Organic Chemistry, Global Edition

Table of Contents

- Cover
- Title Page
- Copyright
- About the Authors
- Brief Contents
- Contents
- About the Authors
- Preface
- The Keys to Organic Chemistry
- Principles, Preparation, and Problem Solving
- The Keys to Organic Chemistry
- Principles, Preparation, and Problem Solving
- Resources Available Online
- Acknowledgments
- Global Edition Acknowledgments
- Chapter 1. Structure And Bonding
 - 1-1 The Origins of Organic Chemistry
 - 1-2 Principles of Atomic Structure
 - 1-3 Bond Formation: The Octet Rule
 - 1-4 Lewis Structures
 - 1-5 Multiple Bonding
 - Summary: Common Bonding Patterns (Uncharged)
 - 1-6 Electronegativity and Bond Polarity
 - 1-7 Formal Charges
 - Summary: Common Bonding Patterns in Organic Compounds and Ions
 - 1-8 Ionic Structures
 - 1-9 Resonance
 - Problem-Solving Strategy: Drawing And Evaluating Resonance Forms

Table of Contents

- 1-10 Structural Formulas
- 1-11 Molecular Formulas and Empirical Formulas
- 1-12 Wave Properties of Electrons in Orbitals
- 1-13 Molecular Orbitals
- 1-14 Pi Bonding
- 1-15 Hybridization and Molecular Shapes
- 1-16 Drawing Three-Dimensional Molecules
- 1-17 General Rules of Hybridization and Geometry
 - Summary: Hybridization and Geometry
- 1-18 Bond Rotation
- 1-19 Isomerism
 - Essential Terms
 - Study Problems

Chapter 2. Acids And Bases; Functional Groups

- 2-1 Polarity of Bonds and Molecules
- 2-2 Intermolecular Forces
- 2-3 Polarity Effects on Solubilities
- 2-4 Arrhenius Acids and Bases
- 2-5 BrønstedLowry Acids and Bases
- 2-6 Strengths of Acids and Bases
- 2-7 Equilibrium Positions of AcidBase Reactions
 - Problem-Solving Strategy: Predicting AcidBase Equilibrium Positions
- 2-8 Solvent Effects on Acidity and Basicity
 - Summary: Acidity and Basicity Limitations in Common Solvents
- 2-9 Effects of Size and Electronegativity on Acidity
- 2-10 Inductive Effects on Acidity
- 2-11 Hybridization Effects on Acidity
- 2-12 Resonance Effects on Acidity and Basicity
- 2-13 Lewis Acids and Bases
- 2-14 The Curved-Arrow Formalism
- 2-15 Hydrocarbons
- 2-16 Functional Groups with Oxygen
- 2-17 Functional Groups with Nitrogen
 - Essential Terms

Table of Contents

Study Problems

Chapter 3. Structure And Stereochemistry Of Alkanes

3-1 Classification of Hydrocarbons (Review)

3-2 Molecular Formulas of Alkanes

3-3 Nomenclature of Alkanes

 Summary: Rules for Naming Alkanes

3-4 Physical Properties of Alkanes

3-5 Uses and Sources of Alkanes

3-6 Reactions of Alkanes

3-7 Structure and Conformations of Alkanes

3-8 Conformations of Butane

3-9 Conformations of Higher Alkanes

3-10 Cycloalkanes

3-11 Cis-trans Isomerism in Cycloalkanes

3-12 Stabilities of Cycloalkanes; Ring Strain

3-13 Cyclohexane Conformations

 Problem-Solving Strategy: Drawing Chair Conformations

3-14 Conformations of Monosubstituted Cyclohexanes

3-15 Conformations of Disubstituted Cyclohexanes

 Problem-Solving Strategy: Recognizing Cis and Trans Isomers

3-16 Bicyclic Molecules

 Essential Terms

 Study Problems

Chapter 4. The Study Of Chemical Reactions

4-1 Introduction

4-2 Chlorination of Methane

4-3 The Free-Radical Chain Reaction

4-4 Equilibrium Constants and Free Energy

4-5 Enthalpy and Entropy

4-6 Bond-Dissociation Enthalpies

4-7 Enthalpy Changes in Chlorination

4-8 Kinetics and the Rate Equation

4-9 Activation Energy and the Temperature Dependence of Rates

4-10 Transition States

Pearson

Table of Contents

- 4-11 Rates of Multistep Reactions
- 4-12 Temperature Dependence of Halogenation
- 4-13 Selectivity in Halogenation
- 4-14 Hammonds Postulate
 - Problem-Solving Strategy: Proposing Reaction Mechanisms
- 4-15 Radical Inhibitors
- 4-16 Reactive Intermediates
 - Summary: Reactive Intermediates
 - Essential Terms
 - Study Problems

Chapter 5. Stereochemistry

- 5-1 Introduction
- 5-2 Chirality
- 5-3 (R) and (S) Nomenclature of Asymmetric Carbon Atoms
- 5-4 Optical Activity
- 5-5 Biological Discrimination of Enantiomers
- 5-6 Racemic Mixtures
- 5-7 Enantiomeric Excess and Optical Purity
- 5-8 Chirality of Conformationally Mobile Systems
- 5-9 Chiral Compounds Without Asymmetric Atoms
- 5-10 Fischer Projections
 - Summary: Fischer Projections and Their Use
- 5-11 Diastereomers
 - Summary: Types of Isomers
- 5-12 Stereochemistry of Molecules with Two or More Asymmetric Carbons
- 5-13 Meso Compounds
- 5-14 Absolute and Relative Configuration
- 5-15 Physical Properties of Diastereomers
- 5-16 Resolution of Enantiomers
 - Essential Terms
 - Study Problems

Chapter 6. Alkyl Halides; Nucleophilic Substitution

- 6-1 Introduction
- 6-2 Nomenclature of Alkyl Halides

Table of Contents

- 6-3 Common Uses of Alkyl Halides
- 6-4 Structure of Alkyl Halides
- 6-5 Physical Properties of Alkyl Halides
- 6-6 Preparation of Alkyl Halides
 - Summary: Methods for Preparing Alkyl Halides
- 6-7 Reactions of Alkyl Halides: Substitution and Elimination
- 6-8 Bimolecular Nucleophilic Substitution: The SN2 Reaction
- 6-9 Generality of the SN2 Reaction
 - Summary: SN2 Reactions of Alkyl Halides
- 6-10 Factors Affecting SN2 Reactions: Strength of the Nucleophile
 - Summary: Trends in Nucleophilicity
- 6-11 Reactivity of the Substrate in SN2 Reactions
- 6-12 Stereochemistry of the SN2 Reaction
- 6-13 Unimolecular Nucleophilic Substitution: The SN1 Reaction
- 6-14 Stereochemistry of the SN1 Reaction
- 6-15 Rearrangements in SN1 Reactions
- 6-16 Comparison of SN1 and SN2 Reactions
 - Summary: Nucleophilic Substitutions
 - Summary: Reactions of Alkyl Halides
 - Essential Terms
 - Study Problems

Chapter 7. Structure And Synthesis Of Alkenes; Elimination

- 7-1 Introduction
- 7-2 The Orbital Description of the Alkene Double Bond
- 7-3 Elements of Unsaturation
- 7-4 Nomenclature of Alkenes
- 7-5 Nomenclature of Cis-Trans Isomers
 - Summary: Rules for Naming Alkenes
- 7-6 Commercial Importance of Alkenes
- 7-7 Physical Properties of Alkenes
- 7-8 Stability of Alkenes
- 7-9 Formation of Alkenes by Dehydrohalogenation of Alkyl Halides
- 7-10 Unimolecular Elimination: The E1 Reaction
 - Summary: Carbocation Reactions

Table of Contents

- 7-11 Positional Orientation of Elimination: Zaitsev's Rule
- 7-12 Bimolecular Elimination: The E2 Reaction
- 7-13 Bulky Bases in E2 Eliminations; Hofmann Orientation
- 7-14 Stereochemistry of the E2 Reaction
- 7-15 E2 Reactions in Cyclohexane Systems
- 7-16 Comparison of E1 and E2 Elimination Mechanisms
 - Summary: Elimination Reactions
- 7-17 Competition Between Substitutions and Eliminations
 - Summary: Substitution and Elimination Reactions of Alkyl Halides
 - Problem-Solving Strategy: Predicting Substitutions And Eliminations
- 7-18 Alkene Synthesis by Dehydration of Alcohols
- 7-19 Alkene Synthesis by High-Temperature Industrial Methods
 - Problem-Solving Strategy: Proposing Reaction Mechanisms
 - Summary: Methods for Synthesis of Alkenes
 - Essential Terms
 - Study Problems

Chapter 8. Reactions Of Alkenes

- 8-1 Reactivity of the Carbon-Carbon Double Bond
- 8-2 Electrophilic Addition to Alkenes
- 8-3 Addition of Hydrogen Halides to Alkenes
- 8-4 Addition of Water: Hydration of Alkenes
- 8-5 Hydration by Oxymercuration-Demercuration
- 8-6 Alkoxymercuration-Demercuration
- 8-7 Hydroboration of Alkenes
- 8-8 Addition of Halogens to Alkenes
- 8-9 Formation of Halohydrins
- 8-10 Catalytic Hydrogenation of Alkenes
- 8-11 Addition of Carbenes to Alkenes
- 8-12 Epoxidation of Alkenes
- 8-13 Acid-Catalyzed Opening of Epoxides
- 8-14 Syn Dihydroxylation of Alkenes
- 8-15 Oxidative Cleavage of Alkenes
- 8-16 Polymerization of Alkenes
- 8-17 Olefin Metathesis

Table of Contents

- Problem-Solving Strategy: Organic Synthesis
- Summary: Reactions of Alkenes
- Summary: Electrophilic Additions to Alkenes
- Summary: Oxidation and Cyclopropanation Reactions of Alkenes
- Essential Terms
- Study Problems

Chapter 9. Alkynes

- 9-1 Introduction
- 9-2 Nomenclature of Alkynes
- 9-3 Physical Properties of Alkynes
- 9-4 Commercial Importance of Alkynes
- 9-5 Electronic Structure of Alkynes
- 9-6 Acidity of Alkynes; Formation of Acetylide Ions
- 9-7 Synthesis of Alkynes from Acetylides
- 9-8 Synthesis of Alkynes by Elimination Reactions
 - Summary: Syntheses of Alkynes
- 9-9 Addition Reactions of Alkynes
- 9-10 Oxidation of Alkynes
 - Problem-Solving Strategy: Multistep Synthesis
 - Summary: Reactions of Alkynes
 - Summary: Reactions of Terminal Alkynes
 - Essential Terms
 - Study Problems

Chapter 10. Structure And Synthesis Of Alcohols

- 10-1 Introduction
- 10-2 Structure and Classification of Alcohols
- 10-3 Nomenclature of Alcohols and Phenols
- 10-4 Physical Properties of Alcohols
- 10-5 Commercially Important Alcohols
- 10-6 Acidity of Alcohols and Phenols
- 10-7 Synthesis of Alcohols: Introduction and Review
 - Summary: Previous Alcohol Syntheses
- 10-8 Organometallic Reagents for Alcohol Synthesis
- 10-9 Reactions of Organometallic Compounds

Table of Contents

Summary: Grignard Reactions

10-10 Side Reactions of Organometallic Reagents: Reduction of Alkyl Halides

10-11 Reduction of the Carbonyl Group: Synthesis of 1° and 2° Alcohols

Summary: Reactions of LiAlH₄ and NaBH₄

Summary: Alcohol Syntheses by Nucleophilic Additions to Carbonyl Groups

10-12 Thiols (Mercaptans)

Summary: Synthesis of Alcohols from Carbonyl Compounds

Essential Terms

Study Problems

Chapter 11. Reactions Of Alcohols

11-1 Oxidation States of Alcohols and Related Functional Groups

11-2 Oxidation of Alcohols

11-3 Additional Methods for Oxidizing Alcohols

11-4 Biological Oxidation of Alcohols

11-5 Alcohols as Nucleophiles and Electrophiles; Formation of Tosylates

Summary: SN₂ Reactions of Tosylate Esters

11-6 Reduction of Alcohols

11-7 Reactions of Alcohols with Hydrohalic Acids

11-8 Reactions of Alcohols with Phosphorus Halides

11-9 Reactions of Alcohols with Thionyl Chloride

11-10 Dehydration Reactions of Alcohols

Problem-Solving Strategy: Proposing Reaction Mechanisms

11-11 Unique Reactions of Diols

11-12 Esterification of Alcohols

11-13 Esters of Inorganic Acids

11-14 Reactions of Alkoxides

Problem-Solving Strategy: Multistep Synthesis

Summary: Reactions of Alcohols

Summary: Reactions of Alcohols: O-H Cleavage

Summary: Reactions of Alcohols: C-O Cleavage

Essential Terms

Study Problems

Chapter 12. Infrared Spectroscopy And Mass Spectrometry

12-1 Introduction

Table of Contents

- 12-2 The Electromagnetic Spectrum
- 12-3 The Infrared Region
- 12-4 Molecular Vibrations
- 12-5 IR-Active and IR-Inactive Vibrations
- 12-6 Measurement of the IR Spectrum
- 12-7 Infrared Spectroscopy of Hydrocarbons
- 12-8 Characteristic Absorptions of Alcohols and Amines
- 12-9 Characteristic Absorptions of Carbonyl Compounds
- 12-10 Characteristic Absorptions of C–N Bonds
- 12-11 Simplified Summary of IR Stretching Frequencies
- 12-12 Reading and Interpreting IR Spectra (Solved Problems)
- 12-13 Introduction to Mass Spectrometry
- 12-14 Determination of the Molecular Formula by Mass Spectrometry
- 12-15 Fragmentation Patterns in Mass Spectrometry
 - Summary: Common Fragmentation Patterns
 - Essential Terms
 - Study Problems

Chapter 13. Nuclear Magnetic Resonance Spectroscopy

- 13-1 Introduction
- 13-2 Theory of Nuclear Magnetic Resonance
- 13-3 Magnetic Shielding by Electrons
- 13-4 The NMR Spectrometer
- 13-5 The Chemical Shift
- 13-6 The Number of Signals
- 13-7 Areas of the Peaks
- 13-8 Spin-Spin Splitting
 - Problem-Solving Strategy: Drawing an NMR Spectrum
- 13-9 Complex Splitting
- 13-10 Stereochemical Nonequivalence of Protons
- 13-11 Time Dependence of NMR Spectroscopy
 - Problem-Solving Strategy: Interpreting Proton NMR Spectra
- 13-12 Carbon-13 NMR Spectroscopy
- 13-13 Interpreting Carbon NMR Spectra
- 13-14 Nuclear Magnetic Resonance Imaging

Table of Contents

Problem-Solving Strategy: Spectroscopy Problems

Essential Terms

Study Problems

Chapter 14. Ethers, Epoxides, And Thioethers

14-1 Introduction

14-2 Physical Properties of Ethers

14-3 Nomenclature of Ethers

14-4 Spectroscopy of Ethers

14-5 The Williamson Ether Synthesis

14-6 Synthesis of Ethers by AlkoxymercurationDemercuration

14-7 Industrial Synthesis: Bimolecular Condensation of Alcohols

Summary: Syntheses of Ethers (Review)

14-8 Cleavage of Ethers by HBr and HI

14-9 Autoxidation of Ethers

Summary: Reactions of Ethers

14-10 Thioethers (Sulfides) and Silyl Ethers

14-11 Synthesis of Epoxides

Summary: Epoxide Syntheses

14-12 Acid-Catalyzed Ring Opening of Epoxides

14-13 Base-Catalyzed Ring Opening of Epoxides

14-14 Orientation of Epoxide Ring Opening

Summary: Orientation of Epoxide Ring Opening

14-15 Reactions of Epoxides with Grignard and Organolithium Reagents

14-16 Epoxy Resins: The Advent of Modern Glues

Summary: Reactions of Epoxides

Essential Terms

Study Problems

Chapter 15. Conjugated Systems, Orbital Symmetry, And ultraviolet Spectroscopy

15-1 Introduction

15-2 Stabilities of Dienes

15-3 Molecular Orbital Picture of a Conjugated System

15-4 Allylic Cations

15-5 1,2- and 1,4-Addition to Conjugated Dienes

Table of Contents

- 15-6 Kinetic Versus Thermodynamic Control in the Addition of HBr to Buta-1,3-diene
- 15-7 Allylic Radicals
- 15-8 Molecular Orbitals of the Allylic System
- 15-9 Electronic Configurations of the Allyl Radical, Cation, and Anion
- 15-10 SN₂ Displacement Reactions of Allylic Halides and Tosylates
- 15-11 The DielsAlder Reaction
- 15-12 The DielsAlder as an Example of a Pericyclic Reaction
- 15-13 Ultraviolet Absorption Spectroscopy
- 15-14 Colored Organic Compounds
- 15-15 UV-Visible Analysis in Biology and Medicine
 - Essential Terms
 - Study Problems

Chapter 16. Aromatic Compounds

- 16-1 Introduction: The Discovery of Benzene
- 16-2 The Structure and Properties of Benzene
- 16-3 The Molecular Orbitals of Benzene
- 16-4 The Molecular Orbital Picture of Cyclobutadiene
- 16-5 Aromatic, Antiaromatic, and Nonaromatic Compounds
- 16-6 Hückels Rule
- 16-7 Molecular Orbital Derivation of Hückels Rule
- 16-8 Aromatic Ions
- 16-9 Heterocyclic Aromatic Compounds
- 16-10 Polynuclear Aromatic Hydrocarbons
- 16-11 Aromatic Allotropes of Carbon
- 16-12 Fused Heterocyclic Compounds
- 16-13 Nomenclature of Benzene Derivatives
- 16-14 Physical Properties of Benzene and Its Derivatives
- 16-15 Spectroscopy of Aromatic Compounds
 - Essential Terms
 - Study Problems

Chapter 17. Reactions Of Aromatic Compounds

- 17-1 Electrophilic Aromatic Substitution
- 17-2 Halogenation of Benzene

Table of Contents

- 17-3 Nitration of Benzene
- 17-4 Sulfonation of Benzene
- 17-5 Nitration of Toluene: The Effect of Alkyl Substitution
- 17-6 Activating, Ortho, Para-Directing Substituents
 - Summary: Activating, Ortho, Para-Directors
- 17-7 Deactivating, Meta-Directing Substituents
 - Summary: Deactivating, Meta-Directors
- 17-8 Halogen Substituents: Deactivating, but Ortho, Para-Directing
 - Summary: Directing Effects of Substituents
- 17-9 Effects of Multiple Substituents on Electrophilic Aromatic Substitution
- 17-10 The FriedelCrafts Alkylation
- 17-11 The FriedelCrafts Acylation
 - Summary: Comparison of FriedelCrafts Alkylation and Acylation
- 17-12 Nucleophilic Aromatic Substitution
- 17-13 Aromatic Substitutions Using Organometallic Reagents
- 17-14 Addition Reactions of Benzene Derivatives
- 17-15 Side-Chain Reactions of Benzene Derivatives
- 17-16 Reactions of Phenols
 - Problem-Solving Strategy: Synthesis Using Electrophilic Aromatic Substitution
 - Summary: Reactions of Aromatic Compounds
 - Summary: Electrophilic Aromatic Substitution of Benzene
 - Summary: Substitutions of Aryl Halides
 - Essential Terms
 - Study Problems

Chapter 18. Ketones And Aldehydes

- 18-1 Carbonyl Compounds
- 18-2 Structure of the Carbonyl Group
- 18-3 Nomenclature of Ketones and Aldehydes
- 18-4 Physical Properties of Ketones and Aldehydes
- 18-5 Spectroscopy of Ketones and Aldehydes
- 18-6 Industrial Importance of Ketones and Aldehydes
- 18-7 Review of Syntheses of Ketones and Aldehydes
- 18-8 Synthesis of Ketones from Carboxylic Acids
- 18-9 Synthesis of Ketones and Aldehydes from Nitriles

Table of Contents

18-10 Synthesis of Aldehydes and Ketones from Acid Chlorides and Esters

 Summary: Syntheses of Ketones and Aldehydes

18-11 Reactions of Ketones and Aldehydes: Introduction to Nucleophilic Addition

18-12 Hydration of Ketones and Aldehydes

18-13 Formation of Cyanohydrins

18-14 Formation of Imines

18-15 Condensations with Hydroxylamine and Hydrazines

 Summary: Condensations of Amines with Ketones and Aldehydes

18-16 Formation of Acetals

 Problem-Solving Strategy: Proposing Reaction Mechanisms

18-17 Use of Acetals as Protecting Groups

18-18 The Wittig Reaction

18-19 Oxidation of Aldehydes

18-20 Reductions of Ketones and Aldehydes

 Summary: Reactions of Ketones and Aldehydes

 Summary: Nucleophilic Addition Reactions of Aldehydes and Ketones

 Essential Terms

 Study Problems

Chapter 19. Amines

19-1 Introduction

19-2 Nomenclature of Amines

19-3 Structure of Amines

19-4 Physical Properties of Amines

19-5 Basicity of Amines

19-6 Factors that Affect Amine Basicity

19-7 Salts of Amines

19-8 Spectroscopy of Amines

19-9 Reactions of Amines with Ketones and Aldehydes (Review)

19-10 Aromatic Substitution of Arylamines and Pyridine

19-11 Alkylation of Amines by Alkyl Halides

19-12 Acylation of Amines by Acid Chlorides

19-13 Formation of Sulfonamides

19-14 Amines as Leaving Groups: The Hofmann Elimination

19-15 Oxidation of Amines; The Cope Elimination

Table of Contents

- 19-16 Reactions of Amines with Nitrous Acid
- 19-17 Reactions of Arenediazonium Salts
 - Summary: Reactions of Amines
- 19-18 Synthesis of Amines by Reductive Amination
- 19-19 Synthesis of Amines by Acylation/Reduction
- 19-20 Syntheses Limited to Primary Amines
 - Summary: Synthesis of Amines
 - Essential Terms
 - Study Problems

Chapter 20. Carboxylic Acids

- 20-1 Introduction
- 20-2 Nomenclature of Carboxylic Acids
- 20-3 Structure and Physical Properties of Carboxylic Acids 1063
- 20-4 Acidity of Carboxylic Acids 1064
- 20-5 Salts of Carboxylic Acids
- 20-6 Commercial Sources of Carboxylic Acids
- 20-7 Spectroscopy of Carboxylic Acids
- 20-8 Synthesis of Carboxylic Acids
 - Summary: Syntheses of Carboxylic Acids
- 20-9 Reactions of Carboxylic Acids and Derivatives; Nucleophilic Acyl Substitution
- 20-10 Condensation of Acids with Alcohols: The Fischer Esterification
- 20-11 Esterification Using Diazomethane
- 20-12 Condensation of Acids with Amines: Direct Synthesis of Amides
- 20-13 Reduction of Carboxylic Acids
- 20-14 Alkylation of Carboxylic Acids to Form Ketones
- 20-15 Synthesis and Use of Acid Chlorides
 - Summary: Reactions of Carboxylic Acids
 - Essential Terms
 - Study Problems

Chapter 21. Carboxylic Acid Derivatives

- 21-1 Introduction
- 21-2 Structure and Nomenclature of Acid Derivatives
- 21-3 Physical Properties of Carboxylic Acid Derivatives
- 21-4 Spectroscopy of Carboxylic Acid Derivatives

Table of Contents

- 21-5 Interconversion of Acid Derivatives by Nucleophilic Acyl Substitution
- 21-6 Transesterification
 - Problem-Solving Strategy: Proposing Reaction Mechanisms
- 21-7 Hydrolysis of Carboxylic Acid Derivatives
- 21-8 Reduction of Acid Derivatives
- 21-9 Reactions of Acid Derivatives with Organometallic Reagents
- 21-10 Summary of the Chemistry of Acid Chlorides
- 21-11 Summary of the Chemistry of Anhydrides
- 21-12 Summary of the Chemistry of Esters
- 21-13 Summary of the Chemistry of Amides
- 21-14 Summary of the Chemistry of Nitriles
- 21-15 Thioesters
- 21-16 Esters and Amides of Carbonic Acid
 - Summary: Reactions of Acid Chlorides
 - Essential Terms
 - Study Problems

Chapter 22. Condensations And Alpha Substitutions Of Carbonyl Compounds

- 22-1 Introduction
- 22-2 Enols and Enolate Ions
- 22-3 Alkylation of Enolate Ions
- 22-4 Formation and Alkylation of Enamines
- 22-5 Alpha Halogenation of Ketones
- 22-6 Alpha Bromination of Acids: The HVZ Reaction
- 22-7 The Aldol Condensation of Ketones and Aldehydes
- 22-8 Dehydration of Aldol Products
- 22-9 Crossed Aldol Condensations
 - Problem-Solving Strategy: Proposing Reaction Mechanisms
- 22-10 Aldol Cyclizations
- 22-11 Planning Syntheses Using Aldol Condensations
- 22-12 The Claisen Ester Condensation
- 22-13 The Dieckmann Condensation: A Claisen Cyclization
- 22-14 Crossed Claisen Condensations
- 22-15 Syntheses Using β -Dicarbonyl Compounds

Table of Contents

- 22-16 The Malonic Ester Synthesis
- 22-17 The Acetoacetic Ester Synthesis
- 22-18 Conjugate Additions: The Michael Reaction
- 22-19 The Robinson Annulation
 - Problem-Solving Strategy: Proposing Reaction Mechanisms
 - Summary: Enolate Additions and Condensations
 - Summary: Reactions of Stabilized Carbanions
 - Essential Terms
 - Study Problems

Chapter 23. Carbohydrates And Nucleic Acids

- 23-1 Introduction
- 23-2 Classification of Carbohydrates
- 23-3 Monosaccharides
- 23-4 Cyclic Structures of Monosaccharides
- 23-5 Anomers of Monosaccharides; Mutarotation
- 23-6 Reactions of Monosaccharides: Reduction
- 23-7 Oxidation of Monosaccharides; Reducing Sugars
- 23-8 Nonreducing Sugars: Formation of Glycosides
- 23-9 Ether and Ester Formation
- 23-10 Chain Shortening: The Ruff Degradation
- 23-11 Chain Lengthening: The KilianiFischer Synthesis
 - Summary: Reactions of Sugars
- 23-12 Disaccharides
- 23-13 Polysaccharides
- 23-14 Nucleic Acids: Introduction
- 23-15 Ribonucleosides and Ribonucleotides
- 23-16 The Structures of RNA and DNA
- 23-17 Additional Functions of Nucleotides
 - Essential Terms
 - Study Problems

Chapter 24. Amino Acids, Peptides, And Proteins

- 24-1 Introduction
- 24-2 Structure and Stereochemistry of the α -Amino Acids
- 24-3 AcidBase Properties of Amino Acids

Table of Contents

- 24-4 Isoelectric Points and Electrophoresis
- 24-5 Synthesis of Amino Acids
 - Summary: Syntheses of Amino Acids
- 24-6 Resolution of Amino Acids
- 24-7 Reactions of Amino Acids
 - Summary: Reactions of Amino Acids
- 24-8 Structure and Nomenclature of Peptides and Proteins
- 24-9 Peptide Structure Determination
- 24-10 Laboratory Peptide Synthesis
- 24-11 Classification of Proteins
- 24-12 Levels of Protein Structure
- 24-13 Protein Denaturation
 - Essential Terms
 - Study Problems

Chapter 25. Lipids

- 25-1 Introduction
- 25-2 Waxes
- 25-3 Triglycerides
- 25-4 Saponification of Fats and Oils: Soaps and Detergents
- 25-5 Phospholipids
- 25-6 Steroids
- 25-7 Prostaglandins
- 25-8 Terpenes
 - Essential Terms
 - Study Problems

Chapter 26. Synthetic Polymers

- 26-1 Introduction
- 26-2 Chain-Growth Polymers
- 26-3 Stereochemistry of Polymers
- 26-4 Stereochemical Control of Polymerization: ZieglerNatta Catalysts
- 26-5 Natural and Synthetic Rubbers
- 26-6 Copolymers of Two or More Monomers
- 26-7 Step-Growth Polymers
- 26-8 Polymer Structure and Properties

Table of Contents

26-9 Recycling of Plastics

Essential Terms

Study Problems

Appendices

Appendix 1A. NMR: Spin-Spin Coupling Constants

Appendix 1B. NMR: Proton Chemical Shifts

Appendix 1C. NMR: ^{13}C Chemical Shifts in Organic Compounds

Appendix 2A. IR: Characteristic Infrared Group Frequencies

Appendix 2B. IR: Characteristic Infrared Absorptions of Functional Groups

Appendix 3A. Methods and Suggestions for Proposing Mechanisms

Appendix 3B. Suggestions for Developing Multistep Syntheses

Appendix 4. pK_a Values for Representative Compounds

Appendix 5. Summary of Organic Nomenclature

Answers to Selected Problems
