

CONTENTS

PART ONE: THEORY (MURRAY PESHKIN)

1. INTRODUCTION	3
2. WHAT IS THE AHARONOV-BOHM EFFECT?	4
3. CLASSICAL THEORY	7
4. QUANTUM THEORY	9
5. BOUND STATE AHARONOV-BOHM EFFECT	10
6. THE CENTRAL ROLE OF QUANTIZED ANGULAR MOMENTUM	13
7. SCATTERING STATE AB EFFECT	15
8. LOCALITY AND CAUSALITY	18
9. LESSONS FROM THE EXPERIMENT	21
APPENDIX A - ENERGY IN THE MAGNETIC FIELD	25
APPENDIX B - ELECTRIC AB EFFECT	27
APPENDIX C - TIME-DEPENDENT FLUX	29
APPENDIX D - EHRENFEST'S THEOREM	31
REFERENCES	33

PART TWO: EXPERIMENT (AKIRA TONOMURA)

1. INTRODUCTION	37
2. AHARONOV-BOHM EFFECT	39
2.1 Electric AB Effect	39
2.2 Magnetic AB Effect	41
2.3 Significance of AB Effect	44
3. EARLY EXPERIMENTS	46
3.1 Chambers Experiment	46
3.2 Möllenstedt and Bayh Experiment	48
4. CONTROVERSY CONCERNING AHARONOV-BOHM EFFECT	51
4.1 Early Discussions	51
4.2 Increased Significance of AB Effect	59
4.3 Controversy Since the Mid-1970s	64
5. RECENT EXPERIMENTS	101
5.1 Experiment Using Toroidal Magnet	101
5.2 Experiment Using Solenoid Covered with Glass Tube	117
5.3 Experiment to Test Possible Flux Quantization	118
5.4 Experiments Concerning Electrostatic AB Effect	120
5.5 Experiment Using Toroidal Magnet Covered with Superconductor	121
6. CONCLUSIONS	137
REFERENCES	139
APPENDIX	149
