Haloalkanes	610
5.2.29.3	Method 3: From Alkyl Grignard Reagents and Bis(trialkyltin) Oxides	611
5.2.29.4	Method 4: From Alkylmetal Reagents and Alkylchlorostannanes	612
5.2.29.4.1	Variation 1: Using Alkylsodium Reagents and Alkylchlorostannanes	612
5.2.29.4.2	Variation 2: Using Alkyl lithium Reagents and Alkylchlorostannanes	613
5.2.29.4.3	Variation 3: Using Alkylzinc Reagents and Alkylchlorostannanes	613
5.2.29.5	Method 5: From Hydrostannylation of Alkenes	614
5.2.29.5.1	Variation 1: At Atmospheric Pressure	614
5.2.29.5.2	Variation 2: Using Elevated Pressures	614
5.2.29.6	Methods 6: Additional Methods	615
	Applications of Product Subclass 29 in Synthesis	615
5.2.29.7	Method 7: Transmetalation	615
5.2.29.7.1	Variation 1: With Palladium	615
5.2.29.7.2	Variation 2: Tin–Lithium Exchange	616
5.3	Product Class 3: Lead Compounds	619
	M. G. Moloney	
5.3.1	Product Subclass 1: Lead Hydrides M. G. Moloney	
5.3.1	Product Subclass 1: Lead Hydrides	627
	Synthesis of Product Subclass 1	628
5.3.1.1	Method 1: From Organolead Halides by Reduction	628
5.3.1.1.1	Variation 1: Using Potassium Borohydride	628
5.3.1.1.2	Variation 2: Using Diborane	629
5.3.1.1.3	Variation 3: Using Lithium Aluminum Hydride	629
5.3.1.1.4	Variation 4: Using Diisobutylaluminum Hydride	630
5.3.1.1.5	Variation 5: Using Tributylstannane	630
5.3.1.2	Method 2: From Lead Alkoxides and Acetates by Reduction	630
5.3.1.2.1	Variation 1: Using Diborane	631

5.3.1.2.2	Variation 2: Using Triorganotin Hydrides	631
5.3.1.3	Method 3: From Lead Imidazoles by Reduction	631
	Applications of Product Subclass 1 in Organic Synthesis	632
5.3.1.4	Method 4: Hydroplumbylation	632
5.3.1.5	Method 5: Reduction	634
5.3.2	Product Subclass 2: Diplumbenes and Diplumbanes	
	N. Takeda, N. Tokitoh, and R. Okazaki	
5.3.2	Product Subclass 2: Diplumbenes and Diplumbanes	637
	Synthesis of Product Subclass 2	637
5.3.2.1	Method 1: Diplumbenes from Grignard Reagents	637
5.3.2.2	Method 2: Diplumbanes from Grignard Reagents	638
5.3.3	Product Subclass 3: Metalated Lead Compounds	
	N. Takeda, N. Tokitoh, and R. Okazaki	
5.3.3	Product Subclass 3: Metalated Lead Compounds	641
	Synthesis of Product Subclass 3	641
5.3.3.1	Method 1: Reactions between Tetravalent Lead Compounds and Metals	641
5.3.3.2	Method 2: Metathesis	642
5.3.3.3	Method 3: Oxidative Addition	642
5.3.3.4	Method 4: From Plumbylenes	643
5.3.4	Product Subclass 4: Organoplumbyl, Sulfides, Selenides, and Tellurides (Double Bonded)	
	N. Takeda, N. Tokitoh, and R. Okazaki	
5.3.4	Product Subclass 4: Organoplumbyl, Sulfides, Selenides, and Tellurides (Double Bonded)	645
	Synthesis of Product Subclass 4	645
5.3.5	Product Subclass 5: Plumbylenes	
	N. Takeda, N. Tokitoh, and R. Okazaki	
5.3.5	Product Subclass 5: Plumbylenes	649
	Synthesis of Product Subclass 5	649
5.3.5.1	Method 1: From Divalent Lead Compounds	649
5.3.5.2	Method 2: From Tetravalent Lead Compounds	650

5.3.6	Product Subclass 6: Halo(organo)plumbanes		
	P. J. Guiry and P. J. McCormack		
5.3.6	Product Subclass 6: Halo(organo)plumbanes		653
	Synthesis of Product Subclass 6		653
5.3.6.1	Method 1:	Reaction of Hexaorganodiplumbanes with Halide Sources	653
5.3.6.1.1	Variation 1:	Reaction with Halogens	654
5.3.6.1.2	Variation 2:	Reaction with Other Halide Sources	654
5.3.6.2	Method 2:	Metathesis Reactions of Organoplumbanes with Halides	655
5.3.6.2.1	Variation 1:	Reaction of Hexaaryldiplumboxanes with Hydrogen Halides	655
5.3.6.2.2	Variation 2:	Reaction of Bis(acetoxy)diorganoplumbanes with Hydrogen Halides	656
5.3.6.3	Method 3:	Reaction of Tetraorganoplumbanes with Halogens	657
5.3.6.3.1	Variation 1:	Reaction with Free Halogen To Form Halotriorganoplumbanes	657
5.3.6.3.2	Variation 2:	Reaction with Free Halogen To Form Dihalodiorgano-plumbanes	658
5.3.6.4	Method 4:	Reaction of Tetraorganoplumbanes with Hydrogen Halides	658
5.3.6.4.1	Variation 1:	Reaction with Hydrogen Halides To Form Halotriorgano-plumbanes	658
5.3.6.4.2	Variation 2:	Reaction with Hydrogen Halides To Form Dihalodiorgano-plumbanes	659
5.3.6.5	Method 5:	Reaction of Tetraorganoplumbanes with Other Halide Sources	659
5.3.6.6	Method 6:	Other Synthetic Methods	660
5.3.6.6.1	Variation 1:	Reaction of Dinitrogen Tetroxide with Tetraorganoplumbanes	660
5.3.6.6.2	Variation 2:	Reaction of Hydrogen Halides with Diethyllead Sulfite	661
	Applications of Product Subclass 6 in Organic Synthesis		661
5.3.6.7	Method 7:	Chemoselective Carbonyl Allylation of α,β -Epoxy Ketones with Allylic Stannanes	661
5.3.7	Product Subclass 7: Organoplumboxanes and Related Compounds		
	P. J. Guiry and P. J. McCormack		
5.3.7	Product Subclass 7: Organoplumboxanes and Related Compounds		665
	Synthesis of Product Subclass 7		665
5.3.7.1	Method 1:	Preparation of Organoplumbanols by the Oxidation of Hexaorganodiplumbanes	665
5.3.7.2	Method 2:	Organoplumbanols, Alkoxy(organo)plumbanes, and Alkylperoxy(organo)plumbanes from Halo(organo)plumbanes	666
5.3.7.2.1	Variation 1:	Reaction of Halo(organo)plumbanes with Wet Silver(I) Oxide	667
5.3.7.2.2	Variation 2:	Reaction of Halo(organo)plumbanes with Alkali Metal Alkoxides	667
5.3.7.3	Method 3:	Preparation of Alkoxyplumbanes by Transalcoholysis and Dehydration Reactions	668
5.3.7.3.1	Variation 1:	Reaction of Organoplumbanols with Alcohols or Phenols	668

5.3.7.3.2	Variation 2:	Reaction of Alkoxy(organo)plumbanes with Alcohols or Phenols	669
5.3.7.3.3	Variation 3:	Reaction of Alkoxy(organo)plumbanes with Hydrogen Peroxide	669
5.3.7.4	Method 4:	Preparation of Alkoxyplumbanes from Tetraorganoplumbanes	669
		Applications of Product Subclass 7 in Organic Synthesis	670
5.3.7.5	Method 5:	Alkoxy(organo)plumbane-Catalyzed Addition Reactions	670
5.3.8	Product Subclass 8: Acyloxy(organo)plumbanes		
	P. J. Guiry and P. J. McCormack		
5.3.8	Product Subclass 8: Acyloxy(organo)plumbanes		673
	Synthesis of Product Subclass 8		673
5.3.8.1	Method 1:	Direct Plumbation of Arenes To Form Tris(acyloxy)arylplumbanes	673
5.3.8.1.1	Variation 1:	Plumbation of Arenes To Form Tri(acyloxy)arylplumbanes ...	673
5.3.8.1.2	Variation 2:	Plumbation of Arenes in the Presence of Monohaloacetic Acids Followed by Metathesis To Form Tris(acetoxy)arylplumbanes	674
5.3.8.1.3	Variation 3:	Plumbation of Arenes in the Presence of Dihaloacetic Acids Followed by Metathesis To Form Tris(acetoxy)arylplumbanes	675
5.3.8.1.4	Variation 4:	Plumbation of Arenes in the Presence of Trihaloacetic Acids Followed by Metathesis To Form Tris(acetoxy)arylplumbanes	675
5.3.8.2	Method 2:	Tin-Lead Transmetalations To Form Tris(acetoxy)organo-plumbanes	676
5.3.8.3	Method 3:	Boron-Lead Transmetalations To Form Tris(acetoxy)organo-plumbanes	677
5.3.8.3.1	Variation 1:	Boron-Lead Transmetalations To Form Bis(acetoxy)diorgano-plumbanes	678
5.3.8.4	Method 4:	Mercury-Lead Transmetalations To Form Tris(acetoxy)organo-plumbanes	678
	Applications of Product Subclass 8 in Organic Synthesis		679
5.3.8.5	Method 5:	Arylation of Phenols Using Tris(acetoxy)organoplumbanes ..	679
5.3.8.6	Method 6:	Arylation of Dicarboxyls and Derivatives with Tris(acetoxy)-organoplumbanes	680
5.3.8.6.1	Variation 1:	Reaction of β -Diketones and Derivatives with Tris(acetoxy)-organoplumbanes	681
5.3.8.6.2	Variation 2:	Reaction of β -Oxo Esters with Tris(acetoxy)organoplumbanes	681
5.3.8.6.3	Variation 3:	Reaction of β -Dicarbonyl Vinylogues with Tris(acetoxy)-organoplumbanes	682
5.3.8.6.4	Variation 4:	Arylation of Malonic Acid Derivatives with Tris(acetoxy)-organoplumbanes	683
5.3.8.6.5	Variation 5:	Arylation of α -Cyano Esters and Malononitriles with Tris(acetoxy)organoplumbanes	684

5.3.8.7	Method 7:	Arylation of Ketones and Derivatives with Tris(acetoxy)-organoplumbanes	685
5.3.8.7.1	Variation 1:	Arylation of Ketones with Tris(acetoxy)organoplumbanes ...	685
5.3.8.7.2	Variation 2:	Arylation of Enamines with Tris(acetoxy)organoplumbanes ..	685
5.3.8.8	Method 8:	Arylation of Nitroalkanes and Nitroacetic Acid Derivatives with Tris(acetoxy)organoplumbanes	686
5.3.8.9	Method 9:	Copper-Catalyzed N-Arylation with Tris(acetoxy)organo-plumbanes	687
5.3.8.9.1	Variation 1:	Arylation of Azoles with Tris(acetoxy)organoplumbanes	687
5.3.8.9.2	Variation 2:	Arylation of Amides with Tris(acetoxy)organoplumbanes	688
5.3.9	Product Subclass 9: Plumbyl Enol Ethers		
	P. J. Guiry and P. J. McCormack		
5.3.9	Product Subclass 9: Plumbyl Enol Ethers		693
	Synthesis of Product Subclass 9		693
5.3.9.1	Method 1:	Reaction of Trimethylsilyl Enol Ethers with Tris(acetoxy)arylplumbanes	693
5.3.9.2	Method 2:	Reaction of Organoplumbanes with Ketene	694
	Applications of Product Subclass 9 in Organic Synthesis		695
5.3.10	Product Subclass 10: Organoplumbane Sulfur Compounds		
	P. J. Guiry and P. J. McCormack		
5.3.10	Product Subclass 10: Organoplumbane Sulfur Compounds		697
	Synthesis of Product Subclass 10		697
5.3.10.1	Method 1:	Preparation of (Organosulfanyl)plumbanes by Reaction of Hexaorganodiplumbanes with Organic Disulfides	697
5.3.10.2	Method 2:	Organo(organosulfanyl)plumbanes from Halo(organo)-plumbanes	698
5.3.10.2.1	Variation 1:	Reaction of Halotriorganoplumbanes with Lead(II) Thiolates ..	698
5.3.10.2.2	Variation 2:	Reaction of Halotriorganoplumbanes with Thiols	699
5.3.10.3	Method 3:	Preparation of Organo(organosulfanyl)plumbanes from Alkoxy(organo)plumbanes	700
5.3.11	Product Subclass 11: Organoplumbyl Selenides, Tellurides, and Related Compounds		
	P. J. Guiry and P. J. McCormack		
5.3.11	Product Subclass 11: Organoplumbyl Selenides, Tellurides, and Related Compounds		703
	Synthesis of Product Subclass 11		704
5.3.11.1	Method 1:	Organoplumbyl Selenides or Tellurides from [(Triorganoplumbyl)selenenyl]lithium or	

		[(Triorganoplumbyl)tellanyl]lithium and Halotriorgano- plumbanes	704
5.3.11.1.1	Variation 1:	Reaction of Lithium Triorganoplumbyl Selenides or Tellurides with Halotriorganoplumbanes	704
5.3.11.1.2	Variation 2:	Organoplumbyl Tellurides from [(Triorganogermyl)tellanyl]- lithium and Halotriorganoplumbanes	704
5.3.11.2	Method 2:	Organoplumbyl Selenides from Dihalodiphenylplumbanes and Sodium Selenide	705
5.3.12	Product Subclass 12: Organoplumbanamines and Related Compounds P. J. Guiry and P. J. McCormack		
5.3.12	Product Subclass 12: Organoplumbanamines and Related Compounds .. 707		
	Synthesis of Product Subclass 12		707
5.3.12.1	Method 1:	Organoplumbanamines from Halo(organo)plumbanes	707
5.3.12.2	Method 2:	Organoplumbanamines from Organoplumbanols	708
5.3.12.3	Method 3:	Organoplumbanamines from Tetraorganoplumbanes and N-Halogenated Organic Compounds	709
5.3.12.4	Additional Methods		709
5.3.13	Product Subclass 13: Organoplumbyl Phosphines and Phosphine Oxides P. J. Guiry and P. J. McCormack		
5.3.13	Product Subclass 13: Organoplumbyl Phosphines and Phosphine Oxides · 711		
	Synthesis of Product Subclass 13		711
5.3.13.1	Method 1:	Organoplumbyl Phosphines from Halo(organo)plumbanes ..	711
5.3.14	Product Subclass 14: Triorganolead Cyanides and Triorganolead Cyanates P. A. C. Eagle		
5.3.14	Product Subclass 14: Triorganolead Cyanides and Triorganolead Cyanates 713		
	Synthesis of Product Subclass 14		713
5.3.14.1	Method 1:	Triorganolead Cyanides from Hexaaryldiplumbanes by Disproportionation with Cyanogen Halides	713
5.3.14.2	Method 2:	Triorganolead Cyanides from Triorganolead Derivatives and Potassium Cyanide or Fulminates	714
5.3.15	Product Subclass 15: Acylplumbanes P. A. C. Eagle		
5.3.15	Product Subclass 15: Acylplumbanes		
	Synthesis of Product Subclass 15		718

5.3.15.1	Method 1:	Acylplumbanes from (Triarylplumbyl)lithiums by Substitution with Acyl Halides or Chloroformates	718
5.3.15.2	Method 2:	Acylplumbane Thioacetals from Triorganoplumbanes by Reactions with 1,3-Dithian-2-yllithiums or 1,3-Oxathian-2-yllithiums	718
5.3.16	Product Subclass 16: Lead Isocyanates, Isothiocyanates, Diazoplumbanes, and Iminoplumbanes P. A. C. Eagle		
5.3.16	Product Subclass 16: Lead Isocyanates, Isothiocyanates, Diazoplumbanes, and Iminoplumbanes		
		Synthesis of Product Subclass 16	721
5.3.16.1	Method 1:	Isocyanates and Isothiocyanates from Triorganolead Derivatives by Substitution	721
5.3.16.2	Method 2:	Diazomethyl(trimethyl)plumbanes from <i>N</i> -(Trimethylplumbyl)- <i>N,N</i> -bis(trimethylsilyl)amine by Reactions with Diazomethanes	722
5.3.16.3	Method 3:	Plumbylimines from Triarylplumbyllithiums by Reactions with Chloroimines	722
5.3.16.4	Method 4:	Iminoplumbanes from Triorganoplumbanes by Reactions with Phenyl Isocyanide	723
5.3.16.5	Method 5:	Pyrazolylplumbanes from Alkynylplumbanes by 1,3-Dipolar Cycloaddition Reactions with Diazomethane	723
5.3.16.6	Method 6:	5-(Trimethylplumbyl)pyrazoles from Ethyl Diazo(trimethyl)-plumbylacetate by 1,3-Dipolar Cycloaddition Reactions with Alkynes and Alkenes	724
5.3.17	Product Subclass 17: 1- or 2-Alkoxy- and 1- or 2-(Alkylsulfanyl) and 1- or 2-Aminoalkenyl(triorgano)plumbanes P. A. C. Eagle		
5.3.17	Product Subclass 17: 1- or 2-Alkoxy- and 1- or 2-(Alkylsulfanyl) and 1- or 2-Aminoalkenyl(triorgano)plumbanes		
		Synthesis of Product Subclass 17	727
5.3.17.1	Method 1:	1-Alkoxy- and 1-(Alkylsulfanyl)alkenyl(triorgano)plumbanes from (Triethylplumbyl)metals by Addition to Alkynyl Ethers and Alkylsulfanylethyne	727
5.3.17.2	Method 2:	1-Alkoxyethyl-1-vinylplumbanes from Trimethyl[1-(trimethylplumbyl)vinyl]plumbanes	727
5.3.17.3	Method 3:	2-Aminovinylplumbanes from Isocyanates and Alkynyl(trialkyl)plumbanes	728

5.3.18	Product Subclass 18: 1-Halo-, 1-Alkoxy-, 1-Hydroxy-, and 1-Aminoalkylplumbanes P. A. C. Eagle	
5.3.18	Product Subclass 18: 1-Halo-, 1-Alkoxy-, 1-Hydroxy-, and 1-Aminoalkylplumbanes	731
	Synthesis of Product Subclass 18	731
5.3.18.1	Method 1: Perfluoroalkyltriorganoplumbanes from Triaryl- or Trialkylplumbyl Derivatives by Reactions with Bis(perfluoroalkyl)cadmium Adducts	731
5.3.18.2	Method 2: Triaryl(trihalomethyl)plumbanes from Triarylplumbyl Derivatives by Reactions with Trihaloacetyl Compounds	733
5.3.18.3	Method 3: Alkyl(perfluoroalkyl)plumbanes from Tetraalkylplumbanes by Radical Substitutions with Perfluoroalkyl Halides	734
5.3.18.4	Method 4: Perfluoroalkylplumbanes from Tetraaryl- and Tetraalkylplumbanes by Radical Exchange with Perfluoroalkylmetal Derivatives	734
5.3.18.4.1	Variation 1: From Tetraalkylplumbanes by Reactions with Perfluoroalkylmercury Compounds	734
5.3.18.4.2	Variation 2: From Tetraarylplumbanes by Reactions with Perfluoroalkylstannanes	735
5.3.18.5	Method 5: Trialkyl(trihalomethyl)- or Triaryl(halomethyl)plumbanes from Triorganolead Alkoxides and Haloforms	735
5.3.18.6	Method 6: Triaryl(trichloromethyl)plumbanes and Triaryl(dichloromethyl)-plumbanes from (Triarylplumbyl)metals by Reactions with Halomethanes	736
5.3.18.7	Method 7: Triaryl(1,1-dichloroalkyl)plumbanes from [(Triaryl)(dichloro)plumbyl)methyl]lithiums by Reactions with Electrophiles	736
5.3.18.8	Method 8: Bromomethyl(triphenyl)plumbane from [(Triphenylplumbyl)-methyl]lithium and 1,2-Dibromoethane	737
5.3.18.9	Method 9: (1-Haloalkyl)triorganoplumbanes from Triorganolead Halides by Reactions with (1-Haloalkyl)lithiums or the Simmons–Smith Reagent	737
5.3.18.10	Method 10: (1-Haloalkyl)plumbanes by Miscellaneous Procedures	739
5.3.18.11	Method 11: (1-Alkoxyalkyl)(trialkyl)plumbanes from (Trialkylplumbyl)lithiums and 1-Chloroalkyl Ethers	739
5.3.18.12	Method 12: (1-Alkoxyalkyl)triorganoplumbanes from Triorganolead Halides and Phenyl (Triphenylplumbyl)methyl Sulfide from Chlorotriphenylplumbane	739
	Applications of Product Subclass 18 in Organic Synthesis	740
5.3.18.13	Method 13: Applications of 1-Alkoxyalkyl(trialkyl)plumbanes in the Diastereoselective Synthesis of 1,2-Diols and Cyclic Ethers ..	740

5.3.19	Product Subclass 19: Alkynylplumbanes		
	P. A. C. Eagle		
5.3.19	Product Subclass 19: Alkynylplumbanes		745
	Synthesis of Product Subclass 19		745
5.3.19.1	Method 1:	Alkynylplumbanes from (Trialkylplumbyl)sodiums and 1-Haloalkynes	745
5.3.19.2	Method 2:	Alkynylplumbanes and Alkynyldiplumbanes from Trialkyl- and Triarylhaloplumbanes and Alkynylmetals	746
5.3.19.3	Method 3:	Alkynylplumbanes or Alkynyldiplumbanes from Trialkyl- or Triarylhaloplumbanes and Alkynylsodiums	746
5.3.19.4	Method 4:	Tetraalkynylplumbanes from Lead(IV) Salts and Alkynylmetals	748
5.3.19.5	Method 5:	Alkynylplumbanes from Trialkyllead or Triaryllead Hydroxides, Silazides, or Alkoxides by Condensation with Alkynes	748
5.3.19.6	Method 6:	Alkynylplumbanes or Alkynyldiplumbanes from Triaryllead Alkynoates by Decarboxylation	749
5.3.20	Product Subclass 20: Allenylplumbanes		
	P. A. C. Eagle		
5.3.20	Product Subclass 20: Allenylplumbanes		751
	Synthesis of Product Subclass 20		751
5.3.20.1	Method 1:	Allenylplumbanes from (Triarylplumbyl)magnesium Bromide and 3-Haloalk-1-yne	751
5.3.20.2	Method 2:	Allenylplumbanes from Trialkylhaloplumbanes and Triarylhaloplumbanes and Propargylmagnesium Halides	752
5.3.21	Product Subclass 21: Arylplumbanes		
	P. A. C. Eagle		
5.3.21	Product Subclass 21: Arylplumbanes		755
	Synthesis of Product Subclass 21		755
5.3.21.1	Method 1:	Trialkyl(perfluoroaryl)plumbanes from Trialkylplumbyl Halides by Reactions with Bromo(fluoro)arenes and Triaminophosphines	755
5.3.21.2	Method 2:	Triaryl(perfluoroaryl)plumbanes from Triaryllead (Perfluoroaryl)carboxylates by Decarboxylation	756
5.3.21.3	Method 3:	Tetraarylplumbanes from Hexaaryldiplumbanes by Disproportionation	756
5.3.21.4	Method 4:	Trialkyl(aryl)plumbanes from (Trialkylplumbyl)sodiums by Reaction with Aryl Halides	757
5.3.21.5	Method 5:	Nonsymmetrical Tetraarylplumbanes from Triaryllead Halides by Reactions with Arylmetals	757
5.3.21.6	Method 6:	Alkyl(aryl)plumbanes from Alkyllead Halides by Reactions with Arylmetals	758

5.3.21.7	Method 7:	Arylalkylplumbanes from Lead Salts by Reactions with Arylmetals and Alkyl Halides	759
5.3.21.8	Method 8:	Symmetrical Tetraarylplumbanes from Lead Salts by Reactions with Aryltrifluorosilanes	760
5.3.21.9	Method 9:	Symmetrical Tetraarylplumbanes from Lead Salts by Reactions with Arylmetals and Aryl Halides	760
5.3.21.10	Method 10:	Tetra(nitroaryl)plumbanes from Di(nitroaryl)plumbyl Halides and Hydrazine	761
5.3.22	Product Subclass 22: Vinylplumbanes		
	P. A. C. Eagle		
5.3.22	Product Subclass 22: Vinylplumbanes		763
	Synthesis of Product Subclass 22		763
5.3.22.1	Method 1:	Tetravinylplumbanes from Lead Chlorides or Metal Hexachloroplumbates by Reactions with Vinylmagnesium Halides	763
5.3.22.2	Method 2:	Vinylplumbanes from Trialkyl- or Triarylplumbylmetals by Reactions with Haloalkenes	764
5.3.22.3	Method 3:	Vinylplumbanes from Alkyl- or Aryllead Halides and Vinylmetals	765
5.3.22.4	Method 4:	Alkyl(trivinyl)plumbanes from Lead(II) Chloride by Reactions with Vinylmagnesium Halides and Haloalkanes	765
5.3.22.5	Method 5:	Vinylplumbanes from Trialkyllead Salts and Alkynes	766
5.3.22.6	Method 6:	[(1-Hydroxyalkyl)vinyl]plumbanes from [1-(Triorgano-plumbyl)ethenyl]lithiums and Carbonyl Compounds	767
5.3.22.7	Additional Methods		767
5.3.23	Product Subclass 23: Benzylplumbanes		
	P. A. C. Eagle		
5.3.23	Product Subclass 23: Benzylplumbanes		769
	Synthesis of Product Subclass 23		769
5.3.23.1	Method 1:	Benzylplumbanes from (Triorganoplumbyl)metals and Benzyl Halides	769
5.3.23.2	Method 2:	Benzylplumbanes from Halotriorganoplumbanes and Benzylmetals	770
5.3.23.3	Method 3:	Tetrabenzylplumbanes from Lead(II) Chloride and Benzylmagnesium Halides	771
5.3.23.4	Method 4:	Benzylplumbanes from Lead(II) Chloride, Arylmagnesium Bromides, and Benzyl Halides	771

5.3.24	Product Subclass 24: Allylplumbanes P. A. C. Eagle	
5.3.24	Product Subclass 24: Allylplumbanes	773
	Synthesis of Product Subclass 24	773
5.3.24.1	Method 1: Allyl(triorgano)plumbanes from Grignard and Analogous Reagents	773
5.3.24.1.1	Variation 1: From (Triorganoplumbyl)metals and Allyl Halides	773
5.3.24.1.2	Variation 2: From Triorganolead Halides or Hydroxides by Reactions with Allylmagnesium Halides	774
5.3.24.1.3	Variation 3: From Lead(II) Chloride, Grignard Reagents, and Allyl Halides ·	775
5.3.24.2	Additional Methods	776
5.3.25	Product Subclass 25: Alkylplumbanes P. A. C. Eagle	
5.3.25	Product Subclass 25: Alkylplumbanes	779
	Synthesis of Product Subclass 25	779
5.3.25.1	Method 1: Nonsymmetrical Tetraalkylplumbanes and Alkyl(aryl)-plumbanes from (Triorganoplumbyl)metals and Electrophiles	779
5.3.25.2	Method 2: Nonsymmetrical Tetraalkylplumbanes and Alkyl(aryl)-plumbanes from Organolead Halides and Metal Alkyls	780
5.3.25.3	Method 3: Alkyl(triaryl)plumbanes from [(Triarylplumbyl)methyl]lithiums and Electrophiles	781
5.3.25.4	Method 4: Alkylplumbanes from Lead Salts and Metal Alkyls	781
5.3.25.4.1	Variation 1: From Alkali Metal Alkylboronates and Aluminates	782
5.3.25.4.2	Variation 2: From Lead Dihalides, Metal Alkyls, and Alkyl Halides	782
5.3.25.5	Method 5: Tetraalkylplumbanes from Lead, Alkyl Halides, and Reducing Agents	783
5.3.25.6	Method 6: Synthesis of Tetraalkylplumbanes by Electrolysis	784
5.3.25.6.1	Variation 1: From Metal Tetraalkylborates or Tetraalkylaluminates	784
5.3.25.6.2	Variation 2: Electrolysis of Alkylmagnesium Halides	785
5.3.25.6.3	Variation 3: Electrolysis of Alkyl Halides at a Zinc Cathode and a Lead Anode	786
5.3.25.6.4	Variation 4: Electrolysis of Alkyl Halides at a Lead Cathode	787
5.3.25.7	Method 7: Tetraalkylplumbanes from Hexaalkyldiplumbanes	787
5.3.25.8	Method 8: Nonsymmetrical Tetraalkylplumbanes from Symmetrical Tetraalkylplumbanes by Radical Redistribution	788
5.3.25.9	Method 9: Tetraalkylplumbanes by Miscellaneous Routes	788
	Applications of Product Subclass 25 in Organic Synthesis	789
5.3.25.10	Method 10: Application of Tetraalkylplumbanes in the Alkylation of Aldehydes	789
