Introduction

- Organization of this book

- Microsoft certifications

- Quick access to online references

- Errata, updates, & book support

- Stay in touch

Chapter 1 Deploy and manage Active Directory Domain

Services in on-premises and cloud environments

Skill 1.1: Deploy and manage AD DS domain controllers

- Deploy and manage domain controllers on-premises

- Deploy and manage domain controllers in Azure

- Deploy read-only domain controllers (RODCs)

- Troubleshoot flexible single master operations (FSMO) roles

Skill 1.2 Configure and manage multi-site, multi-domain, and multi-forest environments

- Configure and manage forest and domain trusts

- Configure and manage AD DS sites

- Configure and manage AD DS replication

# **Table of Contents**

## **Skill 1.3: Create and manage AD DS security principals**

- Create and manage AD DS users and groups

- Manage users and groups in multi-domain and multi-forest scenarios

- Implement group managed service accounts (GMSAs)

- Join Windows Servers to AD DS, Azure AD DS, and Azure AD

## **Skill 1.4: Implement and manage hybrid identities**

- Implement Azure AD Connect

- Manage Azure AD Connect Synchronization

- Implement Azure AD Connect cloud sync

- Manage Azure AD DS

- Integrate Azure AD, AD DS, and Azure AD DS

- Manage Azure AD Connect Health

- Manage authentication in on-premises and hybrid environments

- Configure and manage AD DS passwords

## **Skill 1.5: Manage Windows Server by using domain-based Group Policies**

- Implement Group Policy in AD DS

- Implement Group Policy preferences in AD DS

- Implement Group Policy in Azure AD DS

## **Chapter summary**

## **Thought experiment**

## **Thought experiment answers**

# **Chapter 2 Manage Windows Servers and workloads in a hybrid environment**

## **Skill 2.1: Manage Windows Servers in a hybrid environment**

- Choose administration tools

- Deploy a WAC gateway server

- Configure a target machine for WAC

# **Table of Contents**

Manage Azure hybrid services with WAC

Configure PowerShell remoting

Configure CredSSP or Kerberos Delegation for second hop remoting

Configure Just Enough Administration for PowerShell remoting

## **Skill 2.2: Manage Windows Servers and workloads by using Azure Services**

Manage Windows Servers by using Azure Arc

Assign Azure Policy guest configuration

Deploy Azure services using the Azure VM extensions on non-Azure machines

Manage updates for Windows machines

Integrate Windows Servers with Log Analytics

Integrate Windows Servers with Microsoft Defender for Cloud

Manage IaaS VMs in Azure that run Windows Server

Create runbooks to automate tasks on target VMs

Implement Azure Automation for hybrid workloads

Implement Desired State Configuration to prevent configuration drift in IaaS machines

Chapter summary

Thought experiment

Thought experiment answers

## **Chapter 3 Manage virtual machines and containers**

### **Skill 3.1: Manage Hyper-V and guest virtual machines**

Virtual machine types

Manage VM using PowerShell remoting, PowerShell Direct, and HVC.exe

Enable VM Enhanced Session Mode

Configure nested virtualization

Configure VM memory

Configure integration services

Configure Discrete Device Assignment

Configure VM resource groups

# **Table of Contents**

- Configure VM CPU groups
- Configure hypervisor scheduling types
- Manage VM checkpoints
- Implement high availability for virtual machines
- Manage VHD and VHDX files
- Configure Hyper-V network adapter
- Configure NIC teaming
- Configure Hyper-V switch

## **Skill 3.2: Create and manage containers**

- Understand container concepts
- Manage Windows Server container images
- Manage container instances
- Configure container networking
- Create Windows Server container images

## **Skill 3.3: Manage Azure Virtual Machines that run Windows Server**

- Administer IaaS VMs
- Manage data disks
- Resize Azure VM
- Configure continuous delivery for an Azure VM
- Configure connections to VMs
- Manage Azure VM network configuration

## **Chapter summary**

## **Thought experiment**

## **Thought experiment answers**

## **Chapter 4 Implement and manage an on-premises and hybrid networking infrastructure**

## **Skill 4.1: Implement on-premises and hybrid name resolution**

- Integrate DNS with AD DS
- Create and manage zones and records

# **Table of Contents**

- Configure DNS forwarding/conditional forwarding
- Integrate Windows Server DNS with Azure DNS private zones
- Implement DNSSEC
- Manage Windows Server DNS

## **Skill 4.2: Manage IP addressing in on-premises and hybrid scenarios**

- Implement and manage IPAM
- Implement and configure the DHCP server role
- Resolve IP address issues in hybrid environments
- Create and manage scopes
- Create and manage IP reservations
- Implement DHCP high availability

## **Skill 4.3: Implement on-premises and hybrid network connectivity**

- Implement and manage the Remote Access role
- Implement and manage Azure Network Adapter
- Implement and manage Azure Extended Network
- Implement and manage Network Policy Server role
- Implement Web Application Proxy
- Implement Azure Relay
- Implement site-to-site VPN
- Azure ExpressRoute
- Implement Azure Virtual WAN
- Implement Azure AD Application Proxy
- Use Azure App Service Hybrid Connections

## **Chapter summary**

Thought experiment

Thought experiment answers

## **Chapter 5 Manage storage and file services**

### **Skill 5.1 Configure and manage Azure File Sync**

- Create Azure File Sync Service

# **Table of Contents**

Create sync groups

Create cloud endpoints

Register servers

Create server endpoints

Configure cloud tiering

Monitor File Sync

Migrate DFS to Azure File Sync

## **Skill 5.2 Configure and manage Windows Server File Shares**

Configure Windows Server File Share access

Configure file screens

Configure File Server Resource Manager quotas

Use additional FSRM functionality

Configure BranchCache

Implement and configure Distributed File System

## **Skill 5.3 Configure Windows Server Storage**

Configure disks and volumes

Configure and manage storage spaces

Configure and manage Storage Replica

Configure data deduplication

Configure SMB Direct

Configure Storage QoS

Configure filesystems

Chapter summary

Thought experiment

Thought experiment answers
