Introduction to the Scaled Agile Framework (SAFe)

Part 1: The SAFe Foundation

- Lean-Agile Leaders

- Core Values

- Lean-Agile Mindset

- SAFe Principles Overview

- SAFe Implementation Roadmap Overview

- SAFe Program Consultant

Part 2: The SAFe Implementation Roadmap

- Reaching the Tipping Point

- Train Lean-Agile Change Agents

- Train Executives, Managers, and Leaders

- Create a Lean-Agile Center of Excellence

- Identify Value Streams and ARTs

Table of Contents

- Create the Implementation Plan
- Prepare for ART Launch
- Train Teams and Launch the ART
- Coach ART Execution
- Launch More ARTs and Value Streams
- Extend to the Portfolio
- Sustain and Improve

Part 3: The SAFe Principles

- Principle #1: Take an economic view
- Principle #2: Apply systems thinking
- Principle #3: Assume variability; preserve options
- Principle #4: Build incrementally with fast, integrated learning cycles
- Principle #5: Base milestones on objective evaluation of working systems
- Principle #6: Visualize and limit WIP, reduce batch sizes, and manage queue lengths
- Principle #7: Apply cadence, synchronize with cross-domain planning
- Principle #8: Unlock the intrinsic motivation of knowledge workers
- Principle #9: Decentralize decision-making

Part 4: The Team Level

- Team Level
- Agile Teams
- Dev Team
- Product Owner
- Scrum Master
- Built-In Quality
- ScrumXP
- Story
- Iterations
- Iteration Planning
- Iteration Goals
- Iteration Execution

Table of Contents

Iteration Review

Iteration Retrospective

Team Backlog

Team Kanban

Part 5: The Program Level

Introduction to the Program Level

Agile Release Train

Business Owners

Product and Solution Management

Release Train Engineer and Solution Train Engineer

System and Solution Architect/Engineering

Program and Solution Backlogs

Features and Capabilities

Enablers

Nonfunctional Requirements

Weighted Shortest Job First

Program Increment

Innovation and Planning Iteration

Develop on Cadence

Release on Demand

Architectural Runway

PI Planning

PI Objectives

System Demo

Inspect and Adapt

Program and Solution Kanban

DevOps

Continuous Delivery Pipeline

Continuous Exploration

Continuous Integration

Table of Contents

Continuous Deployment

Part 6: The Spanning Palette

Metrics

Shared Services

Communities of Practice

Milestones

Roadmap

Vision

System Team

Lean UX

Part 7: The Large Solution Level

Introduction to the Large Solution Level

Solution Train

Customer

Supplier

Economic Framework

Pre- and Post-PI Planning

Solution Demo

Solution

Solution Context

Solution Intent

Compliance

Model-Based Systems Engineering

Set-Based Design

Part 8: The Portfolio Level

Introduction to the Portfolio Level

Enterprise

Value Streams

Strategic Themes

Lean Budgets

Table of Contents

Epic

Epic Owners

Enterprise Architect

Lean Portfolio Management

Portfolio Backlog

Portfolio Kanban

Value Stream Coordination

Part 9: Advanced Topics

Agile Architecture

Agile Contracts

Agile HR with SAFe

CapEx and OpEx

Enterprise Backlog Structure and Management

Essential SAFe

Features and Components

Invitation-Based SAFe Implementation

Refactoring

SAFe Requirements Model

Six SAFe Practices for S-Sized Teams

Spikes

Test-First

The Role of PI Objectives

Part 10: Glossary

SAFe Glossary
