## Contributed Papers

|                                                                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Expressing Properties of Coalitional Ability under Resource Bounds . . . .<br><i>Natasha Alechina, Brian Logan, Nguyen Hoang Nga, and<br/>Abdur Rakib</i> | 1   |
| Dynamic Context Logic . . . . .<br><i>Guillaume Aucher, Davide Grossi, Andreas Herzig, and<br/>Emiliano Lorini</i>                                        | 15  |
| Toward a Dynamic Logic of Questions . . . . .<br><i>Johan van Benthem and Ștefan Minică</i>                                                               | 27  |
| A General Family of Preferential Belief Removal Operators . . . . .<br><i>Richard Booth, Thomas Meyer, and Chattrakul Sombattheera</i>                    | 42  |
| Computing Compliance . . . . .<br><i>Ivano Ciardelli, Irma Cornelisse, Jeroen Groenendijk, and<br/>Floris Roelofsen</i>                                   | 55  |
| Attributing Distributed Responsibility in Stit Logic . . . . .<br><i>Roberto Ciuni and Rosja Mastop</i>                                                   | 66  |
| Characterizations of Iterated Admissibility Based on PEGE . . . . .<br><i>Jiaying Cui, Meiyun Guo, and Xiaojia Tang</i>                                   | 76  |
| Can Doxastic Agents Learn? On the Temporal Structure of Learning . . .<br><i>Cédric Dégrement and Nina Gierasimczuk</i>                                   | 90  |
| Agreement Theorems in Dynamic-Epistemic Logic: Extended<br>Abstract . . . . .<br><i>Cédric Dégrement and Olivier Roy</i>                                  | 105 |
| Learning and Teaching as a Game: A Sabotage Approach . . . . .<br><i>Nina Gierasimczuk, Lena Kurzen, and<br/>Fernando R. Velázquez-Quesada</i>            | 119 |
| First-Order Logic Formalisation of Arrow's Theorem . . . . .<br><i>Umberto Grandi and Ulle Endriss</i>                                                    | 133 |
| Twelve Angry Men: A Study on the Fine-Grain of Announcements . . . .<br><i>Davide Grossi and Fernando R. Velázquez-Quesada</i>                            | 147 |
| Dynamic Testimonial Logic . . . . .<br><i>Wesley H. Holliday</i>                                                                                          | 161 |

|                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------|-----|
| From the Logical Point of View: The Chain Store Paradox Revisited . . .                                   | 180 |
| <i>Li Li, Robert C. Koons, and Jianjun Zhang</i>                                                          |     |
| A Cooperation Logic for Declaration Structures . . . . .                                                  | 189 |
| <i>Hu Liu</i>                                                                                             |     |
| Intentions and Assignments . . . . .                                                                      | 198 |
| <i>Emiliano Lorini, Mehdi Dastani,</i><br><i>Hans van Ditmarsch, Andreas Herzig, and John-Jules Meyer</i> |     |
| Epistemic Games in Modal Logic: Joint Actions, Knowledge and<br>Preferences All Together . . . . .        | 212 |
| <i>Emiliano Lorini, François Schwarzentruber, and Andreas Herzig</i>                                      |     |
| Dynamic Epistemic Logic of Finite Identification . . . . .                                                | 227 |
| <i>Minghui Ma</i>                                                                                         |     |
| An Epistemic Logic for Planning with Trials . . . . .                                                     | 238 |
| <i>Rajdeep Niyogi and R. Ramanujam</i>                                                                    |     |
| Obligations in a Responsible World . . . . .                                                              | 251 |
| <i>Loes Olde Loohuis</i>                                                                                  |     |
| Dynamic Epistemic Temporal Logic . . . . .                                                                | 263 |
| <i>Bryan Renne, Joshua Sack, and Audrey Yap</i>                                                           |     |
| Measurement-Theoretic Foundation of Preference-Based Dyadic<br>Deontic Logic . . . . .                    | 278 |
| <i>Satoru Suzuki</i>                                                                                      |     |
| An Update Operator for Strategic Ability . . . . .                                                        | 292 |
| <i>Paolo Turrini, Jan Broersen, Rosja Mastop, and John-Jules Meyer</i>                                    |     |
| Strategy Elimination in Games with Interaction Structures . . . . .                                       | 302 |
| <i>Andreas Witzel, Krzysztof R. Apt, and Jonathan A. Zvesper</i>                                          |     |
| <b>Posters</b>                                                                                            |     |
| The Logic of Knowledge-Based Cooperation in the Social Dilemma . . . .                                    | 316 |
| <i>Xiaohong Cui</i>                                                                                       |     |
| Getting Together: A Unified Perspective on Modal Logics for<br>Coalitional Interaction . . . . .          | 317 |
| <i>Cédric Dégremont and Lena Kurzen</i>                                                                   |     |
| Oppositional Logic . . . . .                                                                              | 319 |
| <i>Guoping Du, Hongguang Wang, and Jie Shen</i>                                                           |     |
| Deliberate Contrary-to-Law Action . . . . .                                                               | 320 |
| <i>Qing Jia</i>                                                                                           |     |

|                                                                                 |     |
|---------------------------------------------------------------------------------|-----|
| Mono-Agent Dynamics .....                                                       | 321 |
| <i>Sebastian Sequoiah-Grayson</i>                                               |     |
| Modal Expressivity and Definability over Sets .....                             | 323 |
| <i>Jing Shi</i>                                                                 |     |
| Dynamic Logics for Explicit and Implicit Information.....                       | 325 |
| <i>Fernando R. Velázquez-Quesada</i>                                            |     |
| Existence of Satisfied Alternative and the Occurring of<br>Morph-Dictator ..... | 327 |
| <i>Zhiyuan Wang</i>                                                             |     |
| <b>Author Index</b> .....                                                       | 329 |
