Contents at a Glance

Table of Contents

Hour 1: Coding Your First Project

Installing Roblox Studio

Lets Take a Tour

Opening the Output Window

Writing Your First Script

Error Messages

Leaving Yourself Comments

Hour 2: Properties and Variables

Object Hierarchy

Keywords

Properties

Finding Properties and Data Types

Creating Variables

Changing the Color Property

Instances

Hour 3: Creating and Using Functions

Table of Contents

Creating and Calling Functions

Understanding Scope

Using Events to Call Functions

Understanding Order and Placement

HOURL 4: Working with Parameters and Arguments

Giving Functions Information to Use

Working with Multiple Parameters and Arguments

Returning Values from Functions

Returning Multiple Values

Returning Nil

Dealing with Mismatched Arguments and Parameters

Working with Anonymous Functions

HOURL 5: Conditional Structures

if/then Statements

elseif

Logical Operators

else

HOURL 6: Debouncing and Debugging

Dont Destroy, Debounce

Figuring Out Where Things Go Wrong

HOURL 7: while Loops

Repeat Forever, while true do

Some Things to Keep in Mind

while Loops and Scope

HOURL 8: for Loops

How for Loops Work

Nested Loops

Table of Contents

Breaking Out of Loops

HOURL 9: Working with Arrays

What Are Arrays?

Adding Items Later

Getting Information from a Specific Index

Printing an Entire List with `ipairs()`

Folders and `ipairs()`

Finding a Value on the List and Printing the Index

Removing Values from an Array

Numeric for Loops and Arrays

HOURL 10: Working with Dictionaries

Intro to Dictionaries

Adding and Removing from Dictionaries

Removing Key-Value Pairs

Working with Dictionaries and Pairs

Returning Values from Tables

HOURL 11: Client Versus Server

Understanding the Client and the Server

Working with GUIs

Understanding RemoteFunctions

Using RemoteFunctions

HOURL 12: Remote Events: One-Way Communication

Remote Events: A One-Way Street

Communicating from the Server to All Clients

Communicating from the Client to the Server

Communicating from the Server to One Client

Communicating from Client to Client

Table of Contents

Hour 13: Using ModuleScripts

- Coding Things Just Once
- Placing ModuleScripts
- Understanding How ModuleScripts Work
- Naming ModuleScripts
- Adding Functions and Variables
- Understanding Scope in ModuleScripts
- Using Modules in Other Scripts
- Dont Repeat Yourself
- Dealing in Abstractions

Hour 14: Coding in 3D World Space

- Understanding X, Y, and Z Coordinates
- Refining Placement with CFrame Coordinates
- Offsetting CFrames
- Adding Rotations to CFrames
- Working with Models
- Understanding World Coordinates and Local Object Coordinates

Hour 15: Smoothly Animating Objects

- Understanding Tweens
- Setting TweenInfo Parameters
- Chaining Tweens Together

Hour 16: Solving Problems with Algorithms

- Defining Algorithms
- Sorting an Array
- Sorting in Descending Order
- Sorting a Dictionary
- Sorting by Multiple Pieces of Information

Table of Contents

Hour 17: Saving Data

- Enabling Data Stores

- Creating a Data Store

- Using Data in the Store

- Limiting the Number of Calls

- Protecting Your Data

- Saving Player Data

- Using UpdateAsync to Update a Data Store

Hour 18: Creating a Game Loop

- Setting Up Game Loops

- Working with BindableEvents

Hour 19: Monetization: One-Time Purchases

- Adding Passes to Your Experience

- Configuring the Pass

- Prompting In-Game Purchases

Hour 20: Object-Oriented Programming

- What Is OOP?

- Organizing Code and Projects

- Making a New Class

- Adding Class Properties

- Using Class Functions

Hour 21: Inheritance

- Setting Up Inheritance

- Inheriting Properties

- Working with Multiple Child Classes

- Inheriting Functions

- Understanding Polymorphism

Table of Contents

Calling Parent Functions

Hour 22: Raycasting

Setting Up the Function to Raycast

3D Math Trick: Getting the Direction

Setting Raycast Parameters

3D Math Trick: Limit Direction

Hour 23: Plopping Objects in an Experience: Part 1

Setting Up the Object

Creating a Plop Button

Tracking Mouse Movements

Previewing the Object

Hour 24: Plopping Objects in an Experience: Part 2

Detecting Mouse Input

Sending a Message to the Server

Getting the Message

Appendix A: Roblox Basics

Keywords

DataType Index

Operators

Naming Conventions

Animation Easing

Possible Solutions to Exercises
