Introduction

- Organization of this book

- Preparing for the exam

- Microsoft certifications

- Quick access to online references

- Errata, updates & book support

- Stay in touch

Chapter 1 Describe cloud computing

- Skill 1.1: Describe cloud computing

 - Cloud computing

 - Shared responsibility model

 - Cloud models

 - The consumption-based model

 - Comparing cloud models

- Skill 1.2: Describe the benefit of using cloud services

 - High availability and scalability

 - Reliability and predictability

Table of Contents

Security and governance

Manageability in the cloud

Skill 1.3: Describe cloud service types

Infrastructure-as-a-Service (IaaS)

Platform-as-a-Service (PaaS)

Software-as-a-Service (SaaS)

Use cases for each cloud service type

Thought experiment

Thought experiment answers

Chapter summary

Chapter 2 Describe Azure architecture and services

Skill 2.1: Describe the core architectural components of Azure

Azure regions, regional pairs, and sovereign regions

Availability zones

Azure datacenters

Azure resources and resource groups

Azure subscriptions

Management groups

Hierarchy of resource groups, subscriptions, and management groups

Skill 2.2: Describe Azure compute and networking services

Compute types

Options for Azure virtual machines

Resources required for virtual machines

Application hosting options

Virtual networking

Skill 2.3: Describe Azure Storage services

Azure Storage services

Storage tiers

Redundancy options

Table of Contents

Storage accounts and storage types
Moving files to and from Azure Storage
Migrating to Azure

Skill 2.4: Describe Azure identity, access, and security

Directory services in Azure
Authentication methods in Azure
External identities and guest access
Azure AD Conditional Access
Role-based access control (RBAC)
Defense in depth and Zero-trust
Microsoft Defender for Cloud

Thought experiment

Governing VMs and keeping them available
Minimizing expenses for small workloads
Fault-tolerant VMs
Cost-effective app usage
Fast and easy web app management
Connecting VNets and DNS management
Storage migration, security, and governance
Effective and secure collaboration with resources

Thought experiment answers

Governing VMs and keeping them available
Minimizing expenses for small workloads
Fault-tolerant VMs
Cost-effective app usage
Fast and easy web app management
Connecting VNets and DNS management
Storage migration, security, and governance
Effective and secure collaboration with resources

Table of Contents

Chapter summary

Chapter 3 Describe Azure management and governance

Skill 3.1: Describe cost management in Azure

Factors that can affect costs

Reducing Azure costs

Pricing calculator and Total Cost of Ownership (TCO) calculator

Total Cost of Ownership calculator

Azure Cost Management and Billing

Tags

Skill 3.2: Describe features and tools in Azure for governance and compliance

Azure Blueprints

Azure Policy

Resource locks

Service Trust Portal

Skill 3.3: Describe features and tools for managing and deploying Azure resources

Azure portal

Azure PowerShell

Azure command-line interface (CLI)

Azure Cloud Shell

Azure Arc

Azure Resource Manager (ARM) and ARM templates

Skill 3.4: Describe monitoring tools in Azure

Azure Advisor

Azure Service Health

Azure Monitor

Thought experiment

Forecasting expenses

Table of Contents

Categorizing expenses

Applying governance to resources

Preventing the deletion of resources

Effective deployment of Azure resources

Monitoring application performance

Reporting on the health of resources

Thought experiment answers

Forecasting expenses

Categorizing expenses

Applying governance to resources

Preventing the deletion of resources

Effective deployment of Azure resources

Monitoring application performance

Reporting on the health of resources
