About the Authors

Introduction

- Who this book is for

- Conventions

 - Text conventions

 - Book features

- Acknowledgments

- Errata, updates, & book support

- Stay in touch

Chapter 1 Jumping into the cloud

- Getting started

 - Which plan is best for me?

- Picking a tenant name

 - Adding your domain name to your tenant

- Delegating access to your tenant

- Should I deploy in hybrid mode?

 - Exchange Hybrid

Table of Contents

SharePoint Hybrid

Is your Exchange environment ready?

Physical Exchange Server infrastructure

Mail routing

Mailboxes

Load balancers, network configurations, proxy servers, and firewall rules

Is your directory ready?

User readiness

Forests and domains

Stale users

Are your users ready?

UPN versus email address

Multi-forest environments

Office versions

Updates

Mailbox cleanup

Scheduling

The Global Address List

Replying to old emails

Whats next?

Chapter 2 Preparing your environment for the cloud

Setting up your subscription

Finding your tenant name

Assigning administrators

Configuring DNS, firewalls, and proxy servers

Public DNS records

Firewall configurations

Proxy servers

Preparing your directories

Table of Contents

Updating and deploying client software

- Installing Microsoft 365 Apps

- Activation

Synchronizing your users

Licensing your users

- Group-based licensing

- PowerShell licensing

- Manual license assignment

Whats next?

Chapter 3 Governance concepts

Identity and access management concepts

- Identity lifecycle

- Access management lifecycle

Governance for core workloads and features

- Azure Active Directory

- Exchange Online

- SharePoint Online

- Microsoft Teams

- Retention and data security

- eDiscovery

Governance controls

- Azure AD

- Exchange Online

- SharePoint Online

- Microsoft Teams

- Retention and data security

- eDiscovery

Whats next?

Table of Contents

Chapter 4 Compliance Manager

- Your organizations compliance score

 - Understanding improvement actions

 - Types of improvement actions

- Assigning permissions

- Conducting an assessment

 - Creating an assessment

 - Reviewing controls and actions

- Updating improvement actions

- Working with alerts

- Whats next?

Chapter 5 Secure Score

- Overview

- Assessing your security posture

- Prioritizing improvements in your security posture

- Reporting on your security posture

- Whats next?

Chapter 6 Labels, retention, and eDiscovery

- Data governance concepts

 - Sensitive information types

 - Classifiers

 - Labels

 - Data loss prevention

 - Retention

 - Records

- Data governance scenarios

 - Sensitivity labels

 - Retention labels

Table of Contents

Retention policies

Data loss prevention policies

Records search

Audit log search

Content search

eDiscovery

Whats next?

Chapter 7 Enterprise Mobility + Security

Overview

Identity and access management

Simplified access management and security

Multifactor authentication

Conditional access

Risk-based access

Advanced security reporting

Privileged Identity Management

Endpoint management

Mobile application management

Advanced Microsoft Office 365 data protection

Integrated PC management

Integrated on-premises management

Information protection

Persistent data protection

Intelligent data classification and labeling

Document tracking and revocation

Encryption key management

Identity-driven security

Microsoft Advanced Threat Analytics

Microsoft Cloud App Security

Table of Contents

Microsoft Defender for Identity

Whats next?

Chapter 8 Security features of Enterprise Mobility + Security

Securing identity

Microsoft Defender for Identity

Ensure your hardware is up to the task

Make sure the required connectivity is in place

Create the service account

Create your MDI instance

Monitoring your environment

Multifactor authentication

Conditional Access

Risk-based Conditional Access

Securing devices

Mobile Device Management

Mobile Application Management

Getting started with Intune

Whats next?

Chapter 9 Identity and authentication planning

Identity types

Synchronized identities

Cloud identities

Guest identities

User authentication

Password

Password policy

Identity federation

Whats next?

Table of Contents

Chapter 10 Installing AAD Connect

The Custom and Express installation experiences

Express installation

Custom installation

Selecting your authentication method

Password synchronization

Connecting to your directories

The UserPrincipalName and SourceAnchor attributes

Domain and OU filtering

Uniquely identifying your users

User matching

Important notes about GalSync and AAD Connect

SamAccountName and MailNickname

Custom join attribute selection

Source Anchor

Filter users and devices

Optional features

Group Writeback

Device Writeback

Directory Extension Attribute Sync

Finalizing the installation

Configuration complete

When should you start synchronizing?

Starting synchronization

Staging Mode your ace in the hole

Whats next?

Chapter 11 Azure AD Cloud Sync

Azure AD Cloud Sync

Table of Contents

Device synchronization and hybrid Azure AD Join

Pass-through authentication

Writeback

Directory extensions

Custom attribute flows and rule editing

SourceAnchor

Installing Azure AD Cloud Sync

Configuring Azure AD Cloud Sync

Deleting attribute mappings

Editing attribute mappings

Adding attribute mappings

Additional complex mapping examples

Decompressing

Using the Expression Builder

Provisioning a user (the validate step)

Notification and deletion protection

Enabling the configuration

Moving from Azure AD Connect to Azure AD Cloud Sync

Whats next?

Chapter 12 Advanced Azure AD scenarios

Migrations and the SourceAnchor

What does mS-DS-ConsistencyGuid support add to the configuration?

Performing migrations

UserPrincipalName

Email address and Exchange attributes

Group and user SIDs

Microsoft options for cross-forest migrations

Additional Azure AD Connect considerations

Password Writeback

Table of Contents

Requirements

Enabling Password Writeback

Precedence

Whats next?

Chapter 13 Azure Automation

Azure Automation concepts

Runbooks

Hybrid Runbook Worker

Authentication

Webhooks

Configuring authentication

Microsoft 365 service account

Azure Automation account

Creating a PowerShell runbook

Prepare an Exchange Online script

Creating a runbook with a script

Testing a PowerShell runbook

Publishing a runbook

Whats next?

Chapter 14 Exchange Online overview

Exchange Online deployment concepts

Recipients

Mail routing

Autodiscover

Migration and coexistence methodologies

Exchange and Active Directory on-premises environment

Active Directory versions and configuration

Autodiscover

Table of Contents

Certificates

Exchange versions, service packs, cumulative updates, and rollups

Exchange Best Practices Analyzer

IDFix

SSL offloading

Windows updates

Recipients

Contacts

Mailboxes

Mail-enabled users

Groups

Dynamic distribution groups

Microsoft 365 groups

Permissions and delegation

Public folders

Mail routing

Data loss prevention

Message encryption

Message hygiene

Networking

Bandwidth

Firewall

Load balancing

Proxy

DNS

Network security appliances

Things that don't migrate

Additional tools

Remote Connectivity Analyzer

Table of Contents

Exchange Deployment Assistant

Whats next?

Chapter 15 Exchange Online hybrid planning and deployment

Overview of Exchange Online hybrid features

Planning

General

Autodiscover

Azure Active Directory Connect

Cross-premises access and delegation

DNS

Email address policies and proxy addresses

Exchange Server Deployment Assistant

Exchange server versions

Free/busy and hybrid authentication

Message sizes

Mail transport

Networking

Public folders

Office 365 Hybrid Configuration Wizard

Overview

Prerequisites

Installing the Office 365 Hybrid Configuration Wizard

Running the Office 365 Hybrid Configuration Wizard

Rerunning the Hybrid Configuration Wizard

Troubleshooting

Mailbox provisioning

Decommissioning the hybrid environment

Whats next?

Table of Contents

Chapter 16 Migrating mailboxes to Exchange Online

- Migration endpoints

- Migration batches

 - Onboarding

 - Offboarding

- Troubleshooting

- Whats next?

Chapter 17 Migrating public folders to Exchange Online

- Exchange Online prerequisites

- Configuring hybrid public folders

 - On-premises public folders

- Public folder migration

 - Exchange 2007 or Exchange 2010

 - Exchange 2013 or later

- Post-migration configuration

 - Exchange Online public folder location

 - Exchange Online mail-enabled public folder routing

 - Exchange Online mail-enabled public folder external email address

 - Exchange on-premises mail routing domain

 - Exchange on-premises public folder migration complete

 - Apply Send-As permissions

 - Apply Grant-Send-On-Behalf-To permissions

- Troubleshooting

 - Active Directory Operation Failed. The Object Already Exists

 - Exceeded Maximum Number Of Corrupted Items

 - Subscription Couldnt Be Loaded

 - Make Sure Public Folder Access Is Locked

 - No Such Request Exists

Table of Contents

Public Folder /Path Could Not Be Mail-Enabled

Public Folders Could Not Be Mail-Enabled

Whats next?

Chapter 18 Managing Exchange Online

Exchange admin center

Recipient management

Mailboxes

Mail-enabled users

Contacts

Distribution groups

Restricting delivery

Transport

Connectors

Transport rules

Central mail transport

Manage IP filtering lists

Enhanced filtering for connectors

Message trace

Migration of transport settings between Office 365 tenants

Migration of transport rules collections

DKIM

Spam, phishing, and malware filtering

Malware filter

Phishing filter

Spam filter

Quarantine

Outbound spam

Blocked accounts

Organization management

Table of Contents

- Organization relationships

- Sharing policies

Hybrid management

- Provisioning remote mailboxes

- Updating domains in a hybrid configuration

Whats next?

Chapter 19 Microsoft Teams overview

Architecture

- Identity

- Files

- Messaging and chat services

- Connectors

- Voicemail

- Recording

- Calendars and meetings

- Contacts

- Other components

Architecture deep dive

- Microsoft 365 groups

- Teams

User interface

- Menu bar

- App bar

- List pane

- Main content area

- Exploring the App bar

Whats next?

Chapter 20 Meetings, webinars, and live events

Table of Contents

Meetings

- Types

Webinars

- Administration

Live events

- Live events policies

- Live events settings

- Integrated services

- Configuring Teams Live events with external production

Whats next?

Chapter 21 Phone system planning

Overview of Teams Phone concepts

- Teams Phone concepts and terminology

- Calling features

Choosing an architecture

- Calling Plans for Microsoft 365

- Direct Routing

- Operator Connect

Planning network requirements

- Network requirements

- Bandwidth requirements

- Ports

- Network endpoints

- Split-tunnel VPN

- Quality of Service

Best practices and additional network tools

- Verify all required outbound network ports

- Bypass encryption and other filtering devices

- Microsoft Teams Network Assessment Tool

Table of Contents

Network Planner for Teams

Microsoft 365 Network Connectivity Test

Call Quality Dashboard Report

Whats next?

Chapter 22 Phone System configuration

Prerequisites

Emergency dialing

Define networks

Configure Location Information Service

Configure emergency policies

Test the emergency location configuration

Phone numbers

Obtain phone numbers

Assign phone numbers

Communications credits

Teams voice policies

Calling restrictions

Calling policies

Call parking policies

Caller ID policies

Voicemail policies

Whats next?

Chapter 23 Phone System advanced features

Resource accounts

Microsoft Teams advanced calling feature resource accounts

Microsoft Teams Room resource accounts

Holidays

Call queues

Table of Contents

Configure call queue prerequisites

Configure a call queue

Voice-enabled channels

Auto attendants

Configure auto attendant prerequisites

Configure an auto attendant

Check auto attendant voicemail

Whats next?

Chapter 24 Managing Teams

Microsoft 365 Groups and Teams component architecture

Collaboration management

Access control planes

Channel controls

Troubleshooting

This link wont work for people outside your organization

We ran into an issue. Please try again later

Your organization does not allow collaboration with the domain of the user youre
inviting

Due to admin policy, you cant add external people to the channel

Whats next?

Chapter 25 SharePoint Online

SharePoint Online concepts

SharePoint Online capacities

Overall service limits

Individual service plan limits

SharePoint Online features

OneDrive for Business

Office Online

Table of Contents

- Delve
- Yammer
- Enterprise search
- SharePoint Store apps
- Business Connectivity Services

SharePoint Online hybrid

Whats next?

Chapter 26 SharePoint Online planning and deployment

Planning a modern site architecture

- Planning sites and hubs
- Planning navigation

Designing site collection structure

- Determining site taxonomy and topology
- Determining site users

Planning and configuring site and guest access

- How external sharing works
- Planning and configuring sharing and site access
- Planning security options

Whats next?

Chapter 27 SharePoint Online Hybrid configuration

Planning

- General
- OneDrive for Business
- Search
- Taxonomy
- App launcher
- Business-to-business extranet

Configuration

Table of Contents

Set up SharePoint services for hybrid integration

OneDrive for Business and Hybrid Sites

Hybrid search

Hybrid taxonomy

App launcher

Business-to-business extranet

Whats next?

Chapter 28 Migrating data to SharePoint Online

Inventorying data sources and mapping destinations

What data is being migrated?

Where should it go?

What cant be migrated?

Choosing the migration tools

Planning for requirements and prerequisites

SharePoint Online planning and prerequisites

Network planning and prerequisites

Scanning content

Generating an identity map

Scanning SharePoint content

Customizing the SMAT scanning process

Resolving blocking issues

Planning for content that cannot be migrated

Migrating data with SharePoint Migration Tool (SPMT)

Whats next?

Index

Chapter 29 SharePoint Online management
