Preface

About the Authors

Part One: Gathering and Exploring Data

Chapter 1. Statistics: The Art and Science of Learning From Data

1.1 Using Data to Answer Statistical Questions

1.2 Sample Versus Population

1.3 Organizing Data, Statistical Software, and the New Field of Data Science

Chapter Summary

Chapter Exercises

Chapter 2. Exploring Data With Graphs and Numerical Summaries

2.1 Different Types of Data

2.2 Graphical Summaries of Data

2.3 Measuring the Center of Quantitative Data

2.4 Measuring the Variability of Quantitative Data

2.5 Using Measures of Position to Describe Variability

2.6 Linear Transformations and Standardizing

2.7 Recognizing and Avoiding Misuses of Graphical Summaries

Chapter Summary

Chapter Exercises

Chapter 3. Exploring Relationships Between Two Variables

3.1 The Association Between Two Categorical Variables

3.2 The Relationship Between Two Quantitative Variables

3.3 Linear Regression: Predicting the Outcome of a Variable

Table of Contents

3.4 Cautions in Analyzing Associations

Chapter Summary

Chapter Exercises

Chapter 4. Gathering Data

4.1 Experimental and Observational Studies

4.2 Good and Poor Ways to Sample

4.3 Good and Poor Ways to Experiment

4.4 Other Ways to Conduct Experimental and Nonexperimental Studies

Chapter Summary

Chapter Exercises

Part Two: Probability, Probability Distributions, and Sampling Distributions

Chapter 5. Probability in Our Daily Lives

5.1 How Probability Quantifies Randomness

5.2 Finding Probabilities

5.3 Conditional Probability

5.4 Applying the Probability Rules

Chapter Summary

Chapter Exercises

Chapter 6. Random Variables and Probability Distributions

6.1 Summarizing Possible Outcomes and Their Probabilities

6.2 Probabilities for Bell-Shaped Distributions: The Normal Distribution

6.3 Probabilities When Each Observation Has Two Possible Outcomes: The Binomial Distribution

Chapter Summary

Chapter Exercises

Chapter 7. Sampling Distributions

7.1 How Sample Proportions Vary Around the Population Proportion

7.2 How Sample Means Vary Around the Population Mean

7.3 Using the Bootstrap to Find Sampling Distributions

Chapter Summary

Chapter Exercises

Part Three: Inferential Statistics

Chapter 8. Statistical Inference: Confidence Intervals

8.1 Point and Interval Estimates of Population Parameters

8.2 Confidence Interval for a Population Proportion

8.3 Confidence Interval for a Population Mean

Table of Contents

8.4 Bootstrap Confidence Intervals

Chapter Summary

Chapter Exercises

Chapter 9. Statistical Inference: Significance Tests About Hypotheses

9.1 Steps for Performing a Significance Test

9.2 Significance Test About a Proportion

9.3 Significance Test About a Mean

9.4 Decisions and Types of Errors in Significance Tests

9.5 Limitations of Significance Tests

9.6 The Likelihood of a Type II Error and the Power of a Test

Chapter Summary

Chapter Exercises

Chapter 10. Comparing Two Groups

10.1 Categorical Response: Comparing Two Proportions

10.2 Quantitative Response: Comparing Two Means

10.3 Comparing Two Groups With Bootstrap or Permutation Resampling

10.4 Analyzing Dependent Samples

10.5 Adjusting for the Effects of Other Variables

Chapter Summary

Chapter Exercises

Part Four: Extended Statistical Methods and Models for Analyzing Categorical and Quantitative Variables

Chapter 11. Categorical Data Analysis

11.1 Independence and Dependence (Association)

11.2 Testing Categorical Variables for Independence

11.3 Determining the Strength of the Association

11.4 Using Residuals to Reveal the Pattern of Association

11.5 Fishers Exact and Permutation Tests

Chapter Summary

Chapter Exercises

Chapter 12. Regression Analysis

12.1 The Linear Regression Model

12.2 Inference About Model Parameters and the Relationship

12.3 Describing the Strength of the Relationship

12.4 How the Data Vary Around the Regression Line

12.5 Exponential Regression: A Model for Nonlinearity

Table of Contents

Chapter Summary

Chapter Exercises

Chapter 13. Multiple Regression

13.1 Using Several Variables to Predict a Response

13.2 Extending the Correlation Coefficient and R^2 for Multiple Regression

13.3 Inferences Using Multiple Regression

13.4 Checking a Regression Model Using Residual Plots

13.5 Regression and Categorical Predictors

13.6 Modeling a Categorical Response: Logistic Regression

Chapter Summary

Chapter Exercises

Chapter 14. Comparing Groups: Analysis of Variance Methods

14.1 One-Way ANOVA: Comparing Several Means

14.2 Estimating Differences in Groups for a Single Factor

14.3 Two-Way ANOVA: Exploring Two Factors and Their Interaction

Chapter Summary

Chapter Exercises

Chapter 15. Nonparametric Statistics

15.1 Compare Two Groups by Ranking

15.2 Nonparametric Methods for Several Groups and for Dependent Samples

Chapter Summary

Chapter Exercises
